## Title 21—Food and Drugs

## CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

## SUBCHAPTER B—FOOD AND FOOD PRODUCTS

## PART 121—FOOD ADDITIVES

## SUBPART F—FOOD ADDITIVES RESULTING FROM CONTACT WITH CONTAINERS OR EQUIPMENT AND FOOD ADDITIVES OTHERWISE AFFECTING FOOD

### Adhesives

The Commissioner of Food and Drugs, having evaluated the data in a petition (FAP 3B2878) filed by Hazleton Laboratories, Inc., 9200 Leesburg Turnpike, Vienna, Va. 22180, and other relevant material, concludes that the food additive regulations (21 CFR Part 121) should be amended, as set forth below, to provide for safe use of tri(nonylphenyl)phosphite-formaldehyde resins as a stabilizer in food-packaging adhesives.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2520(c)(5) is amended by alphabetically adding a new item to the list of substances as follows:

**§ 121.2520 Adhesives.**

* * * * * * *

(c) * * *
(5) * * *

| Components of Adhesives | Limitations |
|---|---|
| *Substances* | |
| * * * | * * * |
| Tri(nonylphenyl) phosphite-formaldehyde resins. | As identified in § 121.2562(c)(4)(iii). For use only as a stabilizer. |

* * * * * * *

Any person who will be adversely affected by the foregoing order may at any time on or before October 9, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6-86, 5600 Fishers Lane, Rockville, Md. 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

*Effective date.*—This order shall become effective September 7, 1973.

(Secs. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1).)

Dated August 30, 1973.

SAM D. FINE, *Associate Commissioner for Compliance.*

## SUBCHAPTER C—DRUGS

## PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

## PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

### Chloramphenicol

The Commissioner of Food and Drugs has evaluated new animal drug applications (65-364V and 65-365V) filed by John D. Copanos, Inc., 6110 Robinwood Road, Baltimore, Md. 21225, covering use of chloramphenicol for administration orally or by injection to dogs. The applications are approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 135b and 135c are amended as follows:

1. Part 135b is amended in § 135b.77 by revising paragraph (b) to read as follows:

**§ 135b.77 Chloramphenicol injection, veterinary.**

* * * * * * *

(b) *Sponsor.*—See code Nos. 054 and 076 in § 135.501(c) of this chapter.

* * * * * * *

2. Part 135c is amended in § 135c.99 by revising paragraph (b) to read as follows:

**§ 135c.99 Chloramphenicol oral solution, veterinary.**

* * * * * * *

(b) *Sponsor.*—See Code Nos. 054 and 076 in § 135.501(c) of this chapter.

* * * * * * *

*Effective date.*—This order shall be effective September 7, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i).)

Dated August 29, 1973.

FRED J. KINGMA, *Acting Director, Bureau of Veterinary Medicine.*

## Title 24—Housing and Urban Development

## CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

## SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-201]

## PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

### Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

**§ 1914.4 Status of participating communities.**

* * * * * * *

| State | County | Location | Map No. | State map repository | Local map repository | Effective date of authorization of sale of flood insurance for area |

[Docket No. FI-199]

## PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS

### List of Communities With Special Hazard Areas

The Federal Insurance Administrator finds that comment and public procedure and the use of delayed effective dates in identifying the areas of communities which have special flood or mudslide hazards, in accordance with 24 CFR Part 1915, would be contrary to the public interest. The purpose of such identifications is to guide new development away from areas threatened by flooding, a purpose which is accomplished pursuant to statute by denying subsidized flood insurance to structures thereafter built within such areas. The practice of issuing proposed identifications for comment or of delaying effective dates would tend to frustrate this purpose by permitting imprudent or unscrupulous builders to start construction within such hazardous areas before the official identification became final, thus increasing the communities' aggregate exposure to loss of life and property and the agency's financial exposure to flood losses, both of which are contrary to the statutory purposes of the program. Accordingly, the Department is not providing for public comment in issuing this amendment and it will become effective upon publication in the FEDERAL REGISTER.

Section 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

§ 1915.3 List of communities with special hazard areas.

## PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS

### List of Communities With Special Hazard Areas

The Federal Insurance Administrator finds that comment and public procedure and the use of delayed effective dates in identifying the areas of communities which have special flood or mudslide hazards, in accordance with 24 CFR Part 1915, would be contrary to the public interest. The purpose of such identifications is to guide new development away from areas threatened by flooding, a purpose which is accomplished pursuant to statute by denying subsidized flood insurance to structures thereafter built within such areas. The practice of issuing proposed identifications for comment or of delaying effective dates would tend to frustrate this purpose by permitting imprudent or unscrupulous builders to start construction within such hazardous areas before the official identification became final, thus increasing the communities' aggregate exposure to loss of life and property and the agency's financial exposure to flood losses, both of which are contrary to the statutory purposes of the program. Accordingly, the Department is not providing for public comment in issuing this amendment and it will become effective September 7, 1973.

Section 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

**§ 1915.3 List of communities with special hazard areas.**

## Title 29—Labor

## CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

## PART 1953—CHANGES TO STATE PLANS FOR THE DEVELOPMENT AND ENFORCEMENT OF STATE STANDARDS

On March 19, 1973, notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 7237) concerning proposed rules under section 18 of the Williams-Steiger Occupational Safety and Health Act of 1970 (29 U.S.C. 667) for procedures for the submission, approval, or rejection of changes to State plans for the development and enforcement of State standards.

Several issues were raised in the public comments received in response to these regulations dealing with the stringency of the requirements for the review of changes, the potential for delay, and the need to separate developmental steps from other types of changes in State plans. Other public comments viewed the regulations as too flexible, lacking in criteria for review of changes, and not permitting public participation in the review procedure except during the annual evaluation of the plan. These comments were reviewed keeping in mind that the Act provides for a Federal occupational safety and health program with participation by the States under very definite conditions. Because the State programs have just begun implementation under the requirements of the Act, it would be inappropriate at this time to reduce the opportunity for public input and review of changes to plans. The advisory opinion procedure, however, does provide for informal contact and review of planned changes by Federal and State offices prior to the formal review of the change. After a period of experience with the State programs and evaluation of their operations revisions to these regulations will be considered as appropriate.

After consideration of the relevant material which has been submitted by interested persons, the proposal is hereby adopted with some changes. The significant changes are: (1) Further delineation of the types of changes, the procedures for submission, and the criteria for public notice and review; (2) reservation of Subpart C on Federal program change supplements for later publication and public comment; and (3) deletion of references to procedures for withdrawal of plan approval and evaluation procedures pending issuance of separate regulations for these areas. The new Part 1953 shall be effective on September 7, 1973.

### Subpart A—General

**§ 1953.1 Purpose and scope.**

(a) This part applies to the provisions of section 18 of the Williams-Steiger Occupational Safety and Health Act of 1970 (hereinafter referred to as the Act) relating to State plans for the development and enforcement of State safety and health standards. The provisions of this part set forth the procedures by which the Assistant Secretary for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) under a delegation of authority from the Secretary of Labor (Secretary's Order 12–71, 36 FR 8754, May 12, 1971) will review changes in a State plan approved in accordance with section 18(c) of the Act and Part 1902 of this chapter, and also provide advisory opinions on proposed changes to be made by a State in implementing its plan.

(b) (1) States may submit plans covering any occupational safety and health issue with respect to which a Federal standard has been promulgated under section 6 of the Act. These plans must meet the criteria in section 18(c) of the Act and Part 1902 either at the time of submission or in any event not later than the three year period immediately following commencement of the plan's operation, where the plan is developmental.

(2) The Act provides for discretionary concurrent Federal and State authority during this three year developmental period and until the Assistant Secretary determines on the basis of actual operations that the State is applying the criteria of section 18 of the Act and Part

V 38-173 SEP 7 73 XUM

1902. During the period of concurrent Federal and State authority, as well as after a determination has been under section 18(e) that the plan is meeting the criteria of the Act and Part 1902, the State plan will be continually evaluated under section 18(f) of the Act as to the manner in which the provisions (including any assurances) are implemented.

(c)(1) In accordance with section 18(c) of the Act the Assistant Secretary is authorized to approve State plans and any modifications to these plans. In submitting plans the States have provided assurances that they will continue to meet the requirements in section 18(c) of the Act and 29 CFR Part 1902 during the time the States participate in the Federal program. Such assurances are a fundamental basis for approval of plans. (See 29 CFR 1902.3(c)(1), (d)(1)). This Part establishes procedures for review of those modifications (hereinafter referred to as changes) that are necessary to fulfill the State's assurances, the requirements of the Act, and 29 CFR Part 1902. Responsibility for review of changes is a separate function, but related to the exercise of concurrent authority under section 18(e) of the Act and continuing evaluation under section 18(f) of the Act.

(2) Changes to a plan can be separated into several categories. As the State plan is implemented, supplements will be required to meet developmental schedules approved as part of the plan. These developmental step supplements must be completed within three years after commencement of operations under the plan. The development of the Federal program and the continuing evaluation of the State programs will also require that changes be made in the plans. In addition there could be State initiated changes that would have an impact on the effectiveness of the State program.

(d) Because of the States' need to continue an on-going program, this Part also provides for advisory opinions to requesting States. These opinions, while not final decisions under the review procedures established in this Part will provide the States with a basis for operation pending formal review of a change supplement.

**§ 1953.2 General policies.**

(a) Approval of a plan submitted under section 18(b) of the Act is based on a finding that the State has or will have, an "at least as effective" program for the enforcement and setting of standards and will meet the criteria in § 1902.3 of the Chapter within a three year developmental period when all of the planned activities are performed. The State must also continue to apply the criteria in section 18(c) of the Act and 29 CFR Part 1902, as well as comply with the provisions of the plan and any assurances contained therein as long as the plan continues in operation. Supplements to the plan will be reviewed in the context of the entire plan as it moves through its developmental and operational stages.

(b) The regulations in this part will apply both before and after determinations have been made under section 18(e) of the Act and will be amended as necessary. Any interested person may file with the Assistant Secretary, Occupational Safety and Health Administration, U.S. Department of Labor, Washington, D.C. 20210, a written petition for revision, amendment or revocation of any of the provisions of this Part. The petition should include, or be accompanied by, the proposed rule desired and a statement of the reasons therefor and intended effect thereof.

(c) Upon reasonable notice to interested persons, the Assistant Secretary may in any particular proceeding prescribe additional or alternative procedures in order to expedite the review process or for any other good cause which may be consistent with the applicable laws.

(d) Advisory opinions are designed to facilitate implementation of changes in a State plan. In general these opinions will be given for proposed changes such as the adoption of regulations or standards prior to promulgation by the States and submission as a formal change.

(e) Copies of all supplements to a plan, all public comments thereon, and all advisory opinions shall be available for inspection and copying at the expense of the person requesting the copy at the locations specified in the Subpart of Part 1952 of this chapter relating to the State plan. The locations include the Office of Federal and State Operations, the Office of the Assistant Regional Director for the Occupational Safety and Health Administration (hereinafter referred to as the Assistant Regional Director) in whose Region the State is located, and an office or offices of the State which have been designated by the State for this purpose. The most current copy of a State plan will be located in the State and Regional office pending submission of the change supplements to the Assistant Secretary.

**§ 1953.3 Publication.**

Whenever a State is required under its law to publish notice of the subject matter of any change required by this Part prior to its adoption by the State, a republication by the State as in § 1902.11(a) of this Chapter will not be required. Where the subject matter of the change is not subject to public notice under State law, republication by the State as provided in § 1902.11(a) of this Chapter may be required unless the Assistant Secretary determines the change is minor. Such a minor change could include notice that the State had completed intermediate steps in the implementation of its Management Information System or its staff training program.

## Subpart B—Developmental Change Supplements

**§ 1953.10 Definitions.**

(a) Each State with a developmental plan must set forth in its plan those changes which are designed to make its program at least as effective as the Federal program and a timetable for making such changes in accordance with 29 CFR 1902.2(b). A developmental change includes the completion of these developmental steps as well as amendments required in response to failure to meet any steps in the developmental schedule.

(b) Developmental steps must be completed within the three year period immediately following commencement of operations. (See § 1902.2(b) of this chapter). The date of "commencement of operations" is ordinarily the plan approval date if the State initiates inspections and enforcement activity with respect to standards covered by the approved plan in accordance with the legal authority existing in the State at the time of approval. But in any case, commencement of operations can be no later than the effective date of the grant approved under section 23(g) of the Act. A State may also commence operations by initiating inspections and enforcement activity at some point after approval and prior to the effective date of the grant. Following approval, each State will submit a letter to the Assistant Regional Director setting the date for commencement operations. These letters will be included in the approved plans.

**§ 1953.11 Submission and consideration.**

(a) A supplement is required whenever a State completes a developmental step or fails to meet any developmental step. If a State fails to submit the required supplement when the developmental step was scheduled for completion, the Assistant Regional Director shall notify the State that a supplement is required and set a time period for submission of the supplement generally not to exceed 30 days.

(b)(1) An authorized representative of the State agency or agencies designated under section 18(c)(1) to administer the plan shall submit the supplement with 6 copies to the appropriate Assistant Regional Director for the Occupational Safety and Health Administration.

(2) When a developmental step is missed, the supplement should contain the change with related documentation on the impact of the change on the State plan as well as the following information: (i) An explanation of why the step was not completed; (ii) a new date for completion of the step; (iii) a revised developmental schedule showing specific actions the State proposes to take whenever the missed step would require a new timetable; and (iv) a demonstration that the current operating program is substantial enough to contribute to the protection of employees in the State through the enforcement of standards. Where appropriate, changes requiring legislative action will be supported as required in § 1902.2(b) of this chapter.

(c) Upon receipt of the supplement, the Assistant Regional Director shall make a preliminary review of the changes. If his examination reveals any defect in the supplement, the Assistant Regional Director shall offer assistance to the State and shall provide the agency an opportunity, generally not to exceed

30 days, to cure such defect. After the preliminary review and after affording the State such opportunity to cure defects, the Assistant Regional Director shall promptly submit the supplement to the Assistant Secretary.

(d)(1) Upon receipt of the supplement from the Assistant Regional Director, the Assistant Secretary shall examine the change and supporting material. If examination discloses no cause for rejecting the change, the procedure provided in § 1902.11 of this chapter for public comment and approval of State plans shall be followed.

(2) If examination discloses cause for rejecting the change, the Assistant Secretary shall provide the State a reasonable time, generally not to exceed 30 days, to submit to the Assistant Regional Director for review and submission to the Assistant Secretary a revised supplement, or to show cause why a proceeding should not be commenced either for rejection of the change or for failure to meet the developmental schedule, in accordance with the procedures in § 1902.17 of this chapter on rejection of State plans.

(e) The Assistant Secretary shall review a supplement in the context of the entire plan to see whether it meets the assurances provided in the plan for an "at least as effective" program and whether there is a reasonable exception that the plan will meet the requirements of the Act and the criteria in Part 1902 within the three year developmental period. The decision shall reflect the Assistant Secretary's determination as to whether the supplement meets these requirements.

(f) If a timely request is submitted by the State, a final decision on a developmental change supplement will, to the extent practicable, be made no later than 60 days after the close of the period for written public comment or a hearing, whichever is relevant, unless the Assistant Secretary determines that the change is minor. The Assistant Secretary may defer publication of minor changes until the end of each full year of operations under the plan. The deferral of publication would not be appropriate where the change under consideration included a failure to meet a developmental step.

## Subpart C—Federal Program Change Supplements [Reserved]

## Subpart D—Evaluation Change Supplements

**§ 1953.30 Definitions.**

An evaluation change would be required as a result of an evaluation finding by the Assistant Secretary. Special and periodic evaluations of a State program may show that some portion of a State plan has an adverse impact on the implementation of the State program. Examples of such evaluation findings would include a report that the public employee program as approved is not, in operation, providing for a program as effective as the standards in the approved plan; or that through a reduction in personnel or funding, the State may no longer have adequate resources for administration and enforcement of standards.

**§ 1953.31 Submission and consideration.**

(a) Within 30 days after an evaluation report has been made, the Assistant Regional Director shall advise the State of the evaluation findings that would require a supplement and the reasons therefor. The notification shall also contain a time period, generally not to exceed 30 days, for the submission of the supplement.

(b)(1) An authorized representative of the State agency or agencies designated under section 18(c)(1) to administer the plan shall submit the supplement with 6 copies to the appropriate Assistant Regional Director. The supplement shall contain the change as well as a timetable for completion of any change when necessary with related documentation on the impact of the change on the State plan and its responsiveness to the Federal evaluation report.

(2) The State may also show cause, in response to the request for an evaluation change supplement, why a supplement should not be required on the ground that the State program is meeting the requirements for an "at least as effective" program. The procedures in this Subpart would be applicable thereto.

(c) Upon receipt of the supplement, the Assistant Regional Director shall make a preliminary review of the change. If his examination reveals any defect in the supplement, the Assistant Regional Director shall offer assistance to the State and shall provide the agency with an opportunity, generally not to exceed 30 days, to cure such defect. After the preliminary review and after affording the State agency such opportunity to cure any defects, the Assistant Regional Director shall promptly submit the supplement to the Assistant Secretary.

(d)(1) Upon receipt of the supplement from the Assistant Regional Director, the Assistant Secretary shall examine the change and supporting material. If his examination discloses no cause for rejecting the change the procedures provided in § 1902.11 of this chapter for public comment and approval of State plans shall be followed.

(2) If examination discloses cause for rejecting the change, the Assistant Secretary shall provide the State a reasonable time, generally not to exceed 30 days, to submit to the Assistant Regional Director for review and submission to the Assistant Secretary a revised supplement, or to show cause why a proceeding should not be commenced for rejection of the change or for failure to submit a change, in accordance with the procedures in § 1902.17 of this chapter on rejection of State plans.

(e) The Assistant Secretary shall review the supplement in the context of the entire plan to see whether it meets the objections set out in the evaluation report as well as the requirements for an "at least as effective" State program. The decision shall reflect the Assistant Secretary's determination as to whether the supplement meets those requirements.

## Subpart E—State Initiated Change Supplements

**§ 1953.40 Definitions.**

A State initiated change would be any change to the State plan other than those defined in Subparts B, C, and D of this Part. Examples of State initiated changes include actions which would effect Federal funding under section 23(g) of the Act such as an increase or decrease in personnel, or coverage of additional issues under the plan; and also legislative, regulatory or administrative policy changes which impact on the effectiveness of the State program including a reassignment of enforcement personnel or legislation restricting coverage under the plan. Such policy changes would not ordinarily include court cases or administrative decisions in individual cases except as they are reflected in State legislative, regulatory, or administrative policy changes.

**§ 1953.41 Submission and consideration.**

(a) A State initiated change supplement is required whenever the State takes with regard to its plan an action not otherwise covered by this Part that would impact on the effectiveness of the State program. The State shall notify the Assistant Regional Director of the change and submit the required supplement within 30 days after notifying the Assistant Regional Director if the change involves legislative amendments or affects Federal funding under section 23(g) of the Act. Other State initiated changes may be submitted at any time generally not to exceed 6 months after the change occurred. If the State fails to notify the Assistant Regional Director of the change or fails to submit the required supplement within 30 days after notification, the Assistant Regional Director shall notify the State that a supplement is required and set a time period for submission of the supplement generally not to exceed 15 days.

(b)(1) An authorized representative of the State agency or agencies designated under section 18(c)(1) to administer the plan shall submit the supplement with 6 copies to the appropriate Assistant Regional Director. The supplement shall contain the change with related documentation on the impact of the change on the State plan.

(2) The State may also show cause why a supplement should not be required on the grounds that it does not impact on the effectiveness of the State program and that additional Federal funding is not required. The procedures in this Subpart would be applicable thereto.

(c) Upon receipt of the supplement, the Assistant Regional Director shall make a preliminary review of the change. If his examination reveals any defect in the supplement, the Assistant Regional Director shall offer assistance to the State and shall provide the agency with an opportunity, generally not to exceed

V 38 173 SEP 7 73 XUM

30 days, to cure such defect. After the preliminary review and after affording the State such opportunity to cure defects, the Assistant Regional Director shall promptly submit the supplement to the Assistant Secretary.

(d) (1) Upon receipt of the supplement from the Assistant Regional Director, the Assistant Secretary shall examine the change and any supporting material. If examination discloses no cause for rejecting the change, the procedure in § 1902.11 of this chapter for public comment and approval of State plans shall be followed.

(2) If examination discloses cause for rejecting the change, the Assistant Secretary shall provide the State a reasonable time, generally not to exceed 30 days, to submit to the Assistant Regional Director for review and submission to the Assistant Secretary a revised supplement, or to show cause why a proceeding should not be commenced either for rejection of the change or for failure to submit the change, in accordance with the procedures in § 1902.17 of this Chapter on rejection of state plans.

(e) The Assistant Secretary shall review the supplement in the context of the entire plan to determine its impact on the "at least as effective as" status of the plan. The decision shall reflect the Assistant Secretary's determination as to whether the change meets that requirement.

### Subpart F—Advisory Opinions

**§ 1953.50 Definitions.**

(a) An authorized representative of a State agency or agencies designated under section 18(c)(1) to administer a plan may request an advisory opinion from the Assistant Regional Director. These opinions are designed to provide the State with a basis for implementing a change. For example, prior to publication of standards, the State may want a preliminary opinion that the standards are at least as effective as the Federal standards standards or that a regulation that will be proposed for public comment in the State appears to meet the requirements of section 18 of the Act and Part 1902.

(b) A request for an advisory opinion ordinarily will be considered inappropriate when extensive investigation or evaluation would be necessary. A requesting State will be informed if the same or substantially similar course of action is under review for an advisory opinion in another State or if it has been the subject of a current evaluation, approval, or disapproval proceeding by the Assistant Secretary.

**§ 1953.51 Submission and consideration.**

(a) The request for advice should be submitted in writing to the Assistant Regional Director in whose Region the State is located and should include full and complete information regarding the proposed course of action. Conferences with members of the Regional and National office staff may be held before and after submittal of the request and submission of additional information may be required.

(b) (1) On the basis of the facts submitted, as well as other information available to him, including information from interested persons where relevant, the Assistant Regional Director, after appropriate consultation with the Office of Federal and State Operations and the Office of the Solicitor will provide an advisory opinion to the State and may take such oother action as may be appropriate.

(2) Because of the possibility that the subject matter of an advisory opinion may change during promulgation by the State as a final change, and in order to provide for public comment on the final change, these opinions cannot bind the Assistant Secretary in making his final decision following the procedures specified in the appropriate subparts of this part. If the Assistant Secretary decides to revoke or rescind the advisory opinion, notice of such recission or revocation will be given to the requesting State so that it may discontinue the course of action taken. The Assistant Secretary will not proceed against the requesting State with respect to any action taken in good faith reliance upon the advice given under this Subpart, where all relevant facts are fully, completely, and accurately presented and where such action was promptly discontinued upon notification by the Assistant Secretary.

(c) When a State has obtained an advisory opinion under this Part, the formal change supplement submitted under the applicable Subpart of this Part shall specify in what areas, if any, it differs from the material submitted for an advisory opinion.

(d) No later than 15 days after the State has been sent the requested advice, the advisory opinion, and any supplementary information will be placed with the requesting State's plan at the location specified in the Subpart of Part 1952 of this chapter relating to the State plan.

Signed at Washington, D.C., this 4th day of September 1973.

JOHN STENDER,
*Assistant Secretary of Labor.*

[FR Doc.73-19071 Filed 9-6-73;8:45 am]

**Title 38—Pensions, Bonuses, and Veterans' Relief**

**CHAPTER I—VETERANS ADMINISTRATION**

**SECURITY, LAW ENFORCEMENT, AND STANDARDS OF CONDUCT ON VETERANS ADMINISTRATION PROPERTY**

The enactment of the National Cemeteries Act of 1973 (Public Law 93-43, 87 Stat. 75) on June 18, 1973, provides the Administrator of Veterans' Affairs with the authority to make all needful rules and regulations for the governing of the property under his charge and control, and to annex to such rules and regulations reasonable penalties for infractions thereof, within the limitations of a maximum fine of $50, or 30 days imprisonment, or both, to ensure their enforcement. The purpose of this authority is to provide for the maintenance of law and order and the protection of persons and property on lands and in buildings (including cemeteries) which are under the jurisdiction of the Veterans Administration (and not under the charge and control of the General Services Administration). As it is necessary to the orderly functioning of Veterans Administration facilities and the protection of the general public that there immediately be such law enforcement authority, it is found impracticable and contrary to the public interest to give preliminary notice and to postpone the effective date of these rules and regulations until 30 days after publication. Therefore, pursuant to this authority, Veterans Administration rules and regulations governing security, law enforcement, and standards of conduct on Veterans Administration property, as set forth below, are hereby adopted.

### PART 1—GENERAL PROVISIONS

1. In Part 1, a centerhead and §§ 1.218, 1.219, and 1.220 are added to read as follows:

SECURITY, LAW ENFORCEMENT, AND STANDARDS OF CONDUCT ON VETERANS ADMINISTRATION PROPERTY

**§ 1.218 Authority, applicability, and responsibility.**

Pursuant to 38 U.S.C. 218, the following rules and regulations apply at all property under the charge and control of the Veterans Administration (and not under the charge and control of the General Services Administration) and to all persons entering in or on such property. The head of the facility is charged with the responsibility for the enforcement of these rules and regulations, and he shall cause these rules and regulations to be posted in a conspicuous place on the property.

(a) *Closing property to public.*—The head of the facility, or his designee, shall establish visiting hours for the convenience of the public and shall establish specific hours for the transaction of business with the public. The property shall be closed to the public during other than the hours so established. In emergency situations, the property shall be closed to the public when reasonably necessary to ensure the orderly conduct of Government business. The decision to close a property during an emergency shall be made by the head of the facility or his designee. The head of the facility or his designee shall have authority to designate areas within a facility as closed to the public.

(b) *Recording presence.*—Admission to property during periods when such property is closed to the public will be limited to persons authorized by the head of the facility or his designee. Such persons may be required to sign a register and/or display identification documents when requested to do so by the hospital police, or other authorized individual. No person, without authorization, shall enter upon or remain on such property while the property is closed. Failure to leave such premises by unauthorized persons shall constitute an offense under this paragraph.

(c) *Preservation of property.*—The improper disposal of rubbish on property; the spitting on property; the creation of any hazard on property to persons or things; the throwing of articles of any kind from a building; the climbing upon the roof or any part of the building, without permission; or the willful destruction, damage, or removal of Government property or any part thereof, without authorization, is prohibited. The destruction, mutilation, defacement, injury, or removal of any monument, gravestone, or other structure within the limits of any national cemetery is prohibited.

(d) *Conformity with signs and emergency directions.*—The head of the facility, or his designee, shall have authority to post signs of a prohibitory and directory nature. Persons, in and on property, shall comply with such signs of a prohibitory or directory nature, and during emergencies, with the direction of police authorities and other authorized officials. Tampering with, destruction, marring, or removal of such posted signs is prohibited.

(e) *Disturbances.*—Conduct on property which creates loud or unusual noise; which unreasonably obstructs the usual use of entrances, foyers, lobbies, corridors, offices, elevators, stairways, or parking lots; which otherwise impedes or disrupts the performance of official duties by Government employees; which prevents one from obtaining medical or other services provided on the property in a timely manner; or the use of loud, abusive, or otherwise improper language; or unwarranted loitering, sleeping, or assembly is prohibited. In addition to measures designed to secure voluntary terminations of violations of this paragraph the head of the facility or his designee may cause the issuance of orders for persons who are creating a disturbance to depart the property. Failure to leave the premises when so ordered constitutes a further disturbance within the meaning of this rule, and the offender is subject to arrest and removal from the premises.

(f) *Gambling.*—Participating in games for money or other personal property, or the operating of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of numbers tickets, in or on property is prohibited.

(g) *Alcoholic beverages and narcotics.*—Operating a motor vehicle on property by a person under the influence of alcoholic beverages, narcotic drugs, hallucinogens, marijuana, barbiturates, or amphetamines is prohibited. Entering property under the influence of any narcotic drug, hallucinogen, marijuana, barbiturate, amphetamine, or alcoholic beverage (unless prescribed by a physician) is prohibited. The use on property of any narcotic drug, hallucinogen, marijuana, barbiturate, or amphetamine (unless prescribed by a physician) is prohibited. The introduction or possession of alcoholic beverages or any narcotic drug, hallucinogen, marijuana, barbiturate, and amphetamine on property is prohibited, except for liquor or drugs prescribed for use by medical authority for medical purposes. Provided such possession is consistent with the laws of the State in which a facility is located, liquor may be used and maintained in quarters assigned to employees as their normal abode, and away from the abode with the written consent of the head of the facility which specifies a special occasion for use and limits the area and period for the authorized use.

(h) *Soliciting, vending, and debt collection.*—Soliciting alms and contributions commercial soliciting and vending of all kinds, displaying or distributing commercial advertising, or collecting private debts in or on property is prohibited. This rule does not apply to (1) national or local drives for funds for welfare, health, or other purposes as authorized by the "Manual on Fund Raising Within the Federal Service" issued by the Civil Service Commission under Executive Order 10927 of March 18, 1961 (26 FR 2383; 3 CFR, 1959–1963 Comp.), (2) concessions or personal notices posted by employees on authorized bulletin boards, and (3) solicitation of labor organization membership or dues under Executive Order 11491 of October 29, 1969, as amended (3 CFR Ch. IV).

(i) *Distribution of handbills.*—The distributing of materials such as pamphlets, handbills, and/or flyers, and the displaying of placards or posting of materials on bulletin boards or elsewhere on property is prohibited, except as authorized by the head of the facility or his designee or when such distributions or displays are conducted as part of authorized Government activities.

(j) *Photographs for news, advertising, or commercial purposes.*—Photographs for advertising or commercial purposes may be taken only with the written consent of the head of the facility or his designee. Photographs for news purposes may be taken at entrances, lobbies, foyers, or in other places designated by the head of the facility or his designee.

NOTE.—For Veterans Administration policy with respect to photographing patients and activities on Veterans Administration property see MP-1, Part I, paragraph 410.08. Available at any Veterans Administration station.

(k) *Dogs and other animals.*—Dogs and other animals, except seeing-eye dogs, shall not be brought upon property except as authorized by the head of the facility or his designee.

(l) *Vehicular and pedestrian traffic.*—Drivers of all vehicles in or on property shall drive in a careful and safe manner at all times and shall comply with the signals and directions of police and all posted traffic signs. The blocking of entrances, driveways, walks, loading platforms, or fire hydrants in or on property is prohibited; parking in unauthorized locations or in locations reserved for other persons or contrary to the direction of posted signs is prohibited. Creating excessive noise on hospital or cemetery premises by muffler cut out, the excessive use of a horn, or other means is prohibited. Operation of a vehicle in a reckless or unsafe manner, drag racing, bumping, overriding curbs, or leaving the roadway is prohibited.

(m) *Weapons and explosives.*—No person while on property shall carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, except for official purposes.

(n) *Demonstrations.*—(1) All visitors are expected to observe proper standards of decorum and decency while on Veterans Administration property. Toward this end, any service, ceremony, or demonstration, except as authorized by the head of the facility or his designee, is prohibited.

(2) For the purpose of the prohibition expressed in this paragraph, unauthorized demonstrations or services shall be defined as, but not limited to, picketing, or similar conduct on Veterans Administration property; any oration or similar conduct to assembled groups of people, unless the oration is part of an authorized service; the display of any placards, banners, or foreign flags on Veterans Administration property unless approved by the head of the facility or his designee; disorderly conduct such as fighting, threatening, violent, or tumultuous behavior, unreasonable noise or coarse utterance, gesture or display or the use of abusive language to any person, present; and partisan activities which may be described as commentary or actions in support of, or in opposition to, or attempting to influence, any current policy of the Government of the United States, or any private group, association, or enterprise.

(o) *Key security.*—The head of the facility or his designee, will determine which employees, by virtue of their duties, shall have access to keys or barrier-card keys which operate locks to rooms or areas on the property. The unauthorized possession, manufacture, and/or use of such keys or barrier cards is prohibited. The surreptitious opening or attempted opening of locks or card-operated barrier mechanisms is prohibited.

(p) *Sexual misconduct.*—Any act of sexual gratification on Veterans Administration property involving two or more persons, who do not reside in quarters on the property, is prohibited. Acts of prostitution or solicitation for acts of prostitution on Veterans Administration property is prohibited. For the purposes of this paragraph, an act of prostitution is defined as the performance or the offer or agreement to perform any sexual act for money or payment.

**§ 1.219 Offenses and penalties.**

(a) *Penalty limitations.*—Conduct in violation of the rules and regulations set forth in § 1.218 subjects an offender to arrest and removal from the premises. Whoever shall be found guilty of violating these rules and regulations while on any property under the charge and control of the Veterans Administration is subject to a fine as set forth in the schedule in paragraph (b) of this section or, if appropriate, the payment of fixed sum in lieu of appearance (forfeiture of collateral) as may be provided for in

V 38-173
SEP 7 73
XUM

rules of the United States District Court. Violations of § 1.218 not included in the schedule of offenses and penalties subjects an offender to a fine of not more than $50, or imprisonment of not more than 30 days, or both.

(b) *Schedule of offenses and penalties.*—An offender who violates any of the offenses listed in this paragraph may also be imprisoned for not more than 30 days.

| | |
|---|---|
| (1) Improper disposal of rubbish on property | $40 |
| (2) Spitting on property | 5 |
| (3) Throwing of articles from a building or the unauthorized climbing upon any part of a building | 5 |
| (4) Willful destruction, damage, or removal of Government property without authorization | 50 |
| (5) Defacement, destruction, mutilation or injury to, or removal, or disturbance of, gravemarker or headstone | 50 |
| (6) Failure to comply with signs of a directive and restrictive nature posted for safety purposes | 10 |
| (7) Tampering with, removal, marring, or destruction of posted signs | 10 |
| (8) Entry into areas posted as closed to the public or others (trespass) | 10 |
| (9) Unauthorized demonstration or service in a national cemetery or on other Veterans Administration property | 50 |
| (10) Creating a disturbance during a burial ceremony | 25 |
| (11) Disorderly conduct which creates loud, boisterous, and unusual noise, or which obstructs the normal use of entrances, exits, foyers, offices, corridors, elevators, and stairways, or which tends to impede or prevent the normal operation of a service or operation of the facility | 25 |
| (12) Failure to depart premises by unauthorized persons | 5 |
| (13) Unauthorized loitering, sleeping or assembly on property | 5 |
| (14) Gambling — participating, in games of chance for monetary gain or personal property; the operation of gambling devices, a pool or lottery; or the taking or giving of bets | 40 |

| (16) Entering premises under the influence of alcoholic beverages or nonprescribed narcotic drugs, hallucinogens, marijuana, barbiturates or amphetamines | 50 |
| (17) Unauthorized use on property of alcoholic beverages or narcotic drugs, hallucinogens, marijuana, barbiturates, or amphetamines | 50 |
| (18) Unauthorized introduction on Veterans Administration controlled property of alcoholic beverages or narcotic drugs, hallucinogens, marijuana, barbiturates, or amphetamines or the unauthorized giving of same to a patient or beneficiary | 50 |
| (19) Unauthorized solicitation of alms and contributions on premises | 5 |
| (20) Commercial soliciting or vending, or the collection of private debts on property | 5 |
| (21) Distribution of pamphlets, handbills, and flyers | 5 |
| (22) Display of placards or posting of material on property | 5 |
| (23) Unauthorized photography on premises | 10 |
| (24) Failure to comply with traffic directions of hospital police | 15 |
| (25) Parking in spaces posted as reserved for physically disabled persons | 25 |
| (26) Parking in no-parking areas, lanes, or crosswalks so posted or marked by yellow borders or yellow stripes | 10 |
| (27) Parking in emergency vehicle spaces, areas and lanes bordered in red or posted as EMERGENCY VEHICLES ONLY or FIRE LANE, or parking within 15 feet of a fire hydrant | 25 |
| (28) Parking within an intersection or blocking a posted vehicle entrance or posted exit lane | 10 |
| (29) Parking in spaces posted as reserved or in excess of a posted time limit | 5 |
| (30) Failing to come to a complete stop at a STOP sign | 20 |
| (31) Failing to yield to a pedestrian in a marked and posted crosswalk | 15 |
| (32) Driving in the wrong direction on a posted one-way street | 10 |
| (33) Operation of a vehicle in a reckless or unsafe manner, drag racing, overriding curbs, or leaving the roadway | 35 |
| (34) Exceeding posted speed limits | 20 |
| (35) Creating excessive noise in a hospital or cemetery zone by muffler cut out, excessive use of a horn, or other means | 5 |
| (36) Failure to yield right of way to other vehicles | 15 |
| (37) Possession of firearms, carried either openly or concealed, whether loaded or unloaded (except by Federal or State law enforcement officers on official business) | 50 |
| (38) Introduction or possession of explosives, or explosive devices which fire a projectile, ammunition, or combustibles | 50 |
| (39) Knives which exceed a blade length of 3 inches: switchblade knives; any of the variety of hatchets, clubs, and hand-held weapons; and brass knuckles | 25 |
| (40) The unauthorized possession of any of the variety of incapacitating liquid or gas-emitting weapons | 25 |
| (41) Unauthorized possession, manufacture, or use of keys or barrier card-type keys to rooms or areas on the property | 35 |
| (42) The surreptitious opening, or attempted opening, of locks or card-operated barrier mechanisms on property | 50 |
| (43) Soliciting for, or the act of, prostitution | 50 |
| (44) Any unlawful sexual activity | 40 |

**§ 1.220 Enforcement and other laws.**

(a) Facility Veterans Administration police and investigators found qualified and duly appointed by heads of facilities to act as special investigators for the purposes of 38 U.S.C. 218(a)(3), will enforce §§ 1.218 and 1.219 and other Federal laws on Veterans Administration property in accordance with operating procedures issued by respective Veterans Administration Department Directors and under the direction of the head of the facility.

(b) Nothing contained in Veterans Administration rules and regulations set forth in §§ 1.218 and 1.219 shall be construed to abrogate any other Federal laws or regulations or any State and local laws and regulations applicable to the area in which the Veterans Administration property is situated.

## PART 2—DELEGATION OF AUTHORITY

2. In Part 2, § 2.6(a)(8) is amended to read as follows:

**§ 2.6 Administrator's delegations of authority to certain officials (38 U.S.C. 212(a)).**

Employees occupying or acting in the positions designated in this section are delegated authority as indicated:

(a) *Department of Medicine and Surgery.*—The Chief Medical Director is delegated authority:

* * * * * *

(8) To authorize Directors of Veterans Administration property and facilities under the charge and control of the Veterans Administration to appoint special policemen (hospital police) who shall act as special investigators with the power to enforce Federal laws and Veterans Administration rules and regulations, and to arrest for crimes committed on Veterans Administration property.

* * * * * *

## PART 17—MEDICAL

3. In Part 17, § 17.66 is revised to read as follows:

**§ 17.66 Authority for disciplinary action.**

The good conduct of beneficiaries receiving hospitalization for observation and examination or for treatment, or receiving domiciliary or nursing home care in facilities under direct and exclusive jurisdiction of the Veterans Administration, will be maintained by corrective and disciplinary procedure formulated by the Veterans Administration. Such corrective and disciplinary measures, to be selectively applied in keeping with the comparative gravity of the particular offense, will consist, in respect to hospital patients, of such penalties as the withholding for a determined period of pass privileges, exclusion from entertainments, or disciplinary discharge; and, in respect to domiciled members, such penalties as confinement to sections or grounds, deprivation of privileges, enforced furlough, or disciplinary discharge. Also, for any violation of the Veterans Administration rules set forth in § 1.218, or other Federal laws on Veterans Administration property, a beneficiary is subject to the penalty prescribed for the offense.

**§ 17.66 [Amended]**

4. Immediately following § 17.66, the centerhead is changed to read "Ceremonies".

**§ 17.70 [Revoked]**

5. Section 17.70, Conduct on Veterans Administration hospital and center reservations, is revoked.

These VA Regulations are effective August 22, 1973.

Approved August 22, 1973.

By direction of the Administrator.

[SEAL] RICHARD L. ROUDEBUSH,
*Assistant Deputy Administrator.*

## Title 47—Telecommunications

## CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 73-890; Docket No. 18179]

## PART 73—RADIO BROADCAST SERVICES

### Memorandum Opinion and Order Granting Stay of Rule on Territorial Exclusivity in Non-Network Program Arrangements

In the matter of amendment of Part 73 of the Commission's rules with respect to the availability of television programs produced by non-network suppliers to commercial television stations and CATV systems.

1. The Commission has before it for consideration, the "Request for Stay" filed on August 16, 1973, by the Association of Maximum Service Telecasters (AMST) wherein it is requested that the Commission stay the effective date (September 7, 1973) of the First Report and Order (FCC 73-806, 38 FR 21265) in this proceeding pending action on its petition for reconsideration. Rust Craft Broadcasting filed a similar "Request for Stay" on August 23, 1973. Statements in support of the AMST Request for Stay were filed by the National Association of Broadcasters (NAB); Kelly Broadcasting Company (KCRA-TV, Sacramento, California); Kansas State Network (KARD-TV, Wichita, Kansas); and McGraw-Hill Broadcasting Company, Inc. (WRTV, Indianapolis, Indiana). Another pleading entitled "Comments of Kaiser Broadcasting Corporation on Request for Stay" was filed on August 23, 1973. All the foregoing parties state that they will file timely petitions for reconsideration.[1]

2. The First Report and Order adopted the new rule (§ 73.658(m) of the rules) concerning territorial exclusivity in nonnetwork program arrangements which reads as follows:

**§ 73.658 Affiliation agreements and network program practices; territorial exclusivity in non-network program arrangements.**

* * * * * *

(m) *Territorial exclusivity in non-network arrangements.* No television station shall enter into any contract, arrangement or understanding, express or implied, with a nonnetwork program producer, distributor, or supplier, or other person which prevents or hinders another television station located in a community over 25 miles away, as determined by the reference points contained in § 76.53 of this chapter, from broadcasting any program purchased by the former station from such nonnetwork program producer, distributor, or supplier, or other person. As used in this subsection, the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

NOTE.—Contracts, arrangements, or understandings that are complete under the practices of the industry prior to August 7, 1973, will not be disturbed. Extensions or renewals of such agreements are not permitted because they would in effect be new agreements without competitive bidding. However, such agreements that were based on the broadcaster's advancing "seed money" for the production of a specific program or series that specify two time periods—a tryout period and a period thereafter for general exhibition—may be extended or renewed as contemplated in the basic agreement.

Thus, territorial exclusivity in television nonnetwork program arrangements is limited to 25 miles from the reference point (set forth in the rule) of the community of license of a television station.

3. AMST contends that the primary effect of the rule, rather than just making programs available for "overshadowed" cities, would be to prevent television "stations in at least 35 of the top 100 markets from obtaining exclusive rights against direct competitors in their very own markets." AMST is referring to the multicity markets, whether the market is hyphenated or nonhyphenated, and states that such markets have been consistently treated as a single market by the marketplace, the networks, the rating services, the stations themselves and the Commission. AMST contends that the stations in these 35 or more markets are not overshadowed stations, but rather are direct competitors, that the rule would encourage program duplication, and that the effect of the rule is not consistent with the Commission's explicit recognition that exclusivity serves the public interest. AMST states that this general rule is not necessary to achieve the Commission's objective to assist stations in overshadowed markets in their attempt to secure nonnetwork programming.

4. AMST also contends that the Commission's action will radically reduce exclusivity that television stations now have against cable television retransmission which was provided in the 1972 cable rules adopted in Docket No. 18397. The specific rule referred to by AMST is § 76.153(c) of the Rules which provides that a station licensed to one city in a hyphenated market cannot obtain exclusivity against cable retransmission within the 35 mile zone (with certain exceptions) of any other designated community in the market unless it has secured over-the-air exclusivity against the stations licensed to the other community. It is contended that the parties did not have notice and opportunity to comment on this cable aspect of the proceeding because the last date for filing comments on the territorial exclusivity portion of this proceeding was March 10, 1969.

5. AMST states that it has standing to file this petition for reconsideration because it participated in the "time" exclusivity portion of this proceeding, and also participated extensively in the cable proceeding (Docket No. 18397). It is claimed that if the effective date of the rule is not stayed pending action on its petition for reconsideration, irreparable injury will be caused to television stations because contracts entered into between August 7, 1973, and the date on which the petitions for reconsideration are disposed of will be subject to the new rule even if the rule is modified on reconsideration. AMST points out that if a stay is granted, any contracts finalized during that period that specified territorial exclusivity greater than that permitted by the new rule could be made subject to all provisions of that rule (including the provision concerning the August 7 date) if the Commission does not modify that rule on reconsideration, and that should parties negotiate contracts specifying exclusivity in excess of 25 miles, they would do so with the knowledge that any exclusivity exceeding 25 miles would have to be reduced. Thus AMST urges that the Commission should, at the very least, stay the rule as it affects the multicity markets, and states that the Commission could tailor the stay so that its effect would not be applicable to the "overshadowed" markets.

6. Rust Craft, a licensee of both VHF and UHF stations, bases its request on the contention that the rule will hinder the development of all-channel television broadcasting as well as reduce exclusivity now permitted under the cable rules.

7. The NAB, Kelly, KSN, and McGraw-Hill statements are in full support of the AMST request for stay. Kelly, KSN and McGraw-Hill point out the specific problems concerning their own respective multicity markets both as to over-the-air exclusivity and cable retransmission. Kaiser, a multiple UHF licensee, agrees with AMST's request that a stay should be granted, but objects to the AMST suggestion that the Commission could, if it grants the stay, except the "overshadowed" markets from the effect of the stay, because an exception as to "overshadowed" cities would discriminate against stations in a select few markets that are within 25 miles of the "overshadowed" markets.

8. While we are of the opinion that the parties could, by contract, adequately protect themselves from irreparable injury should the rule be modified on reconsideration, we believe the best course of action is to order a general stay of the rule for approximately sixty days to enable us to fully consider the material that the parties state they will submit on the multi-city market question (both as to over-the-air exclusivity and exclusivity against cable retransmission), and thereafter take whatever action, if any, is appropriate. It is true that the 1972 cable rules (Docket 18397) were adopted after the comments were filed in the territorial portion of this proceeding. So that as little disruption as possible of negotiations of contracts will oc-

[1] On August 27, 1973, the Corinthian Stations et al. filed a statement in support of the AMST request for stay, and Broadcast-Plaza, Inc. (WTIC-TV, Hartford, Connecticut) filed a separate request for stay on August 28, 1973.

V38-173 SEP 7 73 XUM

cur, should the rule be modified in any respect, we shall grant a stay of the effective date of the rule until November 12, 1973. Of course, should the rule not be modified, all contracts finalized on or after August 7, 1973, will be subject to the rule as adopted on July 26, 1973.

9. In view of the foregoing, the requests for stay are Granted to the extent indicated above; and the effective date of § 73.658(m) of the Commission's rules is Stayed until November 12, 1973.

Adopted: August 29, 1973.

Released: August 29, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
*Acting Secretary.*

## PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

### Frequencies and Conditions of Use

Order.—In the matters of Editorial amendments to § 83.351 of the Commission's rules and regulations.

1. In 1971, Dockets 18682 and 19076 were adopted which, among other things, amended § 83.351 of the Commission's rules and regulations. By this Order, it is intended merely to editorially correct, update, and place in proper numerical order the frequencies and conditions of use appearing therein. Additionally, correct frequency parameters are specified through the addition of a category heading.

2. Authority for these amendments appear in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and in § 0.231(d) of the Commission's rules and regulations. Since the amendments are editorial in nature as specified above, the prior notice, procedure and effective date provisions of 5 U.S.C. 553, are not applicable.

3. In view of the above, it is ordered, That the rule amendments set forth below are adopted effective September 7, 1973.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082, (47 U.S.C. 154, 303).)

Adopted August 27, 1973.

Released August 28, 1973.

[SEAL] JOHN M. TORPET,
*Executive Director.*

Part 83 of Title 47 of Chapter I of the Code of Federal Regulations is amended as follows:

In § 83.351(a) the Table is amended by deleting and adding certain frequencies and conditions of use; and in paragraph (b), footnote (6) is deleted and designated [Reserve], footnote (24) is amended and footnotes (34), (36), and (58) are deleted and designated [Reserved] to read as follows:

[1] Commissioners Johnson and Reid absent.

## Title 49—Transportation

## CHAPTER X—INTERSTATE COMMERCE COMMISSION

### SUBCHAPTER A—GENERAL RULES AND REGULATIONS

## PART 1048—COMMERCIAL ZONES

[No. MC-C-258 (Sub-No. 3)]

### Kansas City, Mo.-Kansas City, Kans. Commercial Zone

At a session of the Interstate Commerce Commission, Review Board Number 2, held at its office in Washington, D.C., on the 1st day of June 1973.

It appearing, that on August 28, 1970, Review Board Number 3 entered its report and order, 112 M.C.C. 103, in this proceeding specifically defining the zone adjacent to and commercially a part of Kansas City, Mo.-Kansas City, Kans.;

It further appearing, that by joint petition filed March 5, 1973, the Blue Springs Chamber of Commerce and Blue Springs Industry, Inc., seek redefinition and extension in certain respects of the Kansas City, Mo.-Kansas City, Kans., commercial zone limits;

And it further appearing, that investigation of the matters and things involved in said petition having been made, and said board having made and filed a report herein containing its findings of fact and conclusions thereon, which report is hereby made a part hereof;

It is ordered, That § 1048.8 as prescribed in this proceeding on August 28, 1970 (49 CFR 1048.8), be, and it is hereby, vacated and set aside, and the revision set forth below is hereby substituted in lieu thereof. (49 Stat. 543, as amended 544, as amended 546, as amended, 49 U.S.C. 302, 303, and 304.)

*It is further ordered*, That this order shall become effective on August 1, 1973, and shall continue in effect until further order of the Commission.

*And it is further ordered*, That notice of this order shall be given to the general public by depositing a copy thereof in the office of the secretary of the Commission by filing a copy thereof with the Director, Office of the Federal Register.

By the Commission, Review Board Number 2.

[SEAL] JOSEPH M. HARRINGTON,
*Acting Secretary.*

**§ 1048.8 Kansas City, Mo.-Kansas City, Kans.**

The zone adjacent to and commercially a part of Kansas City, Mo.-Kansas City, Kans., within which transportation by motor vehicle, in interstate or foreign commerce, not under a common control, management, or arrangement for a continuous carriage to or from a point beyond the zone is partially exempt from regulation under section 203(b)(8) of the Interstate Commerce Act (49 U.S.C. 303(b)(8)), includes and is comprised of all points in the area bounded by a line as follows:

Beginning on the north side of the Missouri River at the western boundary line of Parkville, Mo., thence along the western and northern boundaries of Parkville to the Kansas City, Mo., corporate limits, thence along the western, northern, and eastern corporate limits of Kansas City, Mo., to its junction with U.S. Bypass 71 (near Liberty, Mo.), thence along U.S. Bypass 71 to Liberty, thence along the northern and eastern boundaries of Liberty to its junction with U.S. Bypass 71 south to Liberty, thence south along U.S. Bypass 71 to its junction with the Independence, Mo., corporate limits, thence along the eastern Independence, Mo., corporate limits to its junction with Interstate Highway 70, thence along Interstate Highway 70 to its junction with the Blue Springs, Mo., corporate limits, the ice along the western, northern, and eastern corporate limits of Blue Springs, Mo., to its junction with U.S. Highway 40, thence east along U.S. Highway 40 to its junction with Brizen-Dine Road, thence south along the southerly extension of Brizen-Dine Road to its junction with Missouri Highway AA, thence along Missouri Highway AA to its junction with the Blue Springs, Mo., corporate limits, thence along the southern and western corporate limits of Blue Springs, Mo., to its junction with U.S. Highway 40, thence west along U.S. Highway 40 to its junction with the Lee's Summit, Mo., corporate limits, thence along the eastern Lee's Summit corporate limits to the Jackson-Cass County line, thence west along Jackson-Cass County line to the eastern corporate limits of Belton, Mo., thence along the eastern, southern, and western corporate limits of Belton to the western boundary of Richards-Gebaur Air Force Base, thence along the western boundary of said Air Force base to Missouri Highway 150, thence west along Missouri Highway 150 to the Kansas-Missouri State line, thence north along the Kansas-Missouri State line to 110th Street, thence west along 110th Street to its junction with U.S. Highway 69, thence north along U.S. Highway 69 to its junction with 103d Street, thence west along 103d Street to its junction with Quivera Road (the corporate boundary of Lenexa, Kans.), thence along the eastern and southern boundaries of Lenexa to Black Bob Road, thence south along Black Bob Road to 119th Street, thence east along 119th Street to the corporate limits of Olathe, Kans., thence south and east along the Olathe corporate limits to Schlagel Road, thence south along Schlagel Road to Olathe Morse Road, thence west along Olathe Morse Road to the northeast corner of Johnson County Airport, thence south, west, and north along the boundaries of said airport to Pflumm Road, thence north along Pflumm Road to its junction with Olathe Martin City Road, thence west along Olathe Martin City Road to its junction with Murden Road, thence south along Murden Road to its junction with Olathe Morse Road (the corporate boundary of Olathe, Kans.), thence west and north along said corporate boundary to its intersection with U.S. Highway 56, thence northeast along U.S. Highway 56 to its junction with Parker Road, thence north along Parker Road to the northern boundary of Olathe, thence east and north along the northern corporate limits of Olathe to Pickering Road, thence north along Pickering Road to 107th Street (the corporate boundary of Lenexa, Kans.), thence along the western and northern boundaries of Lenexa to Pflumm Road, thence north along Pflumm Road to its junction with Kansas Highway 10, thence along Kansas Highway 10 to its junction with Kansas Highway 7, thence along an imaginary line due west across the Kansas River to the Wyandotte County-Leavenworth County line (142d Street) at Loring, Kans., thence westerly along Country Route No. 32, a distance of three-fourths of a mile to the entrance of the facilities at Mid-Continent Underground Storage, Loring, thence from Loring in a northerly direction along Loring Lane and Linwood Avenue to the southern boundary of Bonner Springs, Kans., thence along the southern, western, and northern boundaries of Bonner Springs to its intersection with Kansas Highway 7, thence southeast along Kansas Highway 7 to its junction with Kansas Highway 32, thence east on Kansas Highway 32 to the corporate boundary of Kansas City, Kans., thence north, west, and east along the corporate boundaries of Kansas City, Kans., to its junction with Cernech Road and Pomeroy Drive, thence northwesterly along Pomeroy Drive to its junction with 79th Street, thence along 79th Street to its junction with Walcott Drive at Pomeroy, Kans., thence due west 1.3 miles to its junction with an unnamed road, thence north along such unnamed road to the entrance of Powell Port facility, thence due north to the southern bank of the Missouri River, thence east along the southern bank of the Missouri River to a point directly across from the western boundary of Parkville, Mo., thence across the Missouri River to the point of beginning.

## Title 50—Wildlife and Fisheries

## CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, DEPARTMENT OF THE INTERIOR

## PART 32—HUNTING

### Alamosa National Wildlife Refuge, Colorado

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

COLORADO

ALAMOSA NATIONAL WILDLIFE REFUGE

The public hunting of geese, ducks, coots, mergansers, mourning doves, sora, and Virginia rails and Wilson's snipe on the Alamosa National Wildlife Refuge, Colorado, is permitted in accordance with conditions as outlined below, but only on the area designated by signs as open to hunting:

(1) Ducks, coots, mergansers—September 29, through October 9, 1973, inclusive and November 10, 1973 through January 13, 1974 inclusive.

(2) Canada geese—November 1, through December 31, 1973, inclusive. Hunting of Canada geese is restricted to those persons who have secured a special Colorado State permit for the Special San Luis Valley Goose Hunt.

(3) Mourning dove—September 29, through October 9, 1973 inclusive.

(4) Sora and Virginia rails—September 29, through October 9, 1973, inclusive, and November 1, through November 9, inclusive.

(5) Wilson's snipe—September 29, through October 9, 1973, inclusive.

This open area, comprising 3,267 acres, is delineated on maps available at refuge headquarters, Alamosa, Colorado and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of geese, ducks, coots, mergansers, mourning doves, sora, and Virginia rails and Wilson's snipe, subject to the following special conditions:

(1) Dogs—Not to exceed two dogs per hunter, may be used only to retrieve wounded or dead ducks.

(2) Boats—The use of boats is prohibited.

(3) Admittance—Entrance to the area open to hunting and parking of vehicles will be restricted to designated parking areas.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 13, 1974, inclusive.

M. A. MARSTON,
*Regional Director, Bureau of Sport Fisheries and Wildlife, Denver, Colorado.*

AUGUST 23, 1973.

[FR Doc.73-18997 Filed 9-6-73;8:45 am]

## PART 32—HUNTING

### Cape Romain National Wildlife Refuge, South Carolina

The following special regulations are issued and are effective on September 14, 1973.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

SOUTH CAROLINA

CAPE ROMAIN NATIONAL WILDLIFE REFUGE

Public hunting of rails on the Cape Romain National Wildlife Refuge, South Carolina, is permitted only on the area designated by signs as open to hunting. This open area, comprising approximately 12,000 acres, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State regulations covering the hunting of rails, and shall be subject to the following special conditions:

(1) Open season: September 14-November 22, 1973.

(2) Guns must be encased or otherwise rendered incapable of firing except when in the designated hunting area.

(3) The use of dogs is permitted.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas

V 38 - 173 SEP 7 73 XUM

generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 22, 1973.

C. EDWARD CARLSON,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 28, 1973.

[FR Doc.73-18954 Filed 9-6-73;8:45 am]

## PART 32—HUNTING

### Bear River Migratory Bird Refuge, Utah

The following special regulation is issued and is effective September 7, 1973.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

UTAH

BEAR RIVER MIGRATORY BIRD REFUGE

The public hunting of ducks, coots, mergansers, and whistling swans on the Bear River Migratory Bird Refuge, Utah, is permitted from October 6, 1973 through January 6, 1974, inclusive; and geese, from October 13, 1973 through December 16, 1973, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 12,855 acres, is delineated on maps available at refuge headquarters, Brigham City, Utah, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West 6th Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of ducks, geese, coots, mergansers, and whistling swans subject to the following special conditions:

(1) Iron Shot.—The exclusive use of 12 gage iron shot in Area A will be required on odd numbered days beginning October 7, 1973 and continue through the balance of the waterfowl hunting season or until the refuge supply of iron shot is exhausted if this occurs first.

(2) Hunting areas.—Area A—No hunting is permitted from roadways or within 100 yards of any roadway. Area B—No hunting is permitted from roadways or adjacent area as posted by signs.

(3) Boat use.—The use of boats is permitted except that airthrust boats and aircycles may not be used in Unit 2 on week-ends and holidays. Airthrust boats and aircycles may be launched only from designated boat ramps. Boats may be left at designated areas 1 week prior to and during the hunting season. All boats and trailers must be removed within 2 weeks after the close of the hunting season.

(4) Parking.—Hunters may park cars only at designated areas within the refuge.

(5) Hunter check station.—Each hunter who enters Area A is requested to register at the checking station and check out before leaving the refuge. Those hunting in Area B are not required to register on entering or leaving the refuge.

(6) Routes of travel.—To reach open hunting areas, travel is permitted on foot or bicycle over roads between Units 1 and 2 and Units 2 and 3. Travel by boat from checking station using the canal between Units 1 and 2 or down main river channel into Unit 2, or using the canal between Units 2 and 3. Travel by boats and trailers over dike roads to designated parking and launching areas. Airthrust boats and aircycles may use designated travel lanes across a closed portion of the refuge leading to the open area south and southwest of the refuge.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 6, 1974.

LLOYD F. GUNTHER,
*Refuge Manager, Bear River Migratory Bird Refuge, Brigham City, Utah.*

AUGUST 30, 1973

[FR Doc.73-18961 Filed 9-6-73;8:45 am]

## PART 32—HUNTING

### Crab Orchard National Wildlife Refuge, Illinois

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.**

ILLINOIS

CRAB ORCHARD NATIONAL WILDLIFE REFUGE

Public hunting of pheasants, bobwhite quail, and rabbits on the Crab Orchard National Wildlife Refuge, Illinois, is permitted from November 10, 1973 through January 15, 1974. The hunting of raccoons, opossums, skunks, and weasels is permitted from November 10, 1973 through January 31, 1974. The hunting of crows is permitted from December 1, 1973 through February 15, 1974. The hunting of coyotes is permitted from September 1, 1973 through February 28, 1974. Hunting is permitted only on the area designated by signs as open to hunting. This open area, comprising 9,380 acres is delineated on a map available at the refuge headquarters, Carterville, Illinois 62918, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State and Federal regulations.

The provisions of this special regulation supplements the regulations which govern hunting on wildlife refuges generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through February 28, 1974.

L. A. MEHRHOFF, Jr.,
*Project Manager, Crab Orchard National Wildlife Refuge, Carterville, Illinois.*

AUGUST 29, 1973.

## PART 32—HUNTING

### Crab Orchard National Wildlife Refuge, Illinois

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**

ILLINOIS

CRAB ORCHARD NATIONAL WILDLIFE REFUGE

The public hunting of deer on the Crab Orchard National Wildlife Refuge on an area designated by signs as open to hunting is permitted with bow and arrow from one-half hour before sunrise to one-half hour before sunset daily from October 1, 1973, through November 11, 1973, and from one-half hour before sunrise until one-half hour before sunset November 19, 1973, through December 31, 1973, except during the period December 3, through December 9, 1973, inclusive. Shotgun or single shot muzzle loading rifle hunting of deer is permitted from 6:30 a.m. to 4 p.m. from November 16, 1973, through November 18, 1973, and from December 7, 1973 through December 9, 1973. This open area comprising 9,380 acres is delineated on maps available at refuge headquarters, Carterville, Illinois, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of deer.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

L. A. MEHRHOFF, Jr.,
*Project Manager, Crab Orchard National Wildlife Refuge, Carterville, Illinois.*

AUGUST 29, 1973.

## PART 32—HUNTING

### Des Lacs National Wildlife Refuge, North Dakota

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.32 Special regulations; big game, for individual wildlife refuge areas.**

NORTH DAKOTA

DES LACS NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Des Lacs National Wildlife Refuge, North Dakota, is permitted only on the area designated by signs as open to hunting. This area, comprising 17,740 acres, is delineated on a map available at the refuge headquarters and from the Area Manager, Bureau of Sport Fisheries and Wildlife, Federal Building, Bismarck, North Dakota 58501. Hunting shall be in accordance with all applicable State Regulations covering the hunting of deer, subject to the following conditions.

(1) Hunting is permitted from 12:00 noon to sunset November 9 and from sunrise to sunset November 10 through November 18, 1973.

(2) All hunters must exhibit their hunting license, deer tag, game and vehicle contents to Federal and State Officers upon request.

The provisions of this special regulation supplement the regulations which govern hunting on Wildlife Refuge Areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32 and are effective through November 18, 1973.

CHARLES S. PECK,
*Refuge Manager, Des Lacs National Wildlife Refuge, Kenmare, North Dakota.*

AUGUST 27, 1973.

## PART 32—HUNTING

### Hagerman National Wildlife Refuge, Texas

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.**

TEXAS

HAGERMAN NATIONAL WILDLIFE REFUGE

Public hunting of rabbits on the Hagerman National Wildlife Refuge, Texas, is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,644 acres, is delineated on maps available at refuge headquarters, 15 miles northwest of Sherman, Texas, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State regulations governing the hunting of rabbits subject to the following special conditions:

(1) The open season for hunting rabbits on the refuge extends from September 1 through September 30, 1973, inclusive.

(2) Shooting hours will begin at 12 noon daily and end at sunset.

(3) Hunting with rifles or handguns is not permitted.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1973.

BERT M. ANDUSS,
*Refuge Manager, Hagerman National Wildlife Refuge, Sherman, Texas.*

AUGUST 29, 1973.

headquarters, Puxico, Missouri, and from the office of the Area Manager, Bureau of Sport Fisheries and Wildlife, 601 East 12th, Kansas City, Missouri 64106. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions.

(1) Hunting with bows and arrows only is permitted.

(2) Hunters must register when entering or leaving the area.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

GERALD L. CLAWSON,
*Refuge Manager.*

AUGUST 28, 1973.

## PART 32—HUNTING

### National Wildlife Refuges, North Dakota

The following special regulations are issued and are effective on September 7, 1973.

**§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**

NORTH DAKOTA

ARROWWOOD NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Arrowwood National Wildlife Refuge, North Dakota, is permitted only on the area designated by signs as open to hunting. The open area comprising 11,063 acres is delineated on a map available at the refuge headquarters and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West 6th Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all applicable State regulations, covering the hunting of deer subject to the following conditions.

(1) Hunting is permitted from 12 Noon to sunset on November 9, 1973 and from sunrise to sunset November 10, 1973 through November 18, 1973.

(2) All hunters must exhibit their hunting license, deer tag, game and vehicle contents to Federal and State Officers upon request.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 18, 1973.

CHASE LAKE NATIONAL WILDLIFE REFUGE

Public hunting of deer on Chase Lake National Wildlife Refuge, North Dakota; is closed for the 1973 season.

JIM MATTHEWS,
*Refuge Manager, Arrowwood National Wildlife Refuge, Edmunds, North Dakota.*

AUGUST 29, 1973.

## PART 32—HUNTING

### National Wildlife Refuges in Certain States

The following special regulations are issued and are effective on October 6, 1973.

**§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**

MISSISSIPPI

YAZOO NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Yazoo National Wildlife Refuge is permitted only on the areas designated by signs as open to hunting. This open area, comprising approximately 10,500 acres, is delineated on a map available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all State regulations governing the hunting of deer subject to the following special conditions:

(1) Open season: Archery—November 3–16, 1973, Sundays excluded. Gun—December 31, 1973–January 5, 1974.

(2) Bag limit: One deer of either sex during the archery hunt. One buck with antlers 4 inches or longer during the gun hunt.

(3) Weapons: Archery—Longbows only; crossbows and all firearms prohibited. Gun—Shotguns larger than 410 gauge and rifles larger than 22 caliber. No sidearms (pistols or revolvers) permitted.

(4) A refuge deer hunting permit is required for the gun hunt.

(5) Firearms may not be discharged within 250 yards of residences or the refuge headquarters. The carrying of loaded firearms in vehicles and shooting from or across county or State roads is prohibited.

(6) All deer killed must be checked out at a refuge checking station.

(7) Hunters may enter the hunting area no earlier than 1 hour before sunrise. Archery hunters must depart the hunting afea immediately after sunset and gun hunters must depart the hunting area no later than 1 hour after sunset.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 5, 1974.

TENNESSEE

TENNESSEE NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Tennessee National Wildlife Refuge, Tenn., is permitted only on the areas designated by signs as open to hunting. These open areas, comprising 2,800 acres for bow hunting only, 700 acres for muzzleloading rifle hunting, and 3,300 acres for gun and bow hunting, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations governing the hunting of deer subject to the following special conditions:

(1) The open season for archery hunting of deer on the refuge is October 6–14, 1973.

(2) The open season for muzzleloading rifles on the refuge is December 29 and 30, 1973.

(3) The open season for gun and bow hunting of deer on the refuge is December 27, 28, and 29, 1973.

(4) The bag limit is one deer of either sex per hunter during the archery hunt, the muzzleloader rifle hunt, and the gun-bow hunt.

(5) The use of dogs is not permitted.

(6) Camping on the area is not permitted.

(7) Driving of deer is prohibited.

(8) Hunters may enter public hunting area at sunrise and must be out of the area ½ hour after sunset.

(9) All hunters must wear protective clothing of fluorescent red, orange, or yellow material of at least 100 square inches.

(10) Bow hunters who wish to hunt deer on Britton Ford Peninsula on October 6 will be required to possess a refuge permit. Permits for hunting this area will be issued to the first 300 people who make a request for this permit at the refuge office in Paris, Tennessee. No permit will be required to hunt Britton Ford Peninsula October 7 through October 14. Also, no permit will be necessary to hunt Sulphur Well Island or the Duck River area south of Interstate 40 during the refuge archery hunt October 6–14, 1973.

(11) Muzzleloading rifle hunters who wish to hunt Britton Ford Peninsula and Sulphur Well Island on December 29 and 30 will be required to possess a refuge permit. Permits for hunting this area will be issued to the first 100 people who make a request for this permit at the refuge office in Paris, Tennessee. Up to 35 people will be allowed to hunt Britton Ford Peninsula per day and up to 15 people may hunt on Sulphur Well Island each day.

(12) Hunters must check in and out of the designated checking station.

(13) Hunters desiring to hunt deer on the area open to gun hunting will require a refuge permit. Hunters under 18 years of age must be accompanied by a responsible adult. Applications will consist of self-addressed, stamped envelope furnished by the hunter(s) to the refuge office, Bureau of Sport Fisheries and Wildlife, Box 849, Paris, Tennessee 38242, after August 1, 1973. Hunters must submit self-addressed, stamped envelope in time to be received by August 31, 1973.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 30, 1973.

C. EDWARD CARLSON,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 29, 1973.

## PART 32—HUNTING

### Seney National Wildlife Refuge, Michigan

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

MICHIGAN

SENEY NATIONAL WILDLIFE REFUGE

Public hunting of Woodcock and Wilson's Snipe (Jacksnipe) on the Seney National Wildlife Refuge is permitted only on the area designated as open to hunting. This open area, comprising 33,525 acres, is delineated on maps available at refuge headquarters, Seney, Michigan, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of Woodcock and Wilson's Snipe (Jacksnipe) subject to the following special conditions:

(1) All motorized conveyances are prohibited from traveling on dikes or off established roads and trails. Motorized bikes, All-Terrain Vehicles, and snowmobiles are not permitted on the refuge.

The provisions of this special regulation supplements the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 14, 1973.

CHARLES A. HUGHLETT,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife, Twin Cities, Minnesota.*

AUGUST 23, 1973.

[FR Doc.73-18964 Filed 9-6-73;8:45 am]

## PART 32—HUNTING

### Sherburne National Wildlife Refuge, Minnesota

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

MINNESOTA

SHERBURNE NATIONAL WILDLIFE REFUGE

Public hunting of ducks, coots, rails, Wilson snipe, and woodcock on the Sherburne National Wildlife Refuge is permitted only on the areas designated by signs as open to hunting. These open areas, comprising 6,829 acres for ducks, coots, rails, Wilson snipe, and woodcock (designated Area B on map) [1]; and 10,850 acres for Wilson snipe and woodcock (designated Area A on map) [1], are delineated on a map available at refuge headquarters, Box 158, Princeton, Minnesota 55371, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of these species subject to the following special conditions:

(1) All motorized conveyances are prohibited from traveling off of established roads and parking areas open to such travels.

(2) Parking of vehicles is restricted to designated parking areas.

(3) Overnight camping and open fires are prohibited.

(4) Boats, without motors, may be used on the St. Francis River only from designated river access sites.

(5) Construction of any permanent artificial scaffold, platform, blind, or other construction is prohibited.

(6) Boats and decoys must be removed from the refuge at completion of days hunt.

(7) Field possession of ducks and coots in area of refuge closed to hunting of ducks and coots is prohibited.

The provisions of this special regulation supplements the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 18, 1973.

CHARLES A. HUGHLETT,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 16, 1973.

[FR Doc.73-18955 Filed 9-6-73;8:45 am]

## PART 32—HUNTING

### Slade National Wildlife Refuge, North Dakota

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**

NORTH DAKOTA

SLADE NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Slade National Wildlife Refuge, North Dakota, is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,840 acres, is delineated on a map available at the refuge headquarters and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West 6th Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following conditions:

(1) Hunting is permitted from 12 Noon to sunset November 9, 1973, and from sunrise to sunset November 10, 1973, through November 18, 1973.

(2) All hunters must exhibit their hunting license, deer tag, game, and vehicle contents to Federal and State officers upon request.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Regulations, Part 32, and are effective through November 18, 1973.

JIM MATTHEWS,
*Refuge Manager, Arrowwood National Wildlife Refuge, Edmunds, North Dakota.*

AUGUST 30, 1973.

## PART 32—HUNTING

### Upper Souris National Wildlife Refuge, North Dakota

The following special regulation is issued and is effective on September 7, 1973.

**§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**

NORTH DAKOTA

UPPER SOURIS NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Upper Souris National Wildlife Refuge, North Dakota, is permitted on all areas except those designated as closed. The open areas, comprising 31,800 acres, are delineated on maps available at headquarters, Foxholm, North Dakota, and from the office of the Area Manager, Bureau of Sport Fisheries and Wildlife, P.O. Box 1897, Bismarck, North Dakota 58501. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following conditions:

(1) The open season for hunting deer on the refuge is from noon November 9 to sunset November 18, 1973, CST.

(2) The refuge shall be closed to all vehicular travel except the main public roads.

(3) Regular gun license permits the taking of white-tailed deer with forked antlers on at least one side. Hunters with Special Unit III–A licenses may take white-tailed deer of any age or sex or an antlered mule deer buck.

(4) Deer are the only species that may be taken; it is unlawful to carry firearms after the deer tag is used. The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 18, 1973.

DON R. PERKUCHIN,
*Refuge Manager, Upper Souris National Wildlife Refuge, Foxholm, North Dakota.*

AUGUST 29, 1973.

# Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

## DEPARTMENT OF THE TREASURY

### Customs Service

[ 19 CFR Part 1 ]

### CUSTOMS FIELD ORGANIZATION

### Notice of Proposed Changes in Customs Region V

AUGUST 29, 1973.

In order to provide better Customs service to carriers, importers, and the public, it is considered desirable to extend the port limits of Greenville, Mississippi.

Accordingly, notice is hereby given that, by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR Ch. II), and pursuant to the authorization provided by Treasury Department Order No. 190, Rev. 9 (38 FR 17517), it is proposed to extend the port limits of Greenville, Mississippi, in the New Orleans, Louisiana, Customs district (Region V), to include all of Washington County, Mississippi.

Prior to the adoption of the foregoing proposal, consideration will be given to any relevant data, views, or arguments which are submitted to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229, and received on or before October 9, 1973.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.3(b) of the Customs regulations (19 CFR 103.3(b)), at the Regulations Division, Headquarters, United States Customs Service, Washington, D.C., during regular business hours.

[SEAL] JAMES B. CLAWSON,
*Acting Assistant Secretary of the Treasury.*

[FR Doc.73-19034 Filed, 9-6-73;8:45 am]

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

[ 9 CFR Part 381 ]

### HANDLING AND MARKING DRESSED POULTRY

### Notice of Proposed Rulemaking

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that the Animal and Plant Health Inspection Service of this Department has been requested to delete from the poultry products inspection regulations (9 CFR Part 381) those provisions allowing the production, labeling, and movement between official establishments or importation of dressed poultry. No change is proposed with respect to the exemption of dressed poultry from certain restrictions of the Act and the regulations when necessary to avoid conflict with religious dietary requirements. Current regulations define "dressed poultry" as poultry which has been slaughtered for human food with head, feet, and viscera intact and from which the blood and feathers have been removed.

This request, from several poultry industry and trade associations, is based on their contention that the poultry industry no longer produces dressed poultry for movement between official establishments nor imports any such poultry and therefore such regulatory provisions are no longer needed.

The Department is seeking further data, views, or arguments concerning this matter.

Any person wishing to submit written data, views, or arguments concerning the proposed amendments may do so by filing them in duplicate with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, by November 16, 1973.

Any persons desiring opportunity for oral presentation of views should address such requests to the Inspection Standards and Regulations Staff, Scientific and Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250, so that arrangements may be made for such views to be presented prior to the date specified in the preceding paragraph. A record will be made of all views orally presented.

All written submissions and records of oral views made pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business, unless the person makes the submission to the Staff identified in the preceding paragraph and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on grounds that its disclosure could adversely affect such person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in support of the request, the material will be held confidential; otherwise, notice will be given of denial of such request and an opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Comments on the proposal should bear a reference to the date and page number of this issue of the FEDERAL REGISTER.

Done at Washington, D.C. on August 31, 1973.

G. H. WISE,
*Acting Administrator, Animal and Plant Health Inspection Service.*

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

[ 21 CFR Part 121 ]

### SUBSTANCES PROHIBITED FROM USE IN FOOD

*Correction*

In FR Doc. 73-15216, appearing at page 20040 for the issue for Thursday, July 26, 1973, the following corrections are made:

1. In § 121.106(d)(2)(iii), the word now spelled "detectine" should be spelled "detecting".

2. In § 121.106(d)(8)(i) the word now spelled "detectably" should be spelled "detectable".

3. In § 121.106(d)(9)(i), "CoSo," should be "CoSo'".

4. In § 121.106(d)(10(i), the formula now reading "4,4(2,3-dimethyltetramethylene)" should read "4,4(2,3-dimethyltetramethylene)".

5. In § 121.106(e)(2), the formula now reading "4,4i-Methylenebis" should read "4,4'-Methylenebis".

[ 21 CFR Part 121 ]

### CAROB BEAN GUM

### Proposed Transfer From GRAS List to Food Additive Regulation for Direct Human Food Use and Affirmation of GRAS Status as Indirect Human Food Ingredient

*Correction*

In FR Doc. 73-15215, appearing at page 20041 for the issue for Thursday, July 26, 1973, the following corrections should be made:

1. In the first column on page 20042, the word now spelled "applicable" in the fourth line from the bottom should be "applicable".

2. In the second column, eight lines from the top, the word now spelled "asset" should be "assert".

3. In the first column on page 20043, in the third paragraph, the word now spelled "Ora" in the second line should be "Oral". In the eighth line the words now spelled "materna or feta surviva" should be "maternal or fetal survival".

[ 21 CFR Part 121 ]

### MANITOL AND SORBITOL

### Affirmation of GRAS Status of Direct Human Food Ingredients

*Correction*

In FR Doc. 73-15214, appearing at page 20046 for the issue for Thursday, July 26, 1973, the seventh and eighth lines of § 121.104(g)(3)(iv) should read as follows: "(§ 121.1(1)(25)), 26 percent in chewing gum (§ 121.1(1)(6)), 40 percent in soft".

[ 21 CFR Part 121 ]

### METHYL PARABEN AND PROPYL PARABEN

### Affirmation of GRAS Status of Direct Human Food Ingredients

*Correction*

In FR Doc. 73-15212 appearing at page 20048 for the issue for Thursday, July 26, 1973 the following corrections are made:

1. In the third column in the paragraph beginning "Studies in rats," in the seventh line the word now spelled "blucuronic" should be spelled "glucuronic".

2. In the third column on page 20050 the paragraph that begins with "the Commissioner"; in the fourth line the word now spelled "the" should be "those".

[ 29 CFR Part 1910 ]

### STANDARDS ADVISORY COMMITTEE ON CARCINOGENS

### Notice of Receipt of Recommendations of the Committee and of Their Availability for Public Inspection

Notice is hereby given that the Standards Advisory Committee on Carcinogens, established under section 7 of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1592), submitted to the Assistant Secretary of Labor for Occupational Safety and Health, on August 27, 1973, its recommendations for a standard for certain carcinogens. The full text of the recommended standard is set forth in an appendix to this notice.

The number appearing in parentheses in the lower right corner of each recommendation records the voting of the Committee members. The first number indicates the affirmative votes, the second number indicates the negative votes, and any third number indicates abstentions.

Copies of the recommended standard will also be made available for inspection, and copying, upon request, at the U.S. Department of Labor, Office of Standards, Railway Labor Building, Room 500, 400 First Street NW., Washington, D.C. 20210, and at the following regional offices:

John F. Kennedy Federal Building, Government Center, Room No. E308, Boston, Mass. 02203; 1515 Broadway, New York, N.Y. 10036; Penn Square Building, Room 623, 1317 Filbert Street, Philadelphia, Pa. 19107; 1375 Peachtree Street NE., Suite 587, Atlanta, Ga. 30309; 300 South Wacker Drive, Room 1201, Chicago, Ill. 60606; Seventh Floor, Texaco Building, 1512 Commerce Street, Dallas, Tex. 75201; 823 Walnut Street, Waltower Building, Room 300, Kansas City, Mo. 64104; Federal Building, Room 15010, Post Office Box 3588, 1961 Stout Street, Denver, Colo. 80202; 9470 Federal Building, 450 Golden Gate Avenue, Box 36017, San Francisco, Calif. 94102; 506 Second Avenue, 1808 Smith Tower Building, Seattle, Wash. 98104.

Signed at Washington, D.C. this 29th day of August 1973.

JOHN H. STENDER,
*Assistant Secretary of Labor.*

APPENDIX

PROPOSED STANDARD FOR CERTAIN CARCINOGENS AS RECOMMENDED BY THE STANDARDS ADVISORY COMMITTEE ON CARCINOGENS AUGUST 27, 1973

§ 1910.93c Carcinogens.

(a) *Purpose.*—The purpose of this standard is to prevent any worker contact or exposure to any of the listed carcinogens as detected by the most sensitive, feasible sampling and analytical methods available.

(b) *Scope and application.*—This section applies to any workplace in which a carcinogen is manufactured, processed, used, repackaged, released handled or stored, but shall not apply to any workplace involving only shipment of carcinogens in appropriate, sealed containers.

(c) *Terminology.*—For the purpose of this standard: (1) "carinogen" includes one or more of the fourteen substances listed below.

| Compound No. | Chemicals | Chemical abstract registry No. |
|---|---|---|
| 1 | 2-Acetylaminofluorene | 53963 |
| 2 | 4-Aminodiphenyl | 92671 |
| 3 | Benzidine (and its salts) | 92875 |
| 4 | 3,3'-Dichlorobenzidine (and its salts) | 91941 |
| 5 | 4-Dimethylaminoazobenzene | 60117 |
| 6 | alpha-Naphthylamine | 134327 |
| 7 | beta-Naphthylamine | 91598 |
| 8 | 4-Nitrobiphenyl | 92933 |
| 9 | N-Nitrosodimethylamine | 62759 |
| 10 | beta-Propiolactone | 57578 |
| 11 | bis-Chloromethyl ether | 542881 |
| 12 | Methyl Chloromethyl ether | 107302 |
| 13 | 4,4'-Methylene (bis)-2-chloroaniline | 101144 |
| 14 | Ethylenelmine | 151564 |

(2) "Regulated area" is an area in which there is potential exposure to a carcinogen and where entry and exit shall be restricted and controlled by the employer.

(3) "Decontamination" is the safe removal from the work environment or inactivation of a carcinogen to eliminate residual carcinogen as detectible by the most sensitive, feasible sampling and analytical methods available.

(4) "Disposal" is the safe removal of inactivation of a carcinogen to prevent introduction of the carcinogen into regulated areas, nonregulated areas, or the external environment.

(5) "Feasible" is capable of being accomplished successfully within the best practicable technology as it exists or may develop.

(6) "Closed system" is an operation involving a carcinogen where the containment prevents the release of the carcinogen, as detected by the most sensitive, feasible, continuous sampling and analytical methods available, into regulated areas, non-regulated areas, or the external environment.

(7) "Isolated system" is a fully enclosed structure, which is impervious to the passage of a carcinogen, other than the vessel of containment of the carcinogen, and which would prevent the entry of the carcinogen into regulated areas, non-regulated areas, or the external environment, should leakage or spillage from the vessel of containment occur.

(8) "Laboratory type hood" is a device enclosed on three sides and the top and bottom, designed and maintained so as to draw air inward at an average linear face velocity of 150 feet per minute with a minimum of 125 feet per minute; designed, constructed, and maintained in such a way that an operation involving a carcinogen within the hood does not require the insertion of any portion of any employees' body other than his hands and arms. c.f. the American Conference of Governmental Industrial Hygienists "Industrial Ventilation, A manual of Recommended Practice" section on laboratory hoods details and operation when handling and using highly toxic substances, and the section "Hood Design Data."

(9) "Open vessel system" is an operation involving a carcinogen in an open vessel, not in an isolated system, not in a laboratory-type hood, nor in other systems affording equivalent protection, which may allow the entry of a carcinogen into regulated areas, non-regulated areas, or the external environment.

(10) "Nonregulated area" is any area under the control of the employer which is not subject to the provisions of this section because there is no potential for exposure to a carcinogen.

(11) "External environment" is any environment external to the regulated and non-regulated areas.

(12) "Redundant protection" is a backup system for operations involving carcinogens which is capable of providing immediate protection should the primary system fail.

(13) "Protective work clothing" is clothing designed to protect the worker against contact with or exposure to carcinogens in the regulated areas.

(14) "Emergency" is an unforeseen circumstance or set of circumstances re-

V 38-173
SEP 7 73
XUM

sulting in the release of a carcinogen which may result in the exposure or contact with the carcinogen as evidenced by its detection either by the most sensitive, feasible sampling and analytical methods available or by other obvious evidence such as physical detection or an indication of equipment failure or impending failure, which emergency calls for immediate action.

(d) *Requirements for areas containing carcinogens.*—A regulated area shall be established by the employer where a carcinogen is manufactured, processed, used, repackaged, released, handled or stored. All such areas shall be regulated in accordance with the requirements for the following categories of operations involved:

(1) *Isolated System.*—Where a carcinogen is contained within an isolated system, such as a "glove box", employees and other authorized individuals working with such a system shall be required to wash their hands and arms upon completion of the assigned task and before engaging in other unrelated activities.

(2) *Closed system operation.*—Where a carcinogen is stored in sealed containers, or contained in a closed system, such as fully enclosed process or transfer equipment, including pipes; sample ports or openings, if present, are not in use while a carcinogen is contained within:

(i) Access to the regulated area shall be restricted to only employees who work in that area and other authorized individuals.

(ii) Before entering the regulated area each workday all employees and other authorized individuals shall be provided with and be required to wear new or decontaminated appropriate protective work clothing.

(iii) During the workday, such employees and other authorized individuals shall be required to remove and leave that clothing at the point of exit upon each exit from the regulated area.

(iv) Such employees and other authorized individuals shall be required to wash hands and face upon each exit from the regulated area, close to the point of exit.

(v) Such employees and other authorized individuals shall be required to remove and place all protective work clothing in an appropriate container (for purposes of decontamination or disposal) after last exit of the day from the regulated area.

(vi) Such employees and other authorized individuals shall be required to shower after last daily exit from the regulated area, close to the point of exit.

(3) *Transfer from a closed system, charging or discharging point operations,* or otherwise opening a closed system. In operations involving "laboratory type hoods", or in locations where a carcinogen is contained in an otherwise "closed system", but is transferred, charged, or discharged into other normally closed containers:

(i) Access to the regulated area shall be restricted to only employees who work in that area and other authorized individuals.

(ii) Continuous local exhaust ventilation followed by appropriate decontamination and disposal shall be maintained to prevent the dispersion of the carcinogen to regulated areas, non-regulated areas, or the external environment.

(iii) Before entering the regulated area each work day, all employees and other authorized individuals shall be provided with and be required to wear new or decontaminated, appropriate protective work clothing, such as smocks, coveralls or long-sleeved shirts and long pants.

(iv) Such employees and other authorized individuals shall be required to remove and leave that clothing at the point of exit upon each exit from the regulated area.

(v) Employees and other authorized individuals in the regulated area involved in carcinogen handling operations shall be provided with and be required to wear and use appropriate personal protective equipment adequate to prevent exposure to a carcinogen.

(vi) Such employees and other authorized individuals shall be required to wash hands and face upon each exit from the regulated area, close to the point of exit.

(vii) Such employees and other authorized individuals shall be required to shower after last exit of the day from the regulated area, close to the point of exit.

(viii) Employees and other authorized individuals in the regulated area shall be required to remove and place all protective equipment in an appropriate container at the hood site or charging, discharging or transfer point after work at that site or point.

(4) *Open vessel systems.*—(i) Open vessel system operations, as defined above in paragraph c(9), shall be prohibited.

(5) *Maintenance and Decontamination Activities.*—In decontamination of carcinogen(s), either as a part of clean-up of leaks or spills, maintenance or repair operations on systems or equipment, or any operation involving work in an area where direct contact with a carcinogen could result, each employee or other authorized individual entering that area shall:

(i) Be provided with, and be required to wear, a decontaminated, full, impervious, pressurized, air-supplied suit upon entering that area and while engaged in such operations;

(ii) Be decontaminated before leaving that area and before removing the suit; and

(iii) Be required to shower after removing such suit.

(6) *"Out-of-doors systems".*—No distinction shall be made between out-of-door regulated areas and indoor regulated areas.

(e) *General regulated areas requirements.*—In addition to the regulated types of systems listed in paragraph (d) of this section the following requirements apply to all regulated areas:

(1) Each employer shall establish and maintain a list of employees entering a regulated area. The list shall be made available on request to authorized representatives of the Secretary of Labor and the Secretary of Health, Education, and Welfare.

(2) The employer shall provide all work clothing, protective clothing, equipment, and wash and shower supplies including towels, required by this section.

(3) Any required shower rooms shall be provided in accordance with § 1910.-141. Shower supplies may be introduced into a shower room only through a non-contaminated area.

(4) No food, beverage, drug, or cosmetic shall be permitted within a regulated area.

(5) No smoking or smoking materials, tobacco products, or chewing materials shall be permitted within a regulated area.

(6) Appropriate instructions and signs shall be posted at the entrance to, and exit from, regulated areas to inform employees of the procedures that must be followed in entering and leaving a regulated area.

(7) Any equipment, material, or any other items that are to be taken into or removed from a regulated area by any employees or other authorized individuals shall be taken in or removed from such area in such a manner which does not contaminate outside the regulated area.

(8) When only removal of outer clothing or personal protective equipment is required under paragraph (d) of this section, at point of exit from a regulated area, an employee must be able, upon exit from the regulated area, to enter the change room, remove outer work garments and equipment and leave them in that room in an appropriate container.

(9) When change and shower facilities are required under paragraph (d) of this section at point of exit from a regulated area, they shall be arranged so that upon exit, an employee must be able to enter a separate dirty change room where he can undress completely and leave every item of clothing and equipment in approved containers. All clothing shall be decontaminated before laundering. He must then be able to shower in an adjacent room which he can enter through an entrance designed to prevent the escape of carcinogens from the dirty change room to the shower room. Thereafter, he must be able to enter a clean change room where his street clothes are in his locker.

(10) When work area garments or protective clothing and equipment are required under paragraph (d) of this section to be worn in a regulated area, a clean change room must be provided so that before entering the regulated area, the employee or other authorized individuals can change into clean work area garments or protective clothing and equipment in an area not containing contaminated or used work clothing or equipment and without passing through such a contaminated area to enter the regulated area. The clean change room shall have individual storage facilities

for storage of street clothes and clean protective clothing and equipment.

(11) Continuous general mechanical exhaust ventilation shall be provided in regulated areas, or other positive means provided, so that contaminated air from the regulated area does not flow to non-regulated areas. Local exhaust ventilation may satisfy this requirement. Clean makeup air shall replace air removed.

(12) In emergencies, immediate measures shall be initiated, including all of the following:

(i) Evacuation from potentially affected area as soon as the emergency has been determined.

(ii) The release shall be contained and stopped as expeditiously as possible by duly-trained, authorized, and continually available emergency team operating under the conditions described in (d)(5). The makeup of the team shall be determined by need.

(iii) Medical surveillance shall be instituted for any individuals present in the potentially affected area.

(iv) Normal operations in the area are to be resumed only after effective decontamination.

(v) Safe escape in case of an emergency shall be readily possible by satisfactory means of egress.

(vi) Specific emergency procedures shall be prescribed, the terms of such procedures shall be posted, and the employees shall be familiarized with their terms and rehearsed in their application.

(vii) The emergency first aid procedures that shall be used shall be specifically appropriate to the hazard for each carcinogen and these procedures shall be generally recognized as effective.

(f) *Signs and labels.*—(1) Entrances to regulated areas shall be prominently posted with legible signs bearing the legend:

CANCER HAZARD AREA

AUTHORIZED PERSONNEL ONLY

For isolated environment operations, the sign shall be posted on or near the structure containing the isolated system.

(2) Equipment, material, and clothing contaminated with a carcinogen shall not be removed from a regulated area, unless it is either decontaminated or sealed in impervious containers bearing the legend:

DANGER

Contaminated with
CANCER HAZARD AGENT

(3) Entrances to every regulated area for operations described in paragraph (d)(5) of this section shall be prominently posted with legible signs bearing the legend:

CANCER HAZARD IN THIS AREA

FULL IMPERVIOUS PRESSURIZED AIR-SUPPLIED SUIT REQUIRED AT ALL TIMES

AUTHORIZED PERSONNEL ONLY

(g) *Decontamination.*—Decontamination processes shall be established and implemented to remove carcinogens from surfaces of equipment, materials, and the decontamination facility, that are known to be contaminated with a carcinogen.

(h) *Waste disposal.*—Waste disposal methods and processes shall be established and implemented which do not permit carcinogens to be introduced into regulated areas, non-regulated areas, or the external environment.

(i) *Performance Standard.*—(1) Whenever a carcinogen is present, no measurable exposure or contact shall be permitted by any route, oral, respiratory, or skin.

(2) For the purpose of this paragraph "present" shall mean manufactured, processed, used, packaged, released, handled, stored, or otherwise present.

(3) For the purpose of this paragraph "measurable" shall mean detectable, by

(i) the most sensitive, feasible, approved reliable methods of environmental and personal monitoring, and

(ii) the most sensitive approved tests for detecting a carcinogen or its metabolites in biological fluids.

(j) *Monitoring.*—To provide information enabling the employer to comply with the requirements of this regulation, personal and environmental sampling procedures and monitors appropriate to each carcinogen or combination of carcinogens and capable of detecting by the most sensitive, feasible methods available, shall be used by employers to detect and provide a record of the presence of any level of carcinogen in regulated areas and non-regulated areas, and to monitor the discharge of carcinogen into the external environment.

NOTE.—It should be an urgent concern of the Department of Labor in conjunction with the National Institute for Occupational Safety and Health and the Environmental Protection Agency to undertake and/or contract for the development of monitors which shall have a sensitivity of at least one part of carcinogen per billion parts of air (v/v), individual analytical results to be produced by such monitor at intervals no greater than two hours throughout the working day. Of equally urgent concern should be the development of backup detection methods capable of producing a warning or signal at intervals no greater than ten minutes, with sensitivity of at least 100 parts per billion. Methods of equivalent detection shall be developed for water and other wastes. These achievements shall be viewed as milestones on the pathway to achieve the objective of no exposure rather than as ultimate targets.

(k) *Medical.*—(1) *Surveillance.*—(i) The employer, at his cost shall provide and make available to all employees by a company designated physician, or by another duly-qualified physician of their choice, a comprehensive history and physical examination consisting of diagnostic tests and periodicity specific to the carcinogen and in no less detail than guidelines set forth by the Secretary of the Department of Labor after consultation with the Secretary of Health, Education, and Welfare.

(2) *Records.*—(i) The physician(s) charged with the implementation of the medical program shall maintain the appropriate medical records. If the examination is performed by other than a company-designated physician, a copy of the results of that examination shall be forwarded to the company-designated physician and these records shall be treated in a confidential manner.

(ii) Only physicians and medical consultants of the Department of Labor, physicians designated by the company, and physicians designated and authorized by the employee shall have access to the medical records, where confidentiality of these documents shall be preserved.

(iii) Medical records shall be maintained for the duration of the employee's employment; a copy of these records shall be maintained by the company-designated physician; and in addition, at the termination of employment, the records shall be forwarded by registered mail to the Director of the National Institute for Occupational Safety and Health.

(iv) In the event that an employer ceases business without a successor, medical records shall be forwarded by registered mail to the Director of the National Institute for Occupational Safety and Health.

(l) *Labeling.*—All containers of carcinogens for use other than process equipment shall be labeled prominently with the words:

CANCER—HAZARD

DANGER—AVOID ALL CONTACT AND EXPOSURE

For opening and use by authorized personnel. The chemical and common name shall be clearly identified.

(m) *Training and indoctrination.*—(1) All employees who may periodically or routinely enter a regulated area, including maintenance and supervisory personnel, where any carcinogen is manufactured, processed, used, repackaged, released, handled or stored, shall be provided with an indoctrination program which shall include definitive information concerning:

(i) The nature of the hazards, including local and systemic toxicity, of any of the carcinogens or other potentially hazardous chemicals present in the regulated area.

(ii) The specific nature of the operation or procedure, such as manufacturing, processing, use, repackaging, releasing, handling or storing, which could result in exposure to employees to any of the carcinogens.

(iii) The purpose for and application of a medical surveillance program.

(iv) The purpose for and application of an air monitoring program, and basic understanding of the significance of the various monitoring values.

(v) The purpose for and application of decontamination practices and procedures.

(vi) The purpose for and significance of emergency practices and procedures including bimonthly emergency drill procedures.

(vii) The employee's specific role in emergency procedures.

(viii) Specific information to aid the employee in the recognition and evalua-

V 38-173 SEP 7 73 XUM

tion of conditions and situations which may result in the release of a carcinogen into a regulated area, non-regulated area, or the external environment.

(ix) The purpose for and applications of specific first aid procedures and practices.

(x) A presentation of the *Standard on Certain Carcinogens* at the employee's first indoctrination program and annually thereafter.

(xi) Assurance by the employer that the employee has a firm understanding of the purpose and applications of the basic information required above.

(xii) Specific training material for workers and supervisors shall be made available through the Office of the Assistant Secretary of Labor for Occupational Safety and Health or the Director of the National Institute for Occupational Safety and Health.

(xiii) The employer shall maintain a record of the administered indoctrination program.

(n) *Reporting.*—Every employer subject to this section shall report in writing to the Occupational Safety and Health Administration, Office of Standards, the following information:

(1) The address of each of his regulated areas;

(2) The name and other identifying information as to the particular carcinogens present in each of his regulated areas;

(3) The approximate number of employees entering each of his regulated areas during a representative week of normal operations in the regulated areas; and

(4) The manner in which the carcinogens are present in each of his regulated areas, e.g., whether a carcinogen is manufactured, processed, used, repackaged, released, or otherwise handled.

(o) *Permit for the Use of Carcinogens.*—A use permit system shall be initiated as an integral part of the permanent standard to provide for effective regulation of conditions and practices concerning carcinogens to enhance the implementation of the standard.

## BROKER-DEALER MODEL COMPLIANCE PROGRAM ADVISORY COMMITTEE

**Notice of Public Meetings**

Pursuant to sec. 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, 86 Stat. 770, the Securities and Exchange Commission announces the following public advisory committee meetings.

The Commission's Advisory Committee on a Model Compliance Program for Broker-Dealers, established on October 25, 1972 (Securities Exchange Act Release No. 9835), will hold meetings open to the public at the Appraisers' Building, 630 Sansome Street, Room 1329, San Francisco, California on September 13, 1973, and at the office of the National Association of Securities Dealers, Inc., 425 California Street, Room 1400, San Francisco, California on September 14-15, 1973. These meetings will commence at 9:00 local time.

This Advisory Committee was formed to assist the Commission in developing a model compliance program to serve as an industry guide for the broker-dealer community. Assisted by this Committee's work the Commission plans to publish a guide to broker-dealer compliance under the securities acts in order to advise broker-dealers of the standard to which they should adhere if investor confidence in the fairness of the market place is to be warranted and sustained. The Committee's recommendations are not intended to result in the expansion of Commission rules governing broker-dealers but to inform broker-dealers as to the existing requirements and how they may comply with them.

The Committee's scheduled meetings will be for the purpose of reviewing drafts and proposals concerning the Committee's proposed report to the Commission on these compliance guidelines for broker-dealers.

These meetings are open to the public. Any interested person may attend and appear before or file statements with the Advisory Committee—which statements, if in written form, may be filed before or after the meeting or, if oral, at the time and in the manner and extent permitted by the Advisory Committee.

## CITIZENS AND SOUTHERN CAPITAL CORP.

### Filing of Application

AUGUST 31, 1973.

Notice is hereby given that the Citizens and Southern Capital Corporation (Applicant), P.O. Box 4899, Atlanta, Georgia, 30302, a closed-end, nondiversified investment company registered under the Investment Company Act of 1940 (Act) and licensed as a small business investment company under the Small Business Investment Act of 1958, has filed an application pursuant to sec. 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Pursuant to an Agreement and Plan of Reorganization approved by its stockholders on May 29, 1973, Applicant transferred substantially all of its assets to Citizens and Southern Holding Company (Holding Company) in exchange for the assumption by Holding Company of substantially all the liabilities of Applicant and the transfer by Holding Company to Applicant of shares of the issued and outstanding common stock of the Citizens and Southern National Bank (the Bank). Following this exchange with Holding Company, Applicant consummated a liquidation distribution of the Bank stock by delivering the Bank stock to the Stock Transfer Division of the Bank as exchange agent for Applicant's shareholders. Applicant's shareholders, with the exception of the Bank received a prorata liquidation distribution of the Bank stock. The Bank, as a shareholder of Applicant, received certain assets of Applicant (which could not be transferred to Holding Company pursuant to Federal Regulations) and Bank stock. Applicant retained, and presently holds as its sole asset, an amount of cash for the purposes of paying any shareholders of Applicant who dissented from the transaction and paying Applicant's expenses in connection with the transaction and the liquidation and dissolution of Applicant. Any moneys remaining will be paid to Holding Company.

Applicant, which will be dissolved under Georgia law immediately following completion of those acts necessary to terminate Applicant as a legal entity, represents as follows: the transaction set forth in the Agreement and Plan of Reorganization has been consummated; the Small Business Investment Company license of Applicant has been surrendered; all dissenting shareholders have been paid; and the Exchange Agent is exchanging shares of the Bank stock for shares of Applicant's stock. Applicant is in a state of liquidation and the only activities now being conducted by Applicant are those necessary to legally terminate Applicant as a business entity. Applicant no longer has any employees or separate office and does not hold itself out as being engaged in the business of investing, reinvesting or trading in securities.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order the registration of such company shall cease to be in effect.

*Notice is further given*, That any interested person may, not later than September 25, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application may be issued by the Commission upon the basis of the information stated in the application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
*Secretary.*

## EASTERN UTILITIES ASSOCIATES BROCKTON EDISON CO.

### Notice of Certain Proposed Transactions

AUGUST 29, 1973.

Notice is hereby given that Eastern Utilities Associates (EUA), P.O. Box 2333, Boston, Massachusetts, 02107, a registered holding company, and Brockton Edison Company (Brockton), 36 Main Street, Brockton, Massachusetts, 02403, its electric utility subsidiary company, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act) designating secs. 6, 7, 9, 10, and 12 of the Act and Rules 43, 44, and 50 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Brockton proposes to increase its capital stock by $8,000,000 consisting of 320,000 additional shares of its common stock, par value $25.00 per share and to sell such additional shares to EUA at par value. This additional common stock will be pledged by EUA to The First National Bank of Boston as Trustee under EUA's Indenture and Deed of Trust dated as of October 1, 1953, as supplemented.

Brockton also proposes to issue 30,000 shares of its — percent preferred stock, par value $100.00 per share and to sell such shares at competitive bidding. The preferred stock's dividend rate (which shall be a multiple of .04 percent of the par value) and the price to be paid for the preferred stock (which shall not be less than $100 nor more than $102.75 per share) will be determined by competitive bidding.

Brockton further proposes to issue and sell $10,000,000 principal amount of its First Mortgage and Collateral Trust Bonds at competitive bidding, said Bonds to mature on a single date not earlier than September 1, 1978 nor later than September 1, 2003. The proposed interest rate to be paid on the Bonds (which shall be a multiple of ⅛ of 1 percent) and the price to be paid to Brockton (which shall not be less than 100 percent or more than 102¾ percent of the principal amount) will be determined by competitive bidding. The bonds will be issued under the Indenture of First Mortgage and Deed of Trust dated as of September 1, 1948, between Brockton and State Street Bank and Trust Company, Trustee, as heretofore supplemented and as to be further supplemented by a Ninth Supplemental Indenture between Brockton and the Trustee.

The proceeds from the sale of the additional common stock will be applied to reduce $8,000,000 in advances on open account from EUA. The net proceeds from the sale of the new preferred stock and the new Bonds will also be applied to reduce such advances from EUA and any balance not so applied will be applied to the prepayment or reduction of Brockton's short-term notes to banks. Such borrowings from EUA and from banks have been or will be incurred in part to provide funds for construction purposes and in part for the purchase of securities of Montaup Electric Company (or to repay borrowings so incurred).

Applicants-declarants state that the proposed increases in capital stock and the proposed issuance and sale of common stock, preferred stock and Bonds are subject to the jurisdiction of the Department of Public Utilities of the Commonwealth of Massachusetts. It is stated that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses to be incurred in connection with the proposed transactions (to be paid by Brockton) and fees and expenses of counsel for the bidders (to be paid by the successful bidders) will be supplied by amendment.

Notice is further given that any interested person may, not later than September 27, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated addresses and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
*Secretary.*

## EXCELSIOR INCOME SHARES, INC.

### Notice of Application

AUGUST 31, 1973.

Notice is hereby given that Excelsior Income Shares, Inc. (the Fund), 20 Exchange Place, New York, New York 10005, a diversified, closed-end management investment company registered under the Investment Company Act of 1940 (Act), has filed an application for an order of the Commission pursuant to Section 6(c) of the Act declaring that James H. Walker (Walker) shall not be deemed an "interested person" of the Fund within the meaning of Section 2(a)(19) of the Act solely by reason of his status as a director of the Equitable Life Assurance Society of the United States (Equitable). All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Walker, a member of the board of directors of the Fund, is also a director of Equitable, a mutual insurance company incorporated under the laws of New York, which is in the business of selling life insurance and variable annuities. Equitable sells individual variable annuities funded by separate accounts that are registered under the Securities Act of 1933. Solely because it sells variable annuity contracts and HR-10 plans, Equitable has registered as a broker-dealer under the Securities Exchange Act of 1934 and is a member of the National Association of Securities Dealers, Inc. (NASD).

In December, 1971, Equitable organized a wholly-owned brokerage subsidiary, Equico Securities, Inc. (Equico), which is a member of the Philadelphia-Baltimore-Washington Stock Exchange. Equico is not at present registered as a broker-dealer under the Securities Exchange Act of 1934, nor is it at present a member of the NASD. The Fund is informed that Equico deals only in listed securities, and acts as a broker solely for Equitable.

The Fund represents that neither Equitable nor Equico has ever engaged in securities transactions on behalf of the Fund or participated in the distribution of shares of the Fund. Furthermore, the Fund warrants that, so long as Walker remains a director of the Fund, it will not knowingly purchase any securities from or through, or sell any securities to or through, Equitable or any subsidiary of Equitable, and Equitable will not be permitted to participate in any distribution of the Fund's shares.

The Fund represents, that Walker in no way participates in the day-to-day operations of Equitable, and that he is neither a director nor an officer of Equico, nor in any other way a participant in the day-to-day operations of Equico.

Section 2(a)(19) of the Act, in pertinent part, defines an "interested person" of an investment company to include any broker or dealer registered under the Securities Exchange Act of 1934, or any affiliated person of such broker or dealer. Section 2(a)(3) of the Act defines an affiliated person of another person to include any director of such other person.

Walker, as director of Equitable, is an affiliated person of a broker or dealer, and is thus an "interested person" of the Fund.

Section 6(c) of the Act provides that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act or of any rule or regulation under the Act if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The Fund contends that Walker should not be deemed an "interested person" of the Fund because his affiliation with Equitable does not affect, and will not impair, his independence in acting on behalf of the Fund and its shareholders, and the requested exemption is therefore consistent with the provisions of sec. 6(c) of the Act.

Notice is further given that any interested person may, not later than September 26, 1973, at 5:30 p.m., submit to the Commission in writing a request for hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in the application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS.

## FDF 120 ACCUMULATOR PLAN FINANCIAL PROGRAMS, INC.

### Notice of Application

AUGUST 31, 1973.

Notice is hereby given that The FDF 120 Accumulator Plan (Applicant), formerly FDF Monthly Accumulation Plan (MAP) For the Accumulation of Shares of Financial Dynamics Fund, Inc., registered as a unit investment trust under the Investment Company Act of 1940 (the Act), and Financial Programs, Inc. (Sponsor), 900 Grant Street, Denver, Colorado 80201, the sponsor and depositor of Applicant, have filed an application pursuant to sec. 8(f) of the Act for an order declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicant, which filed a registration statement on Form N-8B-2 in October 1968, was created to facilitate monthly purchases by investors over a long term of shares of Financial Dynamics Fund, Inc. (the Fund), a diversified, open-end investment company. Shares of the Fund, which were sold to direct investors with a sales charge, were acquired by Applicant without sales charges. Applicant's monthly payment plans were, however, sold with a front-end sales charge, that is, up to 50 percent of the first year's payments could be used to pay the sales charges on a plan. In May 1971, Applicant elected to be governed by subsection 27(h) of the Act rather than by subsection 27 (a) and (d) of the Act, and thus became a "spread load" company, which, among other things, meant that no more than 20 percent of any payment could be deducted for sales loads. Applicant's assets were held by, and in the custody of the United Bank of Denver National Association (the Custodian) and a custodial fee was charged to plan-holder accounts to cover the custodian services.

On June 22, 1972, pursuant to action by the Fund's board of directors, the charge on the sale of Fund shares was eliminated, and since that date, Fund shares have been offered to the public at net asset value. The Sponsor has assumed all expenses incident to the adoption of a no-load sales policy by the Fund, and Applicant has ceased selling monthly payment plans and has ceased charging a maintenance fee with respect to existing monthly payment plans.

On April 30, 1973, the Fund, the Sponsor, and the Custodian terminated the custodianship of Applicant's assets. All former holders of Applicant's monthly payment contractual investment plans are now shareholders of record of the Fund, and all of such shareholders accounts are being maintained and serviced by the Sponsor pursuant to the investment supervisory and services agreement between Sponsor and the Fund. Applicant's outstanding monthly payment plan certificates are deemed to represent the shares of Fund now held of record by the respective former planholders, and, at the option of such former planholders, such plan certificates may be surrendered, for Fund share certificates or for redemption at net asset value. The Fund will mail to former planholders of Applicant notices of termination of the custodianship. The notice will describe the rights and options available to them as record owners of Fund shares maintained in open investment accounts. All expenses in connection with the termination of the custody agreement and the distribution of the underlying shares of Fund have been assumed by Sponsor.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 25, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted or he may request he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time later than said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in such application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

## GUIDELINES ON THE UTILIZATION AND DISSEMINATION OF UNDISCLOSED MATERIAL INFORMATION

### Extension of Time for the Submission of Comments

On August 1, 1973, the Securities and Exchange Commission solicited comments from interested members of the public concerning an ongoing study by the Commission's staff of the utilization and dissemination of nonpublic material information. Reference should be made to Securities Exchange Act Release No. 10316 (Aug. 1, 1973).

In response to numerous requests from individuals and organizations for an extension of time with which they may develop and prepare meaningful comments on the important issues, the Commission has determined to extend the period for the submission of comments so that comments may be submitted up to and including October 15, 1973.

By the Commission.

## INNOVEN CAPITAL CORP.

### Filing of Application

AUGUST 29, 1973.

Notice is hereby given that InnoVen Capital Corporation (Applicant), Park 80 Plaza West-One, Saddle Brook, New Jersey 07662, a Delaware corporation incorporated on September 27, 1972, has filed an application pursuant to sec. 6(c) of the Investment Company Act of 1940 (Act), for an order of the Commission exempting it from all the provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicant was organized to make venture capital investments. Its authorized capital stock consists of 3,220 shares of Voting Common Stock, par value $.01 per share (Voting Common Stock); 19,800 shares of Non-Voting Convertible Preferred Stock, par value $.01 per share (Non-Voting Preferred Stock); and 23,020 shares of Non-Voting Common Stock, par value $.01 per share (Non-Voting Common Stock).

All of the shares of Applicant's Voting Common Stock were issued on November 8, 1972, for an aggregate consideration of $200,000, to Messrs. Gerald A. Lodge, John R. Andrews, Jr., and Raun J. Rasmussen, who continue to hold such shares. Messrs. Lodge, Andrews, and Rasmussen constitute the three-man Board of Directors of Applicant and serve, respectively as Chairman of the Board, President and Treasurer, and Executive Vice-President and Secretary of Applicant.

Applicant represents that it has not made, and does not propose to make, a public offering of its securities. Since its incorporation, Applicant has solicited 12 prospective investors, including Monsanto Company (Monsanto), a Delaware corporation, and Techno-Ventures, Inc. (Techno-Ventures), a Delaware corporation which is a wholly-owned subsidiary of Emerson Electric Company (Emerson). Monsanto and Techno-Ventures have each purchased 5,000 shares of Applicant's Non-Voting Preferred Stock at a price of $1,000 per share as of May 7, 1973.

Under purchase agreements dated as of April 30, 1973, between Applicant and Monsanto and Applicant and Techno-Ventures, Applicant has agreed to offer to transfer to Monsanto and Emerson, without further consideration, manufacturing or marketing licenses which it may acquire from companies in which it invests, as well as any options it may acquire to purchase stock from major shareholders of companies in which it invests.

No other person has purchased any capital stock of Applicant, and Applicant states that it does not intend to sell any of its capital stock to any person pending the determination of this Application, or until the expiration of nine months from May 7, 1973, whichever shall first occur. Consistent with the foregoing, Applicant states it may, however, during this period, negotiate with potential investors for the sale of shares of its Non-Voting Preferred Stock subsequent to the disposition of this Application. If and when any additional shares of Applicant's capital stock are sold, Applicant represents that only Non-Voting Preferred Stock will be sold.

It was originally intended, and is still contemplated, that Applicant will negotiate with and sell to institutional and corporate investors, in transactions not involving any public offering, up to 19,800 shares of its Non-Voting Preferred Stock at a price of $1,000 per share, thus creating an investment pool of $20,000,000 when aggregated with the $200,000 paid in by Messrs. Lodge, Andrews, and Rasmussen for their shares of Voting Common Stock.

It was similarly contemplated that, with the exception of Monsanto and Techno-Ventures and perhaps one other institutional investor, no investor would purchase Non-Voting Preferred Stock in an amount equal to 10 percent or more of the capital of Applicant. To the extent that less than $20,000,000 in capital is raised, Applicant states that it is possible that investments by others could be equal to 10 percent or more of Applicant's capital. However, no such actual or potential investor will invest more than a de minimis portion of its own assets in Applicant.

Pursuant to a resolution of Applicant's Board of Directors, no investor will be permitted to purchase shares of Applicant's Non-Voting Preferred Stock unless (1) such purchaser's investment represents less than 5 percent of its assets or (2) such purchaser's investment represents less than 10 percent of Applicant's capital. Furthermore, such stock will be sold to no more than 35 institutional or corporate investors, none of which will be an investment company within the meaning of Section 3 of the Act.

Applicant states that it has not registered as an investment company pursuant to sec. 8 of the Act, in reliance upon sec. 3(c)(1) of the Act which exempts from the definition of "investment company" an issuer whose outstanding securities are owned by not more than one hundred persons and which is not making and does not propose to make a public offering of its securities.

Section 3(c)(1) further provides that, for purposes of determining the number of the issuer's shareholders, the shareholders of a corporate investor shall be counted if such corporate investor itself owns 10 percent or more of the outstanding voting securities of the issuer

Applicant states that it has filed the application because it recognizes that a question of its status under sec. 3(c)(1) may exist even though the securities to be issued to corporate investors are "non-voting."

Applicant submits that it is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act for the Commission to enter an order exempting Applicant from all of the provisions of the Act for the reason that Applicant's present and potential investors, both by virtue of their institutional or corporate character, and by virtue of the de minimis nature of their investment in Applicant do not require the protections afforded by the Act.

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person or transaction from any provision or provisions of the Act to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 24, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
*Secretary.*

[File No. 812-3480]

## INVESTORS VARIABLE PAYMENT FUND, INC., ET AL.

### Filing of Application

AUGUST 30, 1973.

Notice is hereby given that Investors Variable Payment Fund, Inc. (Variable), IDS New Dimensions Fund, Inc. (New Dimensions), and IDS Progressive Fund, Inc. (Progressive), 1000 Roanoke Building, Minneapolis, Minnesota, 55402, Nevada corporations and open-end investment companies registered under the Investment Company Act of 1940 ("Act") (collectively referred to as Applicants), have filed an application for an order pursuant to sec. 17(d) of the Act and Rule 17d-1 thereunder permitting the Applicants (a) to enter into Exchange and Recapitalization Agreements with Fotomat Corporation (Fotomat) which provide for, among other things, the exchange of certain notes of Fotomat and warrants to purchase stock of Fotomat for other notes of Fotomat and warrants to purchase stock of Fotomat; and (b) to carry out the transactions contemplated by such Exchange and Recapitalization Agreements. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein which are summarized below.

Fotomat is a Delaware corporation principally engaged in the retail sale of film processing, film, photographic equipment and supplies.

Applicants presently hold, in the aggregate, $6,000,000 principal amount of 6 percent Convertible Subordinated Notes of Fotomat due October 1, 1984, (the 6 percent Notes) and warrants, expiring October 22, 1979, to purchase an aggregate of 240,000 shares of the Common Stock of Fotomat at a price of $20.00 per share, issued by certain stockholders of Fotomat in conjunction with the issuance of the 6 percent Notes (the Stockholders Warrants). Variable holds $3,000,000 principal amount of the 6 percent Notes and Stockholders Warrants to purchase 120,000 shares of Fotomat's Common Stock, and New Dimensions and Progressive each holds $1,500,000 of the 6 percent Notes and Stockholders Warrants to purchase 60,000 shares of Fotomat's Common Stock. The 6 percent Notes and Stockholders Warrants held by Applicants were purchased by them in October 1969. An additional $4,000,000 principal amount of 6 percent Notes and Stockholders Warrants to purchase another 160,000 shares of Fotomat Common Stock were also purchased in October 1969 by certain other investors and are now held by such other investors or their transferees.

In addition to its other businesses, Fotomat has operated two photo-processing plants on a joint venture basis for approximately one year. The management of Fotomat has informed the Applicants that in its view it would be desirable for Fotomat to expand into the field of photo processing on its own and that, accordingly, it has developed a proposed program calling for four processing plants to be placed in operation and future expansion dependent upon experience. Under the terms of the 6 percent Notes, and particularly the restrictions imposed on the amount of indebtedness which Fotomat may incur, Fotomat would be unable to implement its proposed program to enter the photo-processing area on the scale envisioned.

Fotomat has, therefore, requested the holders of the 6 percent Notes to agree to Fotomat's incurring up to $6,000,000 of indebtedness for the purpose of acquiring photographic processing facilities and equipment and up to $2,000,000 of indebtedness for general corporate purposes. It has also negotiated a transaction whereby Heizer Corporation (Heizer) and Bessemer Securities Corporation (Bessemer), who hold in the aggregate approximately 40 percent of Fotomat's Common Stock, warrants to purchase additional shares of Fotomat's Common Stock and approximately $9,500,000 of senior and subordinated notes of Fotomat (including $2,646,000 of the 6 percent Notes) will exchange $5,996,000 principal amount of such notes (other than the 6 percent Notes which will be retained by them) for 59,960 shares of a new class of Preferred Stock, Series A. This transaction will have the effect of reducing Fotomat's presently outstanding long-term indebtedness. In connection with such exchange, Fotomat has requested the consent of the holders of the 6 percent Notes to the payment of dividends on the Preferred Stock, Series A, to be issued.

Applicants propose to enter into Exchange Agreements with Fotomat pursuant to which the 6 percent Notes in the aggregate principal amount of $6,000,000 would be exchanged for $6,000,000 aggregate principal amount of Fotomat's 8½ percent Senior Notes due October 1, 1981 (the Notes), and the Stockholder Warrants to purchase an aggregate of 240,000 shares of Common Stock of Fotomat would be exchanged for new warrants issued by Fotomat to purchase an aggregate of 240,000 shares of its Common Stock (the Warrants). Each of the Applicants would receive, on such exchange, Notes having the same principal amount as the principal amount of the 6 percent Notes presently held by it and Warrants to purchase the same number of shares of Common Stock of Fotomat as are purchasable upon exercise of the Stockholders Warrants presently held by it. The Notes will not be convertible into Common Stock. The Warrants will be exercisable at an initial exercise price of $10.00, payable in cash or in Notes valued at par until October 1, 1984, except that such expiration date may be accelerated by Fotomat under certain conditions.

Investors Diversified Services, Inc. (IDS), a Minnesota corporation engaged in providing a broad range of financial services, acts as distributable of the shares issued by each of Variable, New Dimensions and Progressive. IDS also acts as investment adviser to each of Variable, New Dimensions and Progressive. Each of Variable, New Dimensions and Progressive has on its board of directors six individuals who are also directors of each of the other Applicants. Three other individuals are directors of both New Dimensions and Progressive. In addition, nine individuals serve as the same officers of each of the Applicants and such officers include all of the officers of Variable and Progressive and nine of the ten officers of New Dimensions.

Section 17(d) and Rule 17d-1, as here pertinent, make it unlawful for any affiliated person of a registered investment company, or any affiliated person of such person to effect any transaction in connection with a joint enterprise or other joint arrangement in which such registered investment company, or a company controlled by such registered investment company, is a participant unless an application regarding such joint enterprise or arrangement has been filed with and an appropriate order has been granted by the Commission. Rule 17d-1 provides that in passing upon such application the Commission will consider whether the participation of such registered or controlled company in such joint enterprise or arrangement on the basis proposed is consistent with the provisions, policies and purpose of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

By reason of the relationship described above, each of the Applicants may be deemed to be an "affiliated person" of each of the other Applicants or of the principal underwriter for the other Applicants. The execution by the respective Applicants of the Exchange Agreements and their carrying out of the transactions contemplated thereby and by the Notes and Warrants may be deemed to constitute a joint enterprise or joint arrangement.

The Applicants contend that the proposed recapitalization of Fotomat will substantially improve the position of each of the Applicants in Fotomat and that the participation in the recapitalization by each of the Applicants will be on the same basis.

Notice is further given, that any interested person may, no later than September 24, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or

## KORACORP INDUSTRIES, INC.

### Order Suspending Trading

AUGUST 27, 1973.

The common stock, $1 par value, of Koracorp Industries, Incorporated being traded on the New York Stock Exchange and the Pacific Coast Stock Exchange pursuant to provisions of the Securities Exchange Act of 1934 and all other securities of Koracorp Industries, Incorporated being traded otherwise than on a national securities exchange; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such exchanges and otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

*It is ordered*, Pursuant to secs. 19(a)(4) and 15(c)(5) of the Securities Exchange Act of 1934, that trading in such securities on the above mentioned exchanges and otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from August 28, 1973 through September 6, 1973.

By the Commission.

## LEAGUE LIFE SEPARATE ACCOUNT NO. 1

### Filing of Application

AUGUST 31, 1973.

Notice is hereby given that League Life Separate Account No. 1 (Applicant), 15600 Providence Drive, Southfield, Michigan 48075, a unit investment trust registered under the Investment Company Act of 1940 (Act), has filed an application pursuant to Section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations set forth therein which are summarized below.

Applicant was organized as a separate account of the League Life Insurance Company (Company), a Michigan insurance corporation, to enable the Company to offer variable annuity contracts. Although Applicant registered under the Act on December 28, 1970, by filing a Notification of Registration, it is a dormant organization that does not engage in any business activities, has no shareholders, has neither assets nor liabilities, and has never made and does not intend to make a public offering of its securities.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 26, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in the matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

## MUTUAL SECURITIES FUND OF BOSTON

### Order Pursuant to Section 6(c) of the Act for Limited Exemptions

AUGUST 31, 1973.

Mutual Securities Fund of Boston (Fund), 53 State Street, Boston, Massachusetts, a trust created under the laws of Massachusetts and an open-end, diversified investment company registered under the Investment Company Act of 1940 (Act), and all of its trustees, Joseph Leonard and William Priess, have filed a joint application pursuant to sec. 6(c) of the Act for exemptions from: (1) The provisions of sec. 16(a) of the Act to the extent necessary to extend to October 31, 1973, the period specified in sec. 16(a) of the Act within which a meeting of the holders of the outstanding voting securities of Fund (Beneficiaries) must be held to elect directors (trustees) of Fund pursuant to the requirements of sec. 16(a) of the Act, and (2) the provisions of secs. 32(a)(1) and 32(a)(2) of the Act insofar as is necessary to permit the filing with the Commission of financial statements of Fund for the fiscal year ended March 31, 1973, certified by Arthur Young & Company, provided the Beneficiaries of Fund ratify the selection of said firm at the next meeting of Beneficiaries.

The Commission on August 3, 1973, issued a notice of the filing of said application (Investment Company Act Release No. 7921). The notice gave interested persons an opportunity to request a hearing and stated that an order disposing of the matter might be issued on the basis of the information stated therein unless a hearing should be ordered. No request for a hearing has been filed and the Commission has not ordered a hearing.

The matter has been considered and it has been found that the granting of the requested exemptions is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

*It is ordered*, Pursuant to sec. 6(c) of the Act, that the application for the aforementioned exemptions from secs. 16(a), 32(a)(1), and 32(a)(2) of the Act to the extent noted be, and it hereby is, granted, effective forthwith.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS, *Secretary.*

## ROCKY RIVER REALTY CO.

### Notice of Proposed Purchase

AUGUST 30, 1973.

Notice is hereby given that The Rocky River Realty Company (Rocky River), Selden Street, Berlin, Connecticut, 06037, a nonutility subsidiary of Northeast Utilities (Northeast), a registered holding company, has filed an application-declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating secs. 6 and 7 of the Act and Rules 44 and 50(a)(5) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, as amended, which is summarized below, for a complete statement of the proposed transactions.

Rocky River proposes to purchase, pursuant to an agreement dated August 9, 1973, with Bernard Abrams, John B. Abrams, Robert D. Miller, and David Kotkin (Sellers) approximately 24 acres of land, together with warehouse and office buildings and site improvements, situated near Newington, Connecticut.

Rocky River proposes to pay the purchase price of the above described property, $1,275,000, in the following manner: (a) By assumption of four existing mortgages with an aggregate unpaid principal amount of $795,317.12 on the closing date of October 1, 1973, maturing variously from August 22, 1975, to September 1, 1986, and bearing interest varying from 5½ percent to 7 percent per annum; (b) by assumption of sewer liens of the Metropolitan District Commission in the aggregate amount of $29,094.39 as of October 1, 1973; and (c) by issuing its unsecured purchase money note to the Sellers in the aggregate amount of $441,962.67 bearing interest at 6 percent from September 1, 1973, and maturing January 2, 1974.

Rocky River proposes to obtain the funds with which to pay the aforesaid $441,962.67 note to the Sellers by borrowing from Northeast through a series of 5-year subordinated unsecured notes to be repaid within the five-year period from the proceeds of long term permanent financing, the nature and amount of which has not yet been determined. It is stated that the issue and sale of the 5-year subordinated notes, as well as the long term financing, will be the subject of separate applications to the Commission.

Rocky River further proposes to lease to Northeast Utilities Service Company (Services), the service company of the Northeast system, the property acquired in the foregoing manner for the purpose of providing additional facilities. It is stated that the lease will be at Rocky River's net costs, which will include compensation for the use of its capital. It is further stated that estimates of Rocky River's management indicate that the proposed purchase and lease arrangement will result in lower costs than would the construction of similar facilities.

It is stated that no fees or commissions are to be paid or incurred, directly or indirectly, in connection with the proposed transactions and that incidental services estimated at $500 will be performed at cost by Services. It is further stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Rocky River submits that the sale of its promissory note and assumption by it of the aforesaid mortgages should be exempt from Rule 50 by reason of clause (a)(5) thereof on the ground that the proposed transactions do not lend themselves as a practical matter to competitive bidding.

Notice is further given that any interested person may, not later than September 24, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended, or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

## ROYAL PROPERTIES INC.

### Order Suspending Trading

AUGUST 30, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, $5 par value and all other securities of Royal Properties Incorporated, being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

*It is ordered*, Pursuant to sec. 15(c)(5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from August 31, 1973, through September 9, 1973.

By the Commission.

GEORGE A. FITZSIMMONS, *Secretary.*

## SOUTHERN COMPANY

### Notice of Post-Effective Amendments

AUGUST 29, 1973.

Notice is hereby given that The Southern Company (Southern), P.O. Box 720071, Atlanta, Georgia 30346, a registered holding company, and two of its electric utility subsidiary companies, Alabama Power Company (Alabama) and Georgia Power Company (Georgia) have filed with this Commission, further post-effective amendments to their application-declaration in this proceeding pursuant to secs. 6(a), 6(b), 7, and 12 of the Public Utility Holding Company Act of 1935 (Act) and Rules 45 and 50 promulgated thereunder as applicable to the proposed transactions.

By Orders dated December 26, 1972, and April 27, 1973 (Holding Company Act Release Nos. 17824 and 17945, respectively), the Commission, among other things, authorized Southern, Georgia, and Alabama to issue and sell unsecured notes to banks and/or commercial paper to dealers from time to time through March 31, 1974, up to an aggregate principal amount outstanding at any one time of $175,000,000, $300,000,000, and $130,000,000 for Southern, Georgia, and Alabama, respectively. In connection therewith applicants-declarants had collectively made arrangements with a group of New York banks for lines of credit aggregating $140,000,000, solely to provide backup for their commercial paper obligations under the above authorizations.

In said further posteffective amendments, it is stated that in addition to these lines of credit for the collective use of the three applicants-declarants, Georgia has made arrangements with the following New York City banks for lines of backup credit (supplemental credits) in the maximum amount indicated for each:

| | |
|---|---|
| Morgan Guaranty Trust Company | $35,000,000 |
| First National City Bank | 60,000,000 |
| Bankers Trust Company | 55,000,000 |
| Chemical Bank | 50,000,000 |
| Total | $200,000,000 |

No deposit balances are to be required in respect of the supplemental credits, but in lieu thereof each bank will charge a fee. The fee to be charged by each bank will vary and range from a minimum of .50 of 1 percent per annum to a maximum of .95 of 1 percent per annum based on a prime rate of 9½ percent per annum. Should the prevailing prime rate increase by 1 percent, the maximum fee would increase to 1.05 percent per annum. Three of the four banks will apply the fee rates to the total amount of their respective loan commitments whether or not any loans are outstanding thereunder; the other bank will apply the fee rate only to the unused balance of its commitment.

Borrowings under the supplement credits may be made through March 31, 1974. The interest rate to be charged by each bank will be based on a different formula: (a) on the basis of ¾ of 1 percent above its prevailing rate for 90-day bankers' acceptances; (b) and (c), on the basis of 120 percent and 115 percent, respectively, of their current prime rate; and (d), on its current rate for 90-day

V 38-173 SEP 7 73 XUM

certificates of deposit with certain adjustments. It is estimated that the lowest interest rate will be 10.875 percent per annum and the highest 12.27 percent per annum, under formulae (a) and (d), respectively.

The above-described supplemental credits may be cancelled by Georgia in whole or in part on three-days notice.

The terms and conditions of all other bank borrowings by the applicants-declarants (including Georgia) heretofore in this proceeding authorized will remain unchanged.

It is indicated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the transactions proposed in said posteffective amendments; a statement of the fees and expenses to be incurred in connection with said transactions will be supplied by amendment.

Notice is further given that any interested person may, not later than September 17, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said posteffective amendments to the application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as now amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulations, pursuant to delegated authority.

## UNITED STATES v. WHEELING-PITTSBURGH STEEL CORP.

### Notice of Proposed Consent Judgment

In accordance with Departmental Policy, 28 CFR § 50.7, 38 FR 19029, Notice is hereby given that on August 29, 1973, a proposed partial consent decree in *United States* v. *Wheeling-Pittsburgh Steel Corporation* was lodged with the United States District Court for the Western District of Pennsylvania. The proposed decree would establish effluent limitations for discharges from the company's coke plant located in Follansbee, West Virginia.

The Department of Justice will receive until October 9, 1973, written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States* v. *Wheeling-Pittsburgh Steel Corporation*, D.J. Ref. 90-5-1-1-102.

The proposed consent decree may be examined at the office of the United States Attorney, Seventh Avenue and Grant Street, Pittsburgh, Pennsylvania, at the Region III Office of the Environmental Protection Agency, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pennsylvania, and at the Pollution Control Section, Land and Natural Resources Division, Department of Justice, Room 2623, Department of Justice Building, Ninth Street and Pennsylvania Avenue Northwest, Washington, D.C. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section. In requesting a copy, please enclose a check in the amount of $1.70 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

WALLACE H. JOHNSON,

# DEPARTMENT OF THE INTERIOR

## Bureau of Land Management

## ASSOCIATE STATE DIRECTOR, ET AL.

### Delegation of Authority

Pursuant to redelegation of authority to State Director contained in FEDERAL REGISTER dated August 10, 1973 (FR Doc. 73-16605), the

Associate State Director, State Office
Chief, Division of Management Services, State Office
Chief, Branch of Administrative Management, State Office

are delegated the following procurement authority:

1. Negotiated contracts: May enter into contracts pursuant to section 302(c)(2) of the Federal Property and Administrative Services Act, regardless of amount. This authority is to be used for rental of equipment and aircraft and for procurement of supplies and services required for emergency fire suppression and presuppression, where the order exceeds $2,500.

2. Open market purchases: May enter into contracts pursuant to section 302(c)(3) of the Federal Property and Administrative Services Act, for supplies, services, and rental of equipment and aircraft not to exceed $2,500 per transaction; and for construction not to exceed $2,000 per transaction; provided that the requirement is not available from established sources of supply.

3. Established sources of supply: May procure supplies and services available from established sources of supply regardless of amount.

4. Capitalized property: May enter into contracts, under authority of subparagraphs 1, 2, or 3 above, as appropriate, for purchase of capitalized property.

If the purchase is to be charged to fire suppression funds, or if the item is it not included in an approved equipment budget, prior approval of purchase by the Assistant Director, Administration is required. This authority may be exercised only in a true emergency situation such as for immediate use in suppression of active fires and delivery for use on that fire is attainable.

The authority granted above may not be redelegated. This delegation of authority modifies previous redelegations of authority for the individuals named with regard to the procurement of capitalized property.

This redelegation of authority is effective September 10, 1973.

R. O. BUFFINGTON,
*Acting State Director.*

## HONOKOHAU STUDY ADVISORY COMMISSION

### Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Honokohau Study Advisory Commission will be held from 9 a.m. to 1 p.m. on September 15, 1973, in the Farrington High School Cafetorium, 1564 North King Street, Honolulu, Hawaii.

The Commission was established by Public Law 92-346 to provide advice to the Secretary of the Interior on matters relating to the making of a study of the feasibility and desirability of establishing as a part of the National Park System an area comprising the site of Honokohau National Historic Landmark.

Members of the Commission are as follows:

Colonel Arthur Chun, Kailua-Kona (Chairman); Rev. Henry K. Boshard, Kailua-Kona; Ms. Nani Mary Bowman, Honolulu; Mr. Fred Cachola, Waianae; Mr. Alika Cooper, Hilo; Dr. Kenneth P. Emory, Honolulu; Mr. Homer A. Hayes, Honolulu; Mr. Kwai Wah Lee, Hilo; Ms. Iolani Luahine, Kailua-Kona; Mr. George Naope, Hilo; Mrs. Abbie Napeahi, Hilo; Mr. George Pinehaka, Honaunau, Kona; Mr. David K. Roy, Kailua-Kona; Mr. Filipo Springer, Holualoa; and Mrs. Emily Kaai Thomas, Honolulu.

The matters to be considered at the meeting are:

1. Review of basic data gathered to date;

2. Review of outline of report;

3. Gathering of supplemental data and ideas from interested persons, agencies, and organizations.

The meeting will be open to the public, and participation is encouraged. Any person may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting, or who wish to submit written statements, may contact Robert L. Barrel, State Director, Hawaii, National Park Service, 677 Ala Moana Boulevard, Suite 512, Honolulu, Hawaii 96813.

Minutes of the meeting will be available for public inspection four weeks after the meeting at the Office of the State Director, Hawaii, and the Regional Director, Western Region, National Park Service, 450 Golden Gate Avenue, San Francisco, California 94102.

Dated August 31, 1973.

## PROPOSED IRRIGATION DISTRIBUTION SYSTEM FOR SAN LUIS WATER DISTRICT

### Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the proposed irrigation distribution system for San Luis Water District, Merced and Fresno Counties, California, under the distribution system loan program (Public Law 84-130).

The environmental statement concerns the proposed construction of a water distribution network for the purpose of furnishing irrigation water to 35,600 acres of the San Luis Water District on the west side of the San Joaquin Valley in Merced and Fresno Counties, California. Copies are available for inspection at the following locations:

Office of Ecology, Room 7620, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, Telephone (202) 343-4491.

Division of Engineering Support, Technical Services Branch, E&R Center, Denver Federal Center, Denver, Colorado 80225, Telephone (303) 234-3007.

Office of the Regional Director, Bureau of Reclamation, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825, Telephone (916) 481-6100.

Single copies of the draft environmental statement may be obtained on request to the Commissioner of Reclamation or the Regional Director. In addition, copies may be purchased from the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151. Please refer to the statement number above. Comments on the draft statement are requested to be submitted on or before October 23, 1973.

Dated August 31, 1973.

## COLORADO RIVER

### Notice of Reservation of Waters for Use on Federally Owned Lands in Arizona and California

Pursuant to the authority contained in the Boulder Canyon Project Act, dated December 21, 1928, 45 Stat. 1057, as amended, and consistent with the Supreme Court Decree of March 9, 1964, in Arizona v. California et al., 376 U.S. 340, notice is given that there is hereby reserved to the United States, out of the waters of the Colorado River, the annual consumptive use in 800 acre-feet for use on federally owned lands in Arizona and 1,000 acre-feet for use on federally owned lands in California, administered by the Bureau of Land Management of

V38-173 SEP 7 73 XUM

the Department of the Interior. The water is for culinary, sanitary, and related nonagricultural, domestic uses on Bureau of Land Management campsites, concession areas, and cabin sites involved in the recreational program of the Bureau of Land Management along the lower Colorado River.

The aforesaid reservations of water are subject and/or subordinate to:

(a) all existing rights to the use of the Colorado River waters, including, without limitation, present perfected rights and perfected rights described in Article II (D) of the aforesaid Supreme Court Decree:

(b) rights described in and provisions of existing water delivery contracts entered into by the Secretary of the Interior pursuant to the provisions of the Boulder Canyon Project Act or other applicable Federal statutes;

(c) the availability of water under the provisions of the Colorado River Compact, signed at Santa Fe, New Mexico, November 24, 1922, and the Boulder Canyon Project Act;

(d) the provisions of the Mexican Water Treaty, signed at Washington, D.C., on February 3, 1944; and

(e) the provisions of the Supreme Court Opinion of June 3, 1963, 373 U.S. 546, and the Supreme Court Decree of March 9, 1964, in Arizona v. California, et al., 376 U.S. 340.

The aforesaid reservation of water for use in Arizona is also subject and/or subordinate to the provisions of:

(a) the Colorado River Basin Project Act of September 30, 1968, 82 Stat. 885, particularly section 301(b);

(b) the Contract for Delivery of Water between the United States and the State of Arizona, dated February 9, 1944; and

(c) the Contract between the United States and the Central Arizona Water Conservation District for Delivery of Water and Repayment of Costs of the Central Arizona Project, Contract No. 14-06-W-245, dated December 15, 1972, particularly Article 8.7(c).

The aforesaid reservation of water for use in California is also subject and/or subordinate to the provisions of the California Limitation Act, Chapter 16, California Stats. 1929, page 38, approved March 4, 1929, and the California Seven Party Priority Water Agreement, dated August 18, 1931.

Dated August 30, 1973.

JACK O. HORTON,
*Assistant Secretary of the Interior.*

## DEPARTMENT OF AGRICULTURE

### Forest Service Pacific Northwest Region

### OREGON DUNES NATIONAL RECREATION AREA ADVISORY COUNCIL

#### Notice of Meeting

The Oregon Dunes National Recreation Area Advisory Council will meet on Friday, October 5, at 10:00 a.m. in the Neighborhood Facility in Coos Bay, Oregon.

The purpose of this meeting is to discuss the inholdings within the National Recreation Area and to listen to those who have questions about this subject.

The meeting will be open to the public. Persons who wish to attend should notify Pamela Wilson, P.O. Box 1148, Corvallis, Oregon, 97330. The telephone number is 503-752-4211, extension 502. Written statements may be filed with the committee before or after the meeting.

The committee has established the following rules for public participation. Any member of the public who wishes to speak must be recognized by the council chairman. The council chairman will decide the time when public participation will take place.

Dated September 5, 1973.

SPENCER T. MOORE,
*Forest Supervisor.*

[FR Doc.73-18998 Filed 9-6-73;8:45 am]

## DEPARTMENT OF COMMERCE

### Maritime Administration

[Docket No. S-386]

### NATIONAL SHIPPING CORP.

#### Notice of Application

Notice is hereby given that National Shipping Corporation has filed an application for operating-differential subsidy on one (1) hatchless bulk carrier (to be constructed) of approximately 40,000 deadweight tons. Said vessel will be used primarily in the carriage of wood products from the West Coast of Canada to the East Coast of the United States and phosphate from Florida to the West Coast of Canada, but may at times be operated in other worldwide service in the foreign commerce of the United States in the carriage of liquid bulk cargoes and dry bulk cargoes not subject to the cargo preference statutes including 10 U.S.C. 2631, 46 U.S.C. 1241, and 15 U.S.C. 616a.

Any party having an interest in such application and who would contest a finding of the Board that the service now provided by vessels of United States registry for the worldwide carriage of liquid and dry bulk cargoes, not subject to the cargo preference statutes, moving in the foreign commerce of the United States or in any particular trade in the foreign commerce of the United States is inadequate, must, on or before September 20, 1973, notify the Secretary in writing of his interest and of his position and file a petition for leave to intervene in accordance with the Board's rules of practice and procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under sec. 605(c) of the Merchant Marine Act, 1936, as amended, and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing.

In the event that a sec. 605(c) hearing is ordered to be held, the purpose of such hearing will be to receive evidence relevant to whether the service already provided by vessels of U.S. registry for the worldwide movement of liquid and dry bulk cargoes in the foreign oceanborne commerce of the United States is inadequate and whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing the Maritime Subsidy Board will take such action as may be deemed appropriate.

Dated August 31, 1973.

By Order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
*Secretary.*

(Catalog of Federal Domestic Assistance Program No. 11.504, Operating-Differential Subsidies (ODS).)

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

[Docket No. FDC-D-638; NADA No. 6-226V]

### AMERICAN CYANAMID CO.

#### Led-O-San; Notice of Withdrawal of New Animal Drug Application

In the FEDERAL REGISTER of July 17, 1973 (38 FR 19059), the Commissioner of Food and Drugs published a notice proposing to withdraw approval of new animal drug application (NADA) No. 6-226V for Led-O-San (a product which contains calcium polysulfide and hexachlorophene) marketed by American Cyanamid Co., Post Office Box 400, Princeton, N.J. 08540.

American Cyanamid Co. responded to said notice by requesting that NADA No. 6-226V be withdrawn. No other persons responded to the notice if opportunity for hearing.

Based on the grounds that there is a lack of substantial evidence that the drug will have all of the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, the Commissioner concludes that approval of said NADA should be withdrawn. Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343-351; 21 U.S.C. 360b) and under authority delegated to the Commissioner (21 CFR 2.120), approval of NADA No. 6-226V, including all amendments and supplements thereto, is hereby withdrawn effective on September 17, 1973.

Dated August 30, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

[FR Doc.73-19011 Filed 9-6-73;8:45 am]

[FAP 3B2926]

### E. I. Du PONT de NEMOURS & CO.

#### Notice of Filing of Petition for Food Additives

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 3B2926) has been filed by E. I. Du Pont de Nemours & Co., Wilmington, Del. 19898, proposing that the food additive regulations (21 CFR Part 121) be amended to provide for use of acrylonitrile styrene copolymers modified with butadiene styrene in the manufacture of bottles intended to hold soft drinks.

An environmental impact analysis report has been submitted by the petitioner. Copies of the report are available in the Office of the Assistant Commissioner for Public Affairs, Rm. 15B-42 or the Office of the Hearing Clerk, Food and Drug Administration, Rm. 6-86, 5600 Fishers Lane, Rockville, Maryland 20852.

As indicated elsewhere in this issue of the FEDERAL REGISTER, Food and Drug Administration actions on substances used or intended for use in the fabrication of plastic bottles for carbonated beverage and beer use will have a significant effect on the quality of the human environment and, therefore, will require an environmental impact statement. As this additional notice indicates, consideration is also being given to the necessity for the preparation of an environmental impact statement for plastic bottles that have been authorized for other beverage uses.

In the meantime, the petition is being reviewed with respect to the proposed safe use of the additive in the fabrication of bottles intended to hold soft drinks.

Dated August 13, 1973.

VIRGIL O. WODICKA,
*Director, Bureau of Foods.*

[FR Doc.73-19005 Filed 9-6-73;8:45 am]

[FAP 2B2806]

### ROHM & HAAS CO.

#### Notice of Withdrawal of Petition for Food Additives

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b), 72 Stat. 1786; 21 U.S.C. 348(b)), the following notice is issued:

In accordance with § 121.52 *Withdrawal of petitions without prejudice* of the procedural food additive regulations (21 CFR 121.52), Rohm & Haas Co., Independence Mall West, Philadelphia, PA 19105, has withdrawn its petition (FAP 2B2806), notice of which was published in the FEDERAL REGISTER of August 2, 1972 (37 FR 15443), proposing that § 121.2597 *Polymer modifiers in semirigid and rigid vinyl chloride plastics* (21 CFR 121.2597) be amended to provide for the safe use of copolymers produced by copolymerizing one or more of the monomers listed in paragraph (a)(1)(i) with styrene, provided that such copolymers contain no more than 75 weight-percent of polymer units derived from styrene; such copolymers being used alone or blended with currently regulated polymers, as modifiers in semirigid and rigid vinyl chloride plastic food-contact articles.

Dated August 28, 1973.

VIRGIL O. WODICKA,
*Director, Bureau of Foods.*

[FR Doc.73-19012 Filed 9-6-73;8:45 am]

### MANUFACTURERS AND DISTRIBUTORS OF PLASTIC BOTTLES FOR CARBONATED BEVERAGES AND BEER USE

#### Requirement of Environmental Impact Analysis Reports

Major Federal actions significantly affecting the quality of the human environment require an environmental impact statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA). Numerous food additive regulations have been issued for substances intended for fabrication into food containers. The Food and Drug Administration has also given advisory opinions to inquirers that certain substances fabricated into food containers are food additives under the conditions of their intended use.

The Commissioner of Food and Drugs recognizes the need for issuance of environmental impact statements concerning containers for food use. Full consideration in these statements will be given to the environmental issues relevant to FDA approvals of regulations for food additives and other agency actions taken on substances suitable for use in fabricating such containers. At this time, the Commissioner concludes that an environmental impact statement is necessary for FDA actions on substances used or intended for use in the fabrication of plastic bottles for carbonated beverage and beer use.

Section 6.1(e) of FDA's procedures for preparation of environmental impact statements (21 CFR 6.1(e)) provides that applications or petitions submitted on or after March 15, 1973, requesting action by the agency shall include an environmental impact analysis report. In order to initiate consideration of current proposals as well as prior actions, petitioners for food additive regulations, and all persons marketing articles pursuant to existing food additive regulations as well as recipients of advisory opinions (except those opinions stating that a substance is not subject to the Federal Food, Drug, and Cosmetic Act) issued prior to March 15, 1973, for substances used or intended for use in the fabrication of plastic bottles for carbonated beverage and beer use, are hereby notified that they are required to submit by December 6, 1973, an environmental impact analysis report containing the information prescribed by 21 CFR 6.1(g) and 121.51(c)(H). The Commissioner encourages joint submissions by trade associations and other groups covering related raw materials and/or finished products. Relevant data and information is also requested from all other interested persons.

The Food and Drug Administration is limiting this requirement for environmental impact analysis reports to substances suitable for fabrication of plastic bottles for carbonated beverage and beer use. The necessity of submitting environmental impact analysis reports for other plastic food containers and for other forms of food packaging will be announced by publication in the FEDERAL REGISTER at a later time.

This notice is issued pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1042, 1055, 72 Stat. 1784-1788, as amended; 21 U.S.C. 321(s), 348, 371(a)) and the National Environmental Policy Act (42 U.S.C. 4332(2)(C)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

Dated August 30, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

[FR Doc.73-19006 Filed 9-6-73;8:45 am]

### OVER-THE-COUNTER ANTIPERSPIRANT DRUG PRODUCTS AND OVER-THE-COUNTER TOPICAL ANTIBIOTIC DRUGS

#### Safety and Efficacy Review; Request for Data and Information

The FDA is undertaking a review of all over-the-counter (OTC) drug products for human use currently marketed in the United States, to determine that these OTC products are safe and effective for their labeled indications. This review will utilize expert panels working with FDA personnel.

A notice outlining procedures for this review was published in the FEDERAL REGISTER of May 11, 1972 (37 FR 9464).

To facilitate this review and a determination as to whether an OTC drug for human use is generally recognized as safe and effective and not misbranded under its recommended conditions of use, and to provide all interested persons an opportunity to present for the consideration of the reviewing experts the best data and information available to support the stated claims for all dosage forms of antiperspirant drug products and topical antibiotic drugs, the administration invites submission of data, published and unpublished, and other information pertinent to all active ingredients in such preparations.

FDA is aware that the following is not a complete list, but only representative of the kinds of active ingredients used in such products. FDA has conducted a literature search on each of them:

V 38-173 SEP 7 73 XUM

I. ANTIPERSPIRANTS

| | |
|---|---|
| Aluminum Chlorhydroxide | Sodium Aluminum Lactate |
| Aluminum Chloride | Aluminum Salts, General |
| Aluminum Formate | Zinc Peroxide |
| Aluminum Hydroxide | Zinc Phenolsulfonate (Zinc Sulfocarbolate) |
| Aluminum Phenolsulfonate (Aluminum Sulfocarbolate) | Zinc Salts, General |
| Aluminum Sulfate | Zirconyl Hydroxychloride |
| Aluminum Hydroxy Lactate | |

II. TOPICAL ANTIBIOTICS

| | |
|---|---|
| Bacitracin | Gramicidin |
| Neomycin | Tyrothricin |
| Polymyxin | |

FDA's literature search on antiperspirants covered the United States of America literature and other leading English language literature published since 1950 from the following sources:

Medlars (NLM and SUNY)
FDA Clinical Experience Abstracts
Quarterly Cumulative Index Medicus
Current List of Medical Literature
Index Medicus
JAMA Subject Index
DeHaen Drugs in Use
International Pharmaceutical Abstracts
Excerpta Medica
Abstracts of World Medicine
Biological Abstracts
Chemical Abstracts

FDA's literature search on topical antibiotics covered the United States of America literature and other leading English language literature published since 1965 from the following sources:

Medlars (SUNY)
FDA Clinical Experience Abstracts
DeHaen Drugs in Use
RINGDOC

The bibliographies of the literature searches are available to interested persons.

Interested persons are also invited to submit data on any other active ingredients used in antiperspirant or topical antibiotic drugs.

The FDA is aware that safety data on these ingredients may be available as a result of testing related to nondrug products, such as cosmetics. All interested parties are encouraged to submit at this time all available safety data for these ingredients, so that the conclusions reached will reflect the best information available.

This panel is not charged with reviewing the safety or effectiveness of the use of these ingredients in nondrug products such as cosmetics (e.g., deodorants for which no drug claims are made). However, the conclusions of the panel with respect to these ingredients for drug use may be utilized by the Food and Drug Administration in determining whether their use in cosmetics can continue to be justified. Thus, although the report and monograph prepared by this panel will cover only OTC drug use, the conclusions may well have a direct and substantial impact on all uses of these ingredients in consumer products.

To be considered, eight copies of the data and/or views must be submitted, preferably bound, indexed, and on standard size paper (approximately 8½ by 11 inches). All submissions must be in the format described below:

OTC DRUG REVIEW INFORMATION

I. Label(s) and all labeling (preferably mounted and filed with the other data—facsimile labeling is acceptable in lieu of actual container labeling).

II. A statement setting forth the quantities of active ingredients of the drug.

III. Animal safety data.
A. Individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
B. Combinations of the individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
C. Finished drug product.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination as to the safety of each individual active component.
5. Pertinent medical and scientific literature.
B. Combinations of the individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination as to the safety of combinations of the individual active components.
5. Pertinent medical and scientific literature.
C. Finished drug product.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination as to the safety of the finished drug product.
5. Pertinent medical and scientific literature.

IV. Human safety data.
A. Individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination as to the safety of each individual active component.
5. Pertinent medical and scientific literature.
B. Combinations of the individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination as to the safety of combinations of the individual active components.
5. Pertinent medical and scientific literature.
C. Finished drug product.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination as to the safety of the finished drug product.
5. Pertinent medical and scientific literature.

V. Efficacy data.
A. Individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination on the efficacy of each individual active component.
5. Pertinent medical and scientific literature.
B. Combinations of the individual active components.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination on the efficacy of combinations of the individual active components.
5. Pertinent medical and scientific literature.
C. Finished drug product.
1. Controlled studies.
2. Partially controlled or uncontrolled studies.
3. Documented case reports.
4. Pertinent marketing experiences that may influence a determination on the efficacy of the finished drug product.
5. Pertinent medical and scientific literature.

VI. A summary of the data and views setting forth the medical rationale and purpose (or lack thereof) for the drug and its ingredients and the scientific basis (or lack thereof) for the conclusion that the drug and its ingredients have been proven safe and effective for the intended use. If there is an absence of controlled studies in the material submitted, an explanation as to why such studies are not considered necessary must be included.

VII. If the submission is by a manufacturer, a statement signed by the person responsible for such submission, that to the best of his knowledge it includes unfavorable information, as well as any favorable information, known to him pertinent to an evaluation of the safety, effectiveness, and labeling of such a product. Thus, if any type of scientific data is submitted, a balanced submission of favorable and unfavorable data must be submitted. The same would be true of any other pertinent data or information submitted, such as consumer surveys or marketing results.

In order to avoid duplication, interested persons should not in their submissions include published literature listed in the FDA literature search. An abstract of all such literature will be provided to the panel. Upon request, the panel will be provided with the complete article. Interested persons may, of course, refer to such literature in their submissions by citation.

Submissions or requests for copies of the bibliographies of the FDA literature searches should be forwarded to:

Food and Drug Administration
Bureau of Drugs
OTC Drug Products Evaluation Staff (BD-109)
5600 Fishers Lane
Rockville, Maryland 20852

Data and information must be submitted on or before November 9, 1973.

Dated August 29, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

## JUVENILE PROBLEMS RESEARCH REVIEW COMMITTEE

### Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Juvenile Problems Research Review Committee, National Institute of Mental Health, September 13–14, 1973, 8:45 a.m.–5:00 p.m., Conference Room No. 5, Bldg. No. 31, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 8:45–9:15 a.m., September 13, 1973, for announcements and reports of recent administrative, legislative, and program developments and closed to the public from 9:15 a.m. to 5:00 p.m., September 13, 1973 and 8:45 a.m. to 5:00 p.m., September 14, 1973, to review grants in accordance with the provisions set forth in section 552(b)4 of Title 5 U.S. Code and 10(d) of P.L. 92–463.

Attendance by the public will be limited to space available. The NIMH Information Officer who will furnish summaries of the meeting and rosters of committee members is Mr. Ronald E. McMillen, Acting Director, Office of Communications, National Institute of Mental Health, Room 15–105 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, telephone 443–3600.

The Executive Secretary from whom substantive program information may be obtained is Dr. Joseph R. Marches, Executive Secretary, Juvenile Problems Research Review Committee, Applied Research Branch, Division of Extramural Research Programs, National Institute of Mental Health, NIH, Room 10–99 Parklawn Building, Rockville, Maryland 20852.

Dated August 27, 1973.

ROBERT W. BERLINER,
*Acting Deputy Director, NIH.*

### Office of Education

## ADVISORY COUNCIL ON DEVELOPING INSTITUTIONS

### Notice of Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92–463), that the next meeting of the Advisory Council on Developing Institutions will be held on October 1 and 2 from 9 a.m. to 4 p.m. in room 3008 at the Office of Education, 400 Maryland Avenue SW., Washington, D.C.

The Advisory Council on Developing Institutions was established by title III of the Higher Education Act of 1965 as amended. The Council is governed by the provisions of part D of the General Education Provisions Act and of the Federal Advisory Committee Act (P.L. 92–463). The Council shall assist the Commissioner in identifying the characteristics of developing institutions through which the purpose of title III may be achieved, and in establishing the priorities and criteria to be used in making grants under section 304(a) of that title.

The meeting of the Council shall be open to the public. The proposed agenda includes election of a Chairperson and Secretary, discussion of the process of evaluation and criteria for the Basic Program, explanation of the process and documents for evaluating proposals for the Advanced Program, and planning for a final report of the Council. Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the Deputy Commissioner of Higher Education located in Room 4025, 400 Maryland Avenue, SW.

Signed at Washington, D.C., on August 30, 1973.

PRESTON VALIEN,
*Director, College and University Unit, Office of the Deputy Commissioner for Higher Education.*

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of Interstate Land Sales Registration

[Docket No. N–73–192; Administrative Division Docket No. 73–80]

### APPLE VALLEY ENTERPRISES, INC.

### Notice of Hearing

Notice is hereby given that:

1. Apple Valley Enterprises, Inc., its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90–448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing dated August 26, 1973, which was sent to the developer pursuant to 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1) informing the developer of information obtained by the Office of Interstate Land Sales Registration showing that a change had occurred which affected material facts in the Developer's Statement of Record for Apple Valley Ranchettes Units 1 and 4, located in Cochise County, Arizona, and the failure of the Developer to amend the pertinent sections of the Statement of Record and Property Report.

2. The Respondent filed an answer August 8, 1973, in answer to the allegations contained in the Notice of Proceedings and Opportunity for a Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for a Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(b), *It is hereby ordered,* That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Administrative Law Judge Paul N. Pfeiffer, in Room 2251, Department of HUD Building, 451 7th Street SW., Washington, D.C., on September 17, 1973, at 10 a.m.

The following time and procedure is applicable to such hearing:

All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C. 20410, on or before September 10, 1973.

5. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceeding shall be determined against Respondent, the allegations of which shall be deemed to be true, and an Order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated August 31, 1973.

By the Secretary.

GEORGE K. BERNSTEIN,
*Interstate Land Sales Administrator.*

[FR Doc.73–19069 Filed 9–6–73;8:45 am]

[Docket No. N–73–193; Administrative Division Docket No. 73–81]

### APPLE VALLEY ENTERPRISES, INC.

### Notice of Hearing

Notice is hereby given that:

1. Apple Valley Enterprises, Inc., its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90–448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing dated July 24, 1973, which was sent to the developer pursuant to 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1) informing the developer of information obtained by the Office of Interstate Land Sales Registration showing that a change had occurred which affected material facts in the Developer's Statement of Record for Apple Valley Ranchettes Units 2, 3, and 5, located in Cochise County, Arizona, and the failure of the Developer to amend the pertinent sections of the Statement of Record and Property Report.

2. The Respondent filed an answer August 8, 1973, in answer to the allegations of the Notice of Proceedings and Opportunity for a Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for a Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(b), *It is hereby ordered,* That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Administrative Law Judge Paul N. Pfeiffer, in Room 2251, Department of HUD Building, 451 7th Street SW., Washington, D.C., on September 17, 1973 at 10:00 a.m.

The following time and procedure is applicable to such hearing:

All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C. 20410, on or before September 10, 1973.

5. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceeding shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated August 31, 1973.

By the Secretary.

## AMERICAN REVOLUTION BICENTENNIAL COMMISSION

### HORIZONS '76 ADVISORY GROUP

### Notice of Meeting

Notice is hereby given, pursuant to Executive Order 11671, that the following American Revolution Bicentennial Commission Horizons '76 Advisory Group meeting will be held on September 11 and 12, 1973.

The Horizons '76 Advisory Group will hold open meetings on September 11, 1973 and September 12, 1973 in Room 2008, New Executive Office Building, 726 Jackson Place NW. The Advisory Group membership is composed of thirty-five persons.

Items on the agenda include:

SEPTEMBER 11

Small group sessions with discussions in the areas of Citizenship, Community Development and Transportation, Health, Leisure and Environment, Economy and Human Values and Understanding.

SEPTEMBER 12

Status report on Commission activities.
Recommendations from group sessions held on September 11.
Evaluation and recommendation of the following proposals requesting official recognition:
- Green Survival—American Association of Nurserymen.
- Land '76—The Nature Conservancy.
- Expanded Keep America Beautiful Day Program—KAB, Inc.
- Double Arrow—Speech Communications Association.
- Handicapped Assistance Program—Oklahoma Foundation for Research and Development Utilization.
- Urban Environment—Schools of Architecture at the University of California—Rensselaer Polytechnic Institute.

Presentation of the Bicentennial Information System (BINET).

Dated August 29, 1973.

HUGH A. HALL,
*Acting Director, American Revolution Bicentennial Commission.*

[FR Doc.73–18938 Filed 9–6–73;8:45 am]

## UNITED STATES ATOMIC ENERGY COMMISSION

[Docket No. 50–255]

### CONSUMERS POWER COMPANY

### Notice of Issuance of Amendment to Facility License

The Atomic Energy Commission (the Commission) has issued, effective as of the date of issuance, Amendment No. 5 to Provisional Operating License No. DPR–20. The license authorizes the Consumers Power Company to possess and operate the Palisades Plant located in Covert Township in Van Buren County, Michigan. This amendment authorizes less restriction on the use of the previously authorized 4,000 kilograms of uranium-235.

The Consumers Power Company held a Special Nuclear Material license for possession of reactor fuel and fission chambers that was to be incorporated in the facility operating license when issued. However, through an administrative error the authorization was written for use of the uranium-235 for reactor fuel only. Therefore, this amendment corrects the error and permits the use of small quantities of the material contained in fission chambers. The use of the material for this purpose has been previously evaluated and found acceptable.

The Commission has found that the application for amendment complies with the requirements of the Atomic Energy Act of 1954, as amended, and the Commission's regulations published in 10 CFR Chapter I. The Commission has made the findings (relating to its review of the application) which are set forth in the amendment and has concluded that the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public and does not involve a significant hazards consideration.

For further details with respect to this amendment, see (1) the licensee's application for amendment dated August 1, 1973, and (2) the amendment to Facility License No. DPR–20, which are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan. A copy of Item (2) may be obtained upon request sent to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Directorate of Licensing.

Dated at Bethesda, Maryland, this 20th day of August 1973.

For the Atomic Energy Commission.

ROBERT J. SCHEMEL,
*Chief, Operating Reactors Branch No. 1 Directorate of Licensing.*

[FR Doc.73–19033 Filed 9–6–73;8:45 am]

[Docket No. 50–409]

### DAIRYLAND POWER COOPERATIVE

### Conversion of Provisional Operating Authorization to Provisional Operating License

Notice is hereby given that the Atomic Energy Commission ("the Commission") has converted Provisional Operating Authorization (POA) No. DPRA–6, issued to the Dairyland Power Cooperative (DPC) pursuant to 10 CFR Part 115 of the Commission's regulations, to Provisional Operating License No. DPR–45 pursuant to 10 CFR Part 50 of the Commission's regulations. POA No. DPRA–6 was issued to DPC by the Commission on October 31, 1969 and authorized operation of the Commission's La Crosse Boiling Water Reactor (LACBWR) located in Vernon County, Wisconsin, at power levels up to 165 megawatts (thermal). DPC has purchased the LACBWR from the Commission and plans to continue to operate the facility at the same power level and in the same manner as previously authorized under POA No. DPRA–6.

Part 115 of the Commission's regulations applies to certain Commission-owned reactors exempt from the licensing requirements of the Atomic Energy Act of 1954, as amended (Act). Generally, the procedures established in Part 115 parallel those of 10 CFR Part 50, which applies to reactors subject to the licensing requirements of the Act. In accordance with the provisions of Part 115, LACBWR was reviewed at the construction authorization stage, and again at the operating authorization stage, by the AEC regulatory staff and the Commission's Advisory Committee on Reactor Safeguards (ACRS). The public hearing procedures followed in the case of LACBWR also correspond to the procedures followed by the Commission with respect to Part 50 facilities. At the construction authorization stage a public hearing was held before an atomic safety and licensing board; and at the operating authorization stage the Commission provided an opportunity for a further public hearing.

In correspondence with the Commission, DPC has referred to its forthcoming application for conversion of the LACBWR provisional operating license to a full-term operating license. No such license will be issued, however, prior to the completion of safety and environmental reviews by the AEC regulatory staff, the issuance of a report by the ACRS, and the publication of an appropriate notice of proposed action and opportunity for hearing.

V 38 173 SEP 7 73 XUM

Provisional Operating License No. DPR–45 is effective as of its date of issuance and shall expire eighteen months thereafter unless extended for good cause shown, or upon an earlier superseding licensing action. This license supersedes and terminates POA No. DPRA–6.

The Commission has found that DPC's Application dated May 22, 1972, and supplements thereto dated July 14 and 21, 1972, and July 25, 1973, comply with the requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations published in 10 CFR Chapter I. The Commission has made the remainder of the findings required by the Act and the Commission's regulations, which are set forth in the license, and has concluded that the issuance of the license will not be inimical to the common defense and security or to the health and safety of the public. DPC has satisfied the provisions of 10 CFR Part 140 for financial protection and, concurrent with the issuance of the license, DPC is being required to execute an indemnity agreement.

Since operation of the facility and the operating staff and procedures are as previously reviewed and approved by the Commission and are not altered by the conversion of this provisional operating authorization to a provisional operating license, the Commission's regulatory staff also has concluded that this action does not involve significant hazards considerations, and that, therefore, notice of the proposed conversion of POA No. DPRA–6 is not required.

For further details with respect to this action, see (1) DPC's Application dated May 22, 1972, and supplements thereto dated July 14 and 21, 1972, and July 25, 1973, (2) Provisional Operating License No. DPR–45 and Change No. 12, and (3) the public records in Docket No. 115–5 relating to the authorization and operation of LACBWR which are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Sparta Free Library, P.O. Box 347, Sparta, Wisconsin 54565. A copy of item (2) may be obtained upon request sent to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 28th day of August 1973.

For the Atomic Energy Commission.

DENNIS L. ZIEMANN,
*Chief, Operating Reactors Branch No. 2, Directorate of Licensing.*

[FR Doc.73–18936 Filed 9–6–73;8:45 am]

[Docket Nos. 50–450, 50–451]

## DELMARVA POWER & LIGHT CO. AND PHILADELPHIA ELECTRIC CO.

### Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matter

Delmarva Power & Light Company, 800 King Street, Wilmington, Delaware 19899 and Philadelphia Electric Company, 2301 Market Street, Philadelphia, Pennsylvania 19101 (the applicants), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, have filed an application which was docketed on August 16, 1973, for authorization to construct and operate two generating units utilizing high temperature gas-cooled reactors. The application was tendered on April 30, 1973. Following a preliminary review for completeness, it was accepted on June 15, 1973.

The proposed nuclear facilities, designated by the applicants as the Summit Power Station, Units 1 and 2 will be located on a site in New Castle County, Delaware, approximately 1.2 miles south of the Chesapeake and Delaware Canal, 5 miles northeast of Middletown, Delaware and 15 miles southwest of Wilmington, Delaware. Each reactor is designed for initial operation at approximately 2,000 megawatts thermal, with a net electrical output of approximately 785 megawatts.

A notice of hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before October 30, 1973. The request should be filed in connection with Dockets Nos. 50–450–A and 50–451–A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street NW.; Washington, D.C. 20545 and at the Newark Free Library, Elkton Road and Delaware Avenue, Newark, Delaware 19711.

The applicants also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, an environmental report dated April 1973. Following a preliminary review for completeness, it was rejected on June 15, 1973 for lack of sufficient information. The applicants submitted a supplement to the environmental report on July 30, 1973 and the report was accepted. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations related to the proposed construction of the Summit Power Station, Units 1 and 2 is also being made available at the Delaware State Planning Office, Tomas Collins Building, 530 South Dupont Highway, Dover, Delaware 19901 and at the Wilmington Metropolitan Area Planning and Coordinating Council, 4613 Robert Kirkwood Highway, Wilmington, Delaware 19808.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Md., this 20th day of August 1973.

For the Atomic Energy Commission.

DARRELL G. EISENHUT,
*Acting Chief, Gas Coolant Reactors Branch, Directorate of Licensing.*

[FR Doc.73–18380 Filed 8–30–73;8:45 am]

[License No. 12–12267–03E]

## HONEYWELL, INC.

### Notice of Issuance of Byproduct Material License

Please take notice that the Atomic Energy Commission has, pursuant to § 32.26 of 10 CFR Part 32, issued License No. 12–12267–03E to Honeywell, Incorporated, 1500 West Dundee Road, Arlington Heights, Illinois 60004, which authorizes the distribution of Model TC 100A fire detector to persons exempt from the requirements for a license pursuant to § 30.20 of 10 CFR Part 30.

1. The devices are designed to detect incipient fires by responding to the products of combustion produced by thermal decomposition of building materials or contents prior to the appearance of visible smoke, flame, or appreciable heat. The sensitive element of the detector is an ionization chamber in which air flowing into the chamber is made conductive by alpha particles emitted by americium-241.

2. The byproduct material incorporated in the detector is americium in the oxide form contained in foils manufactured by Nuclear Radiation Developments (Model A–001) or by the Radiochemical Centre (Model AMM). The nominal activity contained in the unit is 12.2 microcuries but the maximum activity is 13.4 microcuries.

3. Each exempt unit will have a label identifying the manufacturer (Honeywell, Incorporated) and the byproduct material (americium 241) contained in the unit and recommending that the unit be returned to Honeywell, Incorporated for disposal.

A copy of the license and a safety evaluation containing additional information, prepared by the Directorate of Licensing, are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C.

For the Atomic Energy Commission.

Dated at Bethesda, Maryland, September 4, 1973.

JAMES C. MALARO,
*Chief, Materials Branch, Directorate of Licensing.*

[Docket No. 50–367]

## NORTHERN INDIANA PUBLIC SERVICE CO.

### Order Delaying Evidentiary Hearings

In the matter of Bailly Generating Station, Nuclear 1.

On August 29, 1973, the Joint Intervenors in the subject proceeding filed a motion requesting the instant Atomic Safety and Licensing Board (Board) to issue an Order that the next session of Evidentiary Hearings[1] be postponed until September 18, 1973, and that they be required to make available copies or summaries of their written testimony on September 13, 1973, instead of September 6, 1973. The primary basis for the motion is the recent illness of Mr. Theodore Falls, a principal technical consultant to the Joint Intervenors. The motion asserts that Mr. Falls' incapacitation will be of long duration, thereby, requiring the Joint Intervenors to seek a substitute witness in the preparation of their direct case.

On September 4, 1973, the Chairman of the Board, by telephone, consulted with all counsel to the proceeding on the motion, and agreement was reached whereby the Evidentiary Hearings scheduled for the week of September 11–14, 1973, commencing at 9 am, local time, will be rescheduled to commence on September 18, 1973, at the same time and place. With the exception of the first week, the schedule as outlined in the Board's Order of August 15, 1973, will remain in effect, with the further understanding that the hearings will continue every week—Tuesdays through Fridays—until completed.

In addition, Joint Intervenors have agreed to make available on September 6, 1973, copies or summaries of their written testimony in existence on that date. Any remaining copies or summaries of written testimony shall be made available on September 13, 1973.

There being good cause for granting the postponement of the schedule Evidentiary Hearings until September 18, 1973, the motion is granted in accordance with the understanding reached by the parties and the Chairman on September 4, 1973.

*It is so ordered.*

The Atomic Safety and Licensing Board.

Issued at Washington, D.C., this 5th day of September 1973.

JEROME GARFINKEL,
*Chairman.*

[FR Doc.73–19145 Filed 9–6–73;8:45 am]

[1] See Board's Order of August 15, 1973, which sets out the schedule for the resumption of the Evidentiary Hearings.

[Docket Nos. 50–448, 50–449]

## POTOMAC ELECTRIC POWER CO.

### Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matter

Potomac Electric Power Company (the applicant), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed an application which was docketed on August 9, 1973 for authorization to construct and operate two single cycle, forced circulation, boiling water nuclear reactors. The application was tendered on July 2, 1973. Following a preliminary review for completeness, it was found acceptable for docketing on August 6, 1973.

The proposed nuclear facilities, designated by the applicant as the Douglas Point Nuclear Generating Station, Units 1 & 2 are located on the east bank of the Potomac River, about 30 miles south-southwest of Washington, D.C., in Charles County, Maryland and are designed for initial operation at approximately 3,579 megawatts (thermal), with a net electrical output of approximately 1,178 megawatts.

A notice of hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before October 30, 1973. The request should be filed in connection with Dockets Nos. 50–448–A & 50–449–A.

The applicant has also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, an environmental report dated August 8, 1973. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations relative to the proposed construction of the Douglas Point Nuclear Generating Station, Units 1 and 2, is also being made available at the Department of State Planning, 301 West Preston Street, Baltimore, Maryland 21201, and at the Metropolitan Washington Council of Governments, 1225 Connecticut Avenue NW., Washington, D.C. 20036.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Md., this 14th day of August 1973.

For the Atomic Energy Commission.

WALTER R. BUTLER,
*Chief, Boiling Water Reactors, Branch 1, Directorate of Licensing.*

## CIVIL SERVICE COMMISSION

### CIVIL ENGINEER, DOVER, DEL.

#### Notice of Establishment of Minimum Rates and Rate Ranges

Under authority of 5 U.S.C. 5303 and Executive Order 11721, the Civil Service Commission has established special minimum salary rates and rate ranges as follows:

GS-810 CIVIL ENGINEER

Geographic coverage: Dover Air Force Base, Delaware.
Effective date: First day of the pay period beginning on or after September 16, 1973.

PER ANNUM RATES

| Grade | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|---|---|
| GS-5 | $10,007 | $10,264 | $10,521 | $10,778 | $11,035 | $11,292 | $11,549 | $11,806 | $12,063 | $12,320 |
| GS-7 | 11,105 | 11,422 | 11,739 | 12,056 | 12,373 | 12,690 | 13,007 | 13,324 | 13,641 | 13,958 |

All new employees in the specified occupational level will be hired at the new minimum rates.

As of the effective date, the base will process a pay adjustment to increase the pay of employees on the roles in the affected occupational levels. An employee who immediately prior to the effective date was receiving basic compensation at one of the statutory rates shall receive basic compensation at the corresponding numbered rate authorized by this notice on or after each date. The pay adjustment will not be considered an equivalent increase within the meaning of 5 U.S.C. 5335.

Under the provisions of section 3–2b, chapter 571, FPM, the base may pay the travel and transportation expenses to first post of duty under 5 U.S.C. 5723, of new appointees to positions cited.

(This special rate schedule for computer purposes is designated as Table No. 413.)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
*Executive Assistant to the Commissioners.*

## COMMISSION ON CIVIL RIGHTS

### ARIZONA

#### Postponement of Hearing

Notice is hereby given that the public hearing of the U.S. Commission on Civil Rights which was scheduled to commence on September 17, 1973, at the Navajo Civic Center, Window Rock, Arizona, has been postponed. When a new date for the hearing is established an announcement will be made.

Dated at Washington, D.C., September 5, 1973.

STEPHEN HORN,
*Acting Chairman.*

[FR Doc.73-19139 Filed 9-6-73;8:45 am]

### NEW MEXICO STATE ADVISORY COMMITTEE

#### Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the New Mexico State Advisory Committee will convene at 9:00 a.m. on September 8, 1973, at the Four Seasons Motor Inn, 2500 Carlisle Boulevard NE., Albuquerque, New Mexico 87110.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Southwestern Regional Office of the Commission, Room 209, New Moore Building, 106 Broadway, San Antonio, Texas 78205.

The purpose of this meeting shall be to discuss the role and functions of the State Advisory Committees, formulate plans for the reconstruction of the New Mexico State Advisory Committee, and design followup activity to the New Mexico Committee's Indian Project.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., September 4, 1973.

ISAIAH T. CRESWELL, JR.,
*Advisory Committee Management Officer.*

## COUNCIL ON ENVIRONMENTAL QUALITY

### ATLANTIC OUTER CONTINENTAL SHELF AND GULF OF ALASKA

#### Oil and Gas Development; Environmental Hearings

On August 14, 1973, the Council on Environmental Quality announced a series of public hearings to be held on the Environmental Impact of Potential Oil and Gas Development on the Atlantic Outer Continental Shelf and in the Gulf of Alaska. Dates, hours, and locations for the hearings are as follows:

WASHINGTON, D.C.:
September 12—9 a.m. to 5 p.m.; 7 p.m. to 10 p.m.
September 13—9 a.m. to 5 p.m.
National Academy of Sciences Auditorium, South Side of the 2100 Block of C Street NW., Washington, D.C. 20418.

BOSTON, MASS.:
September 18—9 a.m. to 5 p.m.; 7 p.m. to 10 p.m.
September 19—9 a.m. to 5 p.m.
Department of Transportation, Transportation Systems Center Auditorium, Kendall Square, Cambridge.

ANCHORAGE, ALASKA:
September 26—9 a.m. to 5 p.m.; 7 p.m. to 10 p.m.
September 27—9 a.m. to 5 p.m.
Anchorage Westward Ho Hotel, Anchorage, Alaska.

MINEOLA, NEW YORK:
October 3—9 a.m. to 5 p.m.; 7 p.m. to 10 p.m.
October 4—9 a.m. to 5 p.m.
Nassau County Social Services Building Auditorium, County Seat Drive, Mineola, Long Island.

PHILADELPHIA, PA. AND OCEAN CITY, MD.:
October 11—9 a.m. to 5 p.m.; 7 p.m. to 11 p.m.
Drexel University Mandel Theater, Drexel University, 32nd and Chestnut Street, Philadelphia, Pa. 19104.
October 12—1 p.m. to 5 p.m.; 7 p.m. to 11 p.m.
October 13 (if necessary)—9 a.m.–Noon.
Ocean City Convention Hall, Ocean City, Md.

JACKSONVILLE, FLA.:
October 16 and 17.
Location to be announced.

For additional information, refer to 38 FR 21956.

W. G. SAVAGE,
*Administrative Officer.*

[FR Doc.73-18937 Filed 9-6-73;8:45 am]

## ENVIRONMENTAL PROTECTION AGENCY

### PRETREATMENT STANDARDS

#### Notice of Hearing

On July 19, 1973, the Administrator of the Environmental Protection Agency published proposed pretreatment standards under section 307(b)(1) of the Federal Water Pollution Control Act, Public Law 92–500 (38 FR 19236). The period for public comment closed on September 4, 1973. Section 307(b)(1) requires that there be an "opportunity for public hearing" prior to promulgation of the standards, and at least one commenter has requested that a public hearing be held on the proposed pretreatment standards. Accordingly, notice is hereby given that a hearing on the proposed pretreatment standards will be held on Wednesday, September 26, 1973, at 9:30 a.m. in Room 3908, Waterside Mall, 401 M Street SW., Washington, D.C.

The hearing is intended to provide an opportunity for interested persons to state their views or arguments or to provide information on the proposed pretreatment standards. It is necessary that this hearing be held on less than 30 days' notice, since the Agency is obligated under the terms of a decree entered in the case of *N.R.D.C.* v. *Fri*, D.D.C. Civil No. 849–73, to promulgate the standards on or before October 15, 1973, and there must be sufficient time between the hearing and the date of promulgation to give the Agency an opportunity for meaningful consideration of the record of the hearing.

Mr. Robert V. Zener is hereby designated the Presiding Officer for the hearing. He will have responsibility for maintaining order, excluding irrelevant or repetitious material, and scheduling presentations.

In order to assist in the scheduling of statements, persons wishing to make a statement at the hearing are requested to file a notice of such intention, together with an estimate of the length of the statement, not later than five days prior to the hearing, to Mr. Robert V. Zener, Acting Deputy General Counsel, Waterside Mall, Room 511 West Tower, 401 M Street SW., Washington, D.C. 20460, 202/755–0753.

Dated September 5, 1973.

ROBERT L. SANSOM,
*Assistant Administrator for Air and Water Programs.*

[FR Doc.73-19182 Filed 9-6-73;8:45 am]

## FEDERAL COMMUNICATIONS COMMISSION

[FCC 73–888]

### COLUMBIA BROADCASTING SYSTEM, INC. ET AL.

#### Memorandum Opinion and Order Granting Waiver of Prime Time Access Rule

In the matter of request by Columbia Broadcasting System, Inc. for continued waiver of the prime time access rule for "one-time" network news and public affairs programs.

1. The Commission here considers a letter request by Columbia Broadcasting System, Inc. (CBS), dated August 16, 1973, asking (inter alia) for continuation of the waiver of the "prime time access rule", § 73.658(k) of the Commission's rules, with respect to "one-time" network news and public affairs programs, those not part of a regular series. A waiver of the rule to this effect has been in effect almost since it went into operation October 1, 1971, the last extension being through August 31, 1973. See 32 FCC 2d 55 (FCC 71–1036, October 1971) 37 FCC 2d 570 (FCC 72–906, October 1972), and 40 FCC 2d 355 (FCC 73–359, March 1973). The present CBS request is for continuation of the waiver until the final resolution of this and other matters by a decision in Docket 19622, the overall proceeding concerning the prime time access rule. CBS refers to its earlier submissions (including comments in Docket 19622) as to the reasons which assertedly support the waiver, and also asserts that extension at this time would be in accord with the Commission's general policy of maintaining the status quo, with respect to the prime time rule, pending the final decision mentioned.

2. Upon consideration of this matter, we are of the view that extension of the waiver is warranted, essentially in the form urged by CBS. In reaching this conclusion, we are not unmindful of the arguments which have been advanced against this waiver in the past (chiefly by Westinghouse Broadcasting Co., Inc.). Also, in view of the length of time which is likely to elapse before any fundamental change in the rule will become effective (at least until September 1974), it is not necessarily appropriate to maintain the status quo in the administration of the rule, in all respects. Nonetheless, the presentation of "special" news and public affairs programs of national significance is a matter of importance, and we do not find, in the material which has been filed in the overall proceeding (Docket 19622) reason to abandon speedily a policy designed to promote the presentation of such material by the networks, via waiver of the rule. In this case, it appears that the public interest is better served by continuation of the waiver policy, pending the completion of our overall consideration.

3. In view of the foregoing, *It is ordered*, That a waiver of § 73.658(k)(1) of the Commission's rules, the prime time access rule, is granted to the American Broadcasting Companies, Inc. (ABC), Columbia Broadcasting System, Inc. (CBS) and National Broadcasting Company, Inc. (NBC) networks, and their owned and affiliated stations in the top 50 markets, to present, without counting toward the permissible three hours of prime time network material, "one-time-only" news and public affairs programs (those not part of a series) through a date 30 days after the release of a decision in Docket 19622 which deals with the subject of network news and public affairs programming.

Released: August 31, 1973.

Adopted: August 29, 1973.

[SEAL] FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
*Acting Secretary.*

[FCC 73–887; Docket No. 19660 RM–690]

### INTERNATIONAL RECORD CARRIERS

#### Memorandum Opinion and Order Re Oral Argument En Banc

In the matter of International Record Carriers' scope of operations in the continental United States, including possible revisions to the formula prescribed under section 222 of the Communications Act.

1. The Commission has before it (a) Amended Complaint and Petition and Motion for Interim Relief filed May 17, 1973, by The Western Union Telegraph Company (WU), (b) Oppositions thereto filed June 29, 1973, by RCA Global Communications, Inc. (RCAGC), ITT World Communications Inc. (ITT WC), Western Union International, Inc. (WUI) and TRT Telecommunications Corporation, [38 FR 16660] and (c) Reply to Oppositions filed July 12, 1973, by WU.

2. WU's Amended Complaint and Petition and Motion for Interim Relief filed May 17, 1973, is an amendment to a Complaint and Petition filed July 23, 1970 requesting the Commission, pursuant to sections 222(e)(3) and 201(a) of the Communications Act, to issue an order increasing the division of charges for landline handling of outbound and inbound international message traffic from 6½¢ to 13¢ per word for full-rate messages with proportionate increases for other message classes.

3. The original Complaint and Petition noted that the landline handling charges for international telegrams were only about one-half of the charges existing in 1970 for the handling of interstate domestic telegrams. On the basis of the amended Complaint and Petition, it appears that due to an increase in charges for domestic telegrams, current charges for handling international telegrams are only at about one-third the level of domestic telegram handling charges.[1]

4. On December 13, 1972, the Commission adopted a Notice of Inquiry and proposed rulemaking instituting this Docket Proceeding and incorporated, for appropriate action, WU's original request for increase in landline charges for international messages together with a number of related issues concerning existing methods and practices of pickup and delivery of international traffic originating in or destined to the hinterland, and the overall relationship between WU and the international carriers.

5. In the likelihood that a determination of the appropriate landline charges in a proceeding involving other complex and related issues will be time-consuming, WU's amended pleading requests that the Commission grant it an interim increase in landline haul charges from 6½¢ to 11½¢ per word for full-rate messages and from 3¼¢ to 5¾¢ per word for letter telegrams with appropriate increases in other message classes.

WU PLEADING

6. In support of its requested interim increase WU maintains that it is faced with an immediate crisis in the form of severely depressed earnings from its Public Message Service (PMS) requiring immediate remedial relief. It asserts that in 1972 it incurred losses of over $15 million in providing total PMS, or a negative 8.9 percent return on investment, and that over two-thirds ($10.4 million) of this PMS deficiency has been incurred in the landline handling of international telegrams.[2] Continuation of these losses, asserts WU, would prejudice its long-term ability to provide vital public services. WU believes that landline haul charges for international messages should be set at a level equivalent to those of domestic messages. The latter charges, according to WU, while keeping interstate operations in the black, will not produce a fair return for the entire PMS, or regain an improving earning trend necessary to enable the company to restore its ability to raise new capital

[1] Commissioner Robert E. Lee dissenting; Commissioners Johnson and Reid absent; Commissioner H. Rex Lee dissenting and issuing a statement filed as part of original document.

[1] Increases in domestic telegram handling charges became effective August 13, 1973.

[2] According to WU, this is the greatest PMS deficiency in any recent year except 1971 when earnings were adversely affected by the largest strike in its history.

V38-173 SEP 7 73 XUM

and refinance existing debt at a reasonable cost. Further and major increases in domestic PMS charges at this time would, in WU's opinion, be imprudent and disrupt hoped for favorable reaction to service improvements from its modernization program.

7. In view of this, WU seeks an increase in revenues from the landline handling of international messages, which it characterizes as the largest contributor to the PMS earning deficiency.[3] It points out that there has been but one increase in such charges since 1958.[4] On the other hand, it states, rising unit costs required interstate PMS rates to be increased a number of times to 300 percent of the 1958 level. It believes the interim increases sought are no more than sufficient to meet a basic minimum revenue requirement for landline handling and are justified on the basis of the pleadings filed.

8. WU submitted the results of a cost study (which it states was made on a conservative estimate) showing that, on the basis of 1972 results, and assuming a pretax return of 18 percent, the revenue requirement in 1972 for the landline haul was $29.643 million, compared to actual landline haul revenues for that year of $14.260 million. It points out that its interim rate increase request would have resulted in $24.983 million and stresses that in reaching this figure as an interim goal it understated its cost for the service, and that by using a 9 percent target pretax return it also understated its return requirements.

9. Anticipating that the international record carriers (IRC's) would be unwilling to absorb the increased interim charges and, therefore, pass them on to the public, WU recommends that the existing maximum levels applicable to International Public Message Service charges of the bellwether carrier (RCAGC) be removed.[5] With such removal it suggests that the international carriers would be free, pursuant to section 203 and Part 61 of the Rules, to file increased charges for International Telegram Services, supported by relevant cost and market data. In the interim, to assure protection of the public, WU proposes that the Commission impose an accounting order with respect to any such increases requiring WU and the international carriers to account for any increased charges collected from the public and to effect a refund of such portion, if any, of the interim increase found, after hearing, to be excessive.

10. WU appended its amended Complaint and Petition with a Memorandum of Law directed to the Commission's authority to grant, pursuant to sections 4(i), 4(j), 201(a) and 222(e)(3) of the Communications Act, the requested interim relief. The company also submitted affidavits of two officers, setting forth facts in support of its pleading.[6]

OPPOSITION PLEADINGS

11. In view of the similarity of the oppositions of the international carriers (RCAGC, WUI, ITTWC and TRT), they are summarized without specific identification as follows:

(a) An interim increase, without hearing, is contrary to the hearing requirements of sections 201(a) and 222(e)(3)[7], which require, as indicated by the Commission in prior cases as well as rule, a determination on the record after opportunity for hearing; no exception is made for interim relief, and there are material issues of fact;

(b) the matter of landline divisions is at issue in Docket No. 19660, along with a number of other matters involving the relationship between WU and the record carriers, all of which the Commission has stated are interrelated; a grant of interim relief to WU would violate that procedure, and such request is tantamount to a tardy request for reconsideration of this procedure which is barred by statute;

(c) Western Union has argued, in oral argument in Docket No. 19660 on the question of whether prior section 222 authority is necessary to the filing by IRC's of free hinterland direct access tariffs; that, in view of the potential $6 million loss to it from such practices, there should be a hearing and an investigation on such matter in the context of section 222 prior to the filing of such tariffs; similarly, there should be a hearing on the requested interim landline increase in view of the potential $9.5 million impact on the IRC's; [8]

(d) an accounting order against WU will not necessarily safeguard the IRC's in view of past Commission action on domestic PMS and telex increases; moreover, the use of millions of dollars would be lost during the interim period; nor would a pass-through to the public in the form of increased international message rates necessarily protect the IRC's since such increase could diminish volume to an extent affecting total international PMS revenues;

(e) to grant the requested interim increase would cause possible irreparable injury to the international carriers unless the Commission also grants their requests for new operating centers and direct access proposals contained in Docket No. 19660, which could provide an alternative to increased international charges;

(f) WU's claims of severe financial crisis are dubious; WU's Annual Report for 1972 shows overall net earnings of $40.8 million, the highest since 1968, and it has recently floated a $60.5 million bond issue;

(g) the validity of WU's cost allocations which base revenue requirements for landline haul upon an allocation of costs between the domestic service and domestic handling of international messages is questionable because it omits to take into account declining volume of domestic traffic and generally stable volume of international traffic and in effect transfers a large revenue requirement burden from domestic users to international users; accordingly, a full hearing is required to measure the impact of this burden before any increase is ordered; and

(h) an accounting order against the international carriers (assuming a pass-through to the public) is impractical; the administrative details and cost of maintaining a file on all customers who send messages during the interim period, locating them, and determining the amount of the refund, would be staggering.

DISCUSSION

12. We have carefully reviewed the points and authorities advanced by WU to support the proposition that the Commission, notwithstanding the hearing requirements of section 222(e)(3), is empowered to grant interim relief, pending completion of such hearing. We have also reviewed the international carriers' oppositions with equal care. We believe that the question is sufficiently important to warrant a full briefing and oral argument on the conditions, if any, under which the Commission may grant interim relief to WU.

Accordingly, *It is ordered*, That oral argument is hereby scheduled to be heard before the Commission *en banc* at its offices in Washington, D.C., on September 25, 1973, at 9:00 A.M. on the following question:

Under what circumstances, if any, may the Commission grant the request of Western Union, in whole or in part, for an interim increase in landline charges for outbound and inbound international messages?

*It is further ordered*, That the parties to the oral argument, and the time allotted to each, shall be as follows:

| | *Minutes* |
|---|---|
| Western Union Telegraph Company | 60 |
| ITT World Communications Inc | 15 |
| Western Union International, Inc | 15 |
| RCA Global Communications, Inc | 15 |
| TRT Telecommunications Corporation | 15 |

*Provided, however*, That should the parties agree among themselves to a different allocation of time, or should the international carriers agree among themselves on a different allocation of the time allotted to them as a group, the Commission should be so notified one week in advance of the date set herein for oral argument; and

*Provided, further*, That The Western Union Telegraph Company may reserve for rebuttal a portion of the time allocated to it.

*It is further ordered*, That the above-named parties shall, on or before, September 17, 1973, file an original and 19 copies of a brief on the matters in question.

Adopted: August 29, 1973.

Released: August 31, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[9]

## LEXINGTON COUNTY BROADCASTERS, INC. AND WILLIAM D. HUNT

### Memorandum Opinion and Order Enlarging Issues

In re applications of Lexington County Broadcasters, Inc., Cayce, South Carolina and William D. Hunt, Cayce, South Carolina, for construction permits.

1. This proceeding, involving the mutually exclusive applications of Lexington County Broadcasters, Inc. (Lexington County) and William D. Hunt (Hunt) for a new FM broadcast station in Cayce, South Carolina, was designated for hearing on a standard comparative issue by an Order issued by the Chief of the Broadcast Bureau, acting under delegated authority of the Commission, 37 FR 16820, published August 19, 1972. On September 5, 1972, Lexington County filed a petition to enlarge issues, requesting several issues against Hunt, including a Rule 1.65 issue on the ground that Hunt allegedly failed to fully report the broadcast interests of his wife, Agnes C. Hunt. By Memorandum Opinion and Order, released April 27, 1973,[1] the Review Board denied Lexington County's petition, stating, with respect to the Rule 1.65 issue, that, "[w]hile Hunt did not report [certain] changes [in his wife's broadcast interests], the omissions are not serious, appear to be the result of inadvertence, and appear to have no decisional significance," 40 FCC 2d at 696, 27 RR 2d at 420. Shortly thereafter, on May 14, 1973, Lexington County filed another petition to enlarge issues (styled a "petition to broaden issues") which is now before the Board [38 FR 18585].[2] In its petition, Lexington County requests the Board to add the following six issues against Hunt:

(1) To determine the extent to which William D. Hunt concealed material facts from the Commission with respect to his pending application and whether William D. Hunt has kept his application current and complete as required by Section 1.65 of the Commission's Rules.

(2) To determine whether William D. Hunt's proposed bookkeeper, Agnes C. Hunt, engaged in fraudulent billing practices while Comptroller-Treasurer at Station WTMP, Tampa, Florida.

(3) To determine the facts and circumstances surrounding the Station WTMP promotion, "Soul Night", the use of the proceeds therefrom, and the participation of Agnes C. Hunt, therein.

(4) To determine whether any person other than William D. Hunt has an interest in the latter's application and, if so, the nature and extent of such interest.

(5) To determine whether grant of the application of William D. Hunt would contravene the Commission's policies against "cross-interests".

(6) To determine whether, in light of the above issues, William D. Hunt is qualified to become a Commission licensee.

2. Lexington County's petition is predicated upon Agnes C. Hunt's relationship with: (a) her husband's application; (b) Speidel Broadcasters, Inc.;[3] and (c) Station WXRY(FM), Columbia, South Carolina.[4] Petitioner contends that events have occurred since the filing of its September 5 petition (see paragraph 1, *supra*) which demonstrate that the Board was misled with respect to Mrs. Hunt's actual relationship to her husband's application and the reasons that he concealed pertinent information concerning her other broadcast interests; and that most of these facts were not revealed until release of the Commission's Memorandum Opinion and Order in Docket 19674 (*WOIC, Inc.*, 39 FCC 2d 355, 26 RR 2d 790) on February 1, 1973, designating the renewal application of Station WOIC for hearing. According to Lexington County, the Commission found that serious questions had been raised concerning improper conduct by WOIC's licensee in the operation of Station WTMP, Tampa Florida. The Commission therefore designated issues to determine whether the licensee engaged in fraudulent billing practices at WTMP and whether it diverted to its own use funds which WTMP had collected in connection with a "Soul Night" contest it promoted.[5] Lexington County contends that Hunt concealed the fact that his wife was a party to his application because of her involvement in the purported misconduct by WOIC's licensee.[6] In addition to being a party to the application, petitioner contends, Mrs. Hunt is also a principal of her husband's proposed station, since she originated the proposal, has been active in implementing it, and is willing to invest in it funds held jointly with her husband, co-sign notes for it, work at the station at a management level without salary, and participate in the formulation of station policy.[7] Lexington County also maintains that the Commission's cross-interest policy would be violated if Hunt's application is granted because Mrs. Hunt would then be chief financial officer of her husband's proposed station, the bookkeeper at WOIC, and, in addition, would have a 50 percent interest in a bookkeeping service which maintains the books of Station WXRY(FM) in Columbia (see note 4, *supra*).[8]

3. The Broadcast Bureau and Hunt oppose the petition on procedural and substantive grounds. They maintain that Lexington County has not sufficiently supported its allegations that Mrs. Hunt was involved in the purported misconduct at WTMP,[9] that she has any undisclosed interests in her husband's application, or that her bookkeeping service for more than one station in the area gives rise to a cross-interest issue. In addition, the Bureau contends that the issues relating to the acts of misconduct are unwarranted since the misconduct was allegedly committed at another station by a proposed employee who is not a stockholder, officer or director of the applicant. Hunt maintains, furthermore, that the assistance his wife has willingly offered him in pursuance of his application does not raise any hidden interest question, but only demonstrates her fealty to him.

4. In reply, Lexington County contends that Hunt has attempted to quash any inquiry into his wife's involvement in the application, or into her interests in WOIC's renewal application, in order to isolate his application from the taint stemming from the fraudulent practices which have been raised in WOIC's renewal application, and in which Mrs. Hunt apparently participated, since these disclosures would have affected his

[1] Commissioners Johnson and Reid absent.

[2] 40 FCC 2d 694, 27 RR 2d 416.

[3] Also before the Board for consideration are: (a) opposition, filed May 29, 1973, by the Broadcast Bureau; (b) opposition, filed May 30, 1973, by Hunt; and (c) reply, filed June 14, 1973, by Lexington County.

[4] In mid-1968, when Speidel Broadcasters, Inc., the licensee of Station WTMP(AM), Tampa, Florida, was allegedly engaged in fraudulent billing practices and misuse of monies collected in a contest that station sponsored, Agnes C. Hunt was an officer and director of several standard broadcast stations, including WTMP and WOIC(AM), Columbia, South Carolina, all of whose corporate licenses were owned or controlled by Speidel Broadcasters. Thereafter, control of these stations' licensee corporations was transferred, with Commission approval, to Joe Speidel III, as an individual. Mrs. Hunt terminated her positions with WTMP when its license was assigned, with Commission approval, in 1972, to a new corporate owner. At present, she holds no other positions with the Speidel stations except for WOIC.

[5] Agnes C. Hunt is a 50 percent partner in Broadcasting Accounting Service, which performs accounting services for WXRY(FM).

[6] The issues read as follows:

(1) To determine whether standard broadcast Station WTMP, while under the ownership and control of Joe Speidel III, engaged in fraudulent billing practices;

(2) To determine with respect to the aforenoted period, the facts and circumstances surrounding the Station WTMP promotion, "Soul Night", and the use of the proceeds therefrom.

[7] Lexington County maintains that Agnes C. Hunt was directly involved in the business practices of WTMP and that her involvement is evidenced by copies of correspondence between her and a client of WTMP who was allegedly fraudulently billed by the station. Copies of the correspondence are attached to the petition.

[8] Lexington County contends that these facts are borne out by Hunt's own application and by depositions he and his wife gave in September 1972.

[9] The Board notes that the city of Columbia is located immediately east of Cayce and is within Hunt's proposed service area.

[9] Hunt also opposes addition of the misconduct issue on the basis that investigating the facts surrounding the alleged misconduct in this proceeding would interfere with the conduct of the collateral proceeding in Docket 19674 involving WOIC's renewal application.

V38-173
SEP 7 73
XUM

application. Petitioner also contends that Mrs. Hunt was the impetus behind the application and that her role in "fomenting, formulating and financially undergrading" it was important and of the type normally associated with control and ownership. Finally, petitioner maintains that Mrs. Hunt's interlocking relationship as bookkeeper at her husband's station, as an officer, director, and bookkeeper of WOIC, and as an accountant of WXRY(FM), violates the Commission's cross-interest doctrine since Mrs. Hunt will have access to confidential information which could potentially impair competition among the three stations.

5. The Review Board is of the opinion that Lexington County filed its petition inexcusably late and that no good cause for the untimeliness has been shown. See *RKO General, Inc. (WNAC–TV)*, ____ FCC 2d ____, 27 RR 2d 1537 (1973); *WIOO, Inc.*, 40 FCC 2d 217, 26 RR 2d 1611 (1973). The allegations are based, for the most part, on facts which have been a matter of Commission record for nearly eight months before the petition was filed. No new or additional facts supporting these issues were revealed by the February 1, 1973, Commission Memorandum Opinion and Order, *supra*, in Docket 19674, and, even assuming that that Order provided information upon which this petition is based, there is no justification for the delay of over three months after it was released before Lexington County filed its petition. *Cf. Chapman Radio and Television Co.*, 38 FCC 2d 508, 25 RR 2d 1187 (1972). Furthermore, there is no merit to most of petitioner's allegations. We do believe, however, that the petition raises a serious question concerning the possible effect Mrs. Hunt's relationship with three stations in the Columbia-Cayce area may have on competition among those stations. See *The Edgefield-Saluda Radio Co.* (*WJES*), 5 FCC 2d 148, 8 RR 2d 611 (1968). We will consider the issues *seriatim*.

6. On the merits, petitioner's request for the addition of issues relating to Mrs. Hunt's involvement with WOIC and WTMP is deficient. The Commission's February 1, 1973, Memorandum Opinion and Order, *supra*, in Docket 19674, does not "make clear" that Mrs. Hunt participated in the fraudulent practices at issue in the WOIC renewal proceeding, as petitioner contends,[10] and no showing has been made in the instant petition that Mrs. Hunt was involved in either the conduct of the "Soul Night" contest or in the alleged fraudulent billing practices at WTMP. Petitioner's allegations concerning Mrs. Hunt's involvement in the alleged misconduct are based on speculation and surmise, and are therefore procedurally infirm. See § 1.229(c) of the Commission's rules. In addition, Mrs. Hunt's role in connection with the Speidel radio stations is explained in affidavits of Mrs. Hunt and Joe Speidel, III, which are attached to Hunt's opposition. According to the affidavits, Mrs. Hunt was named director and, in some cases, an officer of Speidel Broadcasters, Inc. stations, but she was not involved in the daily operations of the stations or in the maintenance of billing records; and, furthermore, she was unable to furnish billing information when it was sought (see note 10, *supra*) only because records had been destroyed in a fire. In view of the foregoing, issues against Hunt in this proceeding are clearly unwarranted. *Cf. Michael D. Haas*, 38 FCC 2d 451, 22 RR 2d 1114 (1972). Likewise, Lexington County's request for a Rule 1.65 issue is without merit. Mrs. Hunt's connections with WOIC have been previously reported.[11] While Hunt failed to list the pendency of WOIC's *renewal* application until an amendment to his application was filed on February 26, 1973, the omission is not serious and does not appear to be of any decisional significance. See *RKO General, Inc. (WNAC–TV), supra; Auburn Publishing Company*, 34 FCC 2d 134, 24 RR 2d 29 (1972). *Cf. Gross Broadcasting Co. (KJOG–TV)*, FCC 2d, 27 RR 2d 1543 (1973). Petitioner's request for a real party-in-interest issue is also premised on conjecture and surmise. Specifically, petitioner fails to show that Mrs. Hunt will exercise control over the proposed station[12] merely on the bases of her relationship with her husband, the general nature of the assistance she has given him in preparing the application, her willingness to release her interest in jointly held property in order that her husband may use it in connection with the proposed station, her promise to work at the proposed station without salary, or her promise to co-sign notes. *Cf. Central Westmoreland Broadcasting Co.*, 40 FCC 2d 21, 26 RR 2d 1638 (1973).

7. The Board is of the view, however, that Mrs. Hunt's roles: (a) as bookkeeper for WXRY(FM); (b) as comptroller-treasurer for WOIC; and (c) as bookkeeper for her husband's proposed FM station, raise serious questions as to whether a grant of Hunt's application may violate the Commission's long-standing cross-interest policy. Simply stated, her connections with all three of these stations could potentially impair competition among them and that would certainly not be in the public interest. See *Shenandoah Life Insurance Co.*, 19 RR 1 (1959); *Martin Lake Broadcasting Co.*, 21 FCC 2d 180, 18 RR 2d 245 (1970). See also *K&M Broadcasters, Inc.*, 19 FCC 2d 947, 17 RR 2d 543 (1969). The cross-interest policy emanating from § 73.240 of the Commission's rules technically applies only where an applicant has a "meaningful relationship" with a station in the same service and when there is a 1 mv/m overlap between these stations. There is no question that there would be 1 mv/m overlap between Hunt's proposed station and WXRY;[13] and although WOIC is a standard broadcast station, and Hunt is applying for an FM station, the public interest considerations underlying the Commission's cross-interest policy appear to be equally applicable. Thus, the potential for the impairment of arms length competition among WOIC, WXRY and Hunt's proposed station presents a substantial question and must be explored in hearing. As Lexington County states in its reply, "with respect to each station, Mrs. Hunt will have access to confidential information including . . . financial records, costs, salaries, customer lists, and rate deals. The potential for abuse . . . need not be belabored." Therefore, an appropriate issue will be added. *Cf. Town Radio, Inc.*, 26 FCC 2d 44 (1970); *Bangor Broadcasting Corp.*, 33 FCC 2d 677, 23 RR 2d 711 (1972).

8. *Accordingly, it is ordered*, That the petition to broaden issues, filed May 14, 1973, by Lexington County Broadcasters, Inc., is granted to the extent indicated below, and is denied in all other respects; and

9. *It is further ordered*, That the issues in this proceeding are enlarged to include the following:

To determine whether Agnes C. Hunt's interests as bookkeeper in WXRY(FM) and in her husband's proposed station, as well as in WOIC as its comptroller-treasurer, provide a potential for the impairment of open, arms length competition among broadcast stations serving substantially the same area, contrary to the principles underlying the Commission's cross-interest policy, and, if so, the effect thereof on the basic and/or comparative qualifications of William D. Hunt to be a Commission licensee.

10. It Is Further Ordered, That the burdens of proceeding with the introduction of evidence and proof under the issue added herein Shall Be on William D. Hunt.

Adopted: August 27, 1973.

Released: August 28, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[14]

[SEAL] VINCENT J. MULLINS,
*Assistant Secretary.*

[FR Doc.73-19025 Filed 9-6-73;8:45 am]

[10] In *WOIC, Inc., supra*, the Commission determined that serious questions had been raised concerning alleged wrongdoings at WTMP, but, regarding Mrs. Hunt's involvement, stated only that, as comptroller of the Speidel Corp., she had responded to an inquiry from James Brown Productions regarding an accounting of the money it spent at the station in 1968 for advertising by replying that "we are unable to supply the information you request from the station's records."

[11] See our April 27, 1973, Memorandum Opinion and Order, *supra*.

[12] "[The test for determining whether a third person is a real party in interest is whether that person has an ownership interest, or is or will be in a position to actually or potentially control the operation of the station." *Sumiton Broadcasting Co., Inc.*, 15 FCC 2d 400, 405, 14 RR 2d 1000, 1007 (1968).

[13] Although there was no showing by Lexington County that a 1 mv/m overlap with WXRY(FM) would result if Hunt's application were granted, the Board is taking official notice that such an overlap would occur and would be substantial. Hunt's application indicates that his proposed site is within the vicinity of the transmitter-antenna site of WXRY(FM). Furthermore, Cayce and Columbia are separated only by the Congaree River and the license files of WXRY and WOIC show that their primary contours now cover Cayce, and Hunt's application shows that his 1 mv/m contour would encompass Columbia. In view of these facts, Lexington County's failure to show 1 mv/m overlap is not fatal. *Cf. Golden West Broadcasters*, 16 FCC 2d 918, 15 RR 2d 938 (1969).

[14] Board member Nelson did not participate. Board member Pincock concurred in result.

## OVERSEAS COMMON CARRIER SERVICES

### Trial of New Procedures for Processing Section 214 Applications

AUGUST 31, 1973.

Effective September 10, 1973, the Commission is informally instituting, on a trial basis, new procedures for processing formal and informal applications relating to overseas common carrier services filed pursuant to section 214 of the Communications Act of 1934. The new procedures will be in effect until March 31, 1974.

Under the new procedures, an overseas carrier applying for section 214 authority will serve other interested common carriers at the time of filing of the application. (Service to other parties now performd by the Commission will continue.) Certificates of service will accompany the applications when filed.

Public notice will be given, as is presently done, of applications acceptable for filing, after which all interested parties will have 14 days rather than the present 20 days in which to file comments. In the case of applications requesting section 214 authority for projects involving unusual questions or major construction, *e.g.*, cable/satellite use questions, environmental impact questions, etc., the Commission may specify a longer pleading period.

The Commission hopes to reduce the delay in processing applications by use of the new experimental procedures while still affording enough time for comments to be filed. Extension of time to file comments will be granted for good cause shown.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] VINCENT J. MULLINS,
*Acting Secretary.*

[FR Doc.73-19026 Filed 9-6-73;8:45 am]

## FEDERAL POWER COMMISSION

[Docket No. G-6083, *et al.*]

### MESA PETROLEUM CO.

### Notice of Petition To Amend

AUGUST 27, 1973

Take notice that on August 6, 1973, Mesa Petroleum Co. (Petitioner), P.O. Box 2009, Amarillo, Texas 79105, filed in Docket No. G-6083, *et al.*, a petition to amend the orders issuing certificates of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act to Pubco Petroleum Corporation (Pubco) by substituting Pubco as certificate holder, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it has acquired the producing properties of Pubco and proposes to continue without change sales of natural gas in interstate commerce authorized to be made by Pubco.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 21, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
*Secretary.*

[Docket No. G-4579, et al.]

## CITIES SERVICE OIL CO. (OPERATOR), ET AL.

### Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

AUGUST 28, 1973.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before September 21, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
*Secretary.*

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

## NATIONAL POWER SURVEY—TECHNICAL ADVISORY COMMITTEE ON FUELS

### Notice of Meeting and Agenda

Agenda for a meeting of the Task Force—Administrative of the Technical Advisory Committee on Fuels, to be held at the Federal Power Commission Offices, 825 North Capitol St. NE., Washington, D.C. 20426, September 13 and 14, 1973, 9:30 A.M., E.d.s.t., Room 6200.

1. Meeting called to order.
2. Objectives and purposes of meeting.
A. Approval of minutes of meeting August 7, 1973.
B. Review comments of task force reports.
C. Continue the drafting of TAC on Fuels report.
D. Other business.
E. Date for next Task Force—Administrative meeting.
3. Adjournment.

NOTE.—This will be a meeting of the Task Force—Administrative for the purpose of preparing draft report of TAC on Fuels. It is anticipated the meeting will require two days. Committee members who desire to contribute to the preparation of the report are invited to attend.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19058 Filed 9-6-73;8:45 am]

## NATIONAL POWER SURVEY—TECHNICAL ADVISORY COMMITTEE ON FUELS

### Notice of Meeting and Agenda

Agenda for a meeting of the Task Force—Administrative of the Technical Advisory Committee on Fuels to be held at the Federal Power Commission Offices, 825 North Capitol St. NE., Washington, D.C. 20426, September 13 and 14, 1973, 9:30 A.M., E.d.s.t., Room 6200.

1. Meeting called to order.

## NATIONAL POWER SURVEY—TECHNICAL ADVISORY COMMITTEE ON RESEARCH AND DEVELOPMENT

### Notice of Meeting and Agenda

Agenda Ninth Meeting of the Technical Advisory Committee on Research and Development to be held at the Federal Power Commission Offices, 825 North Capitol Street, NE., Washington, D.C., 8:30 a.m., September 12, 13, and 14, 1973, Room 5200.

1. Meeting called to order by FPC Coordinating Representative.
2. Objectives and purposes of meeting.

SEPTEMBER 12

A. Approval of minutes of June 14 meeting.
B. Report of Task Force on Environmental Research (8:30 a.m.–12:30 p.m.).
C. Report of Task Force on Energy Systems Research (1 p.m.–5 p.m.).

SEPTEMBER 13

D. Report of Task Force on Energy Conversion Research (8:30 a.m.–12:30 p.m.).
E. Report of Task Force on Energy Distribution Research (1 p.m.–5 p.m.).

SEPTEMBER 14

F. Report of Task Force on Energy Sources Research (8:30 a.m.–12:30 p.m.).
G. Meeting among TAC Chairman and Five Task Force Chairmen (1 p.m.–5 p.m.).
H. Other business.
I. Dates of future meetings.
3. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

[Docket No. CI74-134]

## APEXCO, INC.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 21, 1973, Apexco, Inc. (Applicant), P.O. Box 2299, Tulsa, Oklahoma 74101, filed in Docket No. CI74-134 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Transwestern Pipeline Company from the South Carlsbad Field, Eddy County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell approximately 30,000 Mcf of gas per month for one year at 55.0 cents per Mcf at 14.65 p.s.i.a., subject to upward and downward B.t.u. adjustment, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Upward B.t.u. adjustment is limited to 1,175 B.t.u. per cubic foot.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the

V 38-173 SEP 7 73 XUM

Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19044 Filed 9-6-73;8:45 am]

[Docket Nos. CI73-892, CI73-893]

## BELCO PETROLEUM CORP.

### Order Consolidating Proceedings, Setting Proceedings for Formal Hearing, Permitting Intervention, Prescribing Procedures and Fixing Date of Hearing

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. sections 717c, 717d, 717f, 717g, 717i, and 717), issued Order 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

Belco Petroleum Corporation (Belco) has filed in the two above-entitled dockets two applications, pursuant to section 7(c) of the Natural Gas Act and Commission Order No. 431 (Docket No. 418) for limited term certificates of public convenience and necessity with pre-granted abandonment, authorizing the operation of certain facilities for the emergency sale of gas to El Paso Natural Gas Company (El Paso). Belco proposes to sell the gas under the two, two year limited-term certificates from acreage in Lea (Docket No. CI73-892) and Eddy (Docket No. CI73-893) Counties, New Mexico. Both points of sale are located in the Permian Basin.

Applicant proposes to sell approximately 5000 Mcf of gas per day from the Lea County acreage and approximately 10,000 Mcf per day from the Eddy County acreage. The contractually agreed rate for both sales is 55.0¢ per Mcf at 14.65 psia subject to upward and downward Btu adjustment from a base of 1,000 Btu per cubic foot. This rate exceeds the current ceiling of 35¢ for the Permian Basin.

In Order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18 of the Code of Federal Regulations by adding a new § 2.70, which reads:

(3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971-72 demands will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Commission on July 17, 1970, in Docket No. R-398A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need • • •

Paragraph 12 of R-389A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The applications in this proceeding represent a sizable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that these applications be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of limited term certificates on the terms proposed in the applications.

Notice of the two applications was given with July 12, 1973, as the date on which protests or petitions to intervene were due. On July 5, 1973, El Paso intervened in support of both applications. No protests or petitions to intervene opposing the applications have been filed.

The Commission finds:

(1) Good cause exists to consolidate the proceedings in Docket Nos. CI73-892 and CI73-893 for the purposes of hearing and decision.

(2) Good cause exists to set for formal hearing the applications for limited-term certificates herein.

(3) It may be in the public interest to permit El Paso, which filed a timely petition, to intervene in this proceeding.

*The Commission orders:*

(A) The applications for limited-term certificates for sale of natural gas filed in Docket Nos. CI73-892 and CI73-893 are hereby consolidated and set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing October 15, 1973, at 10 a.m., e.d.t., at a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of limited-term certificates for the sale of natural gas on the terms proposed in these applications and whether the issuance of said certificates should be conditioned in any way.

(C) El Paso Natural Gas Company is hereby permitted to become an intervenor, subject to their rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene: *And, Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The applicant seeking the limited-term certificate and the proposed purchaser, El Paso, shall, on or before October 1, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19045 Filed 9-6-73;8:45 am]

[Docket No. CI74-125]

## CLINTON OIL CO.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 20, 1973, Clinton Oil Company (Applicant), 217 North Water Street, Wichita, Kansas 67202, filed in Docket No. CI74-125 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Company from the Little Sandy Creek Pool, Barber County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it intends to commence the sale of gas within the contemplation of § 157.29 of the Regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for six months from the end of the sixty-day emergency period, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant proposes to sell up to 2,000 Mcf of gas per day at 45.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment. Monthly deliveries are estimated to be 30,000 Mcf of gas. Initial upward Btu adjustment is estimated to be 3.825 cents per Mcf of gas.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days

[1] Commissioner Moody dissenting filed a separate statement appended hereto.

for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1973, file with the Federal Power Comission, Washington, D.C. 20426, a petition to intervene or a protest in accordane with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to interevene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19056 Filed 9-6-73;8:45 am]

[Docket No. CI73-889]

## CORPENING ENTERPRISES

### Order Setting Matter for Formal Hearing, Permitting Intervention, Prescribing Procedures and Fixing Date of Hearing

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly Sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. Sections 717c, 717d, 717f, 717g, 717i, and 717), issued Order 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

A. V. Corpening, Jr., d.b.a. Corpening Enterprises (Corpening) has filed in Docket No. CI73-889 an application pursuant to section 7(c) of the Natural Gas Act and Commission Order No. 431 in Docket No. R-418, for a limited-term certificate of public convenience and necessity with pre-granted abandonment, authoriing the operation of certain facilities for emergency sale of gas to Cities Service Gas Company (Cities Service) from acreage in Payne County, Oklahoma.

The application provides that Corpening sell Cities Service a maximum of 3,000 Mcf per day or 1500 Mcf per day on a best effort basis for a term of two years. The proposed rate of 50.0¢ per Mcf which is subject to upward and downward Btu adjustment from a 1,000 B.t.u. base, exceeds the area ceiling rate of 23.75¢ per Mcf. The application provides for an increase of 1.0¢ per Mcf at the end of the first year.

Public notice of the application was given with July 16, 1973, as the date on which protests or petitions to intervene were due. On July 13, 1973, Cities Service filed a petition to intervene in support of the application. No protests or other petitions to intervene were received.

In order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18 of the Code of Federal Regulations by adding a new § 2.70, which reads:

(3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971-1972 demands will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Comission on July 17, 1970, in Docket No. R-389A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need. • • •

Paragraph 12 of R-389 provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The application in this proceeding represents a sizable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

The Commission finds:

(1) Good cause exists to set for formal hearing the application for a limited-term certificate herein.

(2) It may be in the public interest to permit Cities Service Gas Company, which filed a timely petition, to intervene in this proceeding.

The Commission orders:

(A) The application for limited-term certificate for sale of natural gas filed in Docket No. CI73-889 is hereby set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing October 1, 1973, at 10 a.m., e.d.t., at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of a limited-term certificate for the sale of natural gas on the terms proposed in this application and whether the issuance of said certificate should be conditioned in any way.

(C) Cities Service Gas Company is hereby permitted to become an intervenor, subject to the rules and regulations of the Commission; *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The applicant seeking the limited-term certificate and the proposed purchaser, Cities Service, shall, on or before September 17, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19061 Filed 9-6-73;8:45 am]

[Docket Nos. CP73-47, etc.]

## EASCOGAS LNG, INC., AND DISTRIGAS CORP.—STATEN ISLAND PROJECT

### Notice of Availability of Final Environmental Impact Statement

SEPTEMBER 4, 1973

Notice is hereby given in the captioned Dockets that on September 4, 1973, as required by § 2.82(b) of Commission Order No. 415-C, a draft environmental impact statement prepared by the staff of the Federal Power Commission was made available. This statement deals with the environmental impact of the proposals by Eascogas LNG, Inc. (Eascogas) and Distrigas Corporation (Distrigas) in Docket Nos. CP73-47, CP73-78, CP73-88, CP73-132, CP73-148, CP73-205, and CP73-230 wherein authorization pursuant to section 3 and section 7(c) of the Natural Gas Act are sought. The administrative action here involved arises from

[1] Commissioner Moody, dissenting, filed a separate statement appended hereto.

V 38-173 SEP 7 73 XUM

applications from Eascogas and Distrigas seeking authorization pursuant to section 3 of the Natural Gas Act to import liquefied natural gas (LNG) from Algeria to terminals at Staten Island, New York, and Providence, Rhode Island. Concurrent with the Eascogas and Distrigas applications, Distrigas Corporation of New York (DONY) has been ordered by the Commission to file an application seeking approval, pursuant to section 7 of the Natural Gas Act, to construct certain facilities necessary for DONY to unload, store, revaporize, and distribute the imported LNG. This application would include the construction of an unloading dock, two 900,000 barrel LNG storage tanks, vaporizer units, and other appurtenant facilities. In addition, Distrigas Pipeline Corporation (Distrigas Pipeline) has filed an application to construct and operate approximately 6,000 feet of 24-inch transmission line with a 2,675 foot segment of 30-inch underwater pipeline loop.

This statement discusses the existence and operation of the Distrigas facilities on Staten Island. A separate statement is being prepared for the importation of LNG to facilities in Providence, Rhode Island.

This statement has been sent to the Council on Environmental Quality and to Federal, state, and local agencies, and all parties to the proceeding. In addition, a limited number of copies are available from the Federal Power Commission's Office of Public Information, Room 1000, Union Center Plaza, 825 North Capitol Street NE., Washington, D.C. 20426. Additional copies may be ordered from the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151. Copies are available for review at the Federal Power Commission's Regional Office located at 26 Federal Plaza (22nd Floor), New York, New York 10007.

Any person who wishes to do so may file comments on the staff draft statement for the Commission's consideration. All comments must be filed on or before October 19, 1973. Any person who wishes to present evidence regarding environmental matters in this proceeding must file with the Commission a petition to intervene pursuant to § 1.8 of the Commission's Rules of Practice and Procedure. Petitioners must also file timely comments on the draft statement in accordance with § 2.82(c) of Order No. 415–C. All petitions to intervene must be filed on or before October 19, 1973.

KENNETH F. PLUMB,
*Secretary.*

[Docket Nos. RP71-137, RP72-151]

## EL PASO NATURAL GAS CO.

### Notice of Further Extension of Time

AUGUST 31, 1973.

On August 29, 1973, Cascade Natural Gas Corporation filed a motion for a further extension of time for filing rebuttal evidence as required by notice issued August 10, 1973, in the above-designated matter. The motion states that the parties (twenty-one and Staff Counsel) participating in the above matter have either indicated support for or concurrence in the request.

Upon consideration, notice is hereby given that the time is postponed to September 21, 1973, for the service of rebuttal evidence in the above matter. The hearing is still scheduled to commence immediately upon conclusion of the hearing in Docket Nos. G–10426, et al., now scheduled for October 23, 1973.

[Docket No. CP73-334]

## EL PASO NATURAL GAS CO.

### Notice of Further Extension and Postponement of Prehearing Conference

AUGUST 30, 1973.

On August 28, 1973, El Paso Natural Gas Company filed a motion for a further extension of time to file evidence and for postponement of prehearing conference as fixed by order issued August 7, 1973, and amended by notice issued August 23, 1973, in the above-designated matter. By letter dated August 29, 1973, El Paso advised that the intervenors have no objection to the motion.

Upon consideration, notice is hereby given that the procedural dates are further modified as follows:

Service of Evidence and Testimony—September 21, 1973.
Prehearing Conference—October 10, 1973 (10:00 a.m., e.d.t.).

## EMERALD PRODUCING CORP. ET AL.

### Order Consolidating Proceedings Setting Matter for Formal Hearing, Permitting Intervention, Prescribing Procedures, and Fixing Date of Hearing

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. section 717c, section 717d, section 717f, section 717g, section 717i, and section 717), issued Order 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

On June 13, 1973, Emerald Petroleum Corporation filed an application for a certificate limited to a one year term with pregranted abandonment in Docket No. CI73–887 for a sale of gas to Southern Natural Gas Company from acreage in the Bayou Pigeon Field, Iberia Parish, South Louisiana, at a proposed rate of 50.0 cents subject to upward and downward Btu adjustment from a base of 1,000 Btu per cubic foot. A letter agreement submitted with the application provides for the sale of an average daily quantity of gas produced from the Emerald Petroleum well equal to the lesser of 2,400 Mcf or 80 percent of seller's deliverability.

Emerald Petroleum began a 60 day emergency sale pursuant to Order No. 418 to Southern Natural on May 31, 1973, at a rate of 50.0 cents; however, deliveries ceased on June 3, 1973, due to force majeure (high waters caused a separation of the pipeline from Emerald Petroleum's well to Southern Natural's platform). Emerald Petroleum advised that it is estimated that repairs will not be made for at least 45 days due to persistent flood conditions and that upon completion of the repairs it will resume its emergency deliveries to Southern Natural for the balance of the 60-day period.

On June 13, 1973, Emerald Producing Corporation[1] filed in Docket No. CI73–886 an application for a one-year limited-term certificate with pregranted abandonment for a sale to Southern Natural from acreage in the Diamond Field, Plaquemines Parish, South Louisiana, at a rate of 50.0 cents subject to upward and downward Btu adjustment from a base of 1,000 Btu per cubic foot. A letter agreement submitted concurrently with the application provides for the sale of an average daily quantity of gas equal to the lesser of 2,400 Mcf or 80 percent of seller's deliverability.

Emerald Producing commenced a 60-day emergency sale to Southern Natural at a rate of 50.0 cents on July 18, 1973, pursuant to Order No. 418; the sale will end September 16, 1973.

The base area rate for South Louisiana, the area from which both sales will be made, as determined by the Commission in Opinion No. 518 is 26.875 cents per Mcf.

Public notice of both applications was given with July 12, 1973, given as the date on which protests or petitions to intervene were due in Docket No. CI73–887, and with July 16, 1973, as the date in Docket No. CI73–886. On July 12, 1973, Southern Natural Gas Company filed petitions to intervene in support of both of the above applications. No protests nor petitions to intervene in opposition to the applications have been received.

In order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18, of the Code of Federal Regulations by adding a new § 2.70, which reads:

(3) The Commission recognizing that additional short-term gas purchases may still

[1] Emerald Petroleum and Emerald Producing are separate corporations with common management.

be necessary to meet the 1971–1972 demands will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Commission on July 17, 1970, in Docket No. R–389A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need. * * *

Paragraph 12 of R–389A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The applications in this proceeding represent a sizable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipeline procure emergency supplies of gas to avoid disruption of servce to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that these applications be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of limited-term certificates on the terms proposed in the applications.

The Commission finds:

(1) Good cause exists to consolidate the proceedings in Docket Nos. CI73–886 and CI73–887 for the purposes of hearing and determination.

(2) Good cause exists to set for formal hearing the applications for limited-term certificates herein.

(3) It may be in the public interest to permit Southern Natural Gas Company, which filed timely petitions, to intervene in this consolidated proceeding.

The Commission orders:

(A) The applications for limited-term certificate for sale of natural gas filed in Docket Nos. CI73–886 and CI73–887 are hereby consolidated and set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing November 5, 1973, at 10 a.m., e.s.t., at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of limited-term certificates for the sale of natural gas on the terms proposed in these applications and whether the issuance of said certificates should be conditioned in any way.

(C) Southern Natural Gas Company of America is hereby permitted to become an intervenor, subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene: *And provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The applicants seeking the limited-term certificate and the proposed purchaser, Southern Natural, shall on or before October 22, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[Docket No. E-8008]

## FLORIDA POWER & LIGHT CO.

### Notice of Extension of Time

AUGUST 31, 1973.

On August 29, 1973, Staff Counsel filed a motion for an extension of time to file its exhibits and testimony as required by the notice issued May 2, 1973. The motion states that there is no opposition to the new date.

Upon consideration, notice is hereby given that the service date for testimony and exhibits by Staff is postponed to September 10, 1973. The other dates are unchanged.

KENNETH F. PLUMB,
*Secretary.*

---

[Docket Nos. CI73-863, etc.]

## HOOVER AND BRACKEN OIL PROPERTIES, INC.

### Order Consolidating Proceedings, Granting Intervention, Setting Hearing Date, and Prescribing Procedure

AUGUST 31, 1973.

On June 8, 1973, Hoover and Bracken Oil Properties, Inc. (Hoover and Bracken), filed in Docket Nos. CI73–863, CI73–864, and CI73–865 applications requesting issuance of limited term certificates of public convenience and necessity with pregranted abandonment authority, pursuant to section 7(c) of the Natural Gas Act and the Commission's Regulations thereunder, for the sale of gas to Northern Natural Gas Company (Northern) from three units located in Hemphill and Hansford Counties, Texas Railroad District No. 10 (Hugoton Anadarko Area).

Specifically, Hoover and Bracken proposes to sell and deliver to Northern for two years following the commencement of 60 day emergency sales all the gas attributable to its interest in the units dedicated under three contracts dated April 24, 1973. Monthly deliveries are estimated at 150,000 Mcf (Bradstreet Unit—CI73–863), 78,750 Mcf (Lackey Unit—CI73–864) and 150,000 Mcf (Campbell Unit—CI73–865). The proposed initial base rates of 50.0 cents per Mcf exceed the applicable area base rate of 21.5 cents per Mcf established by the Commission's Opinion No. 586. The base rate proposed in Docket No. CI73–863 is subject to upward and downward Btu adjustment from a base of 1,000 Btu's per cubic foot, whereas the base rates proposed in Docket Nos. CI73–864 and CI73–865 are subject to upward and downward Btu adjustment from a base of 925 Btu's per cubic foot plus reimbursement for all existing and future taxes.

Hoover and Bracken states that it will commence 60 day emergency sales to Northern from the Bradstreet and Lackey Units upon completion of the necessary facilities. A 60 day emergency sale from the Campbell Unit commenced on May 15, 1973, pursuant to § 157.29 of the Regulations. An extension to continue the sale until August 13, 1973, was granted by letter dated July 13, 1973.

Late petitions to intervene in each of the above applications were filed by Northern on July 13, 1973.

The applications in this proceeding represent a sizable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers, nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that these applications be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of limited-term certificates on the terms proposed in these applications.

The Commission finds:

(1) Docket Nos. CI73–863, CI73–864, and CI73–865 should be consolidated for hearing and decision as they involve common questions of fact and law.

(2) The intervention of Northern in this proceeding may be in the public interest.

(3) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the issues in this proceeding be scheduled for hearing in accordance with the procedures set forth below.

The Commission orders:

(A) The applications listed at the head of this order are hereby consolidated for hearing and decision.

(B) Northern is hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Com-

[1] Commissioner Moody, dissenting, filed a separate statement appended hereto.

V 38-173 SEP 7 73 XUM

mission: *Provided, however,* That the participation of such intervener shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene; and *Provided, further,* That the admission of said intervener shall not be construed as recognition by the Commission that it might be aggrieved by any order or orders of the Commission entered in this proceeding.

(C) Pursuant to the authority of the Natural Gas Act, particularly sections 7 and 15 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act, a public hearing shall be held on September 27, 1973, at 10 a.m., e.d.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning the issue of whether certificates of public convenience and necessity should be granted as requested by the applicants.

(D) On or before September 13, 1973, Hoover and Bracken and any supporting party shall file with the Commission and serve upon all parties, including Commission Staff, their testimony and exhibits in support of their positions.

(E) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—See Delegation of Authority, 18 CFR 3.5(d)—shall preside at, and control this proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure and the purposes expressed in this order.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-19066 Filed 9-6-73;8:45 am]

[Docket No. CI74-111]

## J. M. HUBER CORP.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 15, 1973, J. M. Huber Corporation (Applicant), 2000 West Loop South, Houston, Texas 77027, filed in Docket No. CI74-111 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Transwestern Pipeline Corporation from the Yates King No. 1 Well, South Carlsbad Area, Eddy County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it intends to commence the sale of gas within the contemplation of § 157.29 of the Regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for one year from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell approximately 67,500 Mcf of gas per month at 55.0 cents per Mcf at 14.65 p.s.i.a., subject to upward and downward Btu adjustment. Upward Btu adjustment is limited to 1,175 Btu per cubic foot of gas.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-19054 Filed 9-6-73;8:45 am]

[Docket No. CI73-899]

## H. L. HUNT ET AL.

### Order Setting Matter for Formal Hearing, Permitting Intervention, Prescribing Procedures and Fixing Date of Hearing

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly Sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. section 717c section 717d, section 717f, section 717g, section 717i, and section 717), issued Order 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

On June 18, 1973, H. L. Hunt (Operator) *et al.* (Hunt) filed in Docket No. CI73-899, an application, pursuant to Section 7(c) of the Natural Gas Act and Order No. 431 in Docket No. R-418, for a limited-term certificate of public convenience and necessity with pre-granted abandonment, authorizing the operation of certain facilities for the emergency sale of gas to Texas Gas Transmission Corporation (Texas Gas).

The application provides that Hunt will sell all available gas up to 4,000 Mcf per day gas from the Grosse Isle Field, Vermilion Parish, Louisiana, at a rate of 50.0¢ per Mcf subject to upward and downward Btu adjustment from a base of 1,000 B.t.u. The base area rate for South Louisiana as determined in Commission Opinion No. 598 is 26.875¢ per Mcf.

Hunt requests that the certificate be granted for a term of one year. Hunt commenced a sale to Texas Gas pursuant to Order No. 418 on June 12, 1973, at a rate of 50.0¢. However, the subject wells ceased producing approximately 2 days after service commenced and are now being reworked.

In Order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18 of the Code of Federal Regulations by adding a new § 2.70, which reads:

> (3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971–1972 demands, will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Commission on July 17, 1970, in Docket No. R-389A should be utilized (35 FR 11638), The Commission will consider if the pipeline demonstrates emergency need • • •

Paragraph 12 of R-389A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The application in this proceeding represents a sizable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

[1] Commissioner Moody, dissenting, filed a separate statement, filed as part of the original document.

Public notice of the application was given with protests or petitions to intervene due July 16, 1973. On July 16, 1973, Texas Gas filed a petition to intervene in support of the application. No protests nor petitions to intervene opposing the application were received.

The Commission finds:

(1) Good cause exists to set for formal hearing the application for a limited-term certificate herein.

(2) It may be in the public interest to permit Texas Gas, which filed a timely petition, to intervene in this proceeding.

The Commission orders:

(A) The application for limited-term certificate for sale of natural gas filed in Docket No. CI73-899 is hereby set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing October 29, 1973, at 10:00 a.m. (e.s.t.) at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of a limited-term certificate for the sale of natural gas on the terms proposed in this application and whether the issuance of said certificate should be conditioned in any way.

(C) Texas Gas is hereby permitted to become an intervenor, subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and: *Provided, further,* That admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The applicant seeking the limited-term certificate and the proposed purchaser, Texas Gas, shall, on or before October 15, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-19065 Filed 9-6-73;8:45 am]

[Docket No. CI74-115]

## MRT EXPLORATION CO.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 15, 1973, MRT Exploration Company (Applicant), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CI74-115 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Mississippi River Transmission Corporation from the Mills Ranch Field, Wheeler County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell for two years approximately 120,000 Mcf of gas per month at 30.0 cents per Mcf at 14.65 psia, subject to upward and downward B.t.u. adjustment, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Initial downward B.t.u. adjustment is estimated to be 0.30 cent per Mcf of gas.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-19055 Filed 9-6-73;8:45 am]

[Docket No. CI73-903]

## DOUGLAS B. MARSHALL ET AL.

### Order Setting Matters for Formal Hearing, Prescribing Procedures, and Fixing Date of Hearing

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. sections 717c, 717d, 717f, 717g, 717i, and 717), issued Order No. 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

On June 20, 1973, Douglas B. Marshall *et al.* (Marshall) filed in Docket No. CI73-903 an application, pursuant to section 7(c) of the Natural Gas Act and Order No. 431 in Docket No. R-418, for a limited-term certificate of public convenience and necessity with pre-granted abandonment, authorizing the operation of certain facilities for the emergency sale of gas to Transcontinental Gas Pipeline Corporation (Transco).

The limited term certificate application provides that Marshall sell Transco all available gas up to 70,000 Mcf per day on a best efforts basis. Marshall proposes that the sale be limited to a maximum term of six months. Marshall's gas will be produced from acreage which has been temporarily released from a long term commitment to Northern Michigan Exploration Company *et al.* For that reason Marshall requests that the limited term certificate permit termination of the sale on or after October 23, 1973, upon 30 days' advance written notice.

Marshall has been selling gas to Transco from the subject acreage, located in Terrebonne Parish, Louisiana, at a rate of 45.0 cents per Mcf pursuant to a limited term certificate issued in Docket No. CI73-498, which sale and certificate terminated July 24, 1973. A letter agreement submitted concurrently with the application in Docket No. CI73-903 provides for an initial rate of 50.0 cents per Mcf which exceeds the base area rate of 26.875 cents per Mcf set by Commission Opinion No. 598.

Public notice of the application was given with July 12, 1973, as the date on which protests or petitions to intervene were due. None were received.

In Order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18, of the Code of Federal Regulations by adding a new § 2.70, which reads:

> (3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971–72 demands, will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Commission on July 17, 1970, in Docket No. R-398A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need • • •.

[1] Commissioner Moody, dissenting, filed a separate statement, filed as part of the original document.

V 38 - 173 SEP 7 73 XUM

Paragraph 12 of R–398A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The application in this proceeding represents a sizeable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procures emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing should be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

The Commission finds:

Good cause exists to set for formal hearing the application for a limited-term certificate herein.

The Commission orders:

(A) The application for limited-term certificate for sale of natural gas filed in Docket No. CI73–903 is hereby set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing October 8, 1973, at 10:00 a.m., e.d.t., at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of a limited term certificate for the sale of natural gas on the terms proposed in this application and whether the issuance of said certificate should be conditioned in any way.

(C) The applicant seeking the limited-term certificate and the proposed purchaser, Transco, shall, on or before September 24, 1973, file with Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB, *Secretray.*

[FR Doc.73–19046 Filed 9–6–73;8:45 am]

[1] Commissioner Moody, dissenting, filed a separate statement appended hereto.

[Docket No. CI74–127]

## MIDWEST OIL CORP.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 20, 1973, Midwest Oil Corporation (Applicant), 1700 Broadway, Denver, Colorado 80202, filed in Docket No. CI74–127 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Transwestern Pipeline Company from the South Empire Deep Unit No. 3, Eddy County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas within the contemplation of § 157.29 of the Regulation under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale until October 15, 1974, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell approximately 120,000 Mcf of gas per month at 50.0 cents per Mcf at 14.65 p.s.i.a., subject to upward Btu adjustment.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73–19049 Filed 9–6–73;8:45 am]

[Docket No. CI73–402, etc.]

## MOBIL OIL CORP. ET AL.

### Order Consolidating Proceedings, Granting Interventions and Establishing Procedure and Dates for Formal Hearing

AUGUST 31, 1973.

On December 4, 1972, Mobil Oil Corporation (Mobil) filed in Docket No. CI73–402 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce to NI-Gas Supply, Inc. (NI-Gas). On January 11, 1973, NI-Gas filed in Docket Nos. CI73–478 and CI73–509 applications pursuant to Section 7(c) of the Natural Gas Act for certificates of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce to Northern Illinois Gas Company (Northern Illinois) and to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (TGP), respectively. NI-Gas also requests issuance of declaratory orders stating that each sale will not be considered as a sale under its small producer certificate issued in Docket No. CS69–69 since each sale involves the resale of purchased gas. TGP filed on March 20, 1973, in Docket No. CP73–245 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and/or acquisition and operation of facilities for the transportation and delivery of natural gas for NI-Gas's account to Midwestern Gas Transmission Company (Midwestern). In Docket No. CP73–244, Midwestern filed on March 20, 1973, an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity for the transportation and delivery of natural gas to Northern Illinois for the account of NI-Gas.

Mobil, in Docket No. CI73–402, requests authorization to sell gas to NI-Gas from the Block 81 Field, East Cameron Area, Offshore Louisiana, at an initial rate of 28.0¢ per Mcf at 15.025 p.s.i.a. subject to B.T.U. adjustment. Mobil estimates that it will sell 672,000 Mcf per month and it reserves for its own use up to one-third of the quantity of gas produced in excess of 22,000 Mcf per day.

NI-Gas, a wholly owned subsidiary of Northern Illinois, requests a certificate in Docket No. CI73–478 to resell in Illinois up to two-thirds of the gas purchased from Mobil in Louisiana to Northern Illinois at an estimated rate of 57.92¢ per Mcf at 15.025 p.s.i.a. Additionally, NI-Gas requests a certificate in Docket No. CI73–509 to sell the remaining gas purchased from Mobil to TGP at an initial rate of 28.0¢ per Mcf at 15.025 p.s.i.a. subject to B.t.u. adjustment.

In Docket No. CP73–245, TGP requests authorization to construct and/or acquire and operate facilities to transport gas for NI-Gas from the Block 81 Field to Portland, Tennessee, where the gas will be delivered for NI-Gas' account to Midwestern at an existing interconnection of the two pipeline systems.

Midwestern requests authorization in Docket No. CP73–244 to transport gas from Portland, Tennessee, to Illinois and to construct and operate facilities needed for the transportation service. Midwestern states that it will redeliver the gas to Northern Illinois for the account of NI-Gas at existing delivery points in Illinois.

Timely petitions to intervene in Docket No. CI73–402 have been filed by the following:

NI-Gas Supply, Inc., on December 29, 1972.
Central Illinois Light Company on January 2, 1973.
Illinois Power Company on January 2, 1973.

A timely notice of intervention was filed in this docket on December 15, 1973 by the State of New York (PSC of New York), and Associated Gas Distributors filed an untimely petition to intervene on January 22, 1973.

Timely petitions to intervene in Docket No. CI73–478 have been filed by the following:

Central Illinois Light Company on February 16, 1973.
Peoples Gas Light and Coke Company on February 26, 1973.
Tennessee Gas Pipeline Company on February 26, 1973.
Midwestern Gas Transmission Company on February 26, 1973.
Associated Gas Distributors on February 26, 1973.
Northern Illinois Gas Company on February 26, 1973.

An untimely petition to intervene was filed by Northern Indiana Public Service Company on March 1, 1973.

Timely petitions to intervene in Docket No. CI73–509 have been filed by the following:

Associated Gas Distributors on February 26, 1973.
Northern Indiana Public Service Company on February 26, 1973.
Northern Illinois Gas Company on February 26, 1973.
Central Illinois Light Company on February 26, 1973.
Tennessee Gas Pipeline Company on February 26, 1973.
Midwestern Gas Transmission Company on February 26, 1973.

In Docket No. CP73–244, timely petitions to intervene have been filed by the following:

Central Illinois Light Company on April 12, 1973.
Tennessee Gas Pipeline Company on April 16, 1973.
Northern Indiana Public Service Company on April 18, 1973.
Columbia Gas Transmission Corporation on April 19, 1973.
Peoples Gas Light and Coke Company on April 23, 1973.
Northern Michigan Exploration Company on April 23, 1973.
Consumers Power Company on April 23, 1973.
Northern Illinois Gas Company on April 23, 1973.
NI-Gas Supply, Inc., on April 23, 1973.

An untimely petition to intervene was filed by Public Service Electric and Gas Company on April 27, 1973.

In Docket No. CP73–245, timely petitions to intervene have been filed by the following:

Associated Gas Distributors on April 5, 1973.
Central Illinois Light Company on April 12, 1973.
Northern Indiana Public Service Company on April 18, 1973.
Columbia Gas Transmission Company on April 19, 1973.
Midwestern Gas Transmission Company on April 20, 1973.
Northern Illinois Gas Company on April 20, 1973.
NI-Gas Supply, Inc. on April 20, 1973.

Untimely petitions to intervene were filed in CP73–245 by the following:

Consumers Power Company on April 23, 1973.
Northern Michigan Exploration Company on April 23, 1973.
Peoples Gas Light and Coke Company on April 23, 1973.
Public Service Electric and Gas Company on April 26, 1973.

In its petitions to intervene in all of the above-described dockets, Central Illinois Light Company (Central) requests a formal hearing on the subject applications to determine if it is in the public interest for a large distributor or its subsidiary to purchase gas in the field in competition with interstate pipeline companies during a time of gas shortage. Additionally, PSC of New York requests formal hearing in Docket No. CI73–402 and Northern Indiana Public Service Company (Northern Indiana) opposes NI-Gas' application in Docket No. CI73–478 and requests formal hearing therein.

Having reviewed the petitions to intervene, we believe that the petitioners, including those who filed late, all have sufficient interests in these proceedings to warrant intervention and no delay will result in granting the late petitions to intervene. We also believe that the significant and novel questions presented by these applications require a public hearing at which time all issues bearing upon the public interest can be fully developed on the evidentiary record.

The Commission notes the interrelationship between the above described proceedings and concludes that their ultimate disposition would best be accomplished in a consolidated proceeding. Accordingly, we shall consolidate Docket Nos. CI73–402, CI73–478, CI73–509, CP73–244, and CP73–245 for hearing and disposition.

*The Commission finds:*

(1) It is necessary and in the public interest that the above-docketed proceedings be consolidated for hearing and decision.

(2) It is desirable and in the public interest to allow the above-named petitioners to intervene in these consolidated proceedings in order that they may establish the facts and the law from which the nature and validity of their alleged rights and interests may be determined and show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

(3) It is necessary and appropriate that the consolidated proceedings in the above-named applications be set for hearing.

The Commission orders:

(A) Dockets Nos. CI73–402, CI73–478, CI73–509, CP73–244, and CP73–245 are consolidated for purposes of hearing and disposition.

(B) The above-named petitioners are permitted to intervene in this consolidated proceeding subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene: *And provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(C) The direct case of Mobil Oil Corporation, NI-Gas Supply, Inc., Midwestern Gas Transmission Company, Tennessee Gas Pipeline Company, and all supporting intervenors shall be filed and served on all parties, the Presiding Administrative Law Judge and the Commission's staff on or before October 9, 1973.

(D) Pursuant to the authority of the Natural Gas Act, particularly sections 7, 15, and 16 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act (18 CFR, Chapter I), a public hearing on the issues presented by the proposals of Mobil Oil Corporation, NI-Gas Supply, Inc., Midwestern Gas Transmission Company, and Tennessee Gas Pipeline Company shall be held commencing October 30, 1973, at 10:00 a.m. in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20002.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose [see Delegation of Authority, 18 CFR 3.5(d)] shall preside at the hearing in this consolidated proceeding pursuant to the Commission's Rules of Practice and Procedure.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

V 38-173 SEP 7 73 XUM

[Docket No. CI73-857]

## NATIONAL EXPLORATION CO.

### Order Setting Matter for Formal Hearing, Permitting Intervention, Prescribing Procedures and Fixing Date of Hearing

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly Sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. Sections 717c, 717d, 717f, 717g, 717i, and 717), issued Order 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

On June 5, 1973, National Exploration Company (National) filed an application, pursuant to Section 7(c) of the Natural Gas Act and Order No. 431 in Docket No. 418, for a limited-term certificate of public convenience and necessity with pregranted abandonment, authorizing the operation for one year of certain facilities for the emergency sale of gas to United Gas Pipeline Company (United), from acreage in the McCaskill Field, Karnes County, Texas.

National proposes to sell to United approximately 390,000 Mcf per month of surplus gas. Under the proposed contract, United could buy such gas on a daily basis as National would have available for sale. National states that this sale would not impair its ability to meet the demands of its other customers.

The rate to be paid for the sale is 50.0 cents per Mcf subject to upward and downward Btu adjustment from a base of 1,000 Btu per cubic foot. This rate is in excess of the applicable area rate of 24.0 cents per Mcf as determined by the Commission in Opinion No. 595.

National commenced a 60-day emergency sale to United pursuant to Order No. 418, on May 14, 1973, at a rate of 50.0 cents per Mcf. The 60-day exemption period expired on July 13, 1973. By letter of July 12, 1973, National was authorized to extend the sale for up to 60 days or until a certificate is issued in this proceeding, whichever occurs earlier.

Public notice of the application was given with July 2, 1973, as the date on which protests or petitions to intervene were due. United filed a petition to intervene in support of the application. No protests or petitions to intervene in opposition to the application were received.

In Order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18, of the Code of Federal Regulations by adding a new § 2.70, which reads:

> (3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971-1972 demands will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Commission on July 17, 1970, in Docket No. R-389A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need. • • •

Paragraph 12 of R-389A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The application in this proceeding represents a sizeable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

The Commission finds:

(1) Good cause exists to set for formal hearing the application for a limited-term certificate herein.

(2) It may be in the public interest to permit United, which filed a timely petition, to intervene in this proceeding.

The Commission orders:

(A) The application for limited-term certificate for sale of natural gas filed in Docket No. CI73-857 is hereby set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing October 23, 1973, at 10:00 a.m. (EDT) at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of a limited-term certificate for the sale of natural gas on the terms proposed in this application and whether the issuance of said certificate should be conditioned in any way.

(C) United is hereby permitted to become an intervenor, subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene: *And provided, further,* That admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The applicant seeking the limited-term certificate and the proposed purchaser, United, shall, on or before October 8, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Docket Nos. CP73-215, CP73-221]

## NORTHERN NATURAL GAS CO. AND EL PASO NATURAL GAS COMPANY

### Order Consolidating Proceedings, Ordering the Filing of Evidence, and Setting Hearing Date

AUGUST 31, 1973.

On February 12, 1973, Northern Natural Gas Company (Northern) in Docket No. CP73-215 and on February 16, 1973, as supplemented May 7, 1973, El Paso Natural Gas Company (El Paso) in Docket No. CP73-221 filed applications pursuant to section 7(c) of the Natural Gas Act for authorization to continue sales for resale and delivery of natural gas in interstate commerce to each other and to retain in place and operate natural gas facilities previously installed pursuant to § 157.22 of the regulations under the Natural Gas Act (18 CFR 157.22), all as more fully set forth in the applications, as supplemented, in this proceeding.

Northern proposes to sell for three years ending January 31, 1976, up to 75,000 Mcf per day of raw, wet, sour, low pressure gas to El Paso which will be delivered to El Paso or Warren Petroleum Company (Warren) for El Paso's account at seven points in Lea County, New Mexico, where Northern's gathering facilities interconnet cwith El Paso's and Warren's facilities. Approximately 32,000 Mcf per day of raw gas will be delivered to Warren for processing at its Monument and Eunice Plants in Lea County. The remaining 43,000 Mcf per day will be delivered to El Paso for processing at its Jal Plant. Concurrently El Paso proposes to sell sweet, high pressure gas, estimated at 60,000 Mcf per day, to Northern which is equivalent in quantity to the amount of residue gas remaining after processing the raw gas purchased from Northern. Deliveries will be made either at the outlet of Mobil Oil Corporation's Coyanosa Plant in Pecos County, Texas, or at the point of interconnection of El Paso's and Northern's facilities in Lea County. Northern will retain a one-third interest in the liquid products attributable to the raw gas sold to El Paso with the remainder vesting in El Paso. The purpose of the proposed sale and repurchase arrangement is to allow Northern to increase its allowable production from the Lea County Fields by utilizing the excess capacity on El Paso's system in order to augment Northern's ability to provide adequate service to its customers during peak-demand periods. The parties state that they commenced service under this arrangement on December 22, 1973, within the contemplation of § 157.22 of the Regulations and were permitted to continue such emergency deliveries by the letter orders of the Commission dated March 2, 1973.

To implement these proposals, Northern installed four gas delivery interconnections between its facilities and Warren's and four interconnections between its facilities and El Paso's in Lea County, and El Paso has installed three metering and regulating stations at the points of interconnection between Northern's and its gathering systems, all pursuant to § 157.22 of the regulations. El Paso proposes to construct and operate a meter station at the point of interconnection where Northern's 16-inch mainline crosses El Paso's 12-inch Gulf-Eunice pipeline in Lea County.

Northern and El Paso estimate the total costs of their facilities to be $66,600 and $52,087 respectively, which will be financed from working funds.

Northern and El Paso have submitted the gas purchase and sales agreement of January 31, 1973, as their proposed Rate Schedules X-34 and X-30, respectively. Northern proposes to charge El Paso 18.87 cents per Mcf at 14.73 p.s.i.a. for the raw gas sold and states that pursuant to the contract, said rate will be adjusted concurrently with and in an equal amount to the amount by which the commodity rates in Northern's FPC Gas Tariff, Third Revised Volume No. 1, are adjusted under its purchased gas adjustment clause. El Paso's proposed rate to Northern is 32.05 cents per Mcf at 14.73 p.s.i.a. which is the same rate charged under its Rate Schedule X-1, FPC Gas Tariff, Original Volume No. 1, for service rendered in its Southern Division system production areas.

Northern requests authorization to include the purchase of residue gas from El Paso in the computation of its "Annual Rate Adjustment to Reflect Changes in Gas Purchased Cost" under Paragraph 20 of its FPC Gas Tariff, Third Revised Volume No. 1. Northern states that the revenue received from sales of raw gas to El Paso will approximate the cost of purchasing and gathering the gas and the operation of Paragraph 20 will allow it to recover the actual cost of repurchasing the higher priced residue gas from El Paso.

After due notice of Northern's application by publication in the FEDERAL REGISTER on March 5, 1973 (38 FR 6432), and of El Paso's application, as supplemented, on March 7, 1973 (38 FR 6229), and March 9, 1973 (38 FR 6432), respectively, no petitions to intervene, notices of intervention, or protests to the granting of the applications have been filed. Nevertheless the Commission is of the opinion that the public interest in the administration of the Natural Gas Act requires that a record be established in support of these applications and appurtenant rate schedules.

The Commission finds:

(1) The applications in Docket Nos. CP73-215 and CP73-221 are interdependent and should be consolidated.

(2) Approval of the proposals described in the applications in Docket Nos. CP73-215 and CP73-221 would not constitute a major federal action significantly affecting the quality of human environment.

(3) It is desirable and in the public interest that a record be established in support of the applications and appurtenant rate schedules.

The Commission orders:

(A) That the applications of Northern Natural Gas Company as filed in Docket No. CP73-215 be consolidated with the application of El Paso Natural Gas Company filed in Docket No. CP73-221.

(B) That Northern Natural Gas Company and El Paso Natural Gas Company shall file testimony and exhibits describing the facts pertaining to these applications, including cost and feasibility of alternatives to the proposed action and the basis for the rates proposed, on or before September 6, 1973.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, on September 18, 1973, concerning the matters involved in and the issues presented by these consolidated applications.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Docket No. CI74-128]

## OCCIDENTAL PETROLEUM CORP.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 20, 1973, Occidental Petroleum Corporation (Applicant), 10889 Wilshire Boulevard, Los Angeles, California 90024, filed in Docket No. CI74-128 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale of natural gas in interstate commerce to Texas Eastern Transmission Corporation and delivery to Hydrocarbon Development Corporation for transportation to the purchaser in Hidalgo County, Texas, from the Lacal Field (La Sal Vieja Area), Willacy County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas on August 1, 1973, within the contemplation of § 157.29 of the Regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sales for one year from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell approximately 54,000 Mcf of gas per month at 35.0 cents per M c.f. at 14.65 p.s.i.a., subject to downward Btu adjustment.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-19051 Filed 9-6-73;8:45 am]

---

[Docket No. CI74-109]

## PERRY, ADAMS & LEWIS, INC.

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 13, 1973, Perry, Adams & Lewis, Inc. (Applicant), P.O. Box 248, Davenport, Oklahoma 74026, filed in Docket No. CI74-109 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Cities Service Gas Company from acreage in Kay County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

[1] Commissioner Moody, dissenting, filed a separate statement appended hereto.

V 38-173 SEP 7 73 XUM

Applicant states that it commenced the sale of gas on August 6, 1973, within the contemplation of § 157.29 of the Regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for two years from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell up to 3,000 M c.f. of gas per day at 45.0 cents per M c.f. at 14.65 p.s.i.a., subject to upward and downward Btu adjustment. Monthly deliveries are estimated to be 90,000 M c.f. of gas. Applicant states that it is a small producer and is filing the instant application to obtain pregranted abandonment authorization for the proposed sales.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19052 Filed 9-6-73;8:45 am]

[Docket No. CI73-837]

## PRODUCER'S GAS CO.

### Order Setting Matter for Formal Hearing, Permitting Intervention, Prescribing Procedures and Fixing Date of Hearing

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly Sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. Section 717c, Section 717d, Section 717f, Section 171g, Section 717i, and Section 717), issued Order No. 431 promulgating a Statement of General Policy with respect to the establishing of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

Producer's Gas Company (Producer's) has filed, in the above-entitled Docket No. CI73-837, an application, pursuant to section 7(c) of the Natural Gas Act and Order No. 431 in Docket No. R-418, for a limited-term certificate of public convenience and necessity with pre-granted abandonment, authorizing the operation of certain facilities for the sale of emergency gas to Northern Natural Gas Company (Northern) from acreage located in Texas Railroad District No. 10 (Hugoton-Anadarko Area).

The limited-term certificate application provides that Producer's sell approximately 2,000 M c.f. per day for a term of one year. The contractually agreed rate of 51.0 cents per M c.f. at 14.65 p.s.i.a., subject to Btu adjustment from a base of 1,000 Btu, exceeds the applicable area ceiling price of 21.5 cents established by Opinion No. 586.

Producer's commenced emergency deliveries to Northern on May 10, 1973, pursuant to Section 157.29 of the regulations. The sixty-day emergency sale expired July 9, 1973.

In Order No. 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18 of the Code of Federal Regulations by adding a new § 2.70, which reads:

(3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971-1972 demands, will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12, in the Notice issued by the Commission on July 17, 1970, in Docket No. R-389A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need • • •

Paragraph 12 of R-389A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The application in this proceeding represents a sizable volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

Pursuant to the notice of the instant application issued June 13, 1973, Northern filed a petition to intervene.

*The Commission finds*

(1) Good cause exists to set for formal hearing the application for a limited-term certificate herein.

(2) It may be in the public interest to permit Northern Natural Gas Company, which filed a timely petition, to intervene in this proceeding.

*The Commission orders*

(A) The application for limited-term certificate for sale of natural gas filed in Docket No. CI73-837 is hereby set for hearing.

(B) Pursuant to the authority contained in the subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing September 26, 1973, at 10:00 a.m. (EDT) at a hearing room of the Federal Power Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of limited-term certificate for the sale of natural gas on the terms proposed in this application and whether the issuance of said certificate should be conditioned in any way.

(C) Northern Natural Gas Company is hereby permitted to become an intervenor, subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and: *Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The applicant seeking the limited-term certificate and the proposed purchaser, Northern, shall, on or before September 17, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commissioner.[1]

[SEAL] KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19067 Filed 9-6-73;8:45 am]

[1] Commissioner Moody, dissenting, filed a separate statement, filed as part of the original document.

[Docket No. CI73-871]

## PRODUCER'S GAS CO.

### Order Providing for Formal Hearing, Permitting Intervention and Establishing Procedures

AUGUST 31, 1973.

On April 15, 1971, the Commission, acting pursuant to the authority of the Natural Gas Act, as amended, particularly sections 4, 5, 7, 8, 10, and 16 thereof (52 Stat. 822, 823, 824, 825, 826, 830; 56 U.S.C. sections 717c, 717d, 717f, 717g, 717i, and 717), issued Order 431 promulgating a Statement of General Policy with respect to the establishment of measures to be taken for the protection of as reliable and adequate service as present natural gas supplies and capacities will permit.

On June 11, 1973, Producer's Gas Company (Applicant) filed in Docket No. CI73-871 an application pursuant to section 7(c) of the Natural Gas Act and § 2.70 of the Commission's General Policy and Interpretations thereunder for a limited term certificate of public convenience and necessity with pregranted abandonment, authorizing the emergency sale of natural gas to Northern Natural Gas Company (Northern) from the Mowery No. 1 Well in Ellis County, Oklahoma.

The limited term certificate application provides that Applicant sell to Northern a maximum of 2,000 M c.f. of gas per day at an initial rate of 51.0¢ (14.65 p.s.i.a.), subject to upward and downward Btu adjustment from a 1,000 Btu base for a term of one year.

Applicant states that it commenced a sixty day emergency sale to Northern on June 4, 1973. The sixty day sale expired on August 3, 1973.

In Order 431, the Commission amended Part 2, Subchapter A, General Rules, Chapter I, Title 18 of the Code of Federal Regulations by adding a new § 2.70, which reads:

(3) The Commission recognizing that additional short-term gas purchases may still be necessary to meet the 1971-1972 demands, will continue the emergency measures referred to earlier for the stated 60-day period. If the emergency purchases are to extend beyond the 60-day period, paragraph 12 in the Notice issued by the Commission on July 17, 1970, in Docket No. R-389A should be utilized (35 FR 11638). The Commission will consider if the pipeline demonstrates emergency need • • •

Paragraph 12 of R-389A provided, in part, that applicants, requesting certificates for sales of natural gas in excess of the ceiling or guideline rate, shall state the grounds for claiming that the present or future public convenience and necessity requires issuance of a certificate on the terms proposed in the application.

The application in this proceeding represents a significant volume of gas potentially available to the interstate market. It is of critical importance that interstate pipelines procure emergency supplies of gas to avoid disruption of service to consumers; nevertheless, we must determine whether the rate to be paid serves the public convenience and necessity. It is therefore necessary that this application be set for public hearing and expeditious determination. The hearing will be held to allow presentation, cross-examination, and rebuttal of evidence by any participant. This evidence should be directed to the issue of whether the present or future public convenience and necessity requires issuance of a limited-term certificate on the terms proposed in that application.

Northern Natural Gas Company filed a late petition to intervene in this proceeding on July 18, 1973, beyond the July 5, 1973, deadline established by the Notice of Application issued on June 19, 1973.

*The Commission finds*

(1) Good cause exists to set for formal hearing the application for a limited term certificate herein.

(2) It may be in the public interest to permit Northern Natural Gas Company, which filed a late petition, to intervene in this proceeding.

*The Commission orders*

(A) The application for limited term certificate for sale of natural gas filed in Docket No. CI73-871 is hereby set for hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly Sections 7, 15, and 16, and the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing September 27, 1973, at 10:00 a.m. (e.d.t.) at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning whether the present or future convenience and necessity requires the issuance of a limited-term certificate for the sale of natural gas on the terms proposed in this application and whether the issuance of said certificate should be conditioned in any way.

(C) Northern Natural Gas Company is hereby permitted to become an intervenor, subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene: *And, provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in these proceedings.

(D) The Applicant and the proposed purchaser, Northern, shall, on or before September 17, 1973, file with the Commission and serve on all parties to this proceeding, including Commission Staff, all testimony to be sponsored in support of the instant application.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB,
*Secretary.*

[Docket Nos. RI74-30, RI73-31]

## RATE CHANGES

### Order Providing for Hearing on and Suspension of Proposed Changes and Allowing Rate Changes To Become Effective Subject to Refund [2]

AUGUST 29, 1973.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

*The Commission finds*

It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

*The Commission orders*

(A) Under the Natural Gas Act, particularly Sections 4 and 15, the Regulations pertaining thereto (18 CFR, Chapter I), and the Commission's Rules of Practice and Procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and Section 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] KENNETH F. PLUMB,
*Secretary.*

[1] Commissioner Moody dissenting filed a separate statement appended hereto.

[2] Does not consolidate for hearing or dispose of the several matters herein.

V 38-173 SEP 7 73 XUM

APPENDIX A

| Docket No. | Respondent | Rate schedule No. | Supplement No. | Purchaser and producing area | Amount of annual increase | Date filing tendered | Effective date unless suspended | Date suspended until— | Cents per Mcf* Rate in effect | Cents per Mcf* Proposed increased rate | Rate in effect subject to refund in docket No. |

* Unless otherwise stated, the pressure base is 15.025 p.s.i.a.
[1] Subject to upward and downward B.t.u. adjustment from a base of 1,000 B.t.u. per cubic foot.
[2] The pressure base is 14.73 p.s.i.a.

APPENDIX "A"

The proposed rate increases are suspended for five months since they exceed the rate limit for one day suspension.

The producers' proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR 2.56).

Nothing contained in this order shall relieve the respondents of any responsibility imposed by the Economic Stabilization Act of 1970 (Pub. L. 91-379, 84 Stat. 799, as amended by Pub. L. 92-15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

[Project No. 1894]

## SOUTH CAROLINA ELECTRIC & GAS CO.

### Notice of Availability of Environmental Statement for Inspection

South Carolina Electric & Gas Company on July 26, 1972, filed an application with the Federal Power Commission (1) requesting a new license under section 15 of the Federal Power Act for the existing Parr Hydroelectric Project (FPC No. 1894) located on the Broad River in Fairfield and Newberry Counties, South Carolina; (2) requesting authorization to construct and include within the new license a pumped-storage project utilizing the existing Parr reservoir enlarged to serve as the lower pool; and (3) requesting authorization to use the upper reservoir of the pumped-storage project as a cooling impoundment for a proposed nuclear electric powerplant (A.E.C. Docket No. 50-395).

Notice is hereby given that a draft environmental statement on this application is being placed in the public files of the Federal Power Commission as required by the Commission's Rules and Regulations under Order 415-C, issued December 18, 1972, effecting section 102 (1)(C) of the National Environmental Policy Act of 1969 (Public Law 91-100).

This statement is available for public inspection in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C., and in its Atlanta Regional Office. Copies will be available from the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151, on or about September 5, 1973, or from the Commission's Office of Public Information, Washington, D.C. 20426.

The existing project is a conventional hydroelectric facility comprising a 2,715-foot-long concrete dam, and 1,850-acre reservoir with a controlled surface elevation of 257.0 feet, USC&GS, a powerhouse containing 6 generators rated at all other facilities and interests appur- 2,480 kw, each, with provisions for 2 additional units, and all other facilities and interests appurtenant to its operation.

The redeveloped project for which a license is requested of the Federal Power Commission will comprise the existing Parr powerhouse structure and generating equipment, the existing Parr dam raised 9 feet in height, an enlarged Parr reservoir having a surface area of 4,400 acres at elevation 266 feet, USC&GS, providing water for operation of the existing Parr project and serving as the lower pool of a proposed pumped-storage project consisting of a 6,800-acre upper pool (Monticello Reservoir); four random fill dams; an intake channel; a gated intake structure; four 800-foot-long surface penstocks; a semi-outdoor generating station (Fairfield Powerhouse) housing eight 83,000 horsepower pump-turbine units and eight motor-generators rated at 100,000 horsepower/64,800 kilowatts; a switchyard; associated transmission lines; and all other facilities appurtenant to operation of the project.

Immediately proposed nuclear works subject to jurisdiction of the Atomic Energy Commission, Unit I of the Virgil C. Summer Nuclear Station to be located on the south shore of Monticello reservoir, will comprise a single nuclear reactor and a single 900,000 kilowatt generator. Application for license for this facility is pending before the Atomic Energy Commission in A.E.C. Docket No. 50-395, and a construction permit has been issued by the Atomic Energy Commission. Authorization for use of the upper reservoir of the pumped-storage project as a source of condenser cooling water for this nuclear plant is requested of the Federal Power Commission in this action.

The recreational use of Parr reservoir at present consists of fishing and waterfowl hunting. Due to pumped-storage operation, presently contemplated recreational development of Parr reservoir consists of a boat launching area. The Applicant contemplates no construction of facilities for water contact recreational use within the main body of Monticello reservoir. Rather, the Applicant plans to construct a separate 300 acre subimpoundment for recreational use. A scenic overlook will be located on the eastern shore of Monticello reservoir; and 1082.5 acres of land will be purchased for future recreational use.

The existing hydroelectric units will continue to be operated as in the past; while the pumped-storage addition will provide peaking capacity. Operation of the redeveloped hydroelectric project will be coordinated with operation of the nuclear station. Its total power output will be available to assist other systems in cases of emergencies.

Any party desiring to present evidence regarding environmental matters in this proceeding must file with the Federal Power Commission a petition to intervene containing an explanation of its differing environmental position, specifying wherein its position is at variance with the environmental statement upon which the intervenor wishes to be heard, and including a discussion of the factors enumerated in Commission Order 415-C. Written statements by parties not wishing to intervene may also be filed for Commission consideration. All petitions to intervene and all written statements should be filed with the Secretary of the Commission on or before 45 days from the date of this publication. The Commission will consider all responses.

KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19039 Filed 9-6-73;8:45 am]

[Docket No. CI74-131]

## SOUTHWESTERN ELECTRIC POWER COMPANY AND CODY C. BEASLEY

### Notice of Application

AUGUST 30, 1973.

Take notice that on August 2, 1973, Southwestern Electric Power Company and Cody C. Beasley (Applicants), P.O. Box 1106, Shreveport, Louisiana 71156, filed in Docket No. CP74-131 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Texas Eastern Transmission Corporation (Texas Eastern) from the Elm Grove Field Area, Bossier Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants proposes to sell up to 10,000 Mcf of gas per day for six months at 45.0 cents per M c.f. at 15.025 p.s.i.a., subject to upward and downward B.t.u. adjustment, within the contemplation of Section 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Upward B.t.u. adjustment is limited to 1,100 B.t.u. per cubic foot, and initial upward B.t.u. adjustment is estimated at 2.7 cents per M c.f. By order issued February 20, 1973, in Docket No. CI73-436 Applicants were authorized to sell gas to Texas Eastern from the Elm Grove Field Area for six months at 35.0 cents per M c.f. at 15.025 p.s.i.a. within the contemplation of Section 2.70.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19057 Filed 9-6-73;8:45 am]

[Docket No. CP-73-27 etc.]

## STINGRAY PIPELINE CO. ET AL.

### Notice Denying Request for Postponement of Prehearing Conference

AUGUST 28, 1973.

Stingray Pipeline Company, Docket No. CP73-27, Sun Oil Company, Docket No. CI73-878, Docket No. CI73-879, Docket No. CI73-880, Pennzoil Offshore Transmission Company, Docket No. CP72-292.

On August 16, 1973, Pennzoil Offshore Transmission Company requested postponement of the prehearing conference scheduled for Setember 4, 1973, by notice issued August 15, 1973, in the above-designated matter. The prehearing conference was postponed by notice issued August 15, 1973, because of a calendar conflict in the Office of the Administrative Law Judges. The conflict still exists.

Upon consideration, notice is hereby given that the above request for postponement of the prehearing conference is denied.

MARY B. KIDD,
*Acting Secretary.*

[FR Doc.73-19038 Filed 9-6-73;8:45 am]

[Docket No. CI72-662]

## SUN OIL CO., ET AL.

### Order Vacating Order in Part, Amending Order Issuing Certificate, and Accepting FPC Gas Rate Schedule Supplement for Filing

AUGUST 30, 1973.

On June 8, 1973, Sun Oil Company (Operator), *et al.* (Sun), filed an amendment to its application in Docket No. CI72-662 filed April 18, 1973, pursuant to section 7(c) of the Natural Gas Act and requested that a limited-term sale of natural gas to United Gas Pipe Line Company (United) extend from July 17, 1973, in lieu of the date of expiration of a previous limited-term certificate or the date of Commission authorization, all as more fully set forth in the amendment to the application in this proceeding.

By order dated June 14, 1973, in the subject docket, Sun was authorized to resume a sale of natural gas to United from the East Dykesville Field for a one year term from the date of the order within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). The order also accepted a contract dated March 11, 1973, as Supplement No. 1 to Sun Oil Company FPC Gas Rate Schedule No. 508. Sun, upon expiration of prior authorization in the subject docket commenced a sixty-day emergency sale of natural gas to Texas Gas Transmission Corporation on May 18, 1973 within the contemplation of § 157.29 of the Regulations under the Natural Gas Act (18 CFR 157.29). Pursuant to a letter agreement with United dated May 19, 1973, Sun requests authorization to make the subject limited-term sale to United for a one year term extending from the end of the 60-day emergency sale with Texas Gas.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order of June 14, 1973, in the subject docket be vacated in part as hereinafter ordered.

(2) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order in the subject docket issuing a certificate of public convenience and necessity be amended as hereinafter ordered and conditioned.

(3) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the letter agreement and contract submitted by Sun should be accepted for filing as supplements to its FPC gas rate schedule.

(4) An emergency exists on the system of United which will continue for at least the term of the authorization granted herein.

The Commission orders:

(A) The Commission's order of June 14, 1973, in Docket No. CI72-662 is vacated insofar as it authorized the sale of gas to United to begin on the date of such order and accepted for filing the contract dated March 11, 1973, effective the date of such order.

(B) The order issuing a certificate of public convenience and necessity in said docket is amended by authorizing the sale of gas to United by Sun for one year from the end of its sixty-day emergency sale of natural gas to Texas Gas, July 17, 1973. In all other respects said order, as amended, shall remain in full force and effect.

(C) The contract dated March 11, 1973, submitted by Sun is accepted for filing as Supplement No. 1 to Sun Oil Company (Operator), *et al.*, FPC Gas Rate Schedule No. 508 to be effective on July 17, 1973.

(D) The letter agreement dated May 18, 1973, is accepted for filing as Supplement No. 2 to Sun Oil Company (Operator), *et al.*, FPC Gas Rate Schedule No. 508 to be effective July 17, 1973.

By the Commission.

[SEAL] KENNETH F. PLUMB,
*Secretary.*

[FR Doc.73-19064 Filed 9-6-73;8:45 am]

## FEDERAL RESERVE SYSTEM

## MANUFACTURERS HANOVER CORP.

### Acquisition of Assets

This matter comes before the Board of Governors on a Request for Reconsideration filed by Manufacturers Hanover Corporation asking that the Board reconsider its Order dated June 25, 1973, whereby the Board denied the application of Manufacturer's Hanover Corporation for prior approval to acquire substantially all the assets of Citizens Mortgage Company pursuant to sec. 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)).

This request for reconsideration is filed pursuant to § 262.3(g)(5) of the Board's rules of procedure which provides:

After action by the Board on an application, the Board will not grant any request for reconsideration of its action unless the request presents relevant facts that, for good cause shown, were not previously presented to the Board, or unless it otherwise appears to the Board that reconsideration would be appropriate.

The Board finds that the request for reconsideration presents relevant facts

V 38 173 SEP 7 73 XUM

(particularly concerning the public benefits of the application) that, for good cause shown, were not previously presented to the Board, and reconsideration appears otherwise appropriate. Therefore, it appears that reconsideration is in the interest of all parties as well as in the public interest.

It is hereby ordered that the request for reconsideration of the application be, and hereby is, granted. In order to facilitate such reconsideration, comments and views regarding the proposed acquisition may be filed with the Board by September 14, 1973. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The Application, as supplemented, may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of New York.

By order of the Board of Governors,[1] effective August 31, 1973.

[SEAL] THEODORE E. ALLISON,
*Assistant Secretary of the Board.*

[FR Doc.73-19151 Filed 9-6-73;8:45 am]

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (73-67)]

### NASA SPACE PROGRAM ADVISORY COUNCIL

#### Notice of Meeting

The NASA Space Program Advisory Council will meet on September 20 and 21, 1973, Room 7002, Federal Office Building 6, 400 Maryland Avenue SW., Washington, D.C. The meeting is open to the public with the exception of the closed sessions, three of which fill the morning of September 20 and the fourth of which is scheduled from 1:00 P.M. to 2:00 P.M. on September 21. The seating capacity of the room is about 40 persons, including Council members and other participants.

The NASA Space Program Advisory Council was established as an interdisciplinary group to advise NASA senior management on Physical Sciences, Life Sciences, Space Applications, and Space Systems. The functions of the Council are to consult with and advise NASA through the Deputy Administrator with respect to the plans for the work in progress on, and accomplishments of NASA's space programs. In this capacity and within the general confines of agendas submitted for its consideration, the Council will review and advise on (1) agency and program objectives, policies, and strategies; (2) the degree to which programs achieve their objectives and contribute to overall agency objectives; and (3) the means for the effective coordination of NASA's interests and activities with the academic, scientific, and engineering communities and institutions. The current Chairman is Dr. Frederick Seitz. There are nine members on the Council and additional members on four committees which report to the Council. The following list sets forth the approved agenda and schedule for the meeting. For further information contact the Executive Secretary, Mr. J. Allen Crocker, Area Code 202-755-3818.

THURSDAY, SEPTEMBER 20

| Time | Topic |
|---|---|
| 9:00 A.M. | *Issues in the FY 1975 Budget* (Closed Session)—Council members may cite some issues on their own initiative. Other issues will be brought out by NASA. The Council should reach consensus on issues considered. |
| 10:45 A.M. | *NASA/USAF Planning for Shuttle Users* (Closed Session)—Members of the Council will be expected to comment on NASA/USAF shuttle usage planning and make appropriate recommendations. |
| 11:30 A.M. | *SPAC Membership* (Closed Session)—SPAC members should be prepared to recommend ways in which the membership base should be broadened and strengthened. Council members should endeavor to have with them the vitae to support individuals they propose for consideration. |
| 1:00 P.M. | *Skylab Update*—The Council will be briefed on the Skylab mission status with emphasis on: the vehicle situation, experimental results, medical criteria for setting the duration of Skylab occupancy, plans in connection with Comet Kohoutek, what has been learned from Skylab that could not have been learned without the presence of man, and what Skylab portends for the future. |
| 2:45 P.M. | *Space Shuttle Update*—Members of the Council will comment on this updating on technical status, problems, and schedule aspects pertaining to the Space Shuttle. |
| 3:15 P.M. | *Space Tug*—After informing the Council of Space Tug study options, phasing options, and program plans, members will be asked to comment. |

FRIDAY, SEPTEMBER 21

| | |
|---|---|
| 9:00 A.M. | *Space Shuttle Payload Planning*—The shuttle payload planning status will be reviewed and comments will be solicited from the members of SPAC. |
| 9:30 A.M. | *1973 Woods Hole Summer Study Results*—Members of the Council will be given an oral summary of NASA's view of what came out of the summer study. |
| 10:00 A.M. | *Sortie Lab (Spacelab) Update*—In order to inform the members of SPAC on the status of European planning with respect to the Spacelab, the Council will be briefed on a review of requirements, ESRO studies, and the status of agreements. |
| 10:45 A.M. | *Viking and Planetary Sterilization*—The Council will be informed of the analysis of Life Sciences subcommittee's efforts and plans. |
| 11:30 A.M. | *Joint Interests of Life Science Committee and Other Committees*—The insight obtained from an analysis of Life Sciences' thrusts for the 1980's, steps achieved, and plans contemplated will be shared for comment by the members of SPAC. |
| 1:00 P.M. | *Executive Session* (Closed)—Members of the Council will review for NASA Top Management the salient factors which influenced their recommendations. |
| 2:00 P.M. | *Administrative* — Select dates for next meeting. |
| 2:15 P.M. | Adjourn. |

HOMER E. NEWELL,
*Associate Administrator, National Aeronautics and Space Administration.*

AUGUST 31, 1973.

[FR Doc.73-19031 Filed 9-6-73;8:45 am]

## DEPARTMENT OF LABOR

### Office of Labor-Management and Welfare-Pension Reports

### ADVISORY COUNCIL ON EMPLOYEE WELFARE AND PENSION BENEFIT PLANS

#### Notice of Meeting

Pursuant to section 14 of the Welfare and Pension Plans Disclosure Act (29 U.S.C. 308e) a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held on Tuesday, September 18, 1973, at 9:30 a.m. in Departmental Auditorium Conference Rooms B & C, 12th and Constitution Avenue NW., Washington, D.C. The meeting will be open to members of the public who signify an intention to attend.

The agenda for the meeting follows:

1. Administration of Oath to New Members.
2. Approval of Minutes of Last Meeting.
3. Bonding Experience Under the Welfare and Pension Plans Disclosure Act.
4. Pension Plan Termination Insurance.

Persons desiring to attend should notify Mr. Edward F. Lysczek, Executive Secretary to the Advisory Council, 301-427-7273.

[1] Voting for this action: Vice Chairman Mitchell and Governors Deane, Brimmer, Sheehan, Bucher, and Holland. Absent and not voting: Chairman Burns.

Signed at Washington, D.C., this 4th day of September 1973.

PAUL J. FASSER, Jr.,
*Assistant Secretary for Labor-Management Relations.*

[FR Doc.73-19073 Filed 9-6-73;8:45 am]

### Office of the Secretary

### FEDERAL SAFETY ADVISORY COUNCIL

#### Notice of Meeting

Notice is hereby given of a meeting to be held by the Federal Safety Advisory Council established to advise the Secretary of Labor with regard to occupational safety and health programs applicable to Federal employees. (Executive Order 11612; 3 CFR 1971 Comp., p. 195.)

The meeting will begin at 9 a.m., on September 12, 1973, in rooms 102 A, B, and C of the United States Department of Labor Building, 14th Street and Constitution Avenue NW., Washington, D.C.

The purpose of this meeting is to consider and discuss the report of the informal meeting between Department of Labor personnel and members of the Council. The meeting took place on August 28, 1973, to review the comments of Council members on the draft proposed regulations for safety and health programs for Federal employees.

Members of the public are invited to attend the proceedings.

Any written data, views, or arguments concerning the matter to be considered which are received by the Council on or before September 11, 1973, together with 25 duplicate copies, will be provided to the members and will be included in the minutes of the meeting.

Interested persons wishing to address the Council at the meeting should submit a request to be heard, together with 25 copies thereof, no later than September 11, 1973, stating the nature of their intended presentation and the amount of time they will need. At the commencement of the meeting the Chairman will announce the extent to which time will permit the granting of such requests.

Communications to the Council should be addressed as follows:
Mr. Eugene L. Newman
Director, Office of Federal Agency Programs
400 First Street NW., Room 409
Washington, D.C. 20210

Signed at Washington, D.C., this 5th day of September 1973.

JOHN STENDER,
*Assistant Secretary of Labor.*

### HUBBARD SHOE CO., INC.

#### Notice of Certification of Eligibility of Workers To Apply for Adjustment Assistance

Under date of August 7, 1973, the U.S. Tariff Commission made a report of the results of its investigation (TEA-W-202) under section 301(c)(2) of the Trade Expansion Act of 1962 (76 Stat. 884) in response to a petition for determination of eligibility to apply for adjustment assistance filed by the United Shoe Workers of America, AFL-CIO, on behalf of the former workers of the Hubbard Shoe Co., Inc., Rochester, N. H. In this report the Commission found that articles like or directly competitive with women's footwear of the types produced by Hubbard Shoe Co., Inc. are, as a result in major part of concessions granted under trade agreements, being imported into the United States in such increased quantities as to cause, or threaten to cause, unemployment or underemployment of a significant number or proportion of the workers of such company or an appropriate subdivision thereof.

Upon receipt of the Tariff Commission's affirmative finding, the Department, through the Director of the Office of Foreign Economic Policy, Bureau of International Labor Affairs, instituted an investigation.

Following this, the Director made a recommendation to me relating to the matter of certification (Notice of Delegation of Authority and Notice of Investigation, 34 FR 18342; 37 FR 2472; 38 FR 22084; 29 CFR Part 90). In the recommendation she noted that concession generated imports like or directly competitive with women's footwear produced by Hubbard Shoe Co., Inc., increased substantially. In the period 1969-1972 the company's customers turned increasingly to imports. In an effort to remain competitive, the company introduced style changes, consolidated production operations and began importing. Despite these efforts, sales declined substantially and the company sustained losses. Company employment declined throughout this period and the plant was closed in April 1973. Reductions in employment prior to 1971 occurred substantially as a result of voluntary separations. Unemployment and underemployment of a significant number of the workers began in July 1971 as a result in major part from increased import competition. After due consideration I make the following certification:

"All workers, hourly, piecework, and salaried, of the Rochester, New Hampshire plant of the Hubbard Shoe Co., Inc., Rochester, New Hampshire, engaged in the production of women's footwear, who became unemployed or underemployed after July 11, 1971 are eligible to apply for adjustment assistance under Title III, Chapter 3, of the Trade Expansion Act of 1962."

Signed at Washington, D.C., this 30th day of August 1973.

HERBERT N. BLACKMAN,
*Deputy Assistant Secretary for Trade and Adjustment Policy.*

## INTERSTATE COMMERCE COMMISSION

[Notice 336]

### ASSIGNMENT OF HEARINGS

SEPTEMBER 4, 1973.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after September 10, 1973.

Finance Docket No. 26241, Penn Central Transporation Company Reorganization, is continued to September 11, 1973, in the Offices of the Interstate Commerce Commission, Washington, D.C.

MC-C-6980 Sub 1, Joe Jones, Jr., DBA Joe Jones Trucking Co.—Revocation of Permit—now assigned September 10, 1973, at Atlanta, Ga., is cancelled.

MC 126625 Sub 11, Murphy Surf-Air Trucking Company, Inc., application dismissed.

MC 126625 Sub 12, Murphy Surf-Air Trucking Company, Inc., application dismissed.

MC 126625 Sub 13, Murphy Surf-Air Trucking Company, Inc., application dismissed.

MC 115826 Sub 244, W. J. Digby, Inc., now assigned September 10, 1973, at Salt Lake City, Utah, is cancelled and application is dismissed.

MC 108411 Sub 5, Stearly's Motor Freight, Inc., Extension—Cranes, now being assigned hearing October 24, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 73165 Sub 321, Eagle Motor Lines, Inc., now being assigned hearing October 24, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 8948 Subs 55 and 67, Western Gillette, Inc., Extension Alternate Route-El Paso, Tex., now being assigned hearing October 30, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 136035 Sub 2, Walter S. Dunning and Walter H. Dunning, d.b.a. W. S. Dunning & Son, now being assigned hearing October 31, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 138568, W. Paul Henry, now being assigned hearing October 31, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC-C-8073, Piggy-Back Service Co. and C. L. "Bill" Shupe—Investigation of Operations and Practices, now assigned September 24, 1973, at Salt Lake City, Utah, is postponed indefinitely.

[SEAL] ROBERT L. OSWALD,
*Secretary.*

[Notice No. 70]

## MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

AUGUST 31, 1973.

The following applications (except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application), are governed by Special Rule 1100.247[1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d) (3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and within 60 days of the date of this publication, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

No. MC 6078 (sub-No. 74), filed July 19, 1973. Applicant: D. F. BAST, INC., P.O. Box 2288, Allentown, Pa. 18001. Applicant's representative: Bert Collins, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Elevators, escalators, and parts thereof, and machinery, materials and supplies* used in the manufacture, installation and maintenance of elevators and escalators (except in bulk), between the plantsite and other facilities of Otis Elevator Co., at Bloomington, Ind., on the one hand, and, on the other, points in the United States in and east of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 14702 (sub-No. 52), filed July 12, 1973. Applicant: OHIO FAST FREIGHT, INC., P.O. Box 808, Warren, Ohio 44482. Applicant's representative: Paul F. Beery, 88 East Broad Street, Suite 1660, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum and aluminum articles* (except commodities in bulk), from the plantsite of Aluminum Company of America at or near Massena, N.Y., to points in Indiana, the Lower Peninsula of Michigan, and the Chicago, Ill., commercial zone.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 49387 (sub-No. 43), filed July 20, 1973. Applicant: ORSCHELN BROS. TRUCK LINES, INC., Highway 24 East, P.O. Box 658, Moberly, Mo. 65270. Applicant's representative: Herman W. Huber, 101 East High Street, Jefferson City, Mo. 65101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, plastic conduit, plastic or iron fittings and connections, valves, hydrants, and gaskets* (except Oil Field Commodities as defined in *Mercer-Extension Oil Field Commodities*, 74 M.C.C. 459), from the plantsite and storage facilities of the Clow Corporation at Columbia, Mo., to points in Illinois, Indiana and Iowa, restricted to traffic originating at the plantsite and storage facilities of the Clow Corporation at Columbia, Mo.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at either Jefferson City, St. Louis, or Kansas City, Mo.

No. MC 50307 (sub-No. 64), filed August 2, 1973. Applicant: INTERSTATE DRESS CARRIERS, INC., 247 West 35th Street, New York, N.Y. 10001. Applicant's representative: Herbert Burstein, One World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wearing apparel and materials, supplies, and equipment* used in the manufacture thereof, between Bridgeport, Pa., on the one hand, and, on the other, Phillipsburg, N.J.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 61403 (sub-No. 222), filed July 19, 1973. Applicant: THE MASON AND DIXON TANK LINES, INC., Highway 11W, P.O. Box 969, Kingsport, Tenn. 37662. Applicant's representative: W. C. Mitchell, Suite 1201, 370 Lexington Avenue, New York, N.Y. 10017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, from the plantsite of Dow Chemical, U.S.A. at or near Plaquemine, La., to points in the United States (except Alaska and Hawaii), restricted to the transportation of shipments originating at the above-named plantsite.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans, La., or Houston, Tex.

No. MC 71902 (sub-No. 77), filed July 19, 1973. Applicant: UNITED TRANSPORTS, INC., 4900 North Santa Fe Street, P.O. Box 18547, Oklahoma City, Okla. 73118. Applicant's representative: Robert E. Joyner, 2008 Clark Tower, 5100 Poplar Avenue, Memphis, Tenn. 38137. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New foreign-made motor vehicles* (except trailers), in truckaway service, in secondary movements, from Houston, Tex., to Memphis, Tenn.; restricted against tacking and joining with any other authority held by applicant for the purpose of performing a through service.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Houston or Dallas, Tex., or Oklahoma City, Okla.

No. MC 73937 (sub-No. 16) (correction), filed May 21, 1973, published in the FEDERAL REGISTER issue of July 26, 1973, and republished, as corrected, this issue. Applicant: HOGAN STORAGE & TRANSFER COMPANY, a corporation, 721 East Fourth Avenue, Williamson, W. Va. 25661. Applicant's representative: John M. Friedman, 2930 Putman Avenue, Hurricane, W. Va. 25526. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, which because of their size or weight require the use of special equipment, and *related construction equipment and tools, and self-propelled articles, and related machinery tools, parts, and supplies* moving in connection therewith (1) between points in West Virginia, on and south of U.S. Highway 60; those in Buchanan, Dickerson, Lee, and Wise Counties, Va.; those in Athens, Gallia, Lawrence, Meigs, and Scioto Counties, Ohio; and those in Kentucky on and east of a line beginning at the Kentucky-Tennessee State line and extending along U.S. Highway 25 to Erlanger, Ky., and those north to the Kentucky-Indiana State line near Constance, Ky.; and (2) between points in (1) above, on the one hand, and, on the other, points in Tennessee; points in that part of Ohio in and east of U.S. Highway 23 extending through Portsmouth, Columbus, Fostoria, and Toledo, Ohio; points in that part of Virginia on and west of U.S. Highway 220 extending through Martinsville, Roanoke, Clifton Forge, Covington, and Monterey, Va., and those in that part of Pennsylvania on and south of U.S. Highway 322 extending through Jamestown, Meadville, and Clearfield, Pa., to Port Matilda, Pa., and on and west of U.S. Highway 220 extending through Bedford and Altoona, Pa., to Port Matilda, Pa.

NOTE.—The purpose of this republication is to indicate that although applicant seeks by the request for authority herein to eliminate a gateway at Mingo County, W. Va., this application is also a request to extend applicant's commodity authority. Applicant further states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at either Charlestown, W. Va.; Columbus, Ohio, or Washington, D.C.

No. MC 78687 (sub-No. 38), filed July 3, 1973. Applicant: LOTT MOTOR LINES, INC., 118 Monell Street, Penn Yan, N.Y. 14527. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Bldg., 666 11th Street NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt products*, from the facilities of the Morton Salt Company, Division of Morton International, Inc., at Milo Township, N.Y., to points in New Jersey, New York, Pennsylvania, Connecticut, Massachusetts, Rhode Island, Vermont, Maine, and New Hampshire.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. Applicant also holds contract carrier authority in MC 2505, therefore dual operations may be involved. Common control may also be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Chicago, Ill.

No. MC 9530 (sub-No. 19), filed June 20, 1973. Applicant: NORTHERN NECK TRANSFER, INC., P.O. Box 345, Montross, Va. 22520. Applicant's representative: L. C. Major, Jr., Suite 301, Tavern Square, 421 King Street, Alexandria, Va. 22314. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Building materials*, from points in New Jersey, Pennsylvania, and Delaware, to Marlow Heights, Md., (2) *pallets*, wood, set up or knocked down, and *pallet parts*, from Lorne, Va., to points in West Virginia and North Carolina; (3) *treated and untreated lumber, timber, railroad ties, poles, and posts*, from points in that part of Virginia on and east of U.S. Highway 15 (except Franklin, Va., and points in Isle of Wight County, Va.), to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and the District of Columbia; and (4) *wooden mats* from Warsaw, Va., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and the District of Columbia.

NOTE.—Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Richmond, Va.

No. MC 79525 (sub-No. 2), filed July 5, 1973. Applicant: THE NORRIS BROTHERS COMPANY, a corporation, 2138 Davenport Avenue, Cleveland, Ohio 44114. Applicant's representative: Thomas R. Chase, 800 National City Bank Building, Cleveland, Ohio 44114. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk, in tank vehicles), between points in Cuyahoga County, Ohio, and points in Ohio.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Cleveland, Ohio.

No. MC 99610 (sub-No. 16), filed July 27, 1973. Applicant: ROSS NEELY EXPRESS, INC., 1500 Second Street, Pratt City, Birmingham, Ala. 35214. Applicant's representatives: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th Street NW., Washington, D.C. 20004, and Robert S. Richard, 57 Adams Avenue, P.O. Box 2069, Montgomery, Ala. 36103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pipe fittings, hydrants, valves, and parts, and accessories* for the aforenamed items (except commodities in bulk), from the facilities of United States Pipe and Foundry Company at or near Birmingham and Bessemer, Ala., to points in Tennessee, Georgia, Florida, North Carolina, and South Carolina, restricted to the transportation of traffic originating at the facilities of United States Pipe and Foundry Company at or near Birmingham and Bessemer, Ala.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Birmingham, Ala., or Washington, D.C.

No. MC 102567 (sub-No. 165), filed July 9, 1973. Applicant: EARL GIBBON TRANSPORT, INC., 4295 Meadow Lane, P.O. Drawer 5357, Bossier City, La. 71010. Applicant's representative: Jo E. Shaw, 816 Houston First Savings Building, Houston, Tex. 77002. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and plastics*, liquid and dry, in bulk, from points in Gregg and Harrison Counties, Tex., to points in the United States (except Alaska and Hawaii).

NOTE.—Applicant states that the requested authority can be tacked with its existing authority (1) at points in Gregg and Harrison Counties, Tex., on petroleum products and liquefied petroleum gases, to serve points in the United States (except Alaska and Hawaii); and (2) at points in Texas, Arkansas, and Louisiana within 150 miles of Henderson, Tex., on chemicals to provide service between the points named in (2) above, but applicant indicates it has no present intention to tack. If a hearing is deemed necessary, applicant requests it be held at New Orleans, La., or Houston, Tex.

No. MC 103051 (sub-No. 280), filed May 14, 1973. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Avenue, North, P.O. Box 90408, Nashville, Tenn. 37209. Applicant's representative: Russell E. Stone (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils, animal fats, and blends thereof*, in bulk, in tank vehicles, from Chattanooga, Tenn., to points in New Jersey.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority can be tacked with MC 103051 at Chattanooga, Tenn., to provide through service from points in Georgia to points in Tennessee, and further to provide through service from points in Alabama and Mississippi to points in Tennessee, but it has no present intention to tack. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Nashville, Tenn., or Atlanta, Ga.

No. MC 103051 (sub-No. 281), filed June 19, 1973. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Avenue North, Nashville, Tenn. 37209. Applicant's representative. Russell E. Stone (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and fertilizer solutions*, in bulk, in tank vehicles, from Eufaula, Ala., to points in Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority can be tacked with its sub 217 at points in Robertson County, Tenn., to serve points in Indiana, Michigan, Ohio, Virginia, and Missouri; and with sub 230 at Lavergne, Tenn., to serve points in Illinois, Indiana, Michigan, and Virginia, but

FEDERAL REGISTER, VOL. 38, NO. 173—FRIDAY, SEPTEMBER 7, 1973

V 38 N 173 SEP 7 73 XUM

it has no present intention to tack. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing as deemed necessary, applicant requests it be held at Nashville, Tenn., or Atlanta, Ga.

No. MC 103051 (sub-No. 282), filed June 25, 1973. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Avenue North, Nashville, Tenn. 37209. Applicant's representative: Russell E. Stone (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sulfuric acid*, in bulk, in tank vehicles, from Carrollton, Ga., to Hanceville, Ala.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Nashville, Tenn.

No. MC 103498 (sub-No. 35), filed July 9, 1973. Applicant: W. D. SMITH TRUCK LINE, INC., P.O. Drawer C, DeQueen, Ark. 71832. Applicant's representative: Donald T. Jack, Jr., 1550 Tower Building, Little Rock, Ark. 72201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Particleboard*, from Corrigan, Tex., to points in Arkansas, Louisiana, Mississippi, New Mexico, and Oklahoma.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Little Rock, Ark.

No. MC 103926 (sub-No. 29), filed July 16, 1973. Applicant: W. T. MAYFIELD SONS TRUCKING CO., a Corporation, 3881 Bankhead Highway, P.O. Box 947, Mableton, Ga. 30059. Applicant's representative: R. J. Reynolds, III, 1500 Candler Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cranes, derricks, power shovels, draglines, front end loaders, backhoes, and related parts and attachments* moving in connection therewith, which because of size or weight requires the use of special equipment or handling, from the plantsites of the Bucyrus-Erie Company at Evansville, Ind., to points in Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas, restricted to traffic originating at and destined to points named above.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 105159 (sub-No. 29), filed July 5, 1973. Applicant: KNUDSEN TRUCKING, INC., 1320 West Main Street, Red Wing, Minn. 55066. Applicant's representative: Robert D. Gisvold, 1000 First National Bank Building, Minneapolis, Minn. 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Cheese and cheese products*, from points in Wisconsin (except Marshfield and Brown County), and Bongard and Dalbo, Minn., to Philadelphia, Pa., Richmond and Norfolk, Va., North Carolina, Columbia, S.C., Baltimore, Md., and Boston, Mass., restricted to traffic originating at the storage and production facilities serving Wildstein, a division of Brooks Bond Foods, Inc., and destined to the above-named points; (2) *cheese and cheese products*, from the plantsite and warehouse facility of Wildstein, a division of Brooke Bond Foods, Inc., at Philadelphia, Pa., to Richmond and Norfolk, Va., North Carolina, Columbia, S.C., and Baltimore, Md.; (3) *empty steel drum containers*, used for transporting cheese and cheese products, from the plantsite and warehouse facilities of Wildstein, a division of Brooke Bond Foods, Inc., at Philadelphia, Pa., to points in Wisconsin and Bongard and Dalbo, Minn.; and (4) *inedible cheese and inedible cheese products*, from the plantsite and warehouse facilities of Wildstein, a division of Brooke Bond Foods, Inc., located at or near Philadelphia, Pa., to Peoria, Ill.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 106398 (sub-No. 680), filed July 9, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, Okla. 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers*, designed to be drawn by passenger automobiles, in initial movements, from Grand Junction (Mesa County), Colo., to points in the United States (except Alaska and Hawaii).

NOTE.—Dual operations and common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 106398 (sub-No. 681), filed July 9, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, Okla. 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood panels*, from Charleston, S.C., to points in the United States east of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—Dual operations and common control may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Charlotte, N.C.

No. MC 107012 (sub-No. 185), filed July 23, 1973. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Lincoln Highway East and Meyer Road, Fort Wayne, Ind. 46801. Applicant's representative: Terry G. Fewell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Nonmotorized playground and recreational furnishings and equipment*, from Bossier City, La., to points in the United States, including Alaska and Hawaii.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 107012 (sub-No. 186), filed July 23, 1973. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Lincoln Highway East and Meyer Road, Fort Wayne, Ind. 46801. Applicant's representative: Donald C. Lewis (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lawn mowers*, from Indianolla, Miss., and Lawrenceburg, Tenn., to points in the United States, including Alaska and Hawaii, and (2) *lawn and garden tools*, from Statesville, N.C., to points in the United States, including Alaska and Hawaii.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 107107 (sub-No. 430), filed August 9, 1973. Applicant: ALTERMAN TRANSPORT LINES, INC., 12805 Northwest 42d Avenue (LeJeune Road), Opa Locka, Fla. 33054. Applicant's representative: Ford W. Sewell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods and foodstuffs*, from points in Florida, to points in Alabama, Arkansas, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Wisconsin, and the District of Columbia.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at either Tampa, Orlando, or Miami, Fla.

No. MC 107403 (sub-No. 855), filed July 6, 1973. Applicant: MATLACK, INC., Ten West Baltimore Avenue, Lansdowne, Pa. 19050. Applicant's representative: Harry C. Ames, Jr., 666 11th Street NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lime, limestone and cement*, in bulk and in bags, from the plantsites of Cheney Lime and Cement Company at Graystone (Blount County), and Landmark (Shelby County), Ala., to points in Alabama, Florida, Georgia,

Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee, and (2) *liquefied petroleum gas*, in bulk, in tank vehicles, from Milner, Ga., to points in Alabama.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 107445 (sub-No. 4), filed July 9, 1973. Applicant: UNDERWOOD MACHINERY TRANSPORT, INC., 940 West Troy Avenue, Indianapolis, Ind. 46225. Applicant's representative: K. Clay Smith, P.O. Box 33051, Indianapolis, Ind. 46203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, plastic couplings and fittings, plastic articles, and adhesive cement* used in the installation of plastic pipe, tubing, conduit valves, and fittings, from points in Licking County, Ohio, on the one hand, and, on the other, points in New York, Pennsylvania, West Virginia, Kentucky, Indiana, Michigan, Illinois, Missouri, Iowa, Wisconsin, Minnesota, and New Jersey.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind.

No. MC 107743 (sub-No. 23) (correction), filed June 15, 1973, published in the FEDERAL REGISTER issue of August 9, 1973, and republished, as corrected, this issue. Applicant: SYSTEM TRANSPORT, INC., 6523 Broadway, Spokane, Wash. 99206. Applicant's representative: S. J. Cully, Jr., P.O. Box 3456TA, Spokane, Wash. 99220. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron and steel and iron and steel articles*, from Chicago Heights, Ill.; points in Porter County, Ind.; and points in Michigan and Ohio, to points in Idaho Montana, Oregon, Washington, and California; (2) *iron and steel; and iron and steel articles*, when transported together with nonferrous articles, from Chicago, Ill., to points in Washington and California.

NOTE.—Applicant states that the requested authority "cannot" be tacked with its existing authority. The purpose of this republication is to correctly indicate: (1) Applicant's representative as S. J. Culley, in lieu of, Gordon Roberts; and (2) the tacking information. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 108973 (sub-No. 10), filed July 16, 1973. Applicant: INTERSTATE EXPRESS, INC., 2334 University Avenue, St. Paul, Minn. 55114. Applicant's representative: Joseph J. Dudley, W-1260 First National Bank Building, St. Paul, Minn. 55101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products*, from St. Cloud, Minn., to points in Illinois, Indiana, Iowa, Kansas, Michigan, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin, with no transportation for compensation on return except as otherwise authorized; and (2) *machinery, equipment, materials and supplies* used in, or in connection with the manufacture of paper and paper products, between St. Cloud, Minn., on the one hand, and, on the other, points in Illinois, Indiana, Iowa, Kansas, Michigan, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin, under contract with Hoerner Waldorf Corporation, located at St. Paul, Minn.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 109326 (sub-No. 107), filed July 17, 1973. Applicant: C & D TRANSPORTATION CO., INC., P.O. Box 10506, New Orleans, La. 70121. Applicant's representative: William P. Jackson, Jr., 919 18th Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Gulfport, Miss., to points in Louisiana, Mississippi, Arkansas, Missouri, Illinois, Indiana, Ohio, Kentucky, Tennessee, North Carolina, South Carolina and those in that part of Alabama on and north of U.S. Highway 80, restricted against service from or to any facility of the Great Atlantic & Pacific Tea Company.

NOTE.—Common control and dual operations may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or New Orleans, La.

No. MC 109649 (sub-No. 15), filed June 27, 1973. Applicant: L. P. TRANSPORTATION, INC., Cross and Main Streets, Chester, N.Y. 10918. Applicant's representative: John L. Alfano, 2 West 45th Street, New York, N.Y. 10036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquefied natural gases*, in bulk, in tank vehicles, from Everett, Mass., Chattanooga, Tenn., and Roanoke, Va., to Howell Township, Manahawkin, and McKee City, N.J.

NOTE.—Common control may be involved. Applicant states that the requested authority can be tacked with its lead certificate in MC 109649 at Howell Township, Manahawkin, and McKee City, N.J., to provide a through service to points in New York, New Jersey, and Pennsylvania within 150 miles of Chester, N.Y. (including Chester); with sub 5 at Everett, Mass., to originate traffic at Newark, N.J.; sub 6 at Everett, Mass., to originate traffic at Bath, Harford, Mills, and Hudson Falls, N.Y., and points in New York on the Texas-Eastern Transmission Corporation Pipeline extending from the Pennsylvania-New York State line near Corning, N.Y., to Selkirk, N.Y.; sub 8 at Everett, Mass., to originate traffic from pipeline outlets of the Texas-Eastern Transmission Corporation (Little Big Inch Division) pipeline in Pennsylvania; and sub 11 at Everett, Mass., to originate service at Providence, R.I., providing service in all of the above to the destination points requested herein. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 110420 (sub-No. 685), filed July 2, 1973. Applicant: QUALITY CARRIERS, INC., P.O. Box 186, Pleasant Prairie, Wis. 53158. Applicant's representative: Fred H. Figge (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soybean products*, dry, in bulk, from points in Illinois to Muscatine, Iowa.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its present authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 111045 (sub-No. 105), filed July 23, 1973. Applicant: REDWING CARRIERS, INC., P.O. Box 426, Tampa, Fla. 33601. Applicant's representative: J. V. McCoy (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Caustic soda*, in bulk, in tank vehicles, from McIntosh, Ala., to points in Florida.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

No. MC 111401 (sub-No. 392), filed July 6, 1973. Applicant: GROENDYKE TRANSPORT, INC., 2510 Rock Island Boulevard, P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Alvin J. Meiklejohn, Jr., Suite 1600, Lincoln Center, 1660 Lincoln Street, Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Flour*, in bulk, in tank vehicles, from Enid, Okla., to points in Georgia and Arizona: (2) *petroleum wax*, in bulk, in tank vehicles, from Gulf Oil Company—U.S. Cedar Bayou Olefin plant at or near Baytown, Tex., to points in Connecticut and New Jersey; and (3) *dry plastic material*, in bulk, in tank vehicles, from Beaumont, Tex., to points in Louisiana.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans, La., or Houston, Tex.

No. MC 111956 (sub-No. 28), filed July 16, 1973. Applicant: SUWAK TRUCKING COMPANY, a Corporation, 1105 Fayette Street, Washington, Pa. 15301. Applicant's representative: Henry M. Wick, Jr., 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap paper*, from the facilities of Clev-Pak Corporation, located in Donora, Pa., to Piermont, N.Y.

NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 112822 (sub-No. 283), filed July 12, 1973. Applicant: BRAY LINES INCORPORATED, P.O. Box 1191, 1401 North Little Street, Cushing, Okla. 74023. Applicant's representative: Jim R. Gardner (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from the plantsite and facilities utilized by Banquet Foods at or near Wellston, Ohio, to points in Alabama, Arkansas, Florida, Georgia, Illinois, Iowa, Kentucky, Louisiana, Mississippi, Missouri, Minnesota, North Carolina, South Carolina, Tennessee, Texas, and Wisconsin.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis, or Kansas City, Mo.

No. MC 113621 (sub-No. 3), filed August 2, 1973. Applicant: WILLIAM BROOKHISER, ROBERT BROOKHISER, AND HAROLD BROOKHISER, a partnership, doing business as BROOKHISER TRUCKING COMPANY, Wever, Iowa 52658. Applicant's representative: Kenneth F. Dudley, 611 Church Street, P.O. Box 279, Ottumwa, Iowa 52501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Liquid fertilizer*, in bulk, in tank vehicles, from West Point, Iowa, to points in Illinois and Missouri, and (2) *liquid fertilizer, aqua ammonia, and phosphoric acid*, in bulk, in tank vehicles, from points in Illinois and Missouri, to West Point, Iowa.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Kansas City, Mo.

MC 114273 (sub-No. 144), filed July 9, 1973. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Robert E. Konchar, Suite 315 Commerce Exchange Building, 2720 First Avenue NE., P.O. Box 1943, Cedar Rapids, Iowa 52406. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh, frozen, and smoked meats* from Cincinnati, Ohio, to Charleston, W. Va., Woodbridge, N.J., and points in the New York, N.Y., commercial zone.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 114552 (sub-No. 87), filed July 9, 1973. Applicant: SENN TRUCKING COMPANY, a Corporation, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., 919 18th Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Steel electrical conduit pipe*, from the plantsite and facilities of Jones & Laughlin Steel Corp. at New Kensington, Pa., to points in Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 114604 (sub-No. 15), filed July 12, 1973. Applicant: CAUDELL TRANSPORT, INC., State Farmers Market Building 33, Forest Park, Ga. 30050. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Road NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except commodities in bulk), from the plantsites and warehouse facilities of Atlantic Refrigerated Warehouse, Division of Munford, Inc., at Atlanta, Ga., and its commercial zone, to points in North Carolina, those in Florida in and north of Levy, Marion, Putnam, and Flagler Counties, and Daytona Beach, Fla.

NOTE.—Applicant states that the requested authority can be tacked with its existing authority at Atlanta, Ga., to provide a through service from points in Georgia to points in the destination territory described above. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga., or Washington, D.C.

No. MC 114604 (sub-No. 17), filed July 16, 1973. Applicant: CAUDELL TRANSPORT, INC., State Farmers Market, Bldg. 33, Forest Park, Ga. 30050. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Rd., NE., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Meats, meat products, meat byproducts, dairy products, and articles distributed by meat packinghouses*, as described in Sections A, B and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, and (2) *foodstuffs*, in vehicles equipped with mechanical refrigeration, from points in Georgia to points in Alabama, those in Florida in and north of Levy, Marion, Putnam and Flagler Counties, North Carolina, South Carolina, and Daytona Beach, Fla., and Chattanooga, Tenn.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga. or Washington, D.C.

No. MC 115093 (Sub-No. 12), filed July 16, 1973. Applicant: MERCURY MOTOR EXPRESS, INC., 704 West Kennedy Boulevard, Tampa, Fla. 33606. Applicant's representative: Clayton R. Byrd (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Candy, confectionery, and related products* (except in bulk), and (2) *advertising matter, premium and display materials* when shipped in the same vehicle with commodities described in (1) above, from the plantsite and warehouse facilities of M&M/MARS, Division of Mars, Inc., located at or near Albany, Atlanta, Doraville, and Decatur, Ga., to points in Florida and South Carolina, restricted to the transportation of traffic originating at the plantsite and warehouse facilities of M&M/MARS, Division of Mars, Incorporated.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga., or Jacksonville, Fla.

No. MC 115130 (Sub-No. 5), filed July 2, 1973. Applicant: PAULSON TRUCK LINE, INC., 2008 N. E. Airport Road, Roseburg, Oreg. 97470. Applicant's representative: Norman E. Sutherland, 1200 Jackson Tower, Portland, Oreg. 97205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Heavy machinery and other commodities*, the transportation of which, because of size or weight requires the use of special equipment, and (2) *related machinery parts, equipment and supplies*, when the transportation thereof is incidental to the transportation of heavy machinery and other commodities which by reason of size or weight require the use of special equipment, between points in Jackson and Josephine Counties, Oreg., on the one hand, and, on the other, points in Del Norte, Humboldt, Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Mendocino, Pulmas, and Butte Counties, Calif., restricted to traffic originating at or destined to points in the Oregon and California Counties named.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at either Portland or Medford, Oreg.

No. MC 115931 (Sub-No. 28), filed June 25, 1973. Applicant: BEE LINE TRANSPORTATION, INC., Box 925, Berwald Road, Baker, Mont. 59313. Applicant's representative: Vernon P. Williams, Aberdeen Federal Savings and Loan Building, Aberdeen, S. Dak. 57401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, lumber products, and wood products*, from points in Montana to points in North Dakota, Michigan, Indiana, Ohio, Kansas, and Missouri.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Billings, Mont.

No. MC 116073 (Sub-No. 284), filed July 27, 1973. Applicant: BARRETT MOBILE HOME TRANSPORT, INC., 1825 Main Avenue, P.O. Box 919, Moorhead, Minn. 56560. Applicant's representative: Robert G. Tessar, 1819 4th Avenue South, Kegal Plaza, Moorhead, Minn. 56560. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers* designed to be drawn by passenger automobiles, in initial movements, and *buildings* complete or in sections transported on wheeled undercarriages, from points in Pickens County, Ala., to points in Mississippi, Tennessee, Kentucky, Georgia, Arkansas, Louisiana, Missouri, Illinois, North Carolina, South Carolina, and Florida.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Birmingham, Ala.

No. MC 116300 (Sub-No. 14), filed July 12, 1973. Applicant: NANCE AND COLLUMS, INC., P.O. Drawer J, Fernwood, Miss. 39635. Applicant's representative: Harold D. Miller, Jr., 700 Petroleum Bldg., P.O. Box 22567, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sugar*, in sacks and packages, and *condiments*, packaged in individual servings, when moving as part of a shipment of sugar, from (1) Supreme, La., to points in Georgia, North Carolina, South Carolina, Virginia, and West Virginia; (2) from points in St. John the Baptist Parish, La., to points in Arkansas, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Missouri, North Carolina, Ohio, South Carolina, Tennessee, Texas, Virginia, and West Virginia; (3) from Gramercy and Mathews, La., to points in Arkansas, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Missouri, North Carolina, Ohio, South Carolina, Tennessee, Texas, Virginia, and West Virginia; and (4) points in St. Bernard Parish, La., to points in Arkansas, Illinois, Indiana, Kansas, Kentucky, Missouri, Tennessee, and Texas.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans, La.

No. MC 116763 (Sub-No. 264), filed July 9, 1973. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, Ohio 45380. Applicant's representative: H. M. Richters (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned foodstuffs*, from Bloomer, Wis., to points in the United States (except Alaska, Hawaii, and Wisconsin).

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 116763 (Sub-No. 265), filed July 9, 1973. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, Ohio 45380. Applicant's representative: H. M. Richters (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except commodities in bulk), from Parkesburg, Pa., to points in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont, restricted to traffic originating at the facilities of the Green Giant Company, at Parkesburg, Pa., and destined to the states named above.

NOTE.—Applicant states that it cannot be tacked. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 117548 (Sub-No. 2), filed July 6, 1973. Applicant: M & M TANK LINES OF VIRGINIA, INC., P.O. Box 30006, Washington, D.C. 20014. Applicant's representative: William P. Sullivan, Federal Bar Building West, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquefied petroleum gas*, in bulk, from Norfolk, Va., to points in Georgia, Tennessee, Kentucky, West Virginia, Pennsylvania, and New Jersey.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 119665 (Sub-No. 2), filed June 28, 1973. Applicant: APD TRANSPORT CORP., 1 Railroad Place, Maspeth, N.Y. 11378. Applicant's representative: Morton E. Kiel, 140 Cedar Street, New York, N.Y. 10006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities*, as are dealt in by a manufacturer of greeting cards (except in bulk), from West Chester, Pa., to carrier's terminal in Maspeth, N.Y., and *returned shipments* on return.

NOTE.—Applicant states that the requested authority can be tacked with its existing authority at its terminal in Maspeth, N.Y., to provide through service to points in New Jersey, New York, and Connecticut within fifty miles of the New York, N.Y., Commercial Zone. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 119777 (Sub-No. 263), filed June 29, 1973. Applicant: LIGON SPECIALIZED HAULER, INC., P.O. Box L, Madisonville, Ky. 42431. Applicant's representative: William P. Sullivan, Federal Bar Building West, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, plastic conduit, plastic and iron fittings and connections, valves, hydrants*, and *gaskets* (except oil field commodities as defined in *Mercer-Extension Oil Field Commodities*, 74 M.C.C. 459), from the plant site and storage facilities of the Clow Corporation at Columbia, Mo., to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. Applicant holds contract carrier authority in No. MC-126970 (Sub-Nos. 1 and 3), therefore dual operations may also be involved. Applicant further states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Lexington, Ky.

No. MC 119777 (Sub.-No. 264), filed June 29, 1973. Applicant: LIGON SPECIALIZED HAULER, INC., P.O. Box L, Madisonville, Ky. 42431. Applicant's representative: Ronald E. Butler (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel, and iron and steel articles*, (1) from Gulfport, Miss., to points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas, and (2) from New Orleans, La., and Mobile, Ala., to Gulfport, Miss.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. Applicant also holds contract carrier authority in MC 126970 and subs thereunder, therefore dual operations may be involved. Common control may also be involved. If a hearing is deemed necessary, applicant requests it be held at Lexington, Ky., or Washington, D.C.

No. MC 124083 (Sub-No. 48), filed June 29, 1973. Applicant: SKINNER MOTOR EXPRESS, INC., 1035 S. Keystone Avenue, Indianapolis, Ind. 46203. Applicant's representative: Walter F. Jones, Jr., 601 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soda ash*, dry and in bulk, in dump vehicles, from Wyandotte, Mich., to Gas City and Indianapolis, Ind.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind., or Detroit, Mich.

No. MC 124212 (Sub-No. 72), filed July 19, 1973. Applicant: MITCHELL TRANSPORT, INC., 6500 Pearl Road, Cleveland, Ohio 44130. Applicant's representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, Ohio 44114. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, in bulk, in tank vehicles, from the plant site of Diamond-Kosmos Cement Division, The Flintkote Company, located at Indianapolis, Ind., to points in Kentucky, Illinois, and Ohio.

NOTE.—Dual operations and common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 124511 (Sub-No. 18), filed July 16, 1973. Applicant: JOHN F. OLIVER, East Highway 54, P.O. Box 223, Mexico, Mo. 65265. Applicant's representative: Paul J. Maton, Suite 1620 Ten South LaSalle St., Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, plastic conduit, plastic and iron fittings and connections, valves, hydrants, and gaskets* (except Oil Field Commodities as defined in *Mercer-Extension Oil Field Commodities*, 74 M.C.C. 459), from the plantsite and storage facilities of the Clow Corporation at Columbia, Mo., to points in

Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, Oklahoma, Tennessee, and Wisconsin.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo., or Chicago, Ill.

No. MC 124511 (Sub-No. 19), filed July 24, 1973. Applicant: JOHN F. OLIVER, E. Highway 54, P.O. Box 223, Mexico, Mo. 65265. Applicant's representative: Ernest A. Brooks II, 1301 Ambassador Bldg., St. Louis, Mo. 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles* (except such articles which because of size and weight require the use of special equipment), from plantsite and storage facilities of Keystone Steel & Wire, Division of Keystone Consolidated Industries, Inc., at or near Peoria, Ill., to points in Arkansas, Kansas, and Missouri.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 124692 (Sub-No. 115), filed July 2, 1973. Applicant: SAMMONS TRUCKING, a Corporation, P.O. Box 1447, Missoula, Mont. 59801. Applicant's representative: Donald W. Smith, 900 Circle Tower Bldg., Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel, and iron and steel articles*, from points in Minnesota and LaCrosse, Wis., to points in North Dakota, South Dakota, and Nebraska.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 125777 (Sub-No. 144), filed July 18, 1973. Applicant: JACK GRAY TRANSPORT, INC., 4600 East 15th Avenue, Gary, Ind. 46403. Applicant's representative: Carl L. Steiner, 39 South LaSalle Street, Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Alloys, ores, scrap shapes and pig iron*, in dump vehicles, from Theodore, Ala., to points in Georgia, Illinois, Indiana, Kentucky, Maryland (except Baltimore), Michigan, New Jersey, New York, North Carolina, Ohio, Pennsylvania (except Lewistown and points in Decatur and Derry Township (Mifflin Co.)), South Carolina, West Virginia, Tennessee, Wisconsin, and Virginia, (B) *materials and supplies* used in the manufacture of alloys and pig iron, in dump vehicles, from points in Illinois, Indiana, Kentucky (except points in Marshall Co.), Maryland (except Baltimore), Michigan, New Jersey, New York, Ohio, South Carolina, West Virginia, and Pennsylvania (except Lewistown and points in Decatur and Derry Township (Mifflin Co.)), to Theodore, Ala., and (C) *alloys, ores, silicon metals, scrap metals, scrap steel shapes, pig iron, coke, limestone and clay*, in dump vehicles, between Charleston, S.C., on the one hand, and, on the other, points in Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania, Virginia, and West Virginia, restricted against the transportation of traffic from Charleston, S.C., to Baltimore, Md.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 128117 (Sub-No. 18), filed July 24, 1973. Applicant: NORTON-RAMSEY MOTOR LINES, INC., P.O. Box 896, Hickory, N.C. 28601. Applicant's representative: Francis J. Ortman, 1100 17th St. NW., Suite 613, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Alexander, Burke, Caldwell, Catawba, Davidson, Haywood, Iredell, McDowell, and Rutherford Counties, N.C., to points in Arkansas and Louisiana.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Winston-Salem, N.C., or Washington, D.C.

No. MC 128339 (Sub-No. 3), filed June 27, 1973. Applicant: REGISTER VAN & STORAGE COMPANY, INC., 1371 Jacqueline Drive, Columbus, Ga. 31906. Applicant's representative: C. E. Walker, Suite 307, First National Bank Building, P.O. Box 1085, Columbus, Ga. 31902. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk, and Classes A and B explosives), in shipper or railroad owned trailers, for movement in rail TOFC service, between railroad ramps in Columbus, Ga., on the one hand, and, on the other, points in Harris, Meriwether, Talbot, Taylor, Marion, Webster, Quitman, Chattachoochee, Stewart and Schley Counties, Ga.

NOTE.—Applicant states that the requested authority can be tacked with MC 128339 at Columbus, Ga., to serve Phenix City, Ala., further, tacking possibilities exist with its Sub 2 to provide a through service between various Alabama Counties on the one hand, and, on the other, points in the above-named Georgia Counties, but indicates it has no present intention to tack with this authority. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Columbus or Atlanta, Ga.

No. MC 128638 (Sub-No. 3), filed July 19, 1973. Applicant: CENTRAL GRAIN HAULERS, INC., Route #1, Van Meter Road, Winchester, Ky. 40391. Applicant's representative: George M. Catlett, 703–706 McClure Bldg., Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal and poultry feed ingredients*, in bags, and in bulk, between points in Ohio, Kentucky, Tennessee, Indiana, Illinois, Missouri, Virginia, Wisconsin, the lower peninsula of Michigan, Arkansas, and Alabama; (2) *animal and poultry feed ingredients*, in bags and in bulk, from points in Florida to points in Illinois, Indiana, Ohio, Kentucky, Tennessee, and the lower peninsula of Michigan; (3) *animal and poultry feeds and animal and poultry feed ingredients*, in bags and in bulk, from points in Ohio, Indiana, Illinois, and Kentucky, to points in Florida, Georgia, Virginia, and Tennessee; and (4) *distillers malt*, in bulk, between points in Kentucky, Indiana, Ohio, Wisconsin, and Minnesota, restricted to (1) through (4) above against the transportation of commodities in bulk, in tank vehicles.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Cincinnati, Ohio, or Louisville, Ky.

No. MC 128988 (Sub-No. 27), filed August 6, 1973. Applicant: JO/KEL, INC., P.O. Box 1249, 159 South Seventh Avenue, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Upholstery and carpet tacking rims and strips, nails, adhesive cement, mechanic hand tools, and advertising materials, racks, and stands* therefore, from Conyers, Ga., to City of Industry, Calif., and points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas, and (2) *materials, equipment, and supplies* used in the manufacture and distribution of the commodities described in (1) above, from points in the above-described destination territory to Conyers, Ga., restricted against the transportation of commodities in bulk, under a continuing contract or contracts with Taylor Industries, Inc.,

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif., or Washington, D.C.

No. MC 128988 (Sub-No. 28), filed August 6, 1973. Applicant: JO/KEL, INC., P.O. Box 1249, 159 South Seventh Avenue, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Upholstery and carpet tacking rims and strips, nails, adhesive cement, mechanic hand tools, and advertising materials, racks and stands therefor* from City of Industry, Calif., to points in Oregon, Washington, Idaho, Nevada, Arizona, New Mexico, Utah, Colorado, Wyoming, and Montana, and (2) *materials, equipment, and supplies* used in the manufacture and distribution of the

commodities described in (1) above, from points in the above-named destination states to City of Industry, Calif., restricted against the transportation of commodities in bulk, under a continuing contract or contracts with Taylor Industries, Inc.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif., or Washington, D.C.

No. MC 129191 (Sub-No. 4), filed July 30, 1973. Applicant: RICHARD T. PLATTNER, doing business as JANS MOTOR SERVICE, 4640 West 120th Street, Alsip, Ill. 60658. Applicant's representative: Albert A. Andrin, 29 South LaSalle Street, Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron, steel and aluminum metal plate structures, erection equipment and parts thereof and materials and supplies* used in the erection of metal plate structures, in self-unloading equipment, from Indian Oaks, Ill., to points in Wisconsin, Ohio, Kansas, Iowa, Michigan, Indiana, Missouri, Kentucky, Minnesota, North Dakota, South Dakota, Nebraska, and Illinois, and (2) *materials and supplies* used in the erection of metal plate structures, between points in Wisconsin, Ohio, Kansas, Iowa, Michigan, Indiana, Missouri, Kentucky, Minnesota, North Dakota, South Dakota, Nebraska, and Illinois.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 129350 (Sub-No. 28), filed July 16, 1973. Applicant: CHARLES E. WOLFE, doing business as EVERGREEN EXPRESS, P.O. Box 212, Billings, Mont. 59103. Applicant's representative: Clayton Brown (Same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals, feed ingredients, and feed supplements* (except commodities in bulk in tank vehicles), from East St. Louis, Joliet, and LaSalle, Ill., Montpelier, Iowa, Barberton, Ohio, Pine Bend, Minn., Lawrence, Kans., and points in the Chicago, Ill., Commercial Zone, Minneapolis and St. Paul, Minn., Commercial Zone, St. Louis, Mo.-East St. Louis, Ill., Commercial Zone and Kansas City, Mo.-Kansas City, Kans., Commercial Zone, to points in Montana, South Dakota, Wyoming.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Billings, Mont.

No. MC 129387 (sub-No. 16), filed July 13, 1973. Applicant: BILL PAYNE, doing business as BILL PAYNE TRUCKING COMPANY, Highway 14 East, Huron, S. Dak. 57350. Applicant's representative: George N. Manolis, 201 Farmers & Merchants Bank Building, 50 Third Street SW., Huron, S. Dak. 57350. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Foodstuffs* (except hides and commodities in bulk), from the plantsite and warehouse facilities of Yankton Sioux Industries at or near Wagner, S. Dak., to points in North Dakota, South Dakota, Montana, Idaho, Oregon, Washington, California, Nevada, Utah, Wyoming, Colorado, Nebraska, Kansas, Missouri, Iowa, Illinois, Indiana, Ohio, Michigan, Wisconsin, and Minnesota, and (2) *meat, meat products, meat byproducts, foodstuffs, canning plant materials, equipment, and supplies* (except hides and commodities in bulk), from the destination points named in (1) above, to the plantsite and warehouse facilities of Yankton Sioux Industries at or near Wagner, S. Dak., restricted in (1) and (2) above to traffic originating at named origins and destined to named destination.

NOTE.—Applicant states that the requested authority cannot be tacked with its present authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 129516 (sub-No. 21), filed July 20, 1973. Applicant: PATTON'S, INC., 2300 Canyon Road, Ellensburg, Wash. 98926. Applicant's representative: James T. Johnson, 1610 IBM Building, Seattle, Wash. 98101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen pet food ingredients*, from Edmonds, Wash., to points in California.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash., or Portland, Oreg.

No. MC 133919 (sub-No. 2), filed July 23, 1973. Applicant: JOHN ROSSETTI, 683 Pine Street, Burlington, Vt. Applicant's representative: Arthur J. Piken, One Lefrak City Plaza, Flushing, N.Y. 11368. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cheese, cheese products, and curd*, from Alburg, Milton, Richmond, Cabot, and Hinesburg, Vt., to New York, N.Y., under contract with Lucille Farm Products, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 134404 (sub-No. 10), filed July 23, 1973. Applicant: AMERICAN-TRANS FREIGHT, INC., P.O. Box 499, South Bound Brook, N.J. 08880. Applicant's representative: Bert Collins, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products*, from Trenton, Paulsboro, and Englewood, N.J., Newton, Conn., Dedham, Mass., Glens Falls, N.Y., and New Hope and Lancaster, Pa., to points in Massachusetts, Rhode Island, Maine, Vermont, New Hampshire, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, and the District of Columbia, and (2) *materials, supplies, and equipment* used or useful in connection with production, distribution or sales of the aforementioned commodities (except in bulk), from the above-named destination States to the above-named origin points, under contract with Union Camp Corporation.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 134477 (sub-No. 36), filed July 9, 1973. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Paul Schanno (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Matches and woodenware*, from Oakland and Dixfield, Maine, and Springfield, Mass., to points in Illinois, Iowa, Minnesota, Nebraska, and Wisconsin.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

No. MC 134970 (sub-No. 4), filed July 13, 1973. Applicant: UNZICKER TRUCKING, INC., P.O. Box 35, Highway 24 East, El Paso, Ill. 61738. Applicant's representative: David R. Parker, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Buildings*, complete, knocked down or in sections, and *equipment, supplies, and component parts* used in the construction, erection, or completion of such buildings, from the plantsite of Marathon Metallic Building Company, located at El Paso, Ill., to points in Connecticut, Delaware, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Virginia, Vermont, West Virginia, and Wisconsin.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Houston, Tex., or Springfield, Ill.

No. MC 136343 (Sub-No. 18), filed July 24, 1973. Applicant: MILTON TRANSPORTATION, INC., P.O. Box 207, Milton, Pa. 17847. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. NOTE.—If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 138438 (Sub-No. 3), filed July 17, 1973. Applicant: DONALD M. BOWMAN, JR., Route 3, Box 26, Hagerstown, Md. 21740. Applicant's representative: Charles E. Creager, Suite 523, 816 Easley Street, Silver Spring, Md. 20910. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Concrete masonry products*, on vehicles equipped with mechanical boom unloaders, from Chambersburg, Pa., to points in New York, New Jersey, Delaware, Maryland, Ohio, Virginia, West Virginia, and the District of Columbia.

NOTE.—Applicant also holds contract carrier authority in MC 117613 and Subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138714 (Sub-No. 2), filed July 5, 1973. Applicant: VIRGINIA TRANSPORTATION, INC., P.O. Box 26449, 1814 Highpoint Avenue, Richmond, Va. 23201. Applicant's representative: Francis W. McInerny 1000 16th St. NW., Washington, D.C. 20036. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Telephone equipment, material, and supplies*, from Ashland and Arlington, Va., to points in West Virginia; and (2) *telephone materials* returned for repairs or salvage, from points in West Virginia, to Ashland and Arlington, Va.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138436 (sub-No. 1), filed July 13, 1973. Applicant: GLEN BOCH AND ANNA BOCH, a partnership, doing business as MERCHANDISE PICKUP & DELIVERY, 2838 North 83d Terrace, Kansas City, Kans. 66109. Applicant's representative: Glen Boch (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Auto parts and accessories*, between Kansas City, Kans., on the one hand, and, on the other, points in Missouri, under contract with General Automotive Parts Corporation.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 138863 (sub-No. 1), filed July 9, 1973. Applicant: THOMAS H. JOY & COMPANY, a corporation, 114 Montgomery Street, Bloomfield, N.J. 07003. Applicant's representative: Paul J. Keeler, P.O. Box 253, South Plainfield, N.J. 07080. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except articles of unusual value, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Newark, N.J., on the one hand, and, on the other, points in Mercer County and Montgomery Township (Somerset County), N.J., restricted to shipments having a prior or subsequent movement by air.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Newark, N.J., or New York, N.Y.

No. MC 138874 (correction), filed June 20, 1973, and published in the FEDERAL REGISTER issue of August 16, 1973, and republished, as corrected, this issue. Applicant: PACKARD, INC., P.O. Drawer H, Buras, La. 70041. Applicant's representative: Henry O'Connor, Jr., 1440 Oil & Gas Building, New Orleans, La. 70112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Oilfield equipment and materials, timbers, machinery, pipe, cement, lumber and materials, supplies and equipment* to be used in the construction, development, operation and maintenance of facilities for the discovery and development of natural gas and petroleum and *fertilizer and building materials*, used in excavating and construction of dirt work, between points in Louisiana.

NOTE.—The purpose of this republication is not a conversion proceeding as previously published but applicant's initial request for authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans or Baton Rouge, La.

No. MC 138890 (sub-No. 2), filed July 23, 1973. Applicant: MOODIE, INC., 301 Acorn Street, Stevens Point, Wis. 54481. Applicant's representative: Michael J. Wyngaard, 329 West Wilson Street, Madison, Wis. 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Frozen and processed potatoes, frozen and processed potato products, and advertising materials, equipment, and supplies* from points in Portage County, Wis., to points in the United States (except Alaska and Hawaii), and (2) *materials, equipment, and supplies*, which are used or useful in the manufacture, sale, production, or distribution of the commodities described in part (1) above, from points in the United States (except Alaska and Hawaii), to Portage County, Wis.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant request it be held at Stevens Point, Wis., or Madison, Wis.

No. MC 138942 (correction), filed July 9, 1973, published in the FEDERAL REGISTER issue of August 16, 1973, and annotated this issue. Applicant: JOHN H. WOLFF, doing business as AURORA EDUCATIONAL TOURS, 731 South Highland, Aurora, Ill. 60507. Applicant's representative: Patrick H. Smyth, Suite 1000, 327 South La Salle Street, Chicago, Ill. 60604.

NOTE.—The previous FEDERAL REGISTER notice indicated in error that the docket number assigned to this proceeding was No. MC-138943. The correct docket number is No. MC-138942. The rest of the notice remains as previously published.

No. MC 138950 (sub-No. 1), filed July 23, 1973. Applicant: FOR-TRUCKS, INC., P.O. Box 297, Henniker, N.H. 03242. Applicant's representative: Francis P. Barrett, 60 Adams Street, P.O. Box 238, Milton, Mass. 02187. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Treated and untreated lumber, treated and untreated wooden poles, treated and untreated ties, treated and untreated wooden piling and crossarms, and related forest products and contractors supplies*, from North Billerica, Mass., to points in Orange, Rockland, Putnam, Westchester, Bronx, Kings, Queens, Manhattan, and Nassau Counties, N.Y., Bergen, Hudson, Union, and Essex Counties, N.J., and Massachusetts, Maine, New Hampshire, Vermont, Connecticut, and Rhode Island, under contract with For-Tek Division George McQuesten Co., Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Boston, Mass., or Concord, N.H.

No. MC 138974, filed July 5, 1973. Applicant: ERB TRANSPORTATION COMPANY, INC., P.O. Box 65, Crozet, Va. 22932. Applicant's representative: Harry C. Ames, Jr., 666 11th Street NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, between Crozet, Va., on the one hand, and, on the other, points in Kentucky, Maryland, North Carolina, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138975, filed July 19, 1973. Applicant: ROBERT H. BOGART, doing business as BOGART TRUCKING, 79 Queen Avenue, Pennsville, N.J. 08070. Applicant's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic material* (except in bulk, in tank vehicles), from Carneys Point, N.J., to points in Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, and the District of Columbia, and *return shipments, and materials, supplies, and equipment* used in the manufacture, packaging and distribution of the above commodities (except in bulk, in tank vehicles), from points in Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, and the District of Columbia, to Carneys Point, N.J., under contract with Budd Chemical Company.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa.

No. MC 138976, filed July 2, 1973. Applicant: FRED E. FARRIS, Faucett, Mo. 64448. Applicant's representative: Patrick E. Quinn, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Pulpboard, fiberboard, pulpboard and fiberboard products, and materials, and supplies* used in the manufacture and processing thereof, from the plantsite of Hoerner-Waldorf Corporation at St. Joseph, Mo., to points in Nebraska, Kansas, and Iowa, under a continuing contract, or contracts with Hoerner-Waldorf Corporation.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 138978, filed July 30, 1973. Applicant: J N K MACHINE CORP., 106–108 Harrison Street, Jamestown, N.Y. 14701. Applicant's representative: Kenneth T. Johnson, Bankers Trust of Jamestown Building, Jamestown, N.Y. 14701. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by mail order houses and retail stores, and in connection therewith *such equipment, materials and supplies* used in the conduct of such business, (1) between the store site of Sears, Roebuck & Co. at Busti (Chautauqua County), N.Y., on the one hand, and, on the other, points in Crawford, Erie, McKean, and Warren Counties, Pa., and (2) between the site of the warehouse of Sears, Roebuck & Co. at Ellicott (Chautauqua County), N.Y., on the one hand, and, on the other, points in Crawford, Erie, McKean, and Warren Counties, Pa., under contract with Sears, Roebuck & Co.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 138989, filed July 23, 1973. Applicant: ROAD & SEA TRANSPORT, LIMITED, 225 Thorne Avenue, St. John, New Brunswick, Canada. Applicant's representative: Kenneth B. Williams, 111 State Street, Boston, Mass. 02109. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, between ports of entry on the International Boundary line between United States and Canada, located at or near Calais, Maine, and Woodland, Maine, restricted to traffic originating at or destined to points in the Province of New Brunswick, Canada, under contract with Tidal Chemical, Ltd.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Portland, Maine, or Boston, Mass.

No. MC 138992, filed July 13, 1973. Applicant: MFT, INC., 209 South Ruth Street, Sioux Falls, S. Dak. 57102. Applicant's representative: Donald L. Stern, 530 Univac Building, Omaha, Nebr. 68106. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meats, packinghouse products and commodities* used by packinghouses as described in

FEDERAL REGISTER, VOL. 38, NO. 173—FRIDAY, SEPTEMBER 7, 1973

V 38-173 SEP 7 73 XUM

Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Sioux Falls, S. Dak., and Whitehall and Eau Claire, Wis., to points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas, under a continuing contract or contracts, with Whitehall Packing Company, Inc., and Meilman Food Industries, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Sioux Falls, S. Dak.

No. MC 138999, filed July 17, 1973. Applicant: FRED NARK AND ROBERT NARK, a Partnership, doing business as NARK BROS., Box 336, Cobleskill, N.Y. 12043. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Expanded plastic foam insulating material*, from Linden, N.J., to points in New York (except points on Long Island), under continuing contract with Apache Foam Products Division of Millmaster Onyx Corp.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

APPLICATION FILING FOR WATER CARRIER

No. W-1272, filed August 13, 1973. Applicant: WARREN BAILEY, 40 NW. 39th Street, Miami, Florida 33127. Authority sought to engage in operation, in interstate or foreign commerce as a *common carrier by water* in the transportation of *boats and yachts owned by others to be* delivered on their own bottoms, which are too large for shipment by rail or truck (over 11 feet wide or 17 feet high, all self-propelled vessels), (1) between points in Florida; and (2) between points in Texas, Louisiana, Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, Virginia, Delaware, and New York, via the Intercoastal Waterways or coastal waters of the United States (excluding the Mississippi River).

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Miami, Fla.

MOTOR CARRIER OF PASSENGERS

No. MC 3647 (Sub-No. 445), filed June 28, 1973. Applicant: TRANSPORT OF NEW JERSEY, 180 Boyden Avenue, Maplewood, N.J. 07040. Applicant representative: John F. Ward (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, and express, and newspapers* in the same vehicle with passengers: Between Allentown and Lancaster, Pa.: From Allentown over U.S. Highway 222 to Lancaster and return over the same route, serving all intermediate points.

NOTE.—Common control may be involved. Applicant presently holds a brokerage license in No. MC-12668. If a hearing is deemed necessary, applicant requests it be held at Reading, Pa.

APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

No. MC 107515 (Sub-No. 858), filed May 25, 1973. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 30050. Applicant's representative: Richard M. Tettelbaum, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products*, and *meat byproducts* (except in bulk, and except hides) as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Bowling Green, Ky., to points in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Louisiana, Kansas, Iowa, Michigan, Mississippi, Missouri, North Carolina, Ohio, South Carolina, Texas, Oklahoma, Wisconsin, Virginia, and West Virginia, restricted to the transportation of traffic originating at Bowling Green, Ky.

NOTE.—Applicant requests that the grant of authority requested herein be restricted against tacking with any of its existing authority. Common control may be involved.

No. MC 136485 (Sub-No. 3), filed June 4, 1973. Applicant: WALDORF TRANSPORTATION CO., INC., Route 4, Box 108, Waldorf, Md. 20601. Applicant's representative: Daniel B. Johnson, 716 Perpetual Building, 1111 E Street NW., Washington, D.C. 20004. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Electrical equipment, electrical supplies and materials and supplies and materials* used in the installation of electrical equipment and electrical supplies (except commodities which because of size or weight require the use of special equipment, and commodities in bulk), from points in Pennsylvania, Ohio, New York, and Maryland, to Baltimore, Md., and points in Anne Arundel, Baltimore, Howard, Washington, Montgomery, Calvert, Charles, St. Mary's, and Prince Georges Counties, Md., Stafford, Fauquier, Loudoun, Fairfax, Arlington, and Prince William Counties, Va.; and the District of Columbia, restricted to service to be performed under a continuing contract or contracts with Ellen-Breslin Associates, Inc.

APPLICATIONS FOR FILING POSTAL CERTIFICATES

INTERSTATE COMMERCE COMMISSION, No. MC-137026 (NOTICE OF FILING AN APPLICATION FOR A POSTAL CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY), filed March 26, 1973. Applicant: White & Lasater, Inc., P.O. Box 707, Irving, Texas 75060. By application filed March 26, 1973, applicant seeks a Postal Certificate of Public Convenience and Necessity to transport *Mail* in the following territory: Between Dallas and Houston, Tex., over Interstate Highway 45, and return over the same route, serving the intermediate points of Conroe, Huntsville, and Corsicana, Tex. Appended to the application is a copy of a postal contract held by applicant which was in effect on July 1, 1971, the critical "grandfather" date: Route No. 75220 relating to service between Houston and Dallas, Tex.

Any interested person desiring to oppose the application may file with the Commission an original and one copy of his written representations, views, or arguments in opposition to the application within 30 days from the date of this publication in the FEDERAL REGISTER. A copy of each such pleading should be served upon applicant.

INTERSTATE COMMERCE COMMISSION, No. MC-37027 (NOTICE OF FILING AN APPLICATION FOR A POSTAL CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY), filed June 25, 1973. Applicants: John Heywood Thompson, Jr., and James Robert Smith, 108 Clearview Drive, Atlanta, Texas 75551. Applicants' representative: Gerald A. Braswell, 512 Candlewood Road, Ft. Worth, Texas 76013. By application filed June 25, 1973, applicant seeks a Postal Certificate of Public Convenience and Necessity to transport *Mail* in the following territory: Between Memphis, Tenn., and Alexandria, La., from Memphis, Tenn., over U.S. Highway 61 to Greenville, Miss., thence over U.S. Highway 82 to junction U.S. Highway 165 at or near Montrose, Ark., then over U.S. Highway 165 to Alexandria, La., and return over the same route, serving the intermediate point of Monroe, La. Appended to the application is a copy of a postal contract held by applicants which was in effect on July 1, 1971, the critical "grandfather" date: Route No. 38012 relating to service between Memphis, Tenn., and Alexandria, La.

Any interested person desiring to oppose the application may file with the Commission an original and one copy of his written representations, views, or arguments in opposition to the application within 30 days from the date of this publication in the FEDERAL REGISTER. A copy of each such pleading should be served upon applicants' representative.

INTERSTATE COMMERCE COMMISSION, No. MC-137028 (NOTICE OF FILING AN APPLICATION FOR A POSTAL CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY), filed July 5, 1973. Applicant: JOHN E. AULNER, JR., 5433 Kansas Avenue, Omaha, Nebraska 68104. By application filed July 5, 1973, applicant seeks a Postal Certificate of Public Convenience and Necessity to transport *Mail* in the following territory: (1) Between Omaha, Nebr., and Homer, Nebr., from Omaha, Nebr., over U.S. Highway 73 to Homer, Nebr., and return over the same route, serving the intermediate points of Fort Calhoun, Blair, Herman, Tekamah, Decatur, Macy, and Winnebago, Nebr., and the off-route points of Craig, Oakland, Lyons, Rosalie, Bancroft, Pender, Thurston, and Walthill, Nebr.; (2) Between Omaha, Nebr., and Wahoo, Nebr., from Omaha, Nebr., over Interstate Highway 80 to junction Nebraska Highway 370, thence over Nebraska Highway 370 to Gretna, Nebr., thence over U.S. Highway 6 to Ashland, Nebr., thence over Nebraska Highway 63 to Swedeburg, Nebr., thence over U.S. Highway 77 to Wahoo, Nebr., and return over the same route, serving the intermediate points of Gretna, Ashland, Memphis, and Ithaca, Nebr.; (3) Between Omaha, Nebr., and Creston, Iowa, from Omaha, Nebr., over Interstate Highway 480 to junction Interstate Highway 29, thence over Interstate Highway 29 to junction U.S. Highway 34, thence over U.S. Highway 34 to Creston, Iowa, and return over the same route (also return from Creston, Iowa, over U.S. Highway 34 to Emerson, Iowa, thence over U.S. Highway 59 to junction Iowa Highway 92, thence over Iowa Highway 92 to Omaha, Nebr.), serving the intermediate and off-route points of Council Bluffs, Mineola, Glenwood, Pacific Junction, Malvern, Silver City, Hastings, Emerson, Red Oak, and Stanton, Iowa; and

(4) Between Omaha, Nebr., and Stanton, Iowa, from Omaha, Nebr., over Interstate Highway 480 to junction Council Bluffs City route 7, thence over Council Bluffs City route 7 to junction Interstate Highway 29, thence over Interstate Highway 29 to junction U.S. Highway 34, thence over U.S. Highway 34 to Stanton, Iowa, and return over U.S. Highway 34 to junction Iowa Highway 242, thence over Iowa Highway 242 to Iowa Highway 92, thence over Iowa Highway 92 to junction Interstate Highway 29, thence over Interstate Highway 29 to junction Interstate Highway 480, thence over Interstate Highway 480 to Omaha, Nebr., serving the intermediate and off-route points of Council Bluffs, Pacific Junction, Glenwood, Malvern, Silver City, Hastings, Emerson, Mineola, and Red Oak, Iowa. Appended to the application are copies of four postal contracts held by applicant which were in effect on July 1, 1971, the critical "grandfather" date: Route Nos. 68034, 68032, 50810, and 51531 relating to service between Omaha, Nebr., and Homer, Nebr., between Omaha, Nebr., and Wahoo, Nebr., between Omaha, Nebr., and Creston, Iowa, and between Omaha, Nebr., and Stanton, Iowa, respectively.

Any interested person desiring to oppose the application may file with the Commission an original and one copy of his written representations, views, or arguments in opposition to the application within 30 days from the date of this publication in the FEDERAL REGISTER. A copy of each such pleading should be served upon applicant.

By the Commission.

[SEAL] ROBERT L. OSWALD,
*Secretary.*

## ENVIRONMENTAL PROTECTION AGENCY

[ 40 CFR Part 411 ]

### CEMENT MANUFACTURING POINT SOURCE CATEGORY

### Effluent Limitations Guidelines for Existing Sources and Standards of Performance and Pretreatment Standards for New Sources

Notice is hereby given that effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources set forth in tentative form below are proposed by the Environmental Protection Agency (EPA) for the cement manufacturing category of point sources pursuant to sections 301, 304 (b) and (c), 306(b) and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316(b) and 1317(c); 86 Stat. 816 et seq.; P.L. 92-500) (the "Act").

(a) Legal authority:

(1) Existing point sources:

Section 301(b) of the act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) to the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives. The regulations proposed herein set forth effluent limitations guidelines, pursuant to section 304(b) of the Act, for the cement manufacturing category.

(2) New sources:

Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(B) of the Act requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. The Administrator published in the FEDERAL REGISTER of January 16, 1973, (38 FR 1624) a list of 27 source categories including the cement manufacturing category. The regulations proposed herein set forth the standards of performance applicable to new sources within the cement manufacturing category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. Sections 411.15 and 411.25 proposed below provides pretreatment standards for new sources within the cement manufacturing category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under Section 306 of the Act. The development document described further below in section (b)(2) of this preamble provides, pursuant to section 304(c) of the Act, preliminary information on such processes, procedures or operating methods.

(3) Thermal Discharges section 316 (a) of the Act provides a means for further consideration of thermal effluent limitations required under sections 301 and 306 of the Act. Section 316(a) states that with respect to any point source subject to the provisions of sections 301 or 306, whenever the owner or operator of any such source, after opportunity for public hearing, can demonstrate to the satisfaction of the Administrator (or, if appropriate, the State) that any effluent limitation proposed for the control of the thermal component of any discharge from such source will require effluent limitations more stringent than necessary to assure the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife in and on the body of water into which the discharge is to be made, the Administrator (or, if appropriate, the State) may impose a different effluent limitation for the thermal component of the discharge than would ordinarily be required under sections 301 and 306 of the Act. Effluent limitations imposed under section 316(a) must assure the protection and propagation of a balanced indigenous population of shellfish, and wildlife in and on the body of water into which the discharge is to be made.

(b) Summary and basis of proposed effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources.

(1) *General methodology.*—The effluent limitations guidelines and standards of performance proposed herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations and standards are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations and standards for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of: (1) the source, flow and volume of water used in the process employed and the sources of waste and waste waters in the plant; and (2) the constituents of all waste water. The constituents of the waste waters which should be subject to effluent limitations guidelines and standards of performance were identified.

Next, the control and treatment technologies existing within each segment were identified. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which are existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problems, limitations and reliability of each treatment and control technology were also identified. In addition, the non-water quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation were identified. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available," "best available technology economically achievable" and the "best available demonstrated control technology, processes, operating methods, or other alternatives." In identifying such technologies, various factors were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, non-water quality environmental impact (including energy requirements) and other factors.

The data upon which the above analysis was performed included Refuse Act Permit Applications, EPA sampling and inspections, consultant reports, and industry submissions.

The pretreatment standards proposed herein are intended to be complementary

to the pretreatment standards proposed for existing sources under Part 128 of 40 CFR. The basis for such standards is set forth in the FEDERAL REGISTER of July 19, 1973, 38 FR 19236. The provisions of Part 128 are equally applicable to sources which would constitute "new sources" under section 306 if they were to discharge pollutants directly to navigable waters, except for § 128.133. That section provides a pretreatment standard for "incompatible pollutants" which requires application of the "best practicable control technology currently available," subject to an adjustment for amounts of pollutants removed by the publicly owned treatment works. Since the pretreatment standards proposed herein apply to new sources, §§ 411.15 and 411.25 below amend § 128.133 to require application of the standard of performance for new sources rather than the "best practicable" standard applicable to existing sources under sections 301 and 304(b) of the Act.

(2) *Summary of conclusions with respect to cement manufacturing category.*—General information was obtained on all plants and detailed information was collected for 132 (80 percent) of the 166 domestic cement plants identified as currently in operation. The sources and type of information consisted of: (1) Applications to the Army Corps of Engineers for Permits to Discharge under the Refuse Act Permit Program (RAPP) were obtained for 88 plants and provided data on the characteristics of intake and effluent waters, water usage (including flow diagrams in many cases), waste water treatment and control practices employed, daily production, and raw materials used; (2) a questionnaire to nine companies covering 64 plants (including 35 plants for which RAPP applications were not available) provided data on raw material analysis, dust collection and disposal methods, alkali content of the dust, plant age and year of latest modification, detailed water usage, fuels, and treatment and control methods and costs; (3) on-site inspections of 15 plants provided flow diagrams, detailed information on water management practices, and control and treatment methods, equipment, and costs; and (4) other sources of information included EPA technical reports, trade literature, personal and telephone interviews and meetings with regional EPA personnel, industry personnel, and consultants.

This information was compiled by data processing techniques and analyzed for the following: (1) identification of distinguishing features that could potentially provide a basis for subcategorization of the industry (*e.g.*, method of dust collection and disposal, type of process, raw materials, and plant size and age); (2) determination of the water usage and waste characteristics for each of the subcategories including the volume of water used, the sources of contamination in the plant, and the type and quantity of constituents in the waste waters; and (3) identification and determination of those waste water constituents which are characteristic of the industry and subject to effluent limitations guidelines and standards.

The cement manufacturing industry was segmented into two subcategories based upon the method for kiln dust collection and disposition and resulting waste water characteristics. The subcategories are: leaching plants and non-leaching plants. The scope of these subcategories is defined in §§ 411.10 and 411.20 below. The leaching category includes plants in which water comes into contact with kiln dust as an integral part of the process or in which wet scrubbing of kiln stack emissions is employed. Raw waste water loads and necessary treatment methods and technology are substantially different for plants in the leaching subcategory. Factors such as age, size of plant, raw materials, fuel used, process employed, waste water constituents, waste control technologies, and plant location further substantiated the subcategorization of the cement manufacturing industry in this manner for the purpose of the application of effluent limitations guidelines and standards of performance. The pollutants contained in raw waste water resulting from cement manufacturing are principally dissolved solids (potassium and sodium hydroxide, chlorides and sulfates), suspended solids (calcium carbonate) and waste heat.

There are relatively few operations in cement manufacturing where the addition of pollutants to the water used is inherently associated with the use of that water. For nonleaching plants, pollution generally results from practices that allow materials to come in contact with the water. Pollutant levels at these plants can be greatly reduced or eliminated by suitable in-plant control measures that prevent wastes from entering the water or by more extensive reuse and recycling of water that may become contaminated.

For the plants in the leaching subcategory, wastes are necessarily introduced into the water and recycling is not feasible. Thus, for these plants, treatment is required to reduce the pollutant loading.

The main control and treatment methods for the cement industry involve recycle and reuse of wastewater. The devices employed include cooling towers or ponds, settling ponds, containment ponds, and clarifiers. Cooling towers or ponds are used to reduce the temperature of waters used to cool process equipment. Settling ponds are used primarily to reduce the concentration of suspended solids. Containment ponds are used to dispose of waste kiln dust in the non-leaching plants. Clarifiers are mainly used to separate solids in dust-leaching plants. With the exception of plants in the leaching subcategory, most cement plants can achieve virtually complete reuse of wastewater with existing state-of-art technology.

Five alternative control and treatment technologies and the attendant costs have been identified for the cement manufacturing category: two for the non-leaching subcategory and three for the leaching subcategory.

The first alternative for the nonleaching subcategory involves recycling and reuse of all water used in manufacturing and containment or treatment of runoff from kiln-dust piles.

This alternative will result in essentially no discharge of pollutants. The investment cost of implementing this technology at a typical plant will be about $200,000 including a cooling tower ($94,000) or spray pond ($91,000), the necessary piping ($76,000), and containment dikes for kiln-dust piles ($35,000). If an evaporative cooling pond is used, it would cost about $160,000 including piping, but not including land cost.

The operating costs of this alternative will range from about $20,000 to $30,000 per year including maintenance, sludge removal, chemicals, labor cost of power, and taxes and insurance. Power costs are limited to pumping and amount to $13,000 per year.

The second alternative involves limited water reuse and in-plant controls.

This alternative consists of isolation of cooling streams from possible contamination, reuse of cooling water in feed slurry (wet-process plants), retention and reuse or treatment of miscellaneous wastewater (e.g. truck washing) and containment or treatment of runoff from dust piles and would also result in no discharge of pollutants in manufacturing effluents.

Cost of implementing this alternative will vary somewhat within the industry but on the average will be comparable to that for the first alternative.

The first alternative for leaching plants involves the segregation and treatment of the leachate stream.

The nonleaching streams of leaching plants are treated like those of nonleaching plants under this alternative. Treatment of the leachate stream consists of neutralization of the leachate with stack gases, followed by secondary sedimentation to remove both the residual suspended solids that were present in the leachate and the suspended solids (calcium carbonate) created by the neutralization with carbon dioxide.

This alternative will result in an acceptable pH of 9.0, and a suspended solids level of not more than 0.15 kg/kkg (0.30 lb/ton) of dust leached. Dissolved solids will remain at about their present level.

The cost of implementing this alternative will be about $425,000 including $165,000 for the control of nonleaching streams and the cost of installing a stack-gas neutralization system and a clarifier ($260,000). Operating costs will range from about $35,000 to $45,000 per year.

Implementation of this alternative will result in essentially no discharge of pollutants.

The third alternative for the leaching subcategory would be the abandonment of existing leaching operations.

Under this alternative, plants that presently each kiln dust would abandon the practice and adopt either the first or second alternative for nonleaching plants which will result in essentially no discharge of pollutant. The cost of dust

V 38-173 SEP 7 73 XUM

disposal is estimated to be $0.50 per ton (including hauling and piling costs). The value of wasted dust would be about $2.00 per ton (based upon cost to formulate and grind an equivalent amount of raw ingredients). Therefore, the annual cost of wasting 200 tons per day of dust that is presently leached would be $165,000.

Non-water quality environmental impacts due to the effects of the control and treatment technologies described are minimal. Some additional solid wastes will be generated by increased use of sedimentation, but the amount will be quite small compared to the larger quantity of kiln dust normally wasted. The much increased cost of dust leaching may discourage its practice at some plants and thereby add to the solid waste load and create localized dust problems on windy days. However, there are techniques available such as latex coating or water spraying to reduce this problem.

Because of the large energy requirement at a cement plant, about 1.25 million kg cal (5 million BTU) in fuel and about 120 kwhr of electric power per metric ton, the added power needed to operate the recycling systems is small (estimated to be less than 5.0 percent of the total energy requirements) in relation to the total energy requirements of a plant.

The cement manufacturing industry is successfully practicing recycling and waste water reuse at a significant number of non-leaching plants (using the first and second alternative described above). EPA has concluded that the effluent quality representing the degree of effluent reduction obtainable through the application of the best practicable control technology currently available for plants in the non-leaching subcategory is essentially no discharge of waste waters to navigable waters as defined in § 411.12 below.

For plants in the leaching subcategory, EPA has concluded that the best practicable control technology currently available is neutralization to reduce alkalinity and chemical treatment and sedimentation to reduce suspended solids (the first alternative described above). The degree of effluent reduction attainable through application of best practicable control technology currently available is set forth in § 411.12 below.

A report entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards of the Cement Manufacturing Industry Point Source Category" which details the analysis undertaken in support of the regulations being proposed herein is available for inspection at the EPA Information Center, Room 227, West Tower, Waterside Mall in Washington, D.C., at all EPA regional offices, and at State water pollution offices. A supplementary analysis of the possible economic effect of the proposed regulations is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulations, or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman.

(c) Summary of public participation:

Prior to this publication, the agencies and groups listed below were consulted with respect to the development of the effluent limitations guidelines and standards of performance for the cement manufacturing industry category: (a) Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); (b) all interested State and U.S. Territory Pollution Control Agencies; (c) Ohio River Valley Sanitation Commission; (d) New England Interstate Water Pollution Control Commission; (e) Delaware River Basin Commission; (f) Hudson River Sloop Restoration, Inc.; (g) Conservation Foundation; (h) Portland Cement Association; (i) Environmental Defense Fund, Inc.; (j) Natural Resources Defense Council; (k) The American Society of Civil Engineers; (l) Water Pollution Control Federation; (m) National Wildlife Federation; (n) The American Society of Mechanical Engineers; (o) U.S. Department of Commerce; (p) Water Resources Council; and (q) the U.S. Department of the Interior.

The primary issues raised in the development of these proposed effluent limitations guidelines and standards of performance and the treatment of these issued herein are as follows: (1) Industry was concerned that the standards for suspended solids would exceed the capability of the treatment systems following leaching to reduce suspended solids. To determine the degree to which the standard for leaching plants would affect the treatability of suspended solids, values of: 120,000 gallons per day flow in the leaching stream; 208 tons per day of dust leached; and a dust/water ratio of 0.416 was used to calculate a concentration of 44 ppm. Using the same dust/water ratio and flow values and the mass value of 0.30 lb/ton of dust leached, a concentration of 62.5 ppm was established. Both the 44 ppm and the 62.5 ppm values are well above the minimal concentration values to obtain effective suspended solids removal in a properly designed treatment system. (2) Industry was concerned that dikes and containment basins might not be able to prevent runoff from kiln dust and materials storage piles during hurricanes and unusual storm conditions. It is the agency's intention that the dikes and containment ponds should be designed for a 10 year, 24 hour rainfall event. (3) One company in the industry objected to the standard of essentially no discharge on the basis that this would entail a burdensome cost for pumping recycling water. At least 20 percent of the plants in the industry are currently achieving the essentially no discharge standard. (4) The Natural Resources Defense Council questioned the rationale for excluding iron and aluminum as pollutants. The agency's data shows that iron and aluminum are present, if at all, in negligible amounts (0.000 to 0.001 lb/ton of product produced). (5) The Natural Resources Defense Council suggested that the Patzias process for potassium recovery be studied further for possible application in industry to recover potassium as a by-product of kiln dust. The updated costs (from 1957 to 1971) indicate a recovery cost of about $93/ton; the market price of potassium from other commercial sources at present is between $30 and $50/ton. (6) The Natural Resources Defense Council also was concerned that electrodialysis technology might be available for 1977 rather than for 1983 as the agency recommends. The agency's best engineering judgment indicated that electrodialysis technology can be adapted to fill the requirements of leachate demineralization and recycle; but, the operating parameters will have to be thoroughly outlined so that the plants in question can decide which course to pursue. A development program is likely to take more than a year thus, reducing lead time for selection and installation of equipment. In addition, the 1983 deadline provides the time necessary to evaluate other treatment methods that are being used or developed for related problems in other industries. (7) Industry requested that plants that use wet dust disposal should be grouped with leaching plants instead of with non-leaching plants. The agency's best judgement is that alternative material transfer methods, air conveying or hauling, are available to the manufacturer which do not pose as great a threat for pollutant discharge as wet disposal methods. Since the manufacturer has the option of an alternative method, plants currently using wet disposal systems should be grouped in the nonleaching subcategory.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460. Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. All comments received on or before October 9, 1973, will be considered.

Dated: August 31, 1973.

JOHN QUARLES,
*Acting Administrator.*

## PART 41—EFFLUENT LIMITATIONS GUIDELINES FOR EXISTING SOURCES AND STANDARDS OF PERFORMANCE AND PRETREATMENT STANDARDS FOR NEW SOURCES FOR THE CEMENT MANUFACTURING CATEGORY OF POINT SOURCES

### Subpart A—Nonleaching Subcategory

Sec.
411.10 Applicability; description of nonleaching subcategory.
411.11 Specialized definitions.
411.12 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.
411.13 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.
411.14 Standards of performance for new sources.
411.15 Pretreatment standards for new sources.

### Subpart B—Leaching Subcategory

411.20 Applicability; description of leaching subcategory.
411.21 Specialized definitions.
411.22 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.
411.23 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.
411.24 Standards of performance for new sources.
411.25 Pretreatment standards for new sources.

### Subpart A—Nonleaching Subcategory

**§ 411.10 Applicability; description of nonleaching subcategory.**

The provisions of this subpart are applicable to discharges resulting from the process in which several mineral ingredients (limestone or other natural sources of calcium carbonate, silica, alumina, and iron together with gypsum) are used in the manufacturing of cement and in which kiln dust is not contacted with water as an integral part of the process and water is not used in wet scrubbers to control kiln stack emissions.

**§ 411.11 Specialized definitions.**

For the purpose of this subpart: The following definitions apply in addition to, or instead of the general definitions set forth in Part 401, 40 CFR:

(a) For the purposes of this subpart, the following abbreviations shall have the following meaning: (1) kg shall mean kilogram(s); (2) kkg shall mean 1,000 kilograms; and, (3) lb shall mean pound(s).

**§ 411.12 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.**

The following table sets forth the quantity or quality of pollutants or properties which may be discharged after application of the best practicable control technology currently available by a point source subject to the provisions of this subpart:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| Total suspended nonfilterable solids. | Maximum for any 1-day period shall not exceed 0.005 kg/kkg product cement. |
| pH | Not to exceed 6.0 to 9.0. |
| Temperature | Not to exceed 3° C rise above inlet temperature. |

**§ 411.13 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.**

The following table sets forth the quantity or quality of pollutants or properties which may be discharged after application of the best available technology economically achievable by a point source subject to the provisions of this subpart:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| Total suspended nonfilterable solids. | Maximum for any 1-day period shall not exceed 0.005 kg/kkg product cement. |
| pH | Not to exceed 6.0 to 9.0. |
| Temperature | Not to exceed 3° C rise above inlet temperature. |

**§ 411.14 Standards of performance for new sources.**

The following table sets forth the quantity or quality of pollutants or properties which may be discharged after application of standards of performance for new sources by a point source subject to the provisions of this subpart:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| Total suspended nonfilterable solids. | Maximum for any 1-day period shall not exceed 0.005 kg/kkg product cement. |
| pH | Not to exceed 6.0 to 9.0. |
| Temperature | Not to exceed 3° C rise above inlet temperature. |

**§ 411.15 Pretreatment standards for new sources.**

The pretreatment standards under section 307(c) of the Act for a source within the nonleaching subcategory of sources as defined in § 411.10 of this subpart A (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standards set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.133, 40 CFR, shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 411.14: *Provided*, That if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

### Subpart B—Leaching Subcategory

**§ 411.20 Applicability; description of leaching subcategory.**

The provisions of this subpart are applicable to discharges resulting from the process in which several mineral ingredients (limestone or other natural sources of calcium carbonate, silica, alumina, and iron together with gypsum) are used in the manufacturing of cement and in which kiln dust is contacted with water as an integral part of the process or water is used in wet scrubbers to control kiln stack emissions.

**§ 411.21 Specialized definitions.**

For the purpose of this subpart: The following definitions apply in addition to, or instead of, the general definitions set forth in Part 401, 40 CFR:

(a) For the purposes of this subpart, the following abbreviations shall have the following meaning: (1) kg shall mean kilogram(s); (2) kkg shall mean 1,000 kilograms; and, (3) lb shall mean pound(s).

**§ 411.22 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.**

The following table sets forth the quantity or quality of pollutants or properties which may be discharged after application of the best practicable control technology currently available by a point source subject to the provisions of this subpart:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| Total suspended nonfilterable solids. | Maximum for any 1-day period shall not exceed 0.15 kg/kkg (0.30 lb/ton) of dust leached. |
| pH | Not to exceed 6.0 to 9.0. |
| Temperature | Not to exceed 3° C rise above inlet temperature. |

**§ 411.23 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.**

The following table sets forth the quantity or quality of pollutants or properties which may be discharged after application of the best available technology economically achievable by a point source subject to the provisions of this subpart:

V 38-173
SEP 7 73
XUM

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| Total suspended non-filterable solids. | Maximum for any one-day period shall not exceed 0.005 kg/kkg (0.01 lb/ton) product cement. |
| Total dissolved solids. | Maximum for any one-day period shall not exceed 0.005 kg/kkg (0.01 lb/ton) of product cement. |
| pH | Not to exceed 6.0 to 9.0. |
| Temperature | Not to exceed 3° C rise above inlet temperature. |

**§ 411.24 Standards of performance for new sources.**

The following table sets forth the quantity or quality of pollutant effluent characteristics or properties which may be discharged after application of the standards of performance for new sources subject to the provisions of this subpart:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| Total suspended non-filterable solids. | Maximum for any one-day period shall not exceed 0.15 kg/kkg (0.30 lb/ton) of dust leached. |
| pH | Not to exceed 6.0 to 9.0. |
| Temperature | Not to exceed 3° C rise above inlet temperature. |

**§ 411.25 Pretreatment standards for new sources.**

The pretreatment standards under section 307(c) of the Act for a source within the cement manufacturing industry leaching subcategory of sources as defined in § 411.20 (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standards set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.133, 40 CFR shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 411.12: *Provided*, That if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

## FEEDLOTS CATEGORY

### Effluent Limitations Guidelines for Existing Sources and Standards of Performance and Pretreatment Standards for New Sources

Notice is hereby given that effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources set forth in tentative form below are proposed by the Environmental Protection Agency ("EPA") for the feedlots category of point sources pursuant to sections 301, 304(b) and (c), 306(b) and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1311, 1314(b) and (c) and 1316, 1316(b) and 1317(c), 86 Stat. 816 et seq.) (the "Act").

(a) Legal authority:

(1) Existing point sources:

Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) to the Act. Section 304(b) of the Act requires the Administrator to publish, within one year of enactment of the Act, regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives.

(2) New sources:

Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(B) of the Act requires the Administrator to publish a list of categories of sources within 90 days after the date of enactment of the Act (October 18, 1972). Within one year after a category of sources is included on the list, the Administrator is required to propose regulations establishing Federal standards of performance for new sources within such category. The Administrator published in the FEDERAL REGISTER of January 16, 1973, (38 FR 1624) a list of 27 source categories, including the feedlots source category. The regulations proposed herein set forth the standards of performance applicable to new sources within the feedlots source category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. Sections 412.15 and 412.25 proposed below provide pretreatment standards for new sources within the feedlots category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The Development Document referred to below provides, pursuant to section 304(c) of the Act, preliminary information on such processes, procedures or operating methods.

(b) Summary and basis of proposed effluent limitations guidelines and standards of performance.

(1) General methodology:

The effluent limitations guidelines and standards of performance proposed herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations and standards are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations and standards for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of: (1) source, flow and volume of water used in the process employed and the sources of waste and waste waters in the operation; and (2) the constituents (including thermal) of all waste waters, including the toxic constituents and other constituents which result in taste, odor and color in the water or aquatic organisms. The constituents of the waste waters which should be subject to effluent limitations guidelines and standards of performance were identified.

The full range of control and treatment technologies existing with each segment was identified. This included an identification of each distinct control technology, including both inplant and end-of-process technologies which are existent or capable of being designed for each segment. Also included was an identification of, in terms of the amount of constituents (including thermal) and the chemical, physical, biological characteristics of pollutants, the effluent level resulting from the application of each of the treatment and control technologies. The problems, limitations and reliability of each treatment and control technology and the required implementation time was also identified. In addition, the nonwater quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation were also identified. The energy requirements of each control and treatment technology as well as the cost of the application of such technologies were identified.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available," "best available technology economically achievable" and the "best available demonstrated control technology, processes, operating methods, or other alternatives." In identifying such technologies, various factors were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, nonwater quality environmental impact (including energy requirements) and other factors.

The data on which the above analysis was performed was derived from consultant reports, site inspections, published and unpublished technical literature, State pollution control agencies and industry submissions.

The pretreatment standards proposed herein are intended to be complementary to the pretreatment standards proposed for existing sources under Part 128 of 40 CFR. The basis for such standards is set forth in the FEDERAL REGISTER of July 19, 1973, 38 FR 19236. The provisions of Part 128 are equally applicable to sources which would constitute "new sources," under section 306 if they were to discharge pollutants directly to navigable waters, except for § 128.133. That section provides a pretreatment standard for "incompatible pollutants" which requires the application of the "best practicable control technology currently available," subject to an adjustment for amounts of pollutants removed by the publicly owned treatment works. Since the pretreatment standards proposed herein apply to new sources, §§ 412.15 and 412.25 below amend § 128.133 to require application of the standard of performance for new sources rather than the "best practicable" standard applicable to existing sources under sections 301 and 304(b) of the Act.

(2) Summary of conclusions with respect to feedlots source category:

As differentiated from pasture or rangeland conditions, feedlots are concentrated, confined animal or poultry growing operations for meat, milk or egg production or stabling in pens or houses wherein the animals or poultry are fed at the place of confinement, and crop production is not sustained in the area of confinement. The feedlots industry was segmented into eighteen subcategories based upon animal type, production systems and waste characteristics. These subcategories are: open lot, beef cattle; totally housed lot, beef cattle; stall barn, dairy; free stall barn, dairy; cowyard, dairy; open dirt or "pasture" lot swine; totally housed slotted floor lot, swine; solid concrete pad, open or housed, swine; open lot, sheep; housed lot; stables for horses; broiler chickens; layer chickens (egg production); layer breeding and replacement; open lot, turkeys; housed lot, turkeys; dry lot ducks; wet lot ducks. Definition of the terms used in identifying these subcategories are given in §§ 412.11 and 412.21 below. Factors such as age, size of plant, process employed, and waste control technologies further substantiated subcategorization of the feedlots industry in this manner for the purpose of the application of effluent limitations guidelines and standards of performance.

The pollutants contained in raw waste waters or runoff resulting from all confined animal or poultry production processes are principally biochemical oxygen demand, chemical oxygen demand, dissolved solids, suspended solids, nitrates and ammonia, phosphorus and coliform bacteria. Except in the most general terms, feedlot operations do not conform to other water-using manufacturing industries. Water flows are related to rainfall, process water use (manure flushing or washing), or a combination of the two. Process waste flows relate to either the water flow system or to purely bulk solids (raw or partially degraded manure) handling systems. Methods for managing water or waste bows are normally predicated upon a number of factors such as the specific site location, animal type, production system, soil, crop, and cultural practices for the region. Among the alternatives available for managing waste flows are holding basins, ponds, or lagoons to capture and partially stabilize wastes, anaerobic-lagoon systems, modified activated sludge concepts and oxidation ditches for refined handling and partial treatment of wastes and land utilization by irrigation, bulk liquid spreading, or bulk solids spreading, to complete the waste management cycle.

The more refined concepts are municipal secondary treatment methods which are sometimes useful for simplifying waste handling and disposal (e.g. oxidation ditch in a housed slotted floor swine operation). However, because of the extremely concentrated nature of the wastes, even the secondary treated effluents are of very poor quality (ten to twenty times more concentrated than raw domestic waste). Land utilization for liquid wastes or impoundment storage/evaporation with periodic solids disposal are still required and practicable. This effectively eliminates direct discharges. In duck production, however, because of water-based growing systems and limited land availability, biological treatment with subsequent discharge of effluents is of necessity most practicable. The effluents from duck production are known to contain the general organic and nutrient pollutant parameters noted above although the data are limited on all parameters except BOD and coliform bacteria. The biological treatment systems used in the industry to accomplish efficient removal of BOD and coliform bacteria also substantially reduce the other pollutants (suspended solids, nitrogen, etc.).

For all animal types, waste management is closely interrelated with both pollution control and animal husbandry. The costs of any given type of waste management method were not found to be excessive and often directly related to animal production costs as opposed to pollution control costs. Costs for runoff control, for example, will generally range between $2 and $12 per head of beef cattle (or equivalent in raw waste load for other species). Part of these costs (e.g., for manure collection, pen cleaning, etc.) are related to animal health and sanitation requirements as operating expenses and do not affect pollution control investments. Considerably more refined technologies were also investigated and include methods' to process manure for refeeding or other by-product recovery. Such concepts as dehydration, anaerobic digestion, and microbial fermentation have been tested and there is reasonable confidence that the methods will be useful in the future. In nearly all cases, the intent is to preserve or enhance protein (feed) value which may offset feeding costs and lead to further economic benefits through resource recovery as well as pollution control. Other than the explicit requirement for land utilization for waste management, nonwater quality environmental impacts due to these technologies are minimal. Air pollution (odor) problems are inherent in the operations and can be minimized by good housekeeping, sanitizing chemicals or judicious site selection. Technology regarding solid wastes and noncontaminating land disposal is embodied in the efficient practices used throughout the industry. Net energy requirements for waste control have no significant impact and are very small (estimated to be less than 5.0 percent of total requirements) in relation to production needs.

Except for the duck production subcategories, the feedlot industry is successfully practicing storage/land disposal of process wastes and waste water at a significant portion of operations. It is therefore concluded that the effluent limitation representing the degree of effluent reduction obtainable through the application of the best practicable control technology currently available is no discharge of waste water pollutants to navigable waters subject to exception in the event of excess rainfall, floods, or similar occurrences. The duck growing industry is successfully practicing secondary treatment of waste waters using aerobic or aerated biological treatment with chlorination, at a significant number of operations. Therefore, the effluent limitation representing the average of the best of these treatment facilities can achieve an effluent containing only 2.0 pounds of BOD–5 per 1000 ducks being fed for any 30 consecutive day period and greatly reduced bacterial (coliform) con-

V 38-173 SEP 7 73 XUM

tent. Therefore, the degree of effluent reduction obtainable through the application of best practicable control technology currently available is 2.0 pounds of BOD-5 per 1000 ducks fed and a fecal coliform limit of 400 counts per 100 ml at any time. By using complete confinement dry lot buildings with no outside duck runs, waste collection and treatment, recycle of treated wastes for raw waste flushing or irrigation, the duck production subcategories may eliminate the discharge of pollutants to navigable waters. This concept is already being practiced commercially by one operation in the industry with an apparent improvement in production efficiency. It is therefore concluded that the effluent limitation representing the degree of effluent reduction obtainable through the application of the best available technology economically achievable is no discharge of process wastewater pollutants. As an adjunct to these technical findings, an economic impact analysis was conducted. This analysis revealed that no impact exists upon those operations at least as large as stipulated in 40 CFR, Parts 124 and 125. Within the animal types of beef cattle, dairy cattle, swine, and ducks an impact is expected as increases in investment in pollution control facilities are required. As a result, structural changes already projected for the industry (increases in capacity for larger facilities with coincident decrease in small operations) may be substantiated by imposing these effluent limitations. However, effects upon product price increases or employment were found to be quite small, while overall production is likely to increase.

A report entitled "Development Document for Effluent Limitations Guidelines and Standards of Performance for the Feedlots Point Source Category" which further describes the technical analysis undertaken in support of the regulations being proposed herein is available for inspection at all EPA regional offices, State water pollution control offices, and is available from the EPA Information Center, Room 227, West Tower, Waterside Mall, in Washington, D.C., at all EPA regional offices, and at State water pollution offices. A supplementary analysis of the possible economic effect of the proposed regulations is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulations, or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman.

(c) Summary of public participation:

Prior to this publication, the agencies and groups listed below were consulted and given an opportunity to participate in the development of the effluent limitations guidelines and standards of performance for the feedlots industry. The Development Document referred to above includes as a supplement a detailed description of consultations and other participation by the public which has taken place in the course of development of these proposed regulations. The following are the principal agencies and groups consulted: Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); all State and U.S. Territory Pollution Control Agencies; American National Cattlemen's Association; National Livestock Feeders Association; National Pork Producers Council; National Milk Producers Federation; National Lamb Feeders Association; National Broiler Council; American Turkey Growers Association; Poultry and Egg Institute of America; Long Island Duck Growers Cooperative; American Society of Mechanical Engineers; American Society of Civil Engineers; Hudson River Sloop Restoration, Inc.; the Conservation Foundation; Environmental Defense Fund, Inc.; National Wildlife Federation; National Resources Defense Council; Council on Agricultural Science and Technology; Water Pollution Control Federation; Department of Agriculture; Department of Commerce; Department of Health, Education and Welfare; Department of the Interior; and the Water Resources Council.

The primary issues raised in the comments about previous drafts of these proposed effluent limitations guidelines and standards of performance and the discussion of these issues herein are as follows:

The earlier drafts did not offer limitations which accounted for excessive rainfall circumstances. Water pollution from the feedlot industry is almost wholly predicated upon the occurrence of a rainfall event which causes surface runoff of manure. The other potential source is from discharges due either to the washdown or flushing of wastes from pens, barns or other feedlot facilities or overflows from continuous flow watering systems. Since the effect of rainfall runoff is generally much greater than these other sources of discharge, it is the control of runoff thereof which must provide the baseline for effluent limitations. The key issue is the definition of the degree to which runoff must be controlled. In order to avoid requiring excessive land areas to be set aside to account for runoff from rare rainfall events, limitations must be set for some maximum feasible storage requirement. It was determined that the 10 year, 24 hour storm or equivalent hydrologic event(s) would serve the purposes of the Act as a basis for limitations based on best practicable control technology currently available. Similarly, refinement of control systems to contain the runoff from the 25 year, 24 hour storm or equivalent hydrologic event(s) would meet requirements of the Act as a basis for both best available technology economically achievable, and best available demonstrated technology, processes and alternatives.

A second issue was addressed by some states and public interest groups which questioned a standard for duck growers which permits a discharge of treated effluents for 1977. It is not economically feasible to recycle or reuse treated effluents in all operations at the present. Therefore, EPA has concluded that duck growers should be excluded from no discharge requirements until 1983 by which time water minimization concepts and improved feeding facilities can be implemented. Moreover, the average circumstances of the best treatment systems now used by duck growers will achieve a significant reduction of pollutants when implemented by all operations in meeting the requirements of best practicable control technology currently available.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460. Attention Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. All comments received on or before October 9, 1973, will be considered, and will be available for public inspection during normal working hours at the Office of Public Affairs.

Dated August 31, 1973.

JOHN QUARLES,
*Acting Administrator.*

## PART 412—EFFLUENT LIMITATIONS GUIDELINES FOR EXISTING SOURCES AND STANDARDS OF PERFORMANCE AND PRETREATMENT STANDARDS FOR NEW SOURCES FOR THE FEEDLOTS POINT SOURCE CATEGORY

**Subpart A—All Subcategories Except Ducks**

Sec.

412.10 Applicability; description of all subcategories except ducks.
412.11 Special definitions.
412.12 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.
412.13 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.
412.14 Standards of performance for new sources.
412.15 Pretreatment standards for new sources.

**Subpart B—Ducks**

412.20 Applicability; description of duck subcategory.
412.21 Special definitions.
412.22 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.
412.23 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.
412.24 Standards of performance for new sources.
412.25 Pretreatment standards for new sources.

**Subpart A—All Subcategories Except Ducks**

### § 412.10 Applicability; description of all subcategories except ducks.

The provisions of this subpart are applicable to discharges resulting from feedlots in the following subcategories: beef cattle—open lots; beef cattle—housed lots; dairy cattle—stall barn (with milk room); dairy—free stall barn (with milking center); dairy—cowyards (with milking center); swine-dirt or pasture lots; swine—housed, slotted floor; swine—solid concrete floor, open or housed lot; sheep—open lots; sheep—housed lots; horses—stables (race tracks); chickens—broilers, housed; chickens—layers (egg production), housed; chickens—layer breeding or replacement stock, housed; turkeys—open lots; turkeys—housed.

### § 412.11 Special definitions.

For the purposes of this subpart:

(a) The term "feedlot" shall mean a concentrated, confined animal or poultry growing operation for meat, milk or egg production, or stabling, in pens or houses wherein the animals or poultry are fed at the place of confinement and crop production is not sustained in the area of confinement.

(b) The term "process waste water" shall mean any water from any source which comes into contact with any manure, litter or bedding, or any other raw material or intermediate or final material or product used in or resulting from the production of animals or poultry or direct products (e.g. milk, eggs).

(c) The term "process waste water pollutants" shall mean pollutants contained in process waste waters.

(d) The term "open lot" shall mean pens or similar confinement areas with dirt, or concrete surfaces wherein animals or poultry are substantially or entirely exposed to the outside environment except for possible small portions affording some protection by windbreaks, small shed-type shade areas. For the purposes hereof the term "open lot" is synonymous with the terms "cowyard" (dairy cattle), "pasture lot" (swine), and "dirt lot" (swine, sheep or turkeys), which are terms widely used in the industry.

(e) The term "housed lot" shall mean totally roofed buildings which may be open or completely enclosed on the sides wherein animals or poultry are housed over solid concrete or dirt floors, slotted (partially open) floors over pits or manure collection areas in pens, stalls or cages, with or without bedding materials and mechanical ventilation. For the purposes hereof, the term "housed lot" is synonymous with the terms "slotted floor" buildings (swine, beef), "barn" or "stable" (dairy cattle, horses), "houses" (turkeys, chickens), which are terms widely used in the industry.

(f) The terms "stall" barn and "free stall" barn shall mean specialized facilities wherein (1) producing cows and replacement cows are milked and fed in a fixed location (stall barn), or (2) producing cows are permitted free movement between resting and feeding areas (free stall barn).

(g) The term "milkroom" shall mean milk storage and cooling rooms normally used for stall barn dairies.

(h) The term "milking center" shall mean a separate milking area with storage and cooling facilities adjacent to a free stall barn or cowyard dairy operation.

### § 412.12 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available is no discharge of process waste water pollutants to navigable waters, except for runoff which is not contained by facilities, designed, constructed, and operated to contain all process waste water in addition to the runoff from the 10 year, 24 hour rainfall event as established by the U.S. Weather Bureau for the region in which the point source discharger is located.

(b) Application of the factors listed in section 304(b) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

### § 412.13 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable is no discharge of process waste water pollutants to navigable waters, except for runoff which is not contained by facilities designed, constructed, and operated to contain all process waste water in addition to the 25 year, 24 hour rainfall event as established by the U.S. Weather Bureau for the region in which the point source discharger is located.

(b) Application of the factors listed in section 304(b) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

### § 412.14 Standards of performance for new sources.

(a) The standard of performance representing the degree of effluent reduction obtainable by the application of the best available demonstrated control technology, processes, operating method, or other alternatives is no discharge of process waste water pollutants to navigable waters except for runoff which is not contained by facilities designed, constructed, and operated to contain all process waste water in addition to the runoff from the 25 year, 24 hour rainfall event as established by the U.S. Weather Bureau for the region in which the point source discharger is located.

(b) Application of the factors listed in section 306 does not require variation from the standard of performance set forth in this section for any point source subject to such standard of performance.

### § 412.15 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act, for a source within the subcategories covered in this subpart which are industrial users of a publicly owned treatment works, (and which would be new sources subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.133, 40 CFR shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new source specified in § 412.14, 40 CFR, Part 412, provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

**Subpart B—Ducks Subcategory**

### § 412.20 Applicability; description of duck subcategory.

The provisions of this subpart are applicable to discharges from feedlots for the following subcategories:

(a) Ducks—dry lot.

(b) Ducks—wet lot.

### § 412.21 Special definitions.

For the purposes of this subpart:

(a) The term "feedlot" shall mean a concentrated, confined animal or poultry growing operation for meat, milk or egg production, or stabling, in pens or houses wherein the animals or poultry are fed at the place of confinement and crop production is not sustained in the area of confinement.

(b) The term "process waste water" shall mean any water from any source which comes into contact with any manure, litter or bedding, or any other raw material or intermediate or final material or product used in or resulting from the production of animals or poultry or direct products (e.g. milk, eggs).

(c) The term "process waste water pollutants" shall mean pollutants contained in process waste waters.

(d) The term "dry lot" shall mean a totally housed facility for growing ducks in confinement with a dry litter floor cover and expected drinking water use of up to 4.0 gallons of water per duck per day.

(e) The term "wet lot" shall mean a confinement facility for raising ducks which is open to the environment with a small portion of shelter area, and with

V 38 173 SEP 7 73 XUM

open water runs and swimming areas to which ducks have free access with water use in excess of 4.0 gallons per duck per day.

(f) For the purposes of this subpart, the following abbreviations shall have the following meaning: (1) kg shall mean kilogram(s); and (2) lb shall mean pounds.

**§ 412.22 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.**

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available is as follows:

| *Effluent characteristic* | *Effluent Limitation* |
|---|---|
| BOD5 | Maximum for any one day 1.66 kg (3.66 lb) per 1,000 ducks. Maximum average of daily values for any period of 30 consecutive days 0.91 kg (2.00 lb) per 1,000 ducks. |
| Fecal coliform | Maximum at any time 400 counts per 100 ml. |

(b) Application of the factors listed in section 304(b) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

**§ 412.23 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.**

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable is no discharge of process waste water pollutants to navigable waters, except for runoff which is not contained by facilities designed, constructed, and operated to contain all process waste water in addition to the runoff from the 25 year, 24 hour rainfall event as established by the U.S. Weather Bureau for the region in which the point source discharger is located.

(b) Application of the factors listed in section 304(b) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

**§ 412.24 Standards of performance for new sources.**

(a) The standard of performance representing the degree of effluent reduction obtainable by the application of the best available demonstrated control technology, processes, operating methods, or other alternatives is no discharge of process waste water pollutants to navigable waters, except for runoff which is not contained by facilities designed, constructed, and operated to contain all process waste water in addition to the runoff from the 25 year, 24 hour rainfall event as established by the U.S. Weather Bureau for the region in which the point source discharger is located.

(b) Application of the factors listed in section 306 does not require variation from the standard of performance set forth in this section for any point source subject to such standard of performance.

**§ 412.25 Pretreatment standards for new sources.**

The pretreatment standards under section 307(c) of the Act, for a source within the subcategories covered in this subpart which are industrial users of a publicly owned treatment works (and which would be new sources subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.133, 40 CFR shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 412.14, 40 CFR, Part 412; provided that, if the publicly owned treatment works which receives the pollutants is committed in its NPDES permit to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

**[ 40 CFR Part 422 ]**

## PHOSPHATE MANUFACTURING POINT SOURCE CATEGORY

### Effluent Limitations Guidelines for Existing Sources and Standards of Performance and Pretreatment Standards for New Sources

Notice is hereby given that effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources set forth in tentative form below are proposed by the Environmental Protection Agency (EPA) for the phosphorus production subcategory (Subpart A), the phosphorus consuming subcategory (Subpart B), and the phosphate subcategory (Subpart C), of the phosphate manufacturing category of point sources pursuant to sections 301, 304(b) and (c), 306(b) and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and 1317(c); 86 Stat. 816 et seq.; P.L. 92-500) (the "Act").

(a) Legal authority.

(1) *Existing point sources.*—Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to Section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) to the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practible control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives. The regulations proposed herein set forth effluent limitations guidelines, pursuant to section 304(b) of the Act, for the phosphorus production subcategory (Subpart A), the phosphorus consuming subcategory (Subpart B), and the phosphate subcategory (Subpart S), of the phosphate manufacturing category.

(2) *New sources.*—Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(B) of the Act requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. The Administrator published in the FEDERAL REGISTER of January 16, 1973 (38 FR 1624) a list of 27 source categories, including the phosphate manufacturing category. The regulations proposed herein set forth the standards of performance applicable to new sources for the phosphorus production subcategory (Subpart A), the phosphorus consuming subcategory (Subpart B), and the phosphate subcategory (Subpart C), of the phosphate manufacturing category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. §§ 422.15, 422.25, and 422.35, proposed below, provide pretreatment standards for new sources within the phosphorus production subcategory (Subpart A), the phosphorus consuming subcategory (Subpart B), and the phosphate subcategory (Subpart C), of the phosphate manufacturing category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The report or Development Document referred to below provides, pursuant to section 304(c) of the Act, information on such processes, procedures or operating methods.

(b) Summary and basis of proposed effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources.

(1) *General methodology.*—The effluent limitations guidelines and standards of performance proposed herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations and standards are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations and standards for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of (1) the source, flow and volume of water used in the process employed and the sources of waste and waste waters in the operation; and (2) the constituents of all waste water. The constituents of the waste waters which should be subject to effluent limitations guidelines and standards of performance were identified.

The control and treatment technologies existing within each segment were identified. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which are existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problems, limitations and reliability of each treatment and control technology were also identified. In addition, the non-water quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation were identified. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available," "best available technology economically achievable" and the "best available demonstrated control technology, processes, operating methods, or other alternatives." In identifying such technologies, various factors were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, non-water quality environmental impact (including energy requirements) and other factors.

The data upon which the above analysis was performed included EPA permit applications, EPA sampling and inspections, consultant reports, and industry submissions.

The pretreatment standards proposed herein are intended to be complementary to the pretreatment standards proposed for existing sources under Part 128 of 40 CFR. The bases for such standards are set forth in the FEDERAL REGISTER of July 19, 1973, 38 FR 19236. The provisions of Part 128 are equally applicable to sources which would constitute "new sources," under section 306 if they were to discharge pollutants directly to navigable waters, except for § 128.133. That section provides a pretreatment standard for "incompatible pollutants" which requires application of the "best practicable control technology currently available," subject to an adjustment for amounts of pollutants removed by the publicly owned treatment works. Since the pretreatment standards proposed herein apply to new sources, §§ 422.15, 422.25 and 422.35 below amend § 128.133 to require application of the standard of performance for new sources rather than the "best practicable" standard applicable to existing sources under sections 301 and 304(b) of the Act.

(2) Summary of conclusions with respect to the phosphorus production subcategory (Subpart A), the phosphorus consuming subcategory (Subpart B), and the phosphate subcategory (Subpart C), of the phosphate manufacturing category of point sources.

(i) Categorization.

For the purpose of studying waste treatment and effluent limitations, the phosphate manufacturing category was divided into three discrete subcategories which coincide with a breakdown of the category according to the flow of materials as outlined in the Development Document for the phosphate manufacturing category.

(1) *Subpart A.*—Phosphorus Production Subcategory: Phosphorus (and by-product ferrophosphorus) production stands by itself as a smelting operation, as opposed to more conventional chemical processes. In phosphorus production, a grossly impure raw material is involved, and raw wastes and byproducts are generated which dwarf the quantities of the primary product recovered. The remainder of the industry starts with relatively pure materials, and waste streams are consequently much smaller.

(2) *Subpart B.*—Phosphorus Consuming Subcategory: The chemicals that are made directly from elemental phosphorus (dry process phosphoric acid, phosphorus pentoxide, phosphorus pentasulfide and phosphorus trichloride) may be grouped together because aqueous wastes arise primarily from sources other than the direct process stream. Air pollution abatement unit operations, product purification residues, tail gas seals, vessel cleanings, and leaks and spills are the sources of the aqueous waste streams. Phosphorus oxychloride has been added despite the fact that phosphorus is not a direct raw material of its production; however, the waste streams have similar origins.

(3) *Subpart C.*—Phosphate Subcategory: The chemicals that are made from phosphoric acid include sodium tripolyphosphate and the calcium phosphates. The calcium phosphates include both the animal or livestock feed grade and the human food grade products. These constitute a separate segment because large volumes of process water is used in their manufacture, and also because they are finely divided solid products. The former characteristic gives rise to some aqueous wastes of direct process origin; the latter characteristic gives rise to aqueous wastes from wet dust scrubbing equipment. Most of the animal feed grade phosphate of this subcategory is not made from dry process phosphoric acid produced by industries of Subpart B, the phosphorus consuming subcategory. The livestock feed grade product is mainly produced from wet process phosphoric acid.

(ii) Waste characteristics.

The pollutants contained in raw waste waters resulting from the phosphate manufacturing category include fluoride compounds, arsenic compounds, elemental phosphorus, phosphoric acid, sulfurous acid, sulfuric acid, hydrochloric acid, suspended solids, chromates, total dissolved solids and ammonia. Large volumes of cooling water are required by the industry; heat is a raw waste water problem. Five potentially harmful components were noted in raw waste water streams at objectionable concentrations. These were elemental phosphorus, fluorine compounds, arsenic compounds, free inorganic acids and chromates. Some western ores contain considerable cadmium. This element does not normally appear in the waste water discharges of the phosphate manufacturing category, even when present in the ore at a significant level. Vanadium and radium also occur in some ores and must be considered as potential waste water components.

Noncontact cooling water, process and product water, transport water, contact cooling or heater water, atmospheric seal water, scrubber water, and auxiliary process water form the principal waste water streams in phosphate manufacturing. Raw waste load data have been collected on these streams for each subcategory of the industry, and information assembled on the treatment procedures required for each waste water stream.

V 38-173 SEP 7 73 XUM

(iii) Origin of waste water pollutants in the phosphate manufacturing category.

(1) Phosphorus production subcategory: An extremely large quantity of non-contact cooling water is employed. Electrostatic precipitators utilized ahead of phosphorus removal sprays collect a dust that contains about 50 percent phosphorus pentoxide, with other solids. A sludge originates in the phosphorus condenser sump. This is a mixture of dispersed phosphorus, and other solids that escaped through the stack electrostatic precipitator.

The calciner and furnace fume scrubber liquor waste components are $SiO_2$, $Fe_2O_3$, and phosphates, sulfates and fluorides as dissolved solids. The scrubber water is highly acidic from pick-up of sulfur dioxide, and acidic fluorine compounds.

The phosphorus condenser liquor is the main "phossy" water source. Phossy water, a colloidal dispersion of elemental phosphorus, is extremely harmful to aquatic organisms and a major waste water problem. Phossy water occurs from many other sources, whenever elemental phosphorus is handled. Phossy water develops in the water seals and water covers maintained over storage and shipping containers, from washing operations to purify phosphorus, and container cleaning operations.

The slag quenching liquor stream is characterized by suspended solids and dissolved solids, primarily as sulfates. The waste water contains fluorine compounds in the soluble and suspended forms.

(2) Phosphorus Consumption Subcategory: Phossy water is generated whenever elemental phosphorus is stored and shipped. The manufacturing processes are dry, except for use of some water in phosphoric acid production. Waste water pollutants primarily originate from spills, leaks into water seals, and cleanup of equipment and shipping containers.

Water scrubbers, used to pick up fumes from casting of phosphorus pentasulfide, are a source of pollution. Phosphorus trichloride and phosphorus oxychloride manufacture utilize chlorination steps. This leads to the formation of hydrochloric acid. The chlorides do not precipitate in usual treatment operations and constitute a difficult waste water problem.

(3) Phosphate Subcategory: The aqueous wastes from this segment of the industry arise from the use of wet scrubbing equipment, spray and dust deposits, clarified waste water from centrifuges, and filtrate fractions. The pollutants are largely sodium and calcium phosphates, which give rise to suspended and soluble solids in waste water.

A defluorination process utilized in feed grade phosphate production leads to formation of a large suspended solids waste water fraction.

(iv) Treatment and control technology.

In-plant procedures to control pollution include good housekeeping, control of spills, reduction and control of start-up and shut down operations, reuse of waste water, recycle of sediment to raw material supply, salvage of sediment and incorporation in the final product salvage of intermediate products for sale as byproduct, and control of runoff and seepage from lagoons.

"End-of-pipe" waste water treatment processes include sedimentation, flocculation, precipitation, filtration, neutralization, holding basins, lagoons, spray ponds, cooling towers, condensers, disposal of solids to landfill areas, continuous monitoring of cooling water, evaporation and recycle. Treatment technology from this industry requires segregation of process water and cooling water. Process water commonly reused after lime treatment and sedimentation. Phossy water is commonly treated before reuse by holding in a settling pond, neutralization with lime, treatment with a flocculation aid and then additional clarification. Total process waste water recycle is being practiced in segments of the industry.

Air pollution control processes include precipitation, filtration, demisting, stack washing, use of separator towers, cyclone separation, and diversion of components originating in air pollution control processes to waste water treatment systems, to raw materials, and to products. Wet scrubbing of stacks leads to heavy contamination of waste water.

Solid waste control must be considered. The waste water from the phosphate industry, and treatment processes of the industry develop a considerable volume of highly hydrated fluorsilicaceous and silicaceous substance. These hydrated solid wastes form relatively unstable landfill deposits. Best practicable control technology and best available control technology as they are known today, require disposal of the pollutants removed from waste waters in this industry in the form of solid wastes and liquid concentrates. In most cases these are nonhazardous substances requiring only minimal custodial care. However, some constituents may be hazardous and may require special consideration. In order to ensure long term protection of the environment from these hazardous or harmful constituents, special consideration of disposal sites must be made. All landfill sites where such hazardous wastes are disposed, should be selected so as to prevent horizontal and vertical migration of these contaminants to ground or surface waters. In cases where geologic conditions may not reasonably ensure this, adequate legal and mechanical precautions (*e.g.* impervious liners) should be taken to ensure long term protection to the environment from hazardour materials. Where appropriate, the location of solid hazardous materials disposal sites should be permanently recorded in the appropriate office of legal jurisdiction.

(v) Treatment and control technology within subcategories.

Waste water treatment and control technologies have been studied for each subcategory of the industry to determine what is (a) The best practicable control technology currently available, (b) the best available technology economically achievable, and (c) the best available demonstrated control technology, processes, operating methods or other alternatives.

(1) Treatment in phosphorous production subcategory: The best practicable control technology currently available leads to no discharge of the waste components of process waste water from plants of the phosphorus production subcategory. Large amounts of once through cooling water are utilized in the industry. It is vitally important that this be segregated from process waste water. Process waste water can be completely recycled, and reused by lime neutralization and sedimentation. The process waste water is characterized by much suspended phosphorus, silicate, sulfate, fluoride, fluorosilicate and other suspended solids. The treatment system must be protected from excessive intrusion of rain water, and be of adequate volume to handle normal intrusion of peak rainfall periods. The presence of much fine and highly hydrated solids in the waste water typically leads to rapid sealing of most soils. Adverse geologic and hydrologic factors, associated with site selection, may create an environmental uncertainty and could require consideration of adequate impervious liners on the bottoms and sides of treatment ponds to prevent seepage to ground or surface waters.

The requirements for the best available technology economically achievable and for the best available demonstrated control technology, processes, operating methods, or other alternatives for new sources are met by the requirements for the best practicable control technology currently available.

(2) Treatment in the phosphorus consuming subcategory: Best practicable control technology currently available involves segregation of cooling water from process water and treatment and recycle, and reuse of process waste water. Prevention of leaks and spills is important in phosphoric acid production, and for all other products of the subcategory. Total recycle is required for scrubber water in phosphorus pentoxide and phosphorus pentasulfide production. Phosphoric acid is a significant raw waste water contaminant. Lime precipitation is essential in some situations, along with recycle. A special problem is encountered in this subcategory for phosphorus trichloride and phosphorus oxychloride production. The chlorides derived from the chlorination step are not wholly amenable to recycle procedures. A small discharge of total dissolved solids total suspended solids occurs in recycle blowdown. Recycle with lime precipitation and filtration are required operations in phosphorus trichloride and phosphorus oxychloride production.

Condenser coolers are in extensive use in the subcategory. Refrigerated condensers are required for phosphorus trichloride and phosphorus oxychloride production to hold hydrochloric acid

contamination to a low level. Monitoring is essential to detect and correct process leaks. Contaminated cooling water must be dealt with as process waste water.

Treatment required to achieve best available technology economically achievable, and for best available demonstrated control technology, processes, operating methods or other alternatives for new sources is unchanged from best practical control technology for most products in the subcategory. However, evaporation must be considered to deal with the blowdown from the chlorinated products, phosphorus trichloride and phosphorus oxychloride.

(3) Treatment in the phosphate subcategory: Total recycle, with lime precipitation and dry dust collection, is required in the phosphate subcategory for best practicable control technology currently available. Control of spills and good housekeeping measures are necessary and the segregation of uncontaminated cooling water is essential. Continuous monitoring of condenser cooling water for leaks and provision of emergency storage, and treatment facilities are desirable.

As no discharge of process waste water pollutants to navigable waters is achieved by best practicable control technology currently available, no modifications are required to meet best available technology economically achievable, or best available demonstrated control technology, processes, operating methods, or other alternatives.

(vi) Cost estimates for control of waste water pollutants in the phosphate manufacturing category: Cost estimates follow for processes that can achieve the various levels of treatment required for the three subcategories.

(1) The phosphorus production subcategory: No discharge of process waste water pollutants for the phosphorus production subcategory is achieved through 100 percent recycle of process waste water. No discharge of process waste water pollutants to navigable waters is achieved by 10 percent of the subcategory. Complete recycle would add $4.60/ton of product to the treatment costs of the remaining 90 percent of the subcategory. This 90 percent of the subcategory now applies recycle of phossy water, and recycle of process waste water.

(2) Phosphorus consuming subcategory: No discharge of process waste water pollutants to navigable waters is achieved by 10 percent of the subcategory at an average cost increase of $0.65/ton over the remaining portion of the subcategory. This level of discharge limitation can be achieved by the phosphorus pentoxide segment at a cost of $1.40/ton of product; by the phosphorus pentasulfide segment at a cost of $1.70/ton of product; by the phosphorus trichloride segment using evaporation at a cost of $1.70/ton of product; and, by the phosphorus oxychloride segment using evaporation at a cost of $1.25/ton of product. Best practicable control technology currently available can be achieved by the phosphorus trichloride segment at a cost of $0.70/ton of product and by the phosphorus oxychloride segment at a cost of $0.85/ton of product. All costs are in relation to plants discharging untreated waste waters.

(3) Phosphate subcategory: No discharge of process waste water pollutants to navigable waters is being achieved by all of the sodium tripolyphosphate segment. No additional cost is required to maintain this status. This level of discharge control is achieved in the feed grade dicalcium phosphate segment at a cost of $1.40/ton of product over usual practices, and in the production of food grade dicalcium phosphate at a cost of $1.40/ton of product.

(vii) Establishing daily maximum limitations: The daily maximum limitation of twice the 30 day limitation for total suspended solids and for total dissolved solids in the phosphorus trichloride and phosphorus oxychloride products of the phosphorus consuming subcategory is based on statistical studies of waste generation at existent plants.

(viii) Much consideration has been given to the nonwater quality aspects of pollution control. The large quantities of highly hydrated silicates and fluorosilicates, along with other fine precipitates formed in the treatment processes create a substantial solid waste problem. Landfill and lagoon sites of adequate size and character are essential for treatment processes. The industry produces large quantities of air pollutants. These are separated by a variety of stack treatment processes. Many of the stack wastes create solid waste and waste water problems. The phosphorus production subcategory creates the major air and solids problems.

The soluble chloride salts resultant from evaporation require disposal in a site permanently protected from leaching. These chloride salts remain soluble for an infinite time period. These salts will migrate to ground water, through the inexorable leaching processes normal to soil and normal ground water movement unless extraordinary measures are taken to check the processes.

(ix) Economic impact analysis.

The economic analysis has focused on both internal and external costs associated with the proposed levels of water pollution abatement.

The total investment and annual costs required for all subcategories of this segment of the industry to achieve no discharge of process waste water pollutants to navigable waters by 1977 are estimated at $9.3 million and $4.9 million, respectively. Two segments, phosphorus oxychloride and phosphorus trichloride are not required to achieve this effluent level by 1977, however, the costs to achieve this level of control are included for comparison.

The total cost of water pollution abatement, both operating and raw material costs, for each product has been related to the average product selling price to determine the magnitude of either price increases, if these costs can be passed on, or decreases in pre-tax profitability. These percentages range from 0.6% for phosphorus pentoxide to 1.6 percent for feed-grade dicalcium phosphate.

External cost deals basically with the assessment of economic impact of the internal costs discussed above in terms of price increases, production curtailments or plant closures, resultant employment, community and regional impacts, international trade, and future industry growth. It should be noted that a precise study of economic impact is difficult due to numerous other economic forces at work within an industry, and because of the great variability experienced from plant-to-plant in such factors as pollution control costs, profitability, and return on investment. In an economic study such as this, it is not possible to deal with these factors on an individual plant basis.

It is not expected that any significant economic impact would result from imposing the requirement of no discharge of process waste water pollutants to navigable waters on all covered segments of this category by 1977 (Best Practicable Control Technology for most industry segments). Because of this conclusion, we judge that the proposed guidelines for 1977, 1983 and new sources are economically achievable. The small price increases projected will probably be fully passed on to the consuming industry, since there are few substitutable products. Although the small costs can be passed on by all segments, the sodium tripolyphosphate, and dicalcium phosphate segments would have to absorb costs of any greater magnitude due to declining sodium tripolyphosphate markets and cost-competitive alternates for dicalcium phosphates. In general, the economic viability of no plants in the industry will be threatened by the added burden of the costs. Hence, no production curtailments or plant closures are expected and therefore, there should be no resultant unemployment, community or future growth impacts. because international trading of the products of this industry is of very small significance, and projected price increases are small, the U.S. balance of trade is not expected to be affected by the proposed guidelines.

The report entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the PHOSPHORUS DERIVED CHEMICALS Segment of the Phosphate Manufacturing Point Source Category" details the analysis undertaken in support of the regulations being proposed herein and is available for inspection in the EPA Information Center, Room 227, West Tower, Waterside Mall, Washington, D.C., at all EPA regional offices, and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the proposed regulations is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulations, or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August

V 38 173 SEP 7 73 XUM

6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman.

(c) Summary of public participation. Prior to this publication, the agencies and groups listed below were consulted and given an opportunity to participate in the development of effluent limitations guidelines and standards proposed for the phosphate manufacturing category. All participating agencies have been informed of project developments. An initial draft of the Development Document was sent to all participants and comments were solicited on that report. The following are the principal agencies and groups consulted: (1) Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); (2) all State and U.S. Territory Pollution Control Agencies; (3) the Fertilizer Institute; (4) Manufacturing Chemists Association; (4) Puerto Rico Land Association; (5) Soap and Detergent Association; (6) The American Society of Mechanic Engineers; (7) Hudson River Sloop Restoration, Inc.; (8) The Conservation Foundation; (9) Environmental Defense Fund, Inc.; (10) Natural Resources Defense Council; (11) The American Society of Civil Defense Council; (12) The American Society of Civil Engineers; (13) Water Pollution Control Federation; (14) National Wildlife Federation, and (15) the Isaac Walton League of America.

The following organizations responded with comments: FMC Corporation, Monsanto Industrial Chemicals Company, State of Pennsylvania, Division of Industrial Wastes and Erosion Control, Delaware River Basin Commission, State of Florida, Department of Pollution Control, United States Department of Inof Florida, Department of Pollution Control, United States Department of Interior, Texas Water Quality Board, General Counsel of the Department of Commerce, California Water Resources Control Board, and New York State Department of Environmental Conservation.

The comments were highly variable, ranging from full approval to total rejection.

The primary issues raised in the development of the proposed effluent limitations guidelines and standards of performance and the treatment of these issues herein are as follows:

(1) A common criticism was that few or no plants are actually achieving no discharge of process waste water pollutants to navigable waters in some segments of the industry. As noted in the Development Document, a study of the industry established that this level is being achieved in almost all of these subcategories of phosphate manufacturing. For the remainder, established alternative in-plant and treatment procedures are available for application.

(2) A number of commentators took the position that the pH range, 6.0 to 10.5 originally proposed for process waste water discharges for phosphorus trichloride and phosphorus oxychloride production as the best practicable control technology currently available was too alkaline. The range was changed to pH 6.0 to 9.0.

(3) The criticism was made that lime treatment of phosphate does not eliminate a pollutant but merely substitutes one soluble component for another; actually, lime is highly efficient in removal of many pollutants. Lime treatment of these wastes converts phosphoric acid, and many acidic components from stack washing to insoluble precipitates, without introduction of additional soluble pollutants. Sulfuric acid, sulfurous acid, hydrofluoric acid, and the fluorosilicic acids are removed by lime in remarkably beneficial precipitation reactions.

(4) A number of commenters expressed the opinion that inadequate cost information had been gathered and that these studies were not applied to plants with the full range of treatment problems. The economic impact study, however, has established that cost is not a major factor limiting the attainment of the proposed regulations.

(5) Some comments expressed the opinion that the amount of rainfall at a plant site may be the determining factor in the practicability of meeting regulations requiring no discharge of waste water pollutants. Plants practicing total recycle will have no difficulty in meeting regulations in arid regions. While it may be more difficult to practice total recycle in a humid region than in a dry region, established sound procedures for lagoon design, location, and for control of rainfall run-off are among the factors that make the regulations practicable. It is evident that drainage plans must be optimized for a recycle plant in high rainfall regions. Potential spill and fallout areas requiring control must be limited, as must natural drainage into holding areas. Modified ponds, particularly deeper ponds, can provide extra capacity to carry a plant through periods of unfavorable weather. The regulations covering discharge limitations initiate control operation at dates long into the future. This feature provides manufacturers with the time period required to make the relocation moves, in-plant changes, and waste water treatment changes essential for complying with the Act.

(6) Many comments referred to cooling water, boiler blowdown waste water problems, and water supply waste water problems. These are to be dealt with later as a separate category. Any cooling water that picks up process related pollutants from leaks becomes process waste water. It is the responsibility of the plant to monitor cooling water streams for leaks, and to treat contaminated cooling water to the standards set up for process waste water discharges.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. All comments received on or before October 9, 1973, will be considered.

Dated August 31, 1973.

JOHN QUARLES,
*Acting Administrator.*

## PART 422—EFFLUENT LIMITATIONS GUIDELINES FOR EXISTING SOURCES AND STANDARDS OF PERFORMANCE AND PRETREATMENT STANDARDS FOR NEW SOURCES FOR THE PHOSPHATE MANUFACTURING POINT SOURCE CATEGORY

**Subpart A—Phosphorus Production Subcategory**

Sec.
422.10 Applicability; description of phosphorus production subcategory.
422.11 Specialized definitions.
422.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
422.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
422.14 Standards of performance for new sources.
422.15 Pretreatment standards for new sources.

**Subpart B—Phosphorus Consuming Subcategory**

422.20 Applicability; description of phosphorus consuming subcategory.
422.21 Specialized definitions.
422.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
422.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
422.24 Standards of performance for new sources.
422.25 Pretreatment standards for new sources.

**Subpart C—Phosphate Subcategory**

422.30 Applicability; description of phosphate subcategory.
422.31 Specialized definitions.
422.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
422.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by application of the best available technology economically achievable.
422.34 Standards of performance for new sources.
422.35 Pretreatment standards for new sources.

### Subpart A—Phosphorus Production Subcategory

**§ 422.10 Applicability; description of phosphorus production subcategory.**

The provisions of this subpart are applicable to the discharges resulting from the production of phosphorus and ferrophosphorus by smelting of phosphate ore.

**§ 422.11 Specialized definitions.**

For the purpose of this subpart: the term "process waste water" shall mean any water which, during the manufacturing process, comes into direct contact with any raw material, intermediate product, by-product or product used in or resulting from the manufacture of phosphorus and ferrophosphorus.

**§ 422.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged after application of the best practicable control technology currently available by a point source subject to the provisions of this subpart: There shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged after application of the best available technology economically achievable by a point source subject to the provisions of this subpart: There shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.14 Standards of performance for new sources.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged reflecting the greatest degree of effluent reduction achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants by a new point source subject to the provisions of this subpart: There shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.15 Pretreatment standards for new sources.**

The pretreatment standards under section 307(c) of the Act, for a source within the phosphorus production subcategory, which is an industrial user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.133, 40 CFR, shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 422.14, 40 CFR, Part 422 provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

### Subpart B—Phosphorus Consuming Subcategory

**§ 422.20 Applicability; description of phosphorus consuming subcategory.**

The provisions of this subpart are applicable to discharges resulting from the manufacture of phosphoric acid, phosphorus pentoxide, phosphorus pentasulfide, phosphorus trichloride, and phosphorus oxychloride directly from elemental phosphorus. The production of phosphorus trichloride and phosphorus oxychloride create waste water pollutants not completely amenable to the procedures utilized for best practicable control technology currently available. The standards set for phosphorus trichloride manufacture and phosphorus oxychloride manufacture, accordingly, must differ from the rest of the subcategory at this level of treatment.

**§ 422.21 Specialized definitions.**

For the purpose of this subpart:

(a) the term "process waste water" shall mean any water which, during the manufacturing process, comes into direct contact with any raw material, intermediate product, by-product or product used in or resulting from the manufacture of phosphorus and ferrophosphorus.

(b) the term "TSS" shall mean total suspended nonfilterable solids.

(c) the term "TDS" shall mean total dissolved solids. The analytical value for this pollutant is the quantitative difference between the total solids and the total suspended nonfilterable solids.

(d) the term "kg/kkg" shall mean kilograms per 1,000 kilograms.

**§ 422.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged after application of best practicable control technology currently available by a point source subject to these provisions of this subpart:

(a) There shall be no discharge of process waste water pollutants to navigable water from the manufacture of phosphoric acid, phosphorus pentoxide, or phosphorus pentasulfide.

(b) The following limitations constitute the maximum permissible discharge for phosphorus trichloride manufacturing on the basis of productions:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| TSS | Maximum for any one day 1.4 kg/kkg of product (1.4 lb/1,000 lb). Maximum average of daily values for any period of thirty consecutive days 0.7 kg/kkg of product (0.7 lb/1,000 lb). |
| TDS | Maximum for any one day 10.0 kg/kkg of product (10.0 lb/1,000 lb). Maximum average of daily values for any period of thirty consecutive days 5.0 kg/kkg of product (5.0 lb/1,000 lb). |
| pH | 6.0 to 9.0. |

(c) The following table sets forth the maximum permissible discharge for phosphorus oxychloride on the basis of production:

| *Effluent characteristic* | *Effluent limitation* |
|---|---|
| TSS | Maximum for any one day 0.3 kg/kkg of product (0.3 lb/1,000 lb). Maximum average of daily values for any period of thirty consecutive days 0.15 kg/kkg of product (0.15 1,000 lb). |
| TDS | Maximum for any one day 7.0 kg/kkg of product (7.0 lb/1,000 lb). Maximum average of daily values for any period of thirty consecutive days 3.5 kg/kkg of product (3.5 lb/1,000 lb). |
| pH | 6.0 to 9.0. |

**§ 422.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged after application of the best available technology economically achievable by a point source subject to the provisions of this subpart: there shall be no discharge of process waste water pollutants to navigable waters resulting from the manufacture of phosphoric acid, phosphorus pentoxide, phosphorus pentasulfide, phosphorus trichloride or phosphorus oxychloride.

**§ 422.24 Standards of performance for new sources.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged reflecting the greatest degree of effluent reduction achievable through ap-

V38-173
SEP 7 73
XUM

plication of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants by a new point source subject to the provisions of this subpart: there shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.25 Pretreatment standards for new sources.**

The pretreatment standards under section 307(c) of the Act, for a source within the phosphorus consuming subcategory which is an industrial user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.133, 40 CFR shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 422.24, 40 CFR, Part 422; provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

## Subpart C—Phosphate Subcategory

**§ 422.30 Applicability; description of phosphate subcategory.**

The provisions of this subpart are applicable to discharges resulting from the manufacture of sodium tripolyphosphate and calcium phosphates from phosphoric acid.

**§ 422.31 Specialized definitions.**

For the purpose of this subpart: the term "process waste water" shall mean any water which, during the manufacturing process, comes into direct contact with any raw material, intermediate product, by-product or product used in or resulting from the manufacture of phosphorus and ferrophosphorus.

**§ 422.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged after application of the best practicable control technology currently available by a point source subject to the provisions of this Subpart: there shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by application of the best available technology economically achievable.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged after application of the best available technology economically achievable by a point source subject to the provisions of this Subpart: there shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.34 Standards of performance for new sources.**

The following limitations constitute the quantity or quality of pollutants or pollutant properties which may be discharged reflecting the greatest degree of effluent reduction achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants by a new point source subject to the provisions of this Subpart: there shall be no discharge of process waste water pollutants to navigable waters.

**§ 422.35 Pretreatment standards for new sources.**

The pretreatment standards under section 307(c) of the Act, for a source within the phosphate manufacturing category phosphorus consuming subcategory which is an industrial user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purpose of this section, § 128.133, 40 CFR shall be amended to read as follows: "In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 422.34, 40 CFR, Part 422; provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

## DEPARTMENT OF LABOR

### Employment Standards Administration

### MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

### General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following the Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and Federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determinations frequently and in large volume causes these procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

#### MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

#### NEW GENERAL WAGE DETERMINATION DECISIONS

New General Wage Determination Decision No. AQ–3009 for the State of Connecticut; AQ–3008 and AQ–3010 for the State of Massachusetts; and AQ–24 for the State of Nebraska respectively.

#### MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications to General Wage Determination Decisions for the following States (the numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State):

| | |
|---|---|
| Alaska: | |
| AP–902; AP–903 | May 18, 1973 |
| Arizona: | |
| AQ–1004 | July 27, 1973 |
| AQ–1005; AQ–1006 | July 20, 1973 |
| Colorado: | |
| AP–911 | June 22, 1973 |
| Montana: | |
| AP–917 | June 29, 1973 |
| New York: | |
| AP–469 | Feb. 9, 1973 |
| AQ–2001 | July 13, 1973 |

#### SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Supersedeas Decisions to General Wage Determination Decisions for the following States (the numbers of the decisions being superseded and their dates of publication in the FEDERAL REGISTER are listed with each State; Supersedeas Decision numbers are in parentheses following the number of the decision being superseded):

| | |
|---|---|
| Arizona: | |
| AP–260(AQ–1025) | Jan. 19, 1973 |
| Florida: | |
| AP–195(AQ–4007); AP–199 (AQ–4008); AP–1102 (AQ–4009); AP–1103 (AQ–4010) | June 8, 1973 |
| Idaho: | |
| AP–273(AQ–1031); AP–274 (AQ–1028); AP–275 (AQ–1029); AP–276 (AQ–1030) | Mar. 23, 1973 |
| Nebraska: | |
| AP–524(AQ–25) | Apr. 6, 1973 |
| AP–526(AQ–26) | Apr. 20, 1973 |
| Oregon: | |
| AP–277(AQ–1023) | Mar. 23, 1973 |
| AP–284(AQ–1022) | Apr. 6, 1973 |
| Rhode Island: | |
| AP–485(AQ–2008) | Mar. 9, 1973 |
| Washington: | |
| AP–283(AQ–1021) | Apr. 6, 1973 |
| AP–906(AQ–1024) | May 25, 1973 |

Signed at Washington, D.C., this 31st day of August 1973.

WARREN D. LANDIS,
*Assistant Administrator,*
*Wage and Hour Division.*

SUPERSEDEAS DECISION

STATE: Idaho

COUNTIES: Bannock, Bear Lake, Bingham, Bonneville, Caribou, Clark, Franklin, Fremont, Jefferson, Madison, Oneida, Power and Teton.

DECISION NUMBER: AQ-1,030

DATE: Date of Publication

Supersedes Decision No. AP-276 dated March 23, 1973 in 38 FR 7727

DESCRIPTION OF WORK: Building Construction (excluding single family homes and garden type apartments up to and including 4 stories), heavy and highway construction.

SUPERSEDEAS DECISION

STATE: Idaho

COUNTIES: Benewah, Bonner, Boundary, Clearwater, Idaho, Kootenai, Latah, Lewis, Nez Perce and Shoshone

DECISION NUMBER: AQ-1,031

DATE: Date of Publication

Supersedes Decision No. AP-273 dated March 23, 1973, in 38 FR 7707

DESCRIPTION OF WORK: Building Construction (excluding single family homes and garden type apartments up to and including 4 stories), heavy and highway construction.

WELDERS: Receive rate prescribed for craft performing operation to which welding is incidental.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:
a. Employer contributes 2% of basic hourly rate for 5 years' service and 2% of basic hourly rate for 6 months to 5 years' service as Vacation Pay Credit.
b. Six Paid Holidays: A through F.
c. Two weeks vacation with pay after 1 year of employment. Also seven paid Holidays.
d. 4% of gross wages paid by the employer to the credit of the employee with less than one year's service. 6% of all gross wages to be placed to the credit of the employee with more than one year of service.
e. All employees who have completed 1400 compensable hours of employment with one employer in a year of employment shall receive one week's vacation with full pay; pro-rata vacation shall accrue in accordance with the ratio of hours worked in one year of employment divided by 1800 hours multiplied by the one week's full pay.
f. Employer contribution of 14 cents per hour for paid holidays.
g. Employer contribution of 14½ cents per hour for paid holidays.

## INDEX TO GENERAL WAGE DETERMINATION DECISIONS AND MODIFICATIONS AS OF AUGUST 3, 1973

There is set forth below an index to general wage determination decisions and modifications as published in the FEDERAL REGISTER pursuant to the Davis-Bacon and related Acts. The index lists general wage determination decisions and modifications by State and county. An updated index is published on the first Friday of each month.

The index is published for the convenience of the public and the Department of Labor will endeavor to keep it accurate and up to date. In the event the data in the index and published general decisions do not coincide, the published general decisions shall control.

Abbreviations:
(B)—Building Construction.
(D)—Dredging Construction.
(F)—Flood Control Construction.
(H)—Heavy Construction.
(Hw)—Highway Construction.
(R)—Residential Construction.
Mod.—Modification.

Signed at Washington, D.C., this 31st day of August 1973.

WARREN D. LANDIS,
*Assistant Administrator,*
*Wage and Hour Division.*

# REMINDERS

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

### Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER after October 1, 1972.

page no. and date

VA—Requirement of flood insurance coverage on properties with VA loan in special flood hazard areas 20832; 8-3-73

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

**NEW ANIMAL DRUGS**—FDA approves use of prednisolone tertiary butylacetate for treatment of horses, dogs and cats, and revises indications for use of tetracycline in calves (2 documents); effective 9–10–73 ..... 24643, 24644

# List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

# Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## Title 7—Agriculture

### SUBTITLE A—OFFICE OF THE SECRETARY

### PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

This document delegates authority to the Assistant Secretaries and the Director of Agricultural Economics to establish and reestablish regional, state, and local advisory committees.

Part 2 of Subtitle A of Title 7 of the Code of Federal Regulations is amended as follows:

**§ 2.17 Delegations of authority to the Assistant Secretary for Marketing and Consumer Services.**

• • • • • •

(f) *Related to committee management.*—Establish and reestablish regional, state, and local advisory committees for activities under his authority. This authority may not be redelegated.

**§ 2.19 Delegations of authority to the Assistant Secretary for Conservation, Research, and Education.**

• • • • • •

(h) *Related to committee management.*—Establish and reestablish regional, state, and local advisory committees for activities under his authority. This authority may not be redelegated.

**§ 2.21 Delegations of authority to the Assistant Secretary for International Affairs and Commodity Programs.**

• • • • • •

(e) *Related to committee management.*—Establish and reestablish regional, state, and local advisory committees for activities under his authority. This authority may not be redelegated.

**§ 2.23 Delegations of authority to the Assistant Secretary for Rural Development.**

• • • • • •

(d) *Related to committee management.*—Establish and reestablish regional, state, and local advisory committees for activities under his authority. This authority may not be redelegated.

**§ 2.25 Delegations of authority to the Assistant Secretary for Administration.**

• • • • • •

(g) *Related to committee management.*—(1) • • •

(2) Establish and reestablish regional, state, and local advisory committees for activities under his authority. This authority may not be redelegated.

**§ 2.27 Delegations of authority to the Director of Agricultural Economics.**

• • • • • •

(e) *Related to committee management.*—Establish and reestablish regional, state, and local advisory committees for activities under his authority. This authority may not be redelegated.

Dated September 5, 1973.

EARL L. BUTZ,
*Secretary of Agriculture.*

## CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

### SUBCHAPTER B—GENERAL REGULATIONS AND POLICIES—FOOD DISTRIBUTION

[Amdt. 17]

### PART 250—DONATION OF FOODS FOR USE IN UNITED STATES, ITS TERRITORIES AND POSSESSIONS AND AREAS UNDER ITS JURISDICTION

### Availability of Donated Foods for Nutrition Programs for the Elderly

The regulations for the operation of the Food Distribution Program (31 FR 14297), as amended, are further amended to implement the provision of Public Law 93-29 (87 Stat. 56), approved May 3, 1973, which authorizes the Secretary of Agriculture to donate foods for use in nutrition programs for the elderly established under title VII of the Older Americans Act of 1965, as amended (42 U.S.C. 3045f).

P.L. 93-29 became effective on May 3, 1973, and it is desirable to effectuate its provisions as soon as possible. Therefore, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this amendment.

1. The authority citation for Part 250 is amended by adding at the end "42 U.S.C. 3045 f."

2. In § 250.1 paragraph (a) is revised to read as follows, and paragraph (b) is revised by adding a new subparagraph (15) as follows:

**§ 250.1 General purpose and scope.**

(a) *Terms and conditions.*—This part contains the regulations prescribing the terms and conditions under which foods may be obtained by Federal, State, and private agencies for use in any State (1) in schools operating nonprofit food service programs, (2) in nonprofit summer camps and service institutions for children, (3) in charitable institutions, (4) in State correctional institutions for minors, (5) in nutrition programs for the elderly, and (6) otherwise in the assistance of needy persons.

(b) *Legislation.* • • •

• • • • • •

(15) Section 707 of the Older Americans Act of 1965, as amended, which reads as follows:

(a) Agricultural commodities and products purchased by the Secretary of Agriculture under section 32 of the Act of August 24, 1935, (7 U.S.C. 612c) may be donated to a recipient of a grant or contract to be used for providing nutritional services in accordance with the provisions of this title.

(b) The Commodity Credit Corporation may dispose of food commodities under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) by donating them to a recipient of a grant or contract to be used for providing nutritional services in accordance with the provisions of this title.

(c) Dairy products purchased by the Secretary of Agriculture under section 709 of the Food and Agriculture Act of 1965 (7 U.S.C. 1446a-1) may be used to meet the requirements of programs providing nutritional services in accordance with the provisions of this title.

3. In § 250.3 paragraph (j) is revised to read as follows and a new paragraph (t) is added as follows:

**§ 250.3 Definitions.**

• • • • • •

(j) "Recipient agencies" means schools, summer camps for children, institutions, welfare agencies, nutrition programs for the elderly, or disaster organizations receiving foods for their own use or for distribution to eligible recipients.

• • • • • •

(t) "Nutrition program for the elderly" means a project conducted by a recipient of a grant or contract under title VII of the Older Americans Act, as amended, to assist in meeting the nutritional and social needs of persons aged sixty or older.

4. Section 250.8 is amended by adding a new paragraph (h) as follows:

**§ 250.8 Eligible recipient agencies.**

• • • • • •

(h) *Nutrition programs for the elderly.*—Nutrition programs for the elderly are eligible to receive foods under section 416, section 32, and section 709. If a nutrition program for the elderly employs a food service company to conduct its feeding operation, the provisions

V 38-174 SEP 10 73 XUM

of paragraph (b) (3) of this section shall be applicable.

This amendment shall become effective September 10, 1973.

Dated September 5, 1973.

CLAYTON YEUTTER,
*Assistant Secretary.*

[FR Doc.73-19133 Filed 9-7-73;8:45 am]

## CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

### SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1973-Crop Peanut Farm-Stored Loan and Purchase Supp., Amendment 1]

### PART 1421—GRAIN AND SIMILARLY HANDLED COMMODITIES

### Subpart—1973-Crop Farm-Stored Peanut Loan and Purchase Program

The regulations issued by the Commodity Credit Corporation, and published in 38 FR 22372, which set forth specific requirements with respect to farm-stored loan and purchase program for the 1973 crop of peanuts are hereby amended to increase the support values for farmers' stock peanuts. It is impracticable to follow the notice of proposed rulemaking procedure with respect to this amendment, because 1973-crop peanuts are being harvested and it is essential that the rates provided in this subpart be put into effect with respect to such peanuts on the earliest possible date.

Section 1421.294(a) is amended as follows:

§ 1421.294 Loan and purchase rates.

* * * * *

(a) *Loan rate.*—Subject to the discounts specified in paragraph (b) of this section, the loan rates for farmers' stock peanuts placed under farm-stored loan shall be the following rates by types per ton:

| Type: | Dollars per ton |
|---|---|
| Virginia | $335 |
| Runner | 332 |
| Southeast Spanish | 323 |
| Southwest Spanish | 319 |
| Valencia, in the Southwest area suitable for cleaning or roasting[1] | 335 |

[1] The price for all Valencia type peanuts in the Southeast and Virginia—Carolina areas and those in the Southwest area which are not suitable for cleaning and roasting will be the same as for Spanish type peanuts in the same area.

* * * * *

AUTHORITY.—62 Stat. 1070, as amended, 15 U.S.C. 714 (b) and (c); 63 Stat. 1051, as amended, 7 U.S.C. 1441, 1421, 1423, 1425

Effective date.—September 10, 1973.

Signed at Washington, D.C., on September 4, 1973.

KENNETH E. FRICK,
*Executive Vice President,*
*Commodity Credit Corporation.*

## Title 16—Commercial Practices

### CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2428]

### PART 13—PROHIBITED TRADE PRACTICES

### Greater Kansas City Gas Furnace & Air Conditioning Co., Inc. and Dennis G. Svejda

Subpart—Advertising falsely or misleadingly: § 13.73 *Formal regulatory and statutory requirements;* 13.73–92 Truth in Lending Act; § 13.155 *Prices;* 13.155–95 Terms and conditions; 13.155–95(a) Truth in Lending Act; Subpart—Misrepresenting oneself and goods—Goods: § 13.1623 *Formal regulatory and statutory requirements;* 13.1623–95 Truth in Lending Act; —Prices; § 13.1823 *Terms and conditions;* 13.1823–20 Truth in Lending Act; Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1852 *Formal regulatory and statutory requirements;* 13.1852–75 Truth in Lending Act; § 13.1892 *Sales contract, right-to-cancel provision;* § 13.1905 *Terms and conditions;* 13.1905–60 Truth in Lending Act;

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interpret or apply sec. 5, 38 Stat. 719, as amended, 82 Stat. 146, 147 (15 U.S.C. 45, 1601–1605)) [Cease and desist order, Greater Kansas City Gas Furnace & Air Conditioning Company, Inc., et al., Kansas City, Missouri, Docket C-2428, August 2, 1973.]

*In the matter of Greater Kansas City Gas Furnace & Air Conditioning Company, Inc., a corporation, and Dennis G. Svejda, individually and as an officer of said corporation.*

Consent order requiring a Kansas City, Missouri, retailer of furnaces, heating equipment, air conditioners, and parts therefor, among other things to cease violating the Truth in Lending Act by failing to disclose to customers, in connection with the extension of consumer credit, such information as required by Regulation Z of the said Act.

Respondents are further required to cease transferring any documents of indebtedness without providing that the rights or defenses of the consumer may be asserted against any subsequent holder of the documents and to include a statement to that effect on the face of any note or other instrument evidencing indebtedness. Further, the firm must recontact and offer the right of recission to all eligible consumers who purchased on or after July 1, 1969.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

I. *It is ordered,* That respondent Greater Kansas City Gas Furnace and Air Conditioning Company, Inc., a corporation, and its officers, and Dennis G. Svejda, individually and as an officer of said corporation, trading under said corporate name or under any trade name or names, their successors and assigns, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with any extension of consumer credit or any advertisement to aid, promote or assist directly or indirectly any extension of consumer credit, as "consumer credit" and "advertisement" are defined in Regulation Z (12 CFR 226) of the Truth in Lending Act (P.L. 90–321, 15 U.S.C. 1601 et seq.), do forthwith cease and desist from:

1. Failing to identify on the disclosure statement required by § 226.8(a) of Regulation Z the transaction to which the statement relates, as required by § 226.8 (a) (2) of Regulation Z.

2. Failing to disclose the date on which the finance charge begins to accrue when different from the date of the transaction, as required by § 226.8(b) (1) of Regulation Z.

3. Failing to disclose the sum of all payments required, and to describe that sum as the "total of payments", as required by § 226.8(b) (3) of Regulation Z.

4. Failing to describe the type of any security interest held or to be retained or acquired by the creditor in the connection with the transaction, as required by § 226.8(b) (5) of Regulation Z.

5. Failing to use the term "cash price", as defined in section 226.2(i) of Regulation Z, to describe the purchase price of the transaction, as required by § 226.8 (c) (1) of Regulation Z.

6. Failing to use the term "cash downpayment" to describe the downpayment in money made in connection with the transaction, as required by § 226.8(c) (2) of Regulation Z.

7. Failing to use the term "total downpayment" to describe the sum of the cash downpayment and trade-in, as required by § 226.8(c) (2) of Regulation Z.

8. Failing to use the term "unpaid balance of cash price" to describe the difference between the cash price and the total downpayment, as required by § 226.8(c) (3) of Regulation Z.

9. Failing to disclose all other charges, individually itemized, which are included in the amount financed but which are not part of the finance charge, as required by § 226.8(c) (4) of Regulation Z.

10. Failing to disclose the sum of the unpaid balance of cash price and all other charges and describe that sum as the "unpaid balance", as required by § 226.8(c) (5) of Regulation Z.

11. Failing to use the term "amount financed" to describe the amount of credit extended as required by § 226.8(c) (7) of Regulation Z.

12. Failing to disclose the sum of the cash price, all charges which are included in the amount financed but which are not a part of the finance charge, and the finance charge, and describe that sum as the "deferred payment price", as required by § 226.8(c) (8) (ii) of Regulation Z.

13. Failing to disclose the annual percentage rate, computed in accordance with § 226.5 of Regulation Z, as required by § 226.8(b) (2) of Regulation Z.

14. Failing to furnish the customer a statement containing the disclosures required by § 226.8 of Regulation Z, in the manner and form as prescribed by § 226.8 (a) of Regulation Z.

15. Failing, in any transaction in which a security interest or the future right to a security interest is retained or acquired in real property which is used or expected to be used as the principal residence of the customer, to comply with all requirements regarding the right of rescission set forth in § 226.9 of Regulation Z.

16. Making any physical changes in a customer's property or performing any work or services on such property before expiration of the three-day rescission period provided for in § 226.9(a) of Regulation Z, in any transaction in which a security interest or the future right to a security interest is retained or acquired in real property which is used or is expected to be used as the principal residence of the customer, as provided in § 226.9(c) of Regulation Z.

17. Supplying, orally or in writing, any information to a customer so as to mislead or confuse the customer, or contradict, obscure, or detract attention from the information required by Regulation Z, in violation of § 226.6(c) of Regulation Z.

18. Failing, in any consumer credit transaction or advertisement, to make all disclosures, determined in accordance with §§ 226.4 and 226.5 of Regulation Z, in the manner, form, and amount required by §§ 226.6, 226.7, 226.8, 226.9, and 226.10 of Regulation Z.

II. *It is ordered,* That respondent Greater Kansas City Gas Furnace & Air Conditioning Company, Inc., a corporation, and its officers, and Dennis G. Svejda, Individually and as an officer of said corporation, trading under said corporate name or under any trade name or names, their successors and assigns, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the transfer of any indebtedness in commerce, as "commerce" is defined in the Federal Trade Commission Act, forthwith cease and desist from:

1. Assigning, selling, or otherwise transferring respondents' notes, contracts, or other documents evidencing a purchaser's indebtedness, unless any rights or defenses which the purchaser has and may assert against respondents are preserved and may be asserted against any assignee or subsequent holder of such note, contract, or other such documents evidencing the indebtedness.

2. Failing to include the following statement clearly and conspicuously on the face of any note, contract, or other instrument of indebtedness executed by or on behalf of respondents' customers:

NOTICE

Any holder takes this instrument subject to the terms and conditions of the contract which gave rise to the debt evidenced hereby, any contractual provision or other agreement to the contrary notwithstanding.

*It is further ordered,* That respondents shall, within thirty (30) days after service upon them of this order, deliver notice of the right of rescission, in the number, manner, and form set forth in §§ 226.9 (b) and (f) of Regulation Z, to each customer in each transaction entered into by respondents on or after July 1, 1969, in which a security interest or the future right to a security interest was retained or acquired in any real property which, at the time of the transaction, was used or was expected to be used as the principal residence of the customer, and that respondents shall perform all obligations set forth in § 226.9(d) of Regulation Z in any such transaction if the customer exercises the right of rescission within the time and in the manner prescribed in § 226.9(a) of Regulation Z.

*It is further ordered,* That respondents shall maintain adequate records, to be furnished upon the request of the Federal Trade Commission, which disclose compliance with the paragraph above.

*It is further ordered,* That respondents shall forthwith deliver a copy of this order to cease and desist to all present and future salesmen and/or other persons engaged in the sale of respondents' products and/or services, and to all present and future personnel of respondents, engaged in the consummation of any extension of consumer credit or in any aspect of preparation, creation, or placing of advertising of that consumer credit, and shall secure from each such salesman and/or other person a signed statement acknowledging receipt of said order.

*It is further ordered,* That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondents' current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

*It is further ordered,* That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

*It is further ordered,* That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with this order.

By the Commission.

Issued August 2, 1973.

[SEAL] CHARLES A. TOBIN,
*Secretary.*

### PART 211—INTERPRETATIVE RELEASES RELATING TO ACCOUNTING MATTERS (ACCOUNTING SERIES RELEASES)

### PART 231—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

### PART 241—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

### PART 251—INTERPRETATIVE RELEASES RELATING TO THE PUBLIC UTILITY HOLDING COMPANY ACT OF 1935 AND GENERAL RULES AND REGULATIONS THEREUNDER

### PART 271—INTERPRETATIVE RELEASES RELATING TO THE INVESTMENT COMPANY ACT OF 1940 AND GENERAL RULES AND REGULATIONS THEREUNDER

### Effect of Treasury Stock Transactions on Accounting for Business Combinations

In August 1970 the Accounting Principles Board (APB) of the American Institute of Certified Public Accountants (AICPA) issued Opinion No. 16, "Business Combinations," which identifies certain conditions which must be present (or in some cases absent) if a business combination is to be accounted for as a pooling of interests. Two of these conditions, which are set forth in paragraphs 47–c and 47–d, include provisions related to the reacquisition of voting common stock within two years prior to initiation and between initiation and consummation of a business combination which is planned to be accounted for by the pooling-of-interests method. The Commission has observed that these provisions have been subject to varying interpretations in practice, and has concluded that certain of these interpretations are not compatible with concepts underlying the Opinion. Accordingly, this release sets forth the Commission's conclusions as to certain problems relating to the effect of treasury stock transactions on accounting for business combinations.

When cash or other assets are used or liabilities are incurred to effect a business combination, APB Opinion No. 16 concludes that the combination should be accounted for as a purchase. This concept might be circumvented if cash or other assets were used or liabilities were incurred to reacquire common shares and common shares were then exchanged to consummate the combination. Therefore, for the pooling-of-interests method to apply, paragraph 47–c of the Opinion requires that "none of the combining companies changes the equity interest of the voting common stock in contemplation of effecting the combination either

V 38 I 174 SEP 10 73 XUM

within two years before the plan of combinations is initiated or between the dates the combination is initiated and consummated; • • •." Further, paragraph 47–d stipulates that "each of the combining companies [may reacquire] shares of voting common stock only for purposes other than business combinations • • •."

In some cases it is difficult to determine the purposes of treasury stock acquisitions. An AICPA Accounting Interpretation of Opinion No. 16 (No. 20 issued September 1971) states: "In the absence of persuasive evidence to the contrary, however, it should be presumed that all acquisitions of treasury stock during the two years preceding the date a plan of combination is initiated (or from October 31, 1970, to the date of initiation if that period is less than two years) and between initiation and consummation were made in contemplation of effecting business combinations to be accounted for as a pooling of interests. Thus, lacking such evidence, this combination would be accounted for by the purchase method regardless of whether treasury stock or unissued shares or both are issued in the combination." The Commission believes that this presumption and conclusion should be followed.

In determining the purposes of treasury stock acquisitions, it is ordinarily appropriate to focus on the intended subsequent distribution of common shares rather than on the business reasons for acquiring treasury shares. For example, shares may be reacquired because management believes the company is overcapitalized or considers that "the price is right," but such reasons do not overcome the presumption that they were acquired in contemplation of effecting business combinations to be accounted for as poolings of interests. On the other hand, the presumption may be overcome when shares are acquired for a specific use unrelated to business combinations such as stock option or purchase plans or stock dividends, are associated with a combination accounted for as a purchase, or are acquired to resolve an existing contingent share agreement. However, the mere assertion that common shares are reacquired for such purposes, even where the assertion is formalized by action of the board of directors reserving the treasury shares, does not provide persuasive evidence that they were not reacquired in contemplation of pooling-of-interests combinations. If a resolution of the board of directors or other statement of intent were sufficient to provide persuasive contrary evidence, the restrictions on treasury stock acquisitions would be totally ineffective. Accordingly, while a board resolution made prior to acquisition of treasury shares may be useful evidence as to corporate intent, reference also must be made to the actual or probable issuance of shares for purposes unrelated to pooling-of-interests business combinations.

When treasury shares are acquired during a period beginning two years prior to initiation and ending at the date of consummation of a business combination to be accounted for as a pooling of interests (hereinafter referred to as the "restricted period") the issuance of an equivalent number of shares prior to the date of consummation would generally provide persuasive evidence that the treasury shares were not acquired in contemplation of the combination. The shares issued may be treasury shares or previously unissued shares since, with regard to the equity interests of the common shareholders, there is no substantive difference between the two. Thus, a company might "cure" a condition which would preclude pooling-of-interests accounting by selling common shares prior to consummation of the combination. The "cure" could not be effected by merely retiring treasury shares.

Paragraph 47-d of APB Opinion No. 16 includes the statement that "treasury stock acquired for purposes other than business combinations includes shares for stock option and compensation plans and other recurring distributions provided a systematic pattern of reacquisitions is established at least two years before the plan of combination is initiated." Further, "a systematic pattern of reacquisitions may be established for less than two years if it coincides with the adoption of a new stock option or compensation plan." In AICPA Accounting Interpretation No. 20 of Opinion No. 16, no reference is made to a systematic pattern of reacquisition, and some accountants have asserted that this test has been effectively superseded. The Commission does not accept this assertion. Accordingly, the Commission concludes that treasury shares acquired in the restricted period for recurring distributions should be considered "tainted" unless they are acquired in a systematic pattern of reacquisitions established at least two years before the plan of combination is initiated (or coincidentally with the adoption of a new stock option or compensation plan) and there is reasonable expectation that shares will be issued for such purposes.

A systematic pattern of reacquisitions might be demonstrated by the reacquisition of a specified number of shares in successive time periods, e.g., 1,000 shares per month. A systematic pattern might also be demonstrated where, pursuant to a formal reacquisition plan, shares are acquired based on specified criteria such as the market price of the stock and cash availability. The criteria of the reacquisition plan must be sufficiently explicit so that the pattern of reacquisitions may be objectively compared to the plan. Unanticipated interruptions caused by legal constraints on a company's ability to reacquire shares would not upset an otherwise systematic pattern of reacquisitions.

The determination of whether there is reasonable expectation that shares will be issued for the stated purposes of acquiring the shares is a matter of judgment. Generally, there would appear to be such reasonable expectation where the following circumstances exist at the time a reacquisition plan is adopted or shares are reacquired:

1. As to stock option plans, warrants or convertible securities, the quoted price of the common shares is not less than 75 percent of the exercise or conversion price.

2. As to stock purchase or bonus plans or stock dividends, either (a) shares are reacquired to fulfill existing commitments or dividends declared or (b) based on a pattern of issuing shares for such purposes in the prior two years, the shares are reacquired to fulfill anticipated requirements in the succeeding year.

A systematic pattern of reacquisitions test would not apply to treasury shares acquired for issuance in a specific "purchase" business combination or to resolve an existing contingent share agreement from a prior business combination, as these issuances would not be regarded as recurring distributions. Thus, shares acquired and reserved for these purposes at the date a pooling-of-interests business combination is consummated would not be regarded as "tainted" when, based on current negotiations, presently existing earnings levels or market price of shares, etc., there is reasonable expectation that shares will be issued for the stated purposes.

APB Opinion No. 16 does not discuss treasury share acquisitions subsequent to consummation of a business combination. In specific fact situations, subsequent reacquisitions may be so closely related to the prior combination that they should be considered part of the combination plan. Thus, significant reacquisitions closely following a combination which otherwise qualifies as a pooling of interests may invalidate the applicability of that method. Conversely, significant reacquisitions following a combination accounted for as a purchase might be associated with that purchase and would not adversely affect subsequent pooling combinations.

Because of the varying interpretations which have existed in practice, and the confusion which restated financial statements may cause to investors, the Commission has concluded that the accounting for business combinations which were completed prior to the issuance of this release should not be revised. The interpretation set forth herein should be applied to all subsequent business combinations even though shares issued in these combinations may have been reacquired prior to the date of this release.

By the Commission.

[SEAL] SHIRLEY E. HOLLIS,
*Acting Secretary.*

## Title 24—Housing and Urban Development

## CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT-FEDERAL HOUSING COMMISSIONER [FEDERAL HOUSING ADMINISTRATION]

[Docket No. R–73–234]

## MORTGAGE INSURANCE AND HOME IMPROVEMENT LOANS

### Changes in Interest Rates

The following amendments are being made to this chapter to change the maximum interest rate which may be charged on a mortgage insured by this Department from 7¾ percent to 8½ percent. The Secretary has determined that such change is necessary to meet the mortgage market, in accordance with his authority contained in 12 U.S.C. 1709–1, as amended. The Secretary has, therefore, determined that advance notice and public procedure are unnecessary and that said cause exists for making this amendment effective August 25, 1973.

Accordingly, Chapter II is amended as follows:

### PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

#### Subpart A—Eligibility Requirements

1. In § 203.20 paragraph (a) is amended to read as follows:

**§ 203.20 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply Sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709.)

2. In § 203.74 paragraph (a) is amended to read as follows:

**§ 203.74 Maximum interest rate.**

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans insured on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply Sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709.)

### PART 205—MORTGAGE INSURANCE FOR LAND DEVELOPMENT

#### Subpart A—Eligibility Requirements

Section 205.50 is amended to read as follows:

**§ 205.50 Maximum interest rate.**

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

(Sec. 1011, formerly Sec. 1010, 79 Stat. 464, 12 U.S.C. 1749jj; renumbered P.L. 89–754, Sec. 401(a), 80 Stat. 1271.)

### PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

#### Subpart A—Eligibility Requirements

In § 207.7 paragraph (a) is amended to read as follows:

**§ 207.7 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 207, 52 Stat. 16, as amended; 12 U.S.C. 1713.)

### PART 213—COOPERATIVE HOUSING MORTGAGE INSURANCE

#### Subpart A—Eligibility Requirements—Projects

1. In § 213.10 paragraph (a) is amended to read as follows:

**§ 213.10 Maximum interest rate.**

(a) The mortgage or a supplementary loan shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, or the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to mortgages or supplementary loans receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

• • • • • •

#### Subpart C—Eligibility Requirements—Individual Properties Released From Project Mortgage

2. In § 213.511 paragraph (a) is amended to read as follows:

**§ 213.511 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply Sec. 213, 64 Stat. 54, as amended; 12 U.S.C. 1715e.)

### PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

#### Subpart C—Eligibility Requirements—Projects

In § 220.576 paragraph (a) is amended to read as follows:

**§ 220.576 Maximum interest rate.**

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply Sec. 220, 68 Stat. 596, as amended; 12 U.S.C. 1715k.)

### PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

#### Subpart C—Eligibility Requirements—Moderate Income Projects

In § 221.518 paragraph (a) is amended to read as follows:

**§ 221.518 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973. Interest shall be payable in monthly installments on the principal amount of the mortgage outstanding on the due date of each installment.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 221, 68 Stat. 599, as amended; 12 U.S.C. 1715l.)

### PART 232—NURSING HOMES AND INTERMEDIATE CARE FACILITIES MORTGAGE INSURANCE

#### Subpart A—Eligibility Requirements

In § 232.29 paragraph (a) is amended to read as follows:

**§ 232.29 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 232, 73 Stat. 663; 12 U.S.C. 1715w.)

### PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

#### Subpart A—Eligibility Requirements—Individually Owned Units

In § 234.29 paragraph (a) is amended to read as follows:

**§ 234.29 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after August 25, 1973.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 234, 75 Stat. 160; 12 U.S.C. 1715y.)

V38-174 SEP 10 73 XUM

## PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION

### Subpart D—Eligibility Requirements—Rehabilitation Sales Projects

Section 235.540 is amended to read as follows:

**§ 235.540 Maximum interest rate.**

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages insured on or after August 25, 1973.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 235, 82 Stat. 477; 12 U.S.C. 1715z.)

## PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS FOR RENTAL PROJECTS

### Subpart A—Eligibility Requirements for Mortgage Insurance

Section 236.15 is amended to read as follows:

**§ 236.15 Maximum interest rate.**

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 236, 52 Stat. 498; 12 U.S.C. 1715z-1.)

## PART 241—SUPPLEMENTARY FINANCING FOR INSURED PROJECT MORTGAGES

### Subpart A—Eligibility Requirements

Section 241.75 is amended to read as follows:

**§ 241.75 Maximum interest rate.**

The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 8½ percent per annum with respect to loans insured on or after August 25, 1973. Interest shall be payable in monthly installments on the principal then outstanding.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 241, 82 Stat. 508; 12 U.S.C. 1715z-b.)

## PART 242—MORTGAGE INSURANCE FOR HOSPITALS

### Subpart A—Eligibility Requirements

Section 242.33 is amended to read as follows:

**§ 242.33 Maximum interest rate.**

The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973. Interest shall be payable in monthly installments on the principal then outstanding.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies Sec. 242, 82 Stat. 5999; 12 U.S.C. 1715z-7.)

## PART 244—MORTGAGE INSURANCE FOR GROUP PRACTICE FACILITIES

### Subpart A—Eligibility Requirements

In § 244.45 paragraph (a) is amended to read as follows:

**§ 244.45 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 8½ percent per annum with respect to mortgages receiving initial endorsement (or endorsement in cases involving insurance upon completion) on or after August 25, 1973.

* * * * *

(Sec. 1104, 80 Stat. 1275; 12 U.S.C. 1749aaa–3)

*Effective date.*—These amendments are effective as of August 25, 1973.

SHELDON B. LUBAR,
*Assistant Secretary-Commissioner for Housing Production and Mortgage Credit.*

[FR Doc.73–19183 Filed 9–7–73;8:45 am]

## Title 25—Indians

## CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

### SUBCHAPTER M—FORESTRY

## PART 141—GENERAL FOREST REGULATIONS

### Sales of Timber

The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

Beginning on page 9828 of the FEDERAL REGISTER of April 20, 1973 (38 FR 9828), there was published a notice of proposed rulemaking to revise §§ 141.7, 141.9, 141.12, 141.16, and 141.19 of Title 25 of the Code of Federal Regulations. The purpose of the revision is to increase the stumpage value limitation stated in §§ 141.7(c), 141.12, and 141.19(d) from $500 to $2,500; to increase the stumpage value limitation stated in § 141.9(b) from $5,000 to $10,000; to increase advance payments for allotment timber stated in § 141.16 from 15 to 25 percent of the stumpage value, calculated at the bid price, within 30 days of contract approval and before cutting begins, in contracts that are more than 3 years duration permissive, rather than mandatory as now stipulated by regulation; and to make editorial changes. The regulations were proposed pursuant to the authority contained in secs. 7, 8, 36 Stat. 857, 25 U.S.C. 406, 407; and sec. 6, 48 Stat. 986, 25 U.S.C. 466; 47 Stat. 1417, 25 U.S.C. 413.

Interested persons were given 30 days in which to submit written comments, suggestions or objections with respect to the proposed regulations. No objections have been received and the proposed regulations are hereby adopted without change and are set forth below.

The revised 25 CFR §§ 141.7, 141.9, 141.12, 141.16, and 141.19 shall become effective on October 10, 1973.

WILLIAM L. ROGERS,
*Deputy Assistant Secretary of the Interior.*

AUGUST 31, 1973.

**§ 141.7 Timber sales from unallotted and allotted lands.**

(a) On reservations where the volume of timber available for cutting is in excess of that which is being developed by the Indians, open market sales of Indian timber will be authorized: *Provided*, That consent is given by the authorized representative of the tribe for tribal timber and by the owners of a majority Indian interest in trust or restricted timber on allotted lands. The consent of the Secretary is required in all cases.

(b) The Secretary may sell the timber on any Indian land held under a trust or other patent containing restrictions on alienations without the consent of the owners when in his judgment such action is necessary to prevent loss of values resulting from fire, insects, disease, windthrow, or other catastrophes.

(c) Unless otherwise authorized by the Secretary, sales from unallotted lands, allotted lands, or a combination of these two ownerships having a stumpage value exceeding $2,500 will not be approved until an examination of the timber to be sold has been made by a qualified forest officer and a report setting forth all pertinent information has been submitted to the officer authorized to approve the contract as provided in § 141.13. In all such sales of timber exceeding $2,500 in value, the timber shall be appraised and sold at not less than its appraised value.

**§ 141.9 Timber sales without advertisement.**

Sales of timber may be made without advertisement with the consent of the authorized representative of the tribe for tribal timber or with the consent of the owners of a majority Indian interest in trust or restricted timber on allotted lands, and the approval of the Secretary: (a) To Indians or non-Indians when the timber is to be cut in conjunction with the granting of a right-of-way or authorized occupancy, or must be cut to protect the forest from injury, or if it is impractical to secure competition by formal advertising procedures, or when otherwise specifically authorized by statutes or regulations; or (b) To Indians who are members of the tribe for stumpage value not exceeding $10,000. Such contracts shall not be made for a longer term than 2 years. The stumpage rates in connection with such sales shall be established by the approving officer after due appraisal procedure. Timber contract forms executed under authority hereof shall be those stipulated for the sale of timber under § 141.12, and shall carry the bond requirement stipulated in § 141.14. No more than one such sale without advertisement may be made to any person or operating group of persons in any 1 calendar year. In the case of each negotiated transaction the approving officer shall establish a documented record of the transaction, including a written determination and finding that the transaction is of a type or class allowing the negotiation procedures or warranting departure from the procedures provided in § 141.8; the extent of solicitation and competition, or a statement of the facts upon which a finding of impracticability of securing competition is based; and a statement of the factors on which the award is based, including a determination as to the reasonability of the price accepted.

**§ 141.12 Contracts required.**

Except as provided in § 141.19(c), in sales of timber with an appraised stumpage value exceeding $2,500 the contract forms approved by the Secretary must be used unless a special form for a particular sale or class of sales is approved by the Secretary. The approved forms provide flexibility to meet variable conditions, but essential departures from the fundamental requirements of such contracts shall be made only with the approval of the Secretary. Unless otherwise directed, the contracts shall require that the proceeds be paid by remittance drawn to the Bureau of Indian Affairs and transmitted to the Superintendent. Contracts may be extended, modified, or assigned subject to approval of the approving officer, and may be terminated by the approving officer upon completion.

**§ 141.16 Advance payment for allotment timber.**

Unless otherwise authorized by the Secretary, and except in the case of lump sum sales, contracts for the sale of timber from trust allotments shall provide for the payment of 25 percent of the stumpage value, calculated at the bid price, within 30 days from the date of approval and before cutting begins. Additional advance payments may be specified in contracts that are more than 3 years in duration; however, no advance payment will be required that would make the sum of such payment and of advance deposits and advance payments previously applied against timber cut from the allotment exceed 50 percent of the bid stumpage value. The advance payments shall be credited against the allotment timber as it is cut and scaled, at the stumpage rates governing at the time of scaling.

**§ 141.19 Timber cutting permits.**

(a) Except as provided in § 141.20, all timber cutting that is not done under formal contract, pursuant to § 141.12, shall be done under timber cutting permit forms approved by the Secretary. Permits will be issued only with the consent of the Indian owner or the Secretary, for allotted lands, as authorized in § 141.13(b). Such consents to the issuance of cutting permits shall stipulate the minimum stumpage rates at which timber may be sold under permit.

(b) Free-use cutting permits may be issued for specified species and types of forest products by persons authorized under § 141.13 to execute timber contracts. Timber cut under this authority may be limited as to sale or exchange for other goods or services.

(c) An Indian having sole beneficial interest in an allotment may be issued an approved form of special permit to cut and sell designated timber from such allotment. The special permit shall include provision for payment by the Indian of administrative expenses pursuant to § 141.18. Unless waived by the Secretary, the permit shall also require the Indian to make a deposit with the Secretary to be returned to the Indian upon satisfactory completion of the permit or to be used by the Secretary in his discretion for planting or other work to offset damage to the land or the timber caused by the Indian's failure to comply with the provisions of the permit. As a condition to granting a special permit under authority of this paragraph, the Indian may be required to provide evidence acceptable to the Secretary that he has arranged a bona fide sale of the timber to be cut, on terms that will protect the Indian's interests. In special cases, the Secretary may authorize exceptions to the requirement of sole beneficial interest in an allotment.

(d) Permits to be valid must be approved by the Secretary. The stumpage value which may be cut in 1 calendar year by any individual under authority of paragraphs (a) and (b) of this section shall not exceed $2,500, but this limitation shall not apply to cutting under authority in paragraph (c) of this section. Essential departures from the fundamental requirements for issuance of special allotment timber cutting permits under authority of paragraph (c) of this section shall be made only with the approval of the Secretary.

[FR Doc.73–19099 Filed 9–7–73;8:45 am]

## Title 40—Protection of the Environment

## CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

### SUBCHAPTER D—GRANTS

## PART 35—STATE AND LOCAL ASSISTANCE

### Appendix A—Cost-Effectiveness Analysis

On July 3, 1973, notice was published in the FEDERAL REGISTER that the Environmental Protection Agency was proposing guidelines on cost-effectiveness analysis pursuant to section 212(2)(c) of the Federal Water Pollution Act Amendments of 1972 (the Act) to be published as appendix A to 40 CFR part 35.

Written comments on the proposed rulemaking were invited and received from interested parties. The Environmental Protection Agency has carefully considered all comments received. No changes were made in the guidelines as earlier proposed. All written comments are on file with the agency.

*Effective date.*—These regulations shall become effective October 10, 1973.

Dated September 4, 1973.

JOHN QUARLES,
*Acting Administrator.*

APPENDIX A

COST EFFECTIVENESS ANALYSIS GUIDELINES

a. *Purpose.*—These guidelines provide a basic methodology for determining the most cost-effective waste treatment management system or the most cost-effective component part of any waste treatment management system.

b. *Authority.*—The guidelines contained herein are provided pursuant to section 212 (2)(C) of the Federal Water Pollution Control Act Amendments of 1972 (the Act).

c. *Applicability.*—These guidelines apply to the development of plans for and the selection of component parts of a waste treatment management system for which a Federal grant is awarded under 40 CFR, Part 35.

d. *Definitions.*—Definitions of terms used in these guidelines are as follows:

(1) *Waste treatment management system.*—A system used to restore the integrity of the Nation's waters. Waste treatment management system is used synonymously with "treatment works" as defined in 40 CFR, Part 35.905–15.

(2) *Cost-effectiveness analysis.*—An analysis performed to determine which waste treatment management system or component part thereof will result in the minimum total resources costs over time to meet the Federal, State or local requirements.

(3) *Planning period.*—The period over which a waste treatment management system is evaluated for cost-effectiveness. The planning period commences with the initial operation of the system.

(4) *Service life.*—The period of time during which a component of a waste treatment management system will be capable of performing a function.

(5) *Useful life.*—The period of time during which a component of a waste treatment management system will be required to perform a function which is necessary to the system's operation.

e. *Identification, selection and screening of alternatives*—(1) *Identification of alternatives.*—All feasible alternative waste management systems shall be initially identified. These alternatives should include systems discharging to receiving waters, systems using land or subsurface disposal techniques, and systems employing the reuse of wastewater. In identifying alternatives, the possibility of staged development of the system shall be considered.

(2) *Screening of alternatives.*—The identified alternatives shall be systematically screened to define those capable of meeting the applicable Federal, State, and local criteria.

(3) *Selection of alternatives.*—The screened alternatives shall be initially analyzed to determine which systems have cost-effective potential and which should be fully evaluated according to the cost-effectiveness analysis procedures established in these guidelines.

(4) *Extent of effort.*—The extent of effort and the level of sophistication used in the cost-effectiveness analysis should reflect the size and importance of the project.

f. *Cost-Effective analysis procedures*—(1) *Method of Analysis.*—The resources costs shall be evaluated through the use of opportunity costs. For those resources that can be expressed in monetary terms, the interest (discount) rate established in section (f)(5) will be used. Monetary costs shall be calculated in terms of present worth values or equivalent annual values over the planning period as defined in section (f)(2). Non-monetary factors (e.g., social and environmental) shall be accounted for descriptively in the analysis in order to determine their significance and impact.

V 38-174 SEP 10 73 XUM

The most cost-effective alternative shall be the waste treatment management system determined from the analysis to have the lowest present worth and/or equivalent annual value without overriding adverse nonmonetary costs and to realize at least identical minimum benefits in terms of applicable Federal, State, and local standards for effluent quality, water quality, water reuse and/or land and subsurface disposal.

(2) *Planning period.*—The planning period for the cost-effectiveness analysis shall be 20 years.

(3) *Elements of cost.*—The costs to be considered shall include the total values of the resources attributable to the waste treatment management system or to one of its component parts. To determine these values, all monies necessary for capital construction costs and operation and maintenance costs shall be identified.

Capital construction costs used in a cost-effectiveness analysis shall include all contractors' costs of construction including overhead and profit; costs of land, relocation, and right-of-way and easement acquisition; design engineering, field exploration, and engineering services during construction; administrative and legal services including costs of bond sales; startup costs such as operator training; and interest during construction. Contingency allowances consistent with the level of complexity and detail of the cost estimates shall be included.

Annual costs for operation and maintenance (including routine replacement of equipment and equipment parts) shall be included in the cost-effectiveness analysis. These costs shall be adequate to ensure effective and dependable operation during the planning period for the system. Annual costs shall be divided between fixed annual costs and costs which would be dependent on the annual quantity of wastewater collected and treated.

(4) *Prices.*—The various components of cost shall be calculated on the basis of market prices prevailing at the time of the cost-effectiveness analysis. Inflation of wages and prices shall not be considered in the analysis. The implied assumption is that all prices involved will tend to change over time by approximately the same percentage. Thus, the results of the cost effectiveness analysis will not be affected by changes in the general level of prices.

Exceptions to the foregoing can be made if their is justification for expecting significant changes in the relative prices of certain items during the planning period. If such cases are identified, the expected change in these prices should be made to reflect their future relative deviation from the general price level.

(5) *Interest (discount) rate.*—A rate of 7 percent per year will be used for the cost-effectiveness analysis until the promulgation of the Water Resources Council's "Proposed Principles and Standards for Planning Water and Related Land Resources." After promulgation of the above regulation, the rate established for water resource projects shall be used for the cost-effectiveness analysis.

(6) *Interest during construction.*—In cases where capital expenditures can be expected to be fairly uniform during the construction period, interest during construction may be calculated as $I \times \frac{1}{2} P \times C$ where:

I = the interest (discount) rate in Section f(5).
P = the construction period in years.
C = the total capital expenditures.

In cases when expenditures will not be uniform, or when the construction period will be greater than three years, interest during construction shall be calculated on a year-by-year basis.

(7) *Service life.*—The service life of treatment works for a cost-effectiveness analysis shall be as follows:

| | |
|---|---|
| Land | Permanent |
| Structures (includes plant buildings, concrete process tankage, basins, etc.; sewage collection and conveyance pipelines; lift station structures; tunnels; outfalls) | 30–50 years |
| Process equipment (includes major process equipment such as clarifier mechanism, vacuum filters, etc.; steel process tankage and chemical storage facilities; electrical generating facilities on standby service only). | 15–30 years |
| Auxiliary equipment (includes instruments and control facilities; sewage pumps and electric motors; mechanical equipment such as compressors, aeration systems, centrifuges, chlorinators, etc.; electrical generating facilities on regular service). | 10–15 years |

Other service life periods will be acceptable when sufficient justification can be provided.

Where a system or a component is for interim service and the anticipated useful life is less than the service life, the useful life shall be substituted for the service life of the facility in the analysis.

(8) *Salvage value.*—Land for treatment works, including land used as part of the treatment process or for ultimate disposal of residues, shall be assumed to have a salvage value at the end of the planning period equal to its prevailing market value at the time of the analysis. Right-of-way easements shall be considered to have a salvage value not greater than the prevailing market value at the time of the analysis.

Structures will be assumed to have a salvage value if there is a use for such structures at the end of the planning period. In this case, salvage value shall be estimated using straightline depreciation during the service life of the treatment works.

For phased additions of process equipment and auxiliary equipment, salvage value at the end of the planning period may be estimated under the same conditions and on the same basis as described above for structures.

When the anticipated useful life of a facility is less than 20 years (for analysis of interim facilities), salvage value can be claimed for equipment where it can be clearly demonstrated that a specific market or reuse opportunity will exist.

## Title 9—Animals and Animal Products

### CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE (MEAT AND POULTRY PRODUCTS INSPECTION), DEPARTMENT OF AGRICULTURE

### PART 319—DEFINITIONS AND STANDARDS OF IDENTITY OR COMPOSITION

#### Frankfurters and Certain Other Cooked Sausage Products; Correction

The notice published in the FEDERAL REGISTER of August 23, 1973 (38 FR 22621, FR Doc. 73-17902) concerning the postponement of the effective date of amended regulations for frankfurters and certain other cooked sausage products contains an error. In the fourth paragraph, the third line, the date "May 5, 1973" should read "May 5, 1971."

Done at Washington, D.C., on September 4, 1973.

G. H. WISE,
*Acting Administrator, Animal and Plant Health Inspection Service.*

[FR Doc.73-19126 Filed 9-7-73;8:45 am]

## Title 14—Aeronautics and Space

### CHAPTER I—FEDERAL AVIATION ADMINISTRATION

[Docket No. 73-GL-8; Amdt. 39-1715]

### PART 39—AIRWORTHINESS DIRECTIVES

#### Allison Model 250-C20 Engines

There have been failures of Part Number 6875621 fuel tube assemblies in Detroit Diesel Allison Model 250-C20 engines, which caused complete engine stoppage and the release of fuel into the engine compartment. The manufacturer has determined that similar failures could occur. Consequently, it has issued Allison Commercial Engine Bulletin No. 250-C20 CEB-1040 to provide additional supports for the fuel tube to prevent failure. Since the condition described herein may exist or develop in other engines of this same type design, an Airworthiness Directive is being issued requiring installation of the added fuel tube supports specified in Allison Commercial Engine Bulletin No. 250-C20 CEB-1040.

Since immediate action is required in the interest of safety, compliance with the notice and public procedure provisions of the Administrative Procedures Act is not practical and good cause exists for making this amendment effective in less than thirty days. In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (31 FR 13697 and 14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

ALLISON. Applies to Detroit Diesel Allison Model 250-C20 engine.

Compliance required within the next fifty hours time in service unless already accomplished.

To prevent failure of the P/N 6875621 power turbine governor-to-fuel control fuel tube, install the fuel tube supports specified in Allison Commercial Engine Bulletin 250-C20 CEB-1040 dated May 10, 1973, Revision 1 dated June 28, 1973, or later FAA approved revisions or an equivalent procedure approved by the Chief, Engineering and Manufacturing Branch, Great Lakes Region.

(Sec. 313(a), 601, 603 Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c).))

Issued in Des Plaines, Illinois, on August 31, 1973.

This amendment is effective September 14, 1973.

LYLE K. BROWN,
*Director, Great Lakes Region.*

[FR Doc.73-19121 Filed 9-7-73;8:45 am]

[Airworthiness Docket No. 73-SW-28; Amdt. 39-1711]

### PART 39—AIRWORTHINESS DIRECTIVES

#### Bell Model 47 Series Helicopters

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring a one-time inspection for sharp notches in the thread root and the thread relief groove of main rotor blade grips, P/N 47-120-135-1, -2, -3 or P/N 47-120-252-1, -3 on Bell Model 47 series helicopters was published in 38 FR 19048.

Interested persons have been afforded an opportunity to participate in the making of the amendment. One letter was received that recommended retirement of the affected main rotor grips, P/N 47-120-135-1, -2, and 47-120-252-1 and -3, without regard to their condition. Since compliance with the proposed inspections will assure airworthiness of these grips, the rule is herein published as proposed.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BELL. Applies to Model 47 series helicopters certificated in all categories that are equipped with main rotor blade grips, P/N 47-120-135-1, -2, -3 or P/N 47-120-252-1, -3.

Compliance required within the next 100 hours' time in service after the effective date of this A.D., unless already accomplished.

To prevent possible fatigue cracks from developing, accomplish the following for each main rotor blade grip:

(a) Inspect the grip thread relief fillet. The inboard radius and bottom of the fillet must have a smooth finish and be free of nicks or sharp tool marks (Ref. Figure 1-22 of Bell 47D-1, 47G and 47G-2 Maintenance and Overhaul Instructions).

(b) Inspect the root radius of the 4½ inch diameter threads for sharp notches. The root radius must be smooth and free of sharp notches or grooves.

(c) If the grip thread relief fillet is not as specified in subparagraph (a) or has nicks or sharp tool marks, or if the thread root radius has a sharp notch or groove, replace the affected grip prior to next flight, except the helicopter may be flown in accordance with FAR 21.197 to a base where the grip may be replaced.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, and 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c).)

This amendment becomes effective October 10, 1973.

Issued in Fort Worth, Texas, on August 28, 1973.

HENRY L. NEWMAN,
*Director, Southwest Region.*

[Docket No. 73-NW-11-AD; Amdt. 39-1713]

### PART 39—AIRWORTHINESS DIRECTIVES

#### Boeing 737 Series Airplanes

There have been several cracks of the web and lower flange on the aft portion of the inboard flap track of the outboard T.E. flap on Boeing 737 series aircraft. These cracks, if allowed to progress, could result in loss of the outboard T.E. flap. Since this condition is likely to exist or develop in other airplanes of the same design, an Airworthiness Directive is being issued to require inspection of the flap track for cracks and repair if necessary on all affected Boeing 737 series aircraft.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation regulations is amended by adding the following new Airworthiness Directive:

BOEING. Applies to inboard flap track P/N 65-46428-5 or -7 of the outboard T.E. flap installation of all Boeing 737 series aircraft certified in all categories.

Compliance required, on track P/N 65-46428-5 or -7 with 7000 or more flights, within the next 400 flights, unless already accomplished within the last 800 flights, and at intervals thereafter not to exceed 1200 flights from the last inspection.

(a) To detect cracks in the aft portion of the webs and lower flanges of the inboard track P/N 65-46428-5 or -7 of the outboard flap, conduct the inspections called for in paragraph 4 of Boeing Alert Service Bulletin 737-57-1082 or later FAA approved Revisions.

(b) If cracks are detected, accomplish one of the following:

(1) Repair in accordance with instruction contained in Boeing Customer Support Engineering letter 6-2710-1893 dated 16 August, 1973 or repair instructions provided in revisions to Boeing Alert Service Bulletin 737-57-1082 or in a manner approved by Chief, Engineering and Manufacturing Branch, FAA, Northwest Region. Tracks with cracks extending beyond the limits of these repair instructions must be replaced per (2) or (3) below.

(2) Replace the track with a similar track P/N 65-46428-5 or -7 and conduct the inspections required by this Directive.

(3) Replace with track P/N 65-46428-11. Installation of this track constitutes terminating action.

(c) Tracks repaired in accordance with (b)(1) above are to be reinspected using dye penetrant or eddy current inspection methods at intervals not to exceed:

(1) 3,000 flights—for tracks with repaired flanges.

(2) 1,000 flights—for tracks with a web cracked between two fastener holes.

(3) 500 flights—for tracks with cracks stopped drilled and ending in the web.

(d) For the purpose of complying with this Airworthiness Directive, subject to acceptance by the assigned FAA maintenance inspector, the number of flights may be determined by dividing each airplane's hours' time-in-service by the operator's fleet average time from takeoff to landing for the airplane type.

The manufacturing specification and procedures identified and described in this Directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), and 1421, and 1923); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

This amendment becomes effective on September 10, 1973.

Issued in Seattle, Washington, on August 30, 1973.

C. B. WALK, JR.,
*Director, Northwest Region.*

[FR Doc.73-19120 Filed 9-7-73;8:45 am]

[Docket No. 73-NE-8; Amdt. 39-1712]

### PART 39—AIRWORTHINESS DIRECTIVES

#### Pratt & Whitney Model JT3D Engines

Amendment 39-1687 (38 FR 18641) AD 73-15-2 requires the inspection of the turbine nozzle case on JT3D Engines for missing lugs within 1,000 hours time in service and at 1,000 hour intervals thereafter. After issuing amendment 39-1687, the agency determined that turbine nozzle cases with part number 669045 had been inadvertently omitted from the coverage of the AD. Therefore, the AD is being amended to include turbine nozzle case part number 669045 within the provisions of the applicability paragraph of the AD.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation regulations, is amended by inserting the numbers 669045 after the numbers 626669 in the applicability paragraph.

This amendment becomes effective September 14, 1973.

(Sec. 313(a), 601, 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Burlington, Massachusetts, on August 29, 1973.

FERRIS J. HOWLAND,
*Director, New England Region.*

[FR Doc.73-19119 Filed 9-7-73;8:45 am]

[Airspace Docket No. 72-CE-29]

### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

#### Designation of Transition Area

On page 16913 of the FEDERAL REGISTER dated June 27, 1973, the Federal Aviation Administration published a notice of proposed rule making which would amend § 71.181 of Part 71 of the Federal Aviation regulations so as to designate a transition area at Red Oak, Iowa.

Interested persons were given 30 days to submit written comments, suggestions, or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby

V38-174 SEP 10 73 XUM

adopted without change and is set forth below.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

This amendment shall be effective 0901 G.m.t., November 8, 1973.

Issued in Kansas City, Missouri, on August 21, 1973.

JOHN R. WALLS,
*Acting Director,*
*Central Region.*

In § 71.181 (38 FR 435), the following transition area is added:

RED OAK, IOWA

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Red Oak Municipal Airport (latitude 41°00'40" N., longitude 95°15'25" W.); and within 3 miles each side of a 335° bearing from the Red Oak Municipal Airport, extending from the 6-mile radius to 9½ miles northwest of the airport; and that airspace extending from 1,200 feet above the surface within 4½ miles southwest and 9½ miles northeast of the 335° bearing from the Red Oak, Iowa Airport extending from the airport to 18½ miles northwest of the airport.

[FR Doc.73-19122 Filed 9-7-73;8:45 am]

## CHAPTER II—CIVIL AERONAUTICS BOARD

### SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER-821; Amdt. 208-3]

### PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN SUPPLEMENTAL AIR TRANSPORTATION

#### Prohibited Control of a Supplemental Air Carrier; Deletion

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

By Order 73-8-17, adopted August 2, 1973, the Board denied the various "routine" petitions for rule making filed in the Supplemental Renewal Proceeding, Docket 23944, including a request by Capitol International Airways, Inc. (Capitol) to amend Part 208 of the Economic Regulations so as to delete § 208.31 [1] in its entirety. In denying this request, the Board stated that although it was not persuaded to delete this provision entirely, it would in due course revise the section so as to conform with the present text of section 408(a)5) of the Federal Aviation Act, 49 U.S.C. 1378 (a)(5). Upon further consideration, we have now decided that § 208.31 of our regulations may indeed be deleted, as superfluous.

Section 208.31 was adopted long before the 1969 amendment to the Act, at a time when approval of the acquisition of control of an air carrier was required only if the acquirer was one of the persons specifically described in the Act, to wit, any air carrier or person controlling an air carrier, any other common carrier, or any other person engaged in any other phase of aeronautics. Section 208.31 of our regulations therefore imposed special requirements applicable to acquisition of control of supplemental air carriers by certain persons not specified in the Act. However, Public Law 91-62,[2] inter alia, amended section 408(a)(5) so as to require Board approval of the acquisition of control of any air carrier by "any • • • person," rather than only those specifically described.[3] Thus there is no longer any real need for retaining our special regulation with respect to acquisition of control of one particular class of air carrier by certain particular persons.

Since this amendment is editorial in nature, in that it merely deletes a regulation which has become superfluous, and it imposes no burden on any person, the Board finds that notice and public procedure hereon are unnecessary, and the amendment may become effective immediately.

Accordingly, the Board hereby amends Part 208 of its Economic Regulations (14 CFR, Part 208) effective September 4, 1973, as follows:

1. Amend the Table of Contents of Subpart A of Part 208, by deleting and reserving § 208.31, as follows:

Sec.
208.31 [Reserved]

§ 208.31 [Reserved]

2. Delete and reserve § 208.31.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324))

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19166 Filed 9-7-73;8:45 am]

### SUBCHAPTER F—POLICY STATEMENTS

[Reg. PS-54; Amdt. 399-33]

### PART 399—STATEMENTS OF GENERAL POLICY

#### Treatment of Depreciation of Wide-Bodied Aircraft for Rate Purposes

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

In notice of proposed rule making PSDR-34,[4] the Board proposed to amend Part 399 of the regulations, Statements of General Policy (14 CFR, Part 399), to assign a common depreciation life of 16 years to all wide-bodied aircraft for rate-making purposes.

Pursuant to the notice, comments have been filed by the Department of Defense and Pan American World Airways, Inc. Upon consideration, the Board has determined to adopt the rule as proposed. The tentative findings and conclusions set forth in PSDR-34 are incorporated herein and made final.

The comment of the Department of Defense supports the proposed rule. Pan American does not object to a common service life for all wide-bodied aircraft, but it contends that that service life should be set at 15 years rather than 16 years. This request is denied.

Pan American argues that the weighted average service life of all (three-engine and four-engine) owned and leased wide-bodied aircraft is closer to 15 than 16 year , and that the average service life for owned B-747 aircraft is 14.6 years. With respect to their first point, we are not concerned in this proceeding with reviewing the reasonableness of the rates set for three-engine equipment, the question here being the reasonableness of using 16 years for the B-747. As to the latter, we tentatively found in the notice, and affirm here, that 16 years was reasonable even though at the top of the range for owned aircraft, since it represented the average for leased aircraft. In our judgment, reliance on the average for leased aircraft is fully warranted in light of the considerations expressed in our determination in Phase I of the Domestic Passenger-Fare Investigation.[5]

Pan American also asserts that the lesser flexibility of four-engine wide-bodied equipment must be taken into account. As we pointed out in the notice, the anticipated increase in traffic density should prolong the useful life of the four-engine wide-body to such an extent as to offset any lack of flexibility it may ultimately have vis-a-vis its three-engined counterparts.

Finally, it may be noted that Pan American, the only carrier to question the 16-year life, depreciates its own B-747 aircraft over a period of 16 years for accounting purposes.

Since the rule is a statement of policy the amendment may be made effective immediately.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 399 of the Statements of General Policy (14 CFR, Part 399) as follows:

Amend § 399.42, the section as amended to read as follows:

§ 399.42 **Flight equipment depreciation and residual values.**

For rate-making purposes, it is the policy of the Board that flight equipment depreciation will be based on the conventional straight-line method of accrual, employing the service lives and residual values set forth below:

| | Service life in years | Residual value as percent of cost |
|---|---|---|
| | | *Percent* |
| Turbofan equipment: | | |
| 4-engine | 14 | 2 |
| 3-engine | 14 | 2 |
| 2-engine | 14 | 2 |
| Turbojet equipment: | | |
| 4-engine | 10 | 5 |
| 2-engine | 10 | 5 |
| Turboprop equipment: | | |
| 4-engine | 12 | 5 |
| 2-engine | 10 | 15 |
| Wide-body equipment: | | |
| 4-engine | 16 | 10 |
| 3-engine | 16 | 10 |

• • • • •

(Sections 204 and 404 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 and 760 (49 U.S.C. 1324 and 1374).)

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

## Title 21—Food and Drugs

## CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### SUBCHAPTER A—GENERAL

### PART 8—COLOR ADDITIVES

PYROGALLOL AND FERRIC AMMONIUM CITRATE; CONFIRMATION OF EFFECTIVE DATE

In the matter of listing pyrogallol and ferric ammonium citrate for safe use in coloring plain and chromic catgut sutures:

1. Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 706 (b), (c), (d), 74 Stat. 399-403; 21 U.S.C. 376 (b), (c), (d)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), notice is given that no objections or requests for hearing were filed in response to the order in the above-identified matter published in the FEDERAL REGISTER of May 16, 1973 (38 FR 12803). Accordingly, the regulations (§§ 8.6017 and 8.6018) promulgated thereby became effective July 16, 1973.

2. Effective September 10, 1973, § 8.501 *Provisional lists of color additives* is amended in the table in paragraph (f) by deleting "Ferric ammonium citrate" and "Pyrogallol" from the list of color additives.

Dated August 31, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

[FR Doc.73-19088 Filed 9-7-73;8:45 am]

### SUBCHAPTER B—FOOD AND FOOD PRODUCTS

### PART 121—FOOD ADDITIVES

#### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

DIISONONYL PHTHALATE

The Commissioner of Food and Drugs, having evaluated the data in a petition (FAP 2B2752) filed by Esso Research and Engineering Co., Post Office Box 111, Linden, NJ 07036, and other relevant material, concludes that the food additive regulations should be amended, as set forth below, to provide for the safe use of diisononyl phthalate as a plasticizer in vinyl chloride homo- and/or copolymer films for food contact use.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2511 is amended in paragraph (b) by alphabetically adding a new item to the list of substances, as follows:

§ 121.2511 **Plasticizers in polymeric substances.**

• • • • •

(b) List of substances:

| | *Limitations* |
|---|---|
| • • • • • | |
| Diisononyl phthalate. | For use only at levels not exceeding 43 percent by weight of permitted vinyl chloride homo- and/or copolymers used in contact with food only of the types identified in § 121.2526(c), Table 1, under categories I, II, IV-B, and VIII, at temperatures not exceeding room temperature. The average thickness of such polymers in the form in which they contact food shall not exceed 0.005 inch. |
| • • • • • | |

Any person who will be adversely affected by the foregoing order may at any time on or before October 10, 1973, file with the Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 6-88, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

*Effective date.*—This order shall become effective on September 10, 1973.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated August 31, 1973.

SAM D. FINE,
*Associate Commissioner for Compliance.*

[FR Doc.73-19087 Filed 9-7-73;8:45 am]

### SUBCHAPTER C—DRUGS

### PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

#### Prednisolone Tertiary Butylacetate

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (11-080V) filed by Merck Sharp & Dohme Research Laboratories, Div. of Merck & Co., Inc., Rahway, NJ 07065, proposing revised labeling for the safe and effective use of prednisolone *tertiary* butylacetate as an anti-inflammatory agent for the treatment of horses, dogs, and cats. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), the following new section is added to Part 135b:

§ 135b.89 **Prednisolone tertiary butylacetate suspension, veterinary.**

(a) *Specifications.*—Prednisolone *tertiary* butylacetate (Pregna-1,4-diene-3, 20-dione-11B, 17α 21-triol 21-(3,3, dimethyl butyrate) suspension, veterinary contains 20 milligrams of prednisolone tertiary butylacetate per milliliter. It is sterile.

(b) *Sponsor.*—See code No. 023 in § 135.501(c) of this chapter.

(c) *Conditions of use.*—(1) It is used as an anti-inflammatory agent in horses, dogs, and cats.

(2) It is administered to horses intramuscularly at a dosage level of 100 to 300 milligrams and intrasynovially at a dosage level of 50 to 100 milligrams. It is administered intramuscularly to dogs and cats at a dosage level of 1 milligram per 5 pounds of body weight and intrasynovially at a dosage level of 10 to 20 milligrams. Intramuscular retreatment of horses in 24 to 48 hours may be necessary, depending on the general condition of the animal and the severity and duration of the disease.

[1] 14 CFR § 208.31. Section 208.31 provides as follows:

§ 208.31 *Prohibited control of a supplemental air carrier.*

Control of a supplemental air carrier shall not, without prior application to and approval by the Board, be transferred, directly or indirectly, by assignment, transfer of voting stock, or otherwise, to any person who controlled, or participated in control of, as a partner, officer, or director, any air carrier theretofore found by the Board to have committed knowing and willful violations of the Civil Aeronautics Act of 1938, as amended, the Federal Aviation Act of 1958, or any order, rule, or regulation issued pursuant to said Acts during the period such person controlled or participated in the control of said air carrier. Any such application may be approved by the Board with or without hearing. No such application shall be denied unless the Board finds, after notice to said supplemental air carrier and the parties to the proposed transfer, and after opportunity for hearing, that, in the event the proposed transfer is consummated, said supplemental air carrier will thereby be rendered unfit, unwilling, or unable to conform to the provisions of the Federal Aviation Act of 1958, and the rules, regulations, and requirements of the Board thereunder. For the purposes of this section, a transfer of 20% or more of the voting stock of the supplemental air carrier shall be deemed to constitute prima facie evidence of a transfer of control so as to require the filing of an appropriate application with the Board.

[2] 83 Stat. 103, approved by the President on August 20, 1969.

[3] Section 408(a)(5) was also amended by the addition of a proviso authorizing the Board to exempt by order any such acquisition of a noncertificated air carrier from this requirement to the extent and for such periods as may be in the public interest.

[4] 38 FR 14695, June 4, 1973 (Docket 25569).

SUBCHAPTER C—DRUGS

## PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

### Tetracycline Oral Veterinary

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (65-004V) filed by the Upjohn Co., Kalamazoo, MI 49001, proposing revised indications for use of tetracycline boluses in calves. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), § 135c.34 is amended by revising paragraph (b)(1) and (4), and by adding a new item 3 to table 2 in paragraph (e), as follows:

**§ 135c.34 Tetracycline oral veterinary.**

* * * * *

(b) *Sponsor.*—(1) See code No. 030 in § 135.501(c) of this chapter for conditions of use provided for in items 1 and 2 of tables 1 and 2 in paragraph (e) of this section.

* * * * *

(4) See code No. 037 in § 135.501(c) of this chapter for conditions of use provided for in table 1 and in table 2, items 1 and 2 in paragraph (e) of this section.

* * * * *

(e) *Conditions of use.* * * *

TABLE 2—IN BOLUSES

| Ingredient | Milligrams per bolus | Limitations | Indications for use |
|---|---|---|---|
| * * * | * * * | * * * | * * * |
| 3. Tetracycline..... | 500 | For calves; as tetracycline hydrochloride; administer orally 10 mg per lb of body weight per day divided into two daily doses for not more than 5 days; do not slaughter animals for food within 12 days of treatment; as sole source of tetracycline. Federal law restricts this drug to use by or on the order of a licensed veterinarian. | For treatment of bacterial pneumonia caused by organisms susceptible to tetracycline and bacterial enteritis caused by *E. coli* and Salmonella organisms susceptible to tetracycline. |

*Effective date.*—This order shall be effective September 10, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i).)

Dated August 29, 1973.

## Title 41—Public Contracts and Property Management

## CHAPTER 3—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

## PART 3-16—PROCUREMENT FORMS

### Solicitation Documents; Standardized Request for Proposed Format and Checklist

On April 19, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 9671-9676) stating that the Department of Health, Education, and Welfare is considering an amendment to 41 CFR, Chapter 3, by adding a new § 3-16.5001, Standardized Request for Proposal (RFP) Format and Checklist for Solicitation Documents, to Subpart 3-16.50, Forms for Negotiated Procurements. The purpose of the amendment is to illustrate the acceptable minimum requirements for the format and content of requests for proposals.

Interested persons were invited to submit written data, views, or comments within 30 days after publication. Written comments were received, and after consideration of the views presented, the regulation is revised and adopted as set forth below.

(5 U.S.C. 301 (40 U.S.C. 486(c).)

*Effective date.*—These amendments shall become effective on September 10, 1973.

Dated August 31, 1973.

S. H. CLARKE,
*Deputy Assistant Secretary for Administration and Management.*

1. The table of contents for Part 3-16 is amended by adding the following entries:

**Subpart 3-16.50—Forms for Negotiated Procurement**

Sec.
3-16.5001 Standardized request for proposal (RFP) format and checklist for solicitation documents.

2. The new § 3-16.5001 is added as follows:

**§ 3-16.5001 Standardized request for proposal (RFP) format and checklist for solicitation documents.**

(a) Forms used for requesting proposals on negotiated procurements shall be in accordance with this subpart and FPR subpart 1-16.9.

(b) The purpose of these instructions is to establish the acceptable minimum requirements for the format and content of requests for proposals in order: (1) To assure that proposals are complete and contain all the essential information required by the Government, and (2) to assure a degree of uniformity in presentation which will facilitate appraisal of proposals by the Government.

(c) Generally, requests for proposals shall be in writing. Solicitations shall contain the information necessary to enable a prospective offeror to prepare a proposal, and shall contain the following information, if applicable to the procurement involved.

(d) The request for proposal shall consist of the following documents:

(1) Transmittal letter.

(2) Proposed contract provisions (including work statement).

(3) Instructions to offerors.

(i) General instructions.

(ii) Technical proposal instructions.

(iii) Business proposal instructions.

(e) Standard forms 33 and 33A will normally be used for fixed-price type contracts (procurement of hardware and administrative type supplies/services). If the forms 33 and 33A are not utilized, the business proposal instructions must include all required representations and certifications.

(f) The following format shall be utilized in preparing the transmittal letter for requests for proposals:

Date _____

Refer to RFP No._____

Gentlemen: You are invited to submit a proposal in accordance with the requirements of request for proposal No. ------ for (insert name of the procurement.

Your proposal must be received by the Contracting Officer no later than (insert date) and (time—local prevailing time) at (address to which proposals are to be sent).

Special attention is directed to the "Certification of Nonsegregated Facilities" of this solicitation. You are cautioned that failure to agree to the certification shall render your proposal nonresponsive to solicitations involving awards of contracts exceeding $10,000 which are not exempt from the provisions of the equal opportunity clause.

Your proposal must be prepared in accordance with the attached "Contract Provisions," and "Instructions to Offerors."

The RFP does not commit the Government to pay any cost for the preparation and submission of a proposal. It is also brought to your attention that the Contracting Officer is the only individual who can legally commit the Government to the expenditure of public funds in connection with this proposed procurement.

Requests for any information concerning this RFP should be referred only to (name and title of individual) who may be called on (area code and telephone number).

Sincerely,

_____

Include any of the following statements in the transmittal letter if they are applicable:

(1) If the contract is to be conditioned on the availability of funds, a clear statement of such condition must be added (see HEWPR 3-1.354).

(2) Conference of prospective offerors. The following is to be used when a preproposal conference is required. The language may be modified to adapt to the particular situation.

A conference will be held with prospective offerors at _____ on
(time)
_____, at _____
(date) (location)
for the purpose of providing information concerning the Government's requirements which may be helpful in the preparation of proposals, and to answer any questions which you have regarding this solicitation.

The success of this type of conference depends largely on the leadtime available to the Government for research in connection with questions submitted by offerors. Therefore, you are requested to mail written questions concerning any areas of uncertainty which, in your opinion, require clarification or correction, in sufficient time to be received on or before _____
Your questions should be submitted to the Contracting Officer _____ and the envelope should be marked, "Offerors Conference Question, RFP No. _____." A set of all questions and answers will be furnished simultaneously to all prospective offerors.

Because of space limitations, prospective contractors shall be limited to a total of ____ representatives.

Attendance at the preproposal conference is recommended; however, attendance is neither required nor a prerequisite for proposal submission, and will not be considered a factor in proposal evaluation.

(3) When the procurement involves a set-aside for labor surplus area or small business concerns, insert the following statement and include the appropriate "Notice of Set-Aside" clause in the request for proposal.

The prescribed clauses are set forth in FPR 1-1.706-5 and 6; and 1-1.804-2.

This is a ____ percent set-aside for (small business) (labor surplus area concerns).

(4) If multiple awards may be made insert the following: Multiple awards: More than one award may be made under this solicitation.

(5) Insert the following, if the offeror is to be informed of the Government's estimate of the level of effort required to accomplish the required effort.

(A) The Government considers the effort to be performed to require approximate man-hours as follows: (Insert a breakdown of the Government's man-hours estimates by categories.) These estimates are furnished for the offeror's information only and are not to be considered restrictive for proposal purposes; or

(B) To assist you in the preparation of your proposal, the Government considers the effort to be performed during this contract to be approximately (insert the total figure) man-hours. This number is furnished for the offeror's information only and is not considered restrictive for proposal purposes.

(6) The clause set forth in § 1-12.1102-2, *Listing of Employment Openings*, is included herein by reference. Instructions relative to the inclusion of the clause are set forth in the same FPR reference.

(g) Proposed contract provisions (including scope of work)—Each request for proposal shall contain the proposed contract provisions including the scope of work or specifications. In addition to the scope of work or specifications, this element of the request for proposal shall contain such information as the period of performance or delivery schedule, reporting requirements, the general provisions, any additional provisions, and special contract clauses.

(h) The instructions to offerors shall consist of three parts. The first will be "General Instructions," the second will be the instructions for preparation of the technical proposal and the third will be the instructions for the preparation of the business proposal. The following will precede the general instructions.

(i) *Instructions to Offeror.*—The following instructions establish the acceptable minimum requirements for the format and content of proposals. Special attention is directed to the requirements for technical and business proposals to be submitted in accordance with these instructions. You are advised that paramount consideration shall be given to the evaluation of technical proposals, as well as price, in the award of a contract.

The general instructions must contain the following statements:

(1) The proposal shall be based on a (insert type) of contract. In addition to the special provisions of this request for proposal, any resultant contract shall include the general provisions (form HEW , General Provisions for ). Any additional clauses required by Public Law, Executive order, or procurement regulations, in effect at the time of execution of the proposed contract will be included.

(2) The following shall be included unless the operating agency has authorized a different policy regarding the separation of proposals and inclusion of cost information in the technical proposal.

The proposal shall be in two parts: a "Technical Proposal" and a "Business Proposal." Each of the parts shall be separate and complete in itself so that evaluation of one may be accomplished independently of and concurrently with evaluation of the other. The technical proposal shall not contain any reference to cost, however, resources information, such as, data concerning labor hours and categories, materials, subcontracts, etc. shall be contained in the "Technical Proposal" so that the offeror's understanding of the scope of the work may be evaluated. It must disclose your technical approach in as much detail as possible, including, but not limited to the requirements of the technical proposal instructions.

(3) The wording set forth below may be modified if the operating agency has a policy of not requiring the separation of business and technical proposals.

The proposal shall be signed by an official authorized to bind your organization. ____ copies of your technical proposal and ____ copies of your business proposal shall be submitted to: (Insert complete address) as to where the proposal is to be sent and how the RFP is to be marked).

(4) LATE PROPOSALS AND MODIFICATIONS OF PROPOSALS

(This provision does not apply to normal revisions to proposals by offerors selected for discussions during the usual conduct of negotiations with such offerors or to withdrawal of proposals.)

(a) Any proposal received at the office designated in the solicitation after the exact time specified for receipt will not be considered unless it is received before award is made, and:

(1) It was sent by registered or certified mail not later than the fifth calendar day prior to the date specified for receipt of offers (e.g., an offer submitted in response to a solicitation requiring receipt of offers by the 20th day of the month must have been mailed by the 15th or earlier);

(2) It was sent by mail (or telegram if authorized) and it is determined by the Government that the late receipt was due solely to mishandling by the Government after receipt at the Government installation;

(3) It is the only proposal received; or

(4) It offers significant cost or technical advantages to the Government, and it is received before a determination of the competitive range has been made.

(b) Any modification of a proposal is subject to the same conditions as in (a), above, and, in addition, if sent by telegram and received at the office designated in the solicitation by telephone from the receiving telegraph office not later than the time set for opening, shall be considered if such message is confirmed by the telegraph company by sending a copy of the telegram which formed the basis for the telephone call.

(c) The only acceptable evidence to establish:

(1) The date of mailing of a late proposal or modification sent either by registered mail or certified mail is the postmark on the wrapper or on the original receipt from the post office. If neither postmark shows a legible date, the proposal or modification of proposal shall be deemed to have been mailed late.

(2) The time of receipt at a Government installation is the time-date stamp of such installation on the proposal wrapper or other documentary evidence of receipt maintained by the installation.

(d) Notwithstanding (a) and (b), above, a late modification of an otherwise successful proposal which makes the terms more favorable to the Government will be considered at any time it is received and may be accepted.

(5) You may, at your discretion, submit alternative proposals, or proposals which deviate from the requirements, *Provided*, That you also submit a proposal for performance of the work as specified in the statement of work. Such proposals may be considered if overall performance would be improved or not compromised and if they are in the best interests of the Government. Alternative proposals, or deviations from any requirement of this RFP, shall be clearly identified.

(6) The proposal submitted in response to the request for proposal may contain technical data which the offeror; or his subcontractor offeror does not want used or disclosed for any purpose other than evaluation of the proposal. The use and disclosure of any such technical data may be so restricted: *Provided*, The offeror marks the cover sheet of the proposal with the following legend, specifying the pages of the proposal which are to be restricted in accordance with the conditions of the legend:

"Technical data contained in pages____of this proposal shall not be used or disclosed, except for evaluation purposes. *Provided:* That if a contract is awarded to this offeror as a result of or in connection with the submission of this proposal the Government shall have the right to use or disclose this technical data to the extent provided in the contract. This restriction does not limit the Government's right to use or disclose technical data obtained from another source without restriction.

"The Government assumes no liability for disclosure or use of unmarked technical data and may use or disclose the data for any purpose and may consider that the proposal was not submitted in confidence and therefore is releasable under the Freedom of Information Act (5 U.S.C. 552)."

(7) The Government will evaluate technical proposals in accordance with the criteria set forth in the technical proposal instructions.

(8) The Government reserves the right to make an award without further discussion of the proposals received. Therefore, it is important that your proposal be submitted initially on the most favorable terms from both the technical and cost standpoints. Af-

V38-174
SEP 10 73
XUM

ter submission of proposals and closing thereof, no information will be released until after award.

(9) The Government reserves the right to reject any or all proposals received. It is understood that your proposal will become part of the official file on this matter without obligation to the Government.

(10) Unnecessarily elaborate brochures or other presentations beyond that sufficient to present a complete and effective proposal are not desired and may be construed as an indication of the offeror's lack of cost consciousness. Elaborate art work, expensive visual and other presentation aids are neither necessary nor wanted.

Include any of the following in the general instructions, if the item is applicable to the particular situation.

(1) If the proposed contract will involve performance or services on a Government installation insert the following paragraph:

*Site visit.*—Offerors are urged and expected to inspect the site where services are to be performed and to satisfy themselves as to all general and local conditions that may affect the cost of performance of the contract, to the extent such information is reasonably obtainable. In no event will failure to inspect the site constitute grounds for claim after the award of a contract.

(2) The following notice to offerors will be included whenever contract performance is expected to involve risk to human subjects:

NOTICE TO OFFERORS OF REQUIREMENTS FOR ADEQUATE ASSURANCE OF PROTECTION OF HUMAN SUBJECTS

Prospective contractors being considered for award will be required to give acceptable assurance that the project described herein will be subject to initial and continuing review by an appropriate institutional committee. This review shall assure that the rights and welfare of the individuals involved are adequately protected, that the risks to an individual are outweighed by the potential benefits to him or by the importance of the knowledge to be gained, and that informed consent will be obtained by methods that are adequate and appropriate.

(3) The following relates to the procurement of ADPE. Subpart 101-32.4 of the Federal Property Management Regulations (FPMR) provides for the purchasing and contracting of ADPE. FPMR 101-32.407 indicates that Government agencies should procure ADPE from different sources—"Mix a System"—when such action is both feasible and in the best interests of the Government. RFP's should address this possible course of action. Set forth below is a paragraph. Alternate Sources Procurement, which can be incorporated in RFP's to accomplish the desired result.

"The Government does not commit itself to procure any supply or service from any particular offeror by the issuance of this solicitation. The Government reserves the right to reject any and all offers received, or any part or parts thereof and to satisfy its total requirements, or any part thereof, from other sources. Such alternate sources include, but are not limited to:

"(A) Equipment becoming excess to the Government's needs which is owned by the Government, or in which the Government has accrued equity due to past rentals paid.

"(B) Equipment obtained by lease or purchase from sources other than the manufacturer thereof.

"(C) Equipment, which, because there is a substantial number of like individual components, lends itself to separate procurement (e.g., tape drives, disc drives, disc packs, etc.).

"Offerors are requested to state in their proposals the extent to which such courses of action would affect any commitment made by the offeror as to performance of the proposed system, or as to any aspect of pricing."

The clause set forth below entitled, "Warranty Exclusion and Limitation of Damages" eliminates a contractor's liability for both consequential damages and damages for breach of an implied warranty for fitness for a particular purpose. However, it imposes no limit on any remaining areas of exposure to contractual damages. This clause shall be used in all solicitation for ADPE unless the Contracting Officer determines that a higher degree of protection is in the best interest of the Government.

WARRANTY EXCLUSION AND LIMITATION OF DAMAGES

Except as expressly set forth in writing in this agreement, or except as provided in the clause entitled, "Commitments, Warranties and Representations" and except for the implied warranty of merchantability, there are no warranties expressed or implied. In no event will the contractor be liable to the Government for consequential damages as defined in the Uniform Commercial Code, Section 2-715 in effect in the District of Columbia as of January 1, 1973, i.e., Consequential damages resulting from the seller's breach include:

(a) any loss resulting from general or particular requirements and needs of which the seller at the time of contracting had reason to know and which could not reasonably be prevented by cover or otherwise; and

(b) injury to person or property proximately resulting from any breach of warranty.

(4) Where reference material is to be provided for use in preparation of proposals, insert either of the following clauses:

(A) To assist offerors in preparing their proposals, reference material consisting of (insert title or description of publications, specifications, drawings, reports, or other documentation being made available as reference material) will be available for inspection at _____. Offerors are expected to examine all reference material prior to preparation and submission of their proposals. Failure to do so will be at the offeror's risk.

or

(B) To assist offerors in preparing their proposals, reference material consisting of (insert title or description of publications, specifications, drawings, reports or other documentation being furnished as reference material) is enclosed (is being forwarded to you under separte cover). Offerors are expected to examine all reference material prior to preparation and submission of their proposal. Failure to do so will be at the offeror's risk.

Include the following statement if the reference material is to be returned to the Government:

All reference material furnished hereunder shall be returned within ____ days after the submission of proposals to _____.

(5) A statement regarding discount provisions.

(6) When telegraphic offers are authorized in a solicitation using standard form 33 (solicitation, offer, and award), a provision similar to that set forth in FPR 1-2.202-2 can be included.

(7) A statement that in the event the proposal should contain classified information, the provisions of the HEW security staff manual will apply.

(8) If options are to be solicited, include the following or similar language describing the method by which the Government will evaluate the option:

If the Government elects to exercise the option simultaneously with award, proposals will be evaluated for purposes of award on the basis of the total price for the basic quantity plus the option quantity to be exercised with award.

If the Government does not elect to exercise the option with award, evaluation will be on the basis of the quantity to be awarded exclusive of the option quantity.

(9) If an incentive type contract is being considered, a notice to the offeror of the Government's desire as to use of incentives considered applicable, objectives of the incentive performance goals, schedules, milestones, critical delivery parameters and similar information shall be included.

(ii) *Technical Proposal Instructions.*—The technical evaluation criteria and the relative weightings of each factor must be included in the RFP. It should be noted that the RFP evaluation criteria cannot be modified except for a formal modification to the RFP and no factors other than those set forth in the request for proposals shall be used in the evaluation of technical proposals. The following are examples of technical evaluation criteria that can be used in the evaluation of technical proposals and the information that can be requested:

(1) Understanding the problem and technical approach.

(A) Statement and discussion of the requirements as it is analyzed by the offeror.

(B) Prospective contractor's proposed definitive Scope of Work with explanation of technical approaches and a detailed outline of the proposed program for executing the requirements of the technical scope and achieving the objectives of the project.

(C) Preliminary layouts, sketches, diagrams, other graphic representation calculations, curves, and other data as may be necessary for presentation, substantiation, justification or understanding of the proposed approaches and program.

(D) Statement and discussion of anticipated major difficulties and problem areas, together with potential or recommended approaches for their resolution.

(E) Statement of the extent to which the proposed approach and program can be expected to meet or exceed requirements and specifications of the technical scope.

A differentiation shall be made between the areas of assured compliance, possible but not assured compliance, and noncompliance.

(F) An outline of the phases or segments into which the proposed program can be logically divided and performed if for some substantial reason they are different from the phases or segments shown in the technical scope.

(G) Schedule for the completion of the work and delivery of items specified in the technical scope. Performance or delivery schedules shall be indicated for phases or segments, as applicable, as well as for the overall program. Schedules shall be shown in terms of calendar months from the date of authorization to proceed or, where applicable, from the date of a stated event, as for example, receipt of a required approval by the contracting officer. Unless the request for proposal indicates that the stipulated schedules are mandatory, they shall be treated as desired or recommended schedules. In this event, proposals based upon the offeror's best alternative schedule, involving no overtime, extra shift or other premium, will be accepted for consideration.

(2) Qualifications.

(A) *Experience.*—General background, experience, and qualifications of the offeror. Special notation should be made of similar or related Government programs, performed for the Government including documentation with reference to the applicable con-

tract numbers and supervising cognizant agencies.

(B) *Personnel.*—Personnel who will be assigned for direct work on this program. Information is required which will show the composition of the task or work group, its general qualifications, and recent experience with similar equipment or programs. Special mention shall be made direct technical supervisors and key technical personnel, and the approximate percentage of the total time each will be available for this program. Résumés are desirable which will indicate education, background, recent experience, and specific scientific or technical accomplishments.

Additional personnel, if any, who will be required for full-time employment, or on a subcontract or consultant basis. The technical areas, character, and extent of subcontract or consultant activity will be indicated and the anticipated sources will be specified and qualified.

In addition to the evaluation criteria and the relative weightings, these technical proposal instructions must include the following statement:

Proposals which merely offer to conduct a program in accordance with the requirements of the Government's scope of work will be considered nonresponsive to this request and will not be considered further. The offeror must submit a definitive scope of work in accordance with his proposal for the end results that he proposes to accomplish in compliance with the Government's requirements.

(iii) *Business proposal instructions.*—The business proposal instruction will consist of three parts: (1) Cost and Pricing Data. The forms to be used are optional form 59, contract pricing proposal, or optional form 60, contract pricing proposal (resarch and development). The forms are illustrated in FPR 1-16.902-OF59 and 1-16.902-OF60. The instructions to offerors and footnotes must be complied with and the appropriate boxes checked or filled in by the offeror.

(2) Other Administrative Data.

(3) Representations and Certifications.

(A) *Cost and pricing data.*—The offeror, as a minimum, must submit cost proposals fully supported by cost and pricing data adequate to establish the reasonableness of the proposed amount. The attached form OF59 or 60 must be used in the preparation of your proposal and the offeror must comply with the instructions and footnotes of the form and fill in or check the appropriate boxes.

(1) The cost for individual elements, such as analytical studies, reports, etc., shall be itemized.

(2) The estimated cost of each phase or segment of the offered performance shall be itemized.

(3) Inasmuch as it may be necessary to authorize performance of the project by phases or a group of phases, the extent that these are severable should be indicated together with the effect, if any, of such severance upon the estimated cost.

(B) The following shall be set forth under the item entitled "Other Administrative Data."

OTHER ADMINISTRATIVE DATA

(1) The proposal shall stipulate that it is predicated upon all the terms and conditions of this RFP. In addition, it shall contain a statement to the effect that it is firm for a period of at least (insert number of days) from the date of receipt thereof by the Government.

(2) The proposal shall list the names and telephone numbers of persons authorized to conduct negotiations.

(3) It is HEW policy that contractors will provide all equipment and facilities necessary for performance of contracts. Exception may be granted to furnish Government-owned property, or to authorize purchase with contract funds only when approved by the head of the procuring activity. If additional equipment must be acquired, the offeror shall include the description, estimated cost of each item, and whether the prospective offeror will furnish such items with its own funds.

(4) The offeror shall identify Government-owned property in their possession and/or property acquired from Federal funds, and title to which vests in the offeror which they propose to use in the performance of the prospective contract (§§ 3-56.502 and 3-56.503).

(5) The management and control of any Government property shall be in accordance with HEW Publication (OS) 72-74, entitled, "Management of Government-Owned Personal Property Held by HEW Contractors," a copy of which will be provided upon request.

(6) The following statement should also be included in the RFP when necessary:

Bid guarantee, performance bond and payment bond requirements, if any. If a bid bond or other form of bid guarantee is required the solicitation shall include the provision required by FPR 1-10.103-3 (if applicable).

(7) Other pertinent business and administrative information can also be requested if the information desired is necessary for the evaluation of proposals.

(C) The following representations and certifications shall be included in all requests for proposals as attachments which do not contain standard form 33 or 33A.

The heading of the representations and certifications shall state: Copies of the attachment must be executed by an official authorized to bind the offeror and made a part of his business proposal.

REPRESENTATIONS AND CERTIFICATIONS

(The offeror makes the following representations and certifications as part of his proposal (check or complete appropriate boxes or blanks).)

1. SMALL BUSINESS REPRESENTATION

He ( ) is, ( ) is not, a small business concern. If he is a small business concern and is not the manufacturer of the supplies to be furnished hereunder, he also represents that all such supplies ( ) will, ( ) will not, be manufactured or produced by a small business concern in the United States, its possessions, or Puerto Rico. If a small business concern, contractor represents that he ( ) has, ( ) has not, previously been denied a Small Business Certificate of Competency by the Small Business Administration. (A small business concern for the purpose of Government procurement is a concern, including its affiliates, which is independently owned and operated, is not dominant in the field of operation in which it is contracting and can further qualify under the criteria concerning number of employees, average annual receipts, or other criteria, as prescribed by the Small Business Administration.) (See Code of Fdeeral Regulations, Title 13, Part 12, as amended, which contains detailed definitions and related procedures.)

NOTE.—The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

2. TYPE OF ORGANIZATION

He operates as an ( ) Individual, ( ) State or Local Agency, ( ) Partnership, ( ) Joint Venture, ( ) Nonprofit, ( ) Educational Institution, ( ) Corporation organized and existing under the laws of the State of _____.

3. REGULAR DEALER—MANUFACTURER REPRESENTATION

(Applicable only to supply contracts exceeding $10,000.) He is a ( ) regular dealer in ( ) manufacturer of, the supplies covered by this proposal.

4. CONTINGENT FEE REPRESENTATION

(Applicable only to proposals in which the aggregate amount involved exceeds $2,500.) Offeror represents: (a) That he ( ) has, ( ) has not, employed or retained any company or person (other than a full-time bona fide employee working solely for the offeror) to solicit or secure this contract, and (b) that he ( ) has, ( ) has not, paid or agreed to pay any company or person (other than a full-time bona fide employee working solely for the offeror) any fee, commission, percentage or brokerage fee, contingent upon or resulting from the award of this contract; and agrees to furnish information relating too (a) and (b) above as requested by the contracting officer. (NOTE.—For interpretation of representation, including the term "bona fide employee," see Code of Federal Regulations, Title 41, Chapter 1, Subpart 1-1.5.)

5. EQUAL OPPORTUNITY CERTIFICATION

a. Have you participated in any contractual agreement which contained the Equal Employment Opportunity Clause prescribed in Executive Orders 10925, 1114, or 11246?

( ) Yes. ( ) No.

b. Were you required pursuant to the rules and regulations of Equal Employment Opportunity (41 CFR 60-1) to file a compliance report as the result of such contractual agreement?

( ) Yes. ( ) No. If "Yes," answer question (c).

c. Did you file the necessary compliance report in accordance with the instructions contained on the appropriate report form—SF-40, SF-41, or EEO-1 (SF-100).

( ) Yes. ( ) No. If "Yes," answer question (d).

d. Name of agency requiring report _____

e. When was report filed? _____

f. Has any action been required of you to improve your compliance posture?

( ) Yes. ( ) No.

g. Name and address of Government "Compliance Agency," if known: _____

h. What is your current employment? _____

i. Have you prepared a written affirmative action compliance program?

( ) Yes. ( ) No. If "No," reason for this is:

( ) Offeror is an agency or instrumentality of state or local government.

( ) Offeror employs less than 50 persons.

( ) Offeror has not been awarded a Federal contract or subcontract of $50,000 or more since July 1, 1968.

j. *Data on subcontractors.*—(Use supplementary sheets where required.)

| Name of subcontractor and address | (1) | (2) | (3) |
|---|---|---|---|
| _____ | (□) Yes (□) No | (□) Yes (□) No | (□) Yes (□) No |
| _____ | (□) Yes (□) No | (□) Yes (□) No | (□) Yes (□) No |

(1) Previously held contracts subject to E.O. 10925, 1114, and 11246.
(2) Previously filed certificate of nonsegregated facilities.
(3) Previously filed compliance report (SF-40, SF-41, or EEO-1).

V38-174 SEP 10 73 XUM

6. CERTIFICATION OF NONSEGREGATED FACILITIES

By the submission of this offer, the offeror or subcontractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. He certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The offeror or subcontractor agrees that a breach of this certification is a violation of the equal opportunity clause of this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. He further agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certification from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the equal opportunity clause; that he will retain such certifications in his files; and that he will forward the following notice to such proposed subcontractors (except where proposed subcontractors have submitted identical certification for specific time periods).

NOTICE TO PROSPECTIVE SUBCONTRACTORS OF REQUIREMENT FOR CERTIFICATIONS OF NONSEGREGATED FACILITIES

A certification of nonsegregated facilities, as required by the May 9, 1967, order (32 FR 7439, May 19, 1967) on elimination of segregated facilities, by the Secretary of Labor must be submitted prior to the award of a subcontract exceeding $10,000 which is not exempt from the provisions of the equal opportunity clause. The certification may be submitted either for each subcontract or for all subcontracts during a period (i.e., quarterly, semiannually, or annually).

NOTE.—Failure of an offeror to agree to the certification of nonsegregated facilities shall render his offer nonresponsive to the terms of solicitations involving awards of contracts exceeding $10,000 which are not exempt from the provisions of the equal opportunity clause.

7. BUY AMERICAN CERTIFICATE

(Applies to proposals involving end products as defined by FPR 1-8.101.) The offeror hereby certifies that each end product, except the end product listed below, is a domestic source end product (as defined in the clause entitled "Buy American Act"); and that components of unknown origin have been considered to have been mined, produced, or manufactured outside the United States:

Excluded end products (show country of origin for each excluded end product).

---

---

---

8. DUPLICATION OF COST

The contractor represents and certifies that any charges contemplated and included in his estimate of cost for performance are not duplicative of any charges against any other Government contract, subcontract, or other Government source.

9. PLACE OF PERFORMANCE

Following is the name and location of the plant or place of business where the item(s) will be produced or supplied from stock or where the service will be performed.

---------- ----------
Name of plant) (City and State)

----------
(County and congressional district)

10. CERTIFICATE OF CURRENT COST OR PRICING DATA

When a certificate of cost or pricing data is required to be submitted in accordance with Federal procurement regulation (FPR) 1-3.807-3, the contractor agrees to complete, execute, and submit to the contracting officer the following:

CERTIFICATE OF CURRENT COST OR PRICING DATA

This is to certify that to the best of my knowledge and belief, cost or pricing data[1] submitted in writing, or specifically identified in writing if actual submission of the data is impracticable (see § 1-3.807-3(h)(2)), to the contracting officer or his representative in support of ----------[2] are accurate complete, and current as of

----------[3]
(date)

Firm----------
Name----------
Title----------

----------[4]
(Date of execution)

Describe the proposal, quotation, or other submission involved, giving appropriate identifying number (e.g., RFP No. ------).

The above certification shall be submitted as soon as practicable after agreement is reached on any proposed contract cost or price.

11. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION

a. By submission of this proposal, each offeror certifies and in the case of a joint bid or proposal, each party thereto, certifies as to its own organizations, that in connection with this procurement:

(1) The prices in this proposal have been arrived at independently, without consultation, communication, or agreement, for the purpose of restricting competition, as to any matter relating to such prices with any other offeror or with any competition;

(2) Unless otherwise required by law, the prices which have been quoted in this proposal have not been knowingly disclosed by the offeror and will not knowingly be disclosed by the prior to award, directly or indirectly to any other offeror or to any competitor; and

(3) No attempt has been made or will be made by the offeror to induce any other person or firm to submit or not to submit a proposal for the purpose of restricting competition.

b. Each person signing this proposal certifies that:

(1) He is the person in the offeror's organization responsible within that organization for the decision as to the prices being offered herein and that he has not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above; or

(2) He is not the person in the offeror's organization responsible within that organization for the decision as to prices being offered herein but that he has been authorized in writing to act as agent for the persons responsible for such decision in certifying that such persons have not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above, and as their agent does hereby so certify; and (ii) he has not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above.

c. This certification is not applicable to a foreign offeror submitting a proposal for a contract which requires performance or delivery outside the United States, its possessions, and Puerto Rico.

d. A proposal will not be considered for award where (a)(1), (a)(3), or (b) above has been deleted or modified. Where (a)(2) above has been deleted or modified, the proposal will not be considered for award unless the offeror furnishes with the proposal a signed statement which sets forth in detail the circumstances of the disclosure and the head of the agency, or his designee, determines that such disclosure was not made for the purpose of restricting competition.

12. PRICE STABILIZATION CERTIFICATION

(a) The offeror (Contractor) certifies that he is in compliance with the price stabilization requirements of Executive Order 11723, dated June 13, 1973, and amendments thereof, and the regulations of the Cost of Living Council as set forth in title 6, Code of Federal Regulations, Part 140, or any additions or revisions to title 6.

13. DISCLOSURE STATEMENT—COST ACCOUNTING PRACTICES AND CERTIFICATION

Any contract in excess of $100,000 resulting from this solicitation, except when the price negotiated is based on: (a) Established catalog or market prices of commercial items sold in substantial quantities to the general public, or (b) prices set by law or regulation, shall be subject to the requirements of the Cost Accounting Standards Board. Any offeror submitting a proposal which, if accepted, will result in a contract subject to the requirements of the Cost Accounting Standards Board must, as a condition of contracting, submit a disclosure statement as required by regulations of the Board. The disclosure statement must be submitted as a part of the offeror's proposal under this solicitation (see 1, below) unless (i) the offeror, together with all divisions, subsidiaries, and affiliates under common control, did not receive net awards of negotiated defense prime contracts during the period July 1, 1970, through June 30, 1971, totaling more than $30 million (see 2, below), (ii) the offeror has already submitted a disclosure statement disclosing the practices used in connection with the pricing of this proposal (see 3, below) or (iii) postaward submission has been authorized by the contracting officer.

CAUTION.—A practice disclosed in a disclosure statement shall not, by virtue of such disclosure, be deemed to be a proper, approved, or agreed to practice for pricing proposals or accumulating and reporting contract performance cost data.

() 1. CERTIFICATION OF CONCURRENT SUBMISSION OF DISCLOSURE STATEMENTS

The offeror hereby certifies that he has submitted, as a part of his proposal under this solicitation, copies of the disclosure statements as follows: (i) Original and one copy to the cognizant contracting officer; (ii) one copy to the cognizant contract auditor; and (iii) one copy to the Cost Accounting Standards Board, 441 G Street NW., Washington, D.C. 20548.

| Date of disclosure statement | Name and address of cognizant contracting officers where filed |
|---|---|

The offeror further certifies that practices used in estimating costs in pricing this proposal are consistent with the cost accounting practices disclosed in the disclosure statements.

() 2. CERTIFICATION OF MONETARY EXEMPTION

The offeror hereby certifies that, together with all divisions, subsidiaries, and affiliates under common control, he did not receive net awards of negotiated national defense prime contracts during July 1, 1970, through June 30, 1971, totaling more than $30 million.

() 3. CERTIFICATE OF PREVIOUSLY SUBMITTED DISCLOSURE STATEMENTS

The offeror hereby certifies that the disclosure statements were filed, as follows:

| Date of disclosure statement | Name and address of cognizant contracting officers where filed |
|---|---|

The offeror further certifies that practices used in estimating costs in pricing this proposal are consistent with the cost accounting practices disclosed in this disclosure statement. For additional exemptions, see Federal Procurement Regulations, Temporary Regulation 27 and supplements thereto.

(j) *Noncompetitive procurements.*—For noncompetitive procurements, the RFP shall include the transmittal letter, the offeror's representations and certifications, and the instructions relative to cost and pricing data. The following are the minimum instructions that should be included in the RFP.

INSTRUCTIONS TO OFFEROR

The following instructions establish the acceptable minimum requirements for the format and content of proposals. Special attention is directed to the requirements for technical and business proposals to be submitted in accordance with instructions herein.

GENERAL INSTRUCTIONS

(1) The proposal shall be based on a----------type of contract. In addition to the special provisions of this solicitation, any ensuing contract will include the general provisions for ----------

---

Any additional clauses required by public law, Executive order, or procurement regulations, in effect at the time of execution of the proposed contract, will be included.

(2) The proposal shall be signed by an official authorized to bind your organization. ------ copies of your proposal shall be submitted to:

(Insert complete address as to where the proposal is to be sent and mailing instructions.)

(3) You may, at your discretion, submit alternative proposals, or proposals which deviate from the requirements: *Provided*, That you also submit a proposal for performance of the work as specified in the statement of work. Such proposals may be considered if overall performance would be improved or not compromised; and if they are in the best interests of the Government. Alternative proposals, or deviations from any requirements of this solicitation shall be clearly identified.

(4) The proposal submitted in response to the request for proposal may contain technical data which you or your subcontractor(s) do not want used or disclosed for any purpose other than evaluation of your proposal. The use and disclosure of any such data may be so restricted; *Provided*, That you mark the cover sheet of the proposal with the following legend, specifying the pages of the proposal which are to be restricted in accordance with the conditions of the legend.

"Technical data contained in pages ------ of this proposal shall not be used or disclosed, except for evaluation purposes, *Provided*, That if a contract is awarded to this offeror as a result of or in connection with the submission of this proposal the Government shall have the right to use or disclose this technical data to the extent provided in the contract. This restriction does not limit the Government's right to use or disclose technical data obtained from another source without restriction."

The Government assumes no liability for disclosure or use of unmarked technical data and may use or disclose the data for any purpose and may consider that the proposal was not submitted in confidence and therefore releasable under the Freedom of Information Act (5 U.S.C. 552).

(5) The Government reserves the right to reject any or all proposals received. It is understood that your proposal will become a part of the official file on this matter without obligation to the Government.

## CHAPTER 114—DEPARTMENT OF THE INTERIOR

## PART 114-50—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

### Miscellaneous Amendments

On April 13, 1973, there was published in the FEDERAL REGISTER (38 FR 9302) a proposal to amend the regulations implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 84 Stat. 1894, 1900, 42 U.S.C. 4601, 4633.

Forty-five days were given within which any interested person wishing to do so could file written comments, suggestions, or objections regarding the proposed revisions with the Office of Management Operations, Office of the Secretary, 18th and C Streets NW., Washington, D.C.

Comments on the proposed revisions were received from one organization. These comments suggested that the Department modify its regulations relating to computation of the rental replacement housing payment so as to ensure that the rental differential payment will be within the financial means of the displaced person in any case where the displacee is currently paying an excessive amount for rent. Guidelines covering this particular situation are currently under consideration by an Interagency Working Group. The Department proposes to adopt the interagency decision in this matter which will be published as guidelines in the form of a General Services Administration Federal Management Circular. Accordingly, the proposed amendments are adopted without change as set forth below, effective on September 10, 1973.

JAMES T. CLARKE,
*Assistant Secretary of the Interior.*

SEPTEMBER 4, 1973.

The table of contents for subpart 114-50.1 is revised as follows:

Change "114-50.109 (Reserved)" to read "114-50.109 Multiple Occupancy."

The table of contents for subpart 114-50.10 is revised to read as follows:

Subpart 114-50.10—Federally Assisted Programs

| Sec. | |
|---|---|
| 114-50.1000 | Acceptance of real property furnished by a State incident to Federal program. |
| 114-50.1001 | Assurances—section 210. |
| 114-50.1002 | Assurances—section 305. |
| 114-50.1003 | [Reserved] |
| 114-50.1004 | Compliance with sections 301 and 302. |
| 114-50.1005 | Inability to provide assurances prior to July 1, 1972. |
| 114-50.1006 | Inability to provide assurance for programs or projects causing displacement on or after July 1, 1972. |
| 114-50.1007 | Monitoring assurances. |
| 114-50.1008 | Grants, contracts, or agreements executed prior to July 1, 1972. |
| 114-50.1009 | Federal share of costs. |
| 114-50.1010 | Relocation assistance programs. |
| 114-50.1011 | Effective date. |
| 114-50.1012 | Appeal procedures. |

### Subpart 114-50.1—General

Section 114-50.109 is revised to read as follows:

§ 114-50.109 Multiple occupancy.

Where two or more individuals, not families, living together in a single family dwelling are displaced from such dwelling, they shall be treated as one displaced person for purposes of entitlements for replacement housing benefits under sections 203 and 204 of the act. However, each individual displaced may receive a payment for actual reasonable moving expenses as authorized under section 202(a) of the act, and in the case of families, each family shall be considered separately.

### Subpart 114-50.7—Payments in Lieu of Moving and Related Expenses

Two new paragraphs (a) and (b) are added to § 114-50.701 reading as follows:

§ 114-50.701 Displaced dwelling occupant.

• • • • •

(a) Only those persons who are displaced from a dwelling, as defined in

[1] For definition of "cost or pricing data," see FPR § 1-3.807-3.

[2] Describe the proposal, quotation, request for price adjustments, or other submission involved, giving appropriate identifying number (e.g., RFP No. ----------).

[3] This date shall be the date when the price negotiations were concluded and the contract price was agreed to. The responsibility of the contractor is not limited by the personal knowledge of the contractor's negotiator if the contractor had information reasonably available (see § 1-3.807-5(a)) at the time of agreement showing that the negotiated price is not based on accurate, complete, and current data.

[4] This date should be as close as practicable to the date when the price negotiations were concluded and the contract price was agreed upon.

V38-174 SEP 10 73 XUM

§ 114–50.201(h), may elect to receive the payment authorized under section 202(b) of the act in lieu of payment for actual reasonable moving expenses.

(b) Where two or more individuals, not families, living together in a single family dwelling are displaced from such dwelling, they shall be treated as one displaced person for purposes of entitlements under this § 114–50.701.

**Subpart 114–50.9—Replacement Housing Payment for Tenants and Certain Others**

A new paragraph (e) is added to § 114–50.903 to read as follows:

**§ 114–50.903 Computation of replacement housing rental differential payment for tenants.**

* * * * *

(e) The amount determined in accordance with this section 114–50.903 to be necessary to rent a comparable replacement dwelling, sets the upper limit of this payment. Where the amount of rent actually paid by the displaced person for a decent, safe, and sanitary replacement dwelling is less than the upper limit, computation of the differential payment shall be based on the amount of rent actually paid. However, the amount initially established as the differential payment shall not be adjusted to compensate for subsequent increases or decreases, if any, in the amount of rent actually paid by the displacee.

**Subpart 114–50.10—Federally Assisted Programs**

**§ 114–50.1003 [Reserved]**

A new § 114–50.1003 is inserted in subpart 114–50.10 and existing §§ 114–50.1003 through 114–50.1011 are renumbered 114–50.1004 through 114–50.1012, respectively. New § 114–50.1003 reads as set forth above.

In existing § 114–50.1008(c), which is renumbered § 114–50.1009(c), change the reference to "§ 114–50.1008" to read "§ 114–50.1009".

[FR Doc.73–19098 Filed 9–7–73;8:45 am]

## Title 43—Public Lands: Interior

### CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

### SUBCHAPTER C—MINERALS MANAGEMENT (3000)

[Circular 2350]

### PART 3830—LOCATION OF MINING CLAIMS

**Subpart 3831—Rights to Mineral Lands**

LOCATION OF PLACER CLAIMS

The purpose of this amendment is to correct an omission in § 3831.1 of the regulations which deals with the location of mining claims. On March 31, 1964, regulations then found at 43 CFR 185.3 were changed to eliminate repetitions and provisions made obsolete by law or the expiration of law. It was stated in the preamble of that rulemaking that no substantive changes to the regulations were intended.

A substantive change was inadvertently made, however, by omission of a footnote referring to the staking of placer claim locations. Present regulations in § 3831.1 provide in part that: "A location is made by staking the corners of the claim, * * *" The exception to this rule, which was omitted in the March 31, 1964, revision, is that placer claims may, by virtue of State law, be located by legal subdivision. States which presently provide for location in this manner are California, Nevada and Oregon.

Federal law governing location is broadly written and provides for the following of local rules. 30 U.S.C. 28 (1970) provides, in part: "The miners of each mining district may make regulations not in conflict with the laws of the United States, or with the laws of the State or Territory in which the district is situated, governing the location, manner of recording, amount of work necessary to hold possession of a mining claim, subject to the following requirements: "The location must be distinctly marked on the ground so that its boundaries can be readily traced * * *."

This amendment reinserts into the regulations the omitted provision for locating placer claims by legal subdivision where permitted by State statute.

It is the policy of the Department of the Interior to give notice of proposed rulemaking and to invite the public to participate in rulemaking except where such participation would be impracticable, unnecessary or contrary to the public interest and a specific finding to this effect is published with the rules or regulations (36 FR 8336, May 4, 1971). Public participation is unnecessary in this case since this amendment merely corrects an oversight in codifying long standing rules.

The amendment is adopted as set forth below and is, in fact, retroactive to March 31, 1964, the date of omission from the regulations.

Section 3831.1 of Subpart 3831 of Chapter II is revised to read:

**§ 3831.1 Manner of initiating rights under locations.**

Rights to mineral lands, owned by the United States, are initiated by prospecting for minerals thereon, and, upon the discovery of minerals, by locating the lands upon which such discovery has been made. A location is made by (a) staking the corners of the claim, except placer claims described by legal subdivision where State law permits locations without marking the boundaries of the claims on the ground, (b) posting notice of location thereon, and (c) complying with the State laws, regarding the recording of the location in the county recorder's office, discovery work, etc. As supplemental to the United States mining laws there are State statutes relative to location, manner of recording of mining claims, etc., in the State, which should also be observed in the location of mining claims. Information as to State laws can be obtained locally or from State officials.

JACK O. HORTON,
*Assistant Secretary of the Interior.*

AUGUST 31, 1973.

[FR Doc.73–19101 Filed 9–7–73;8:45 am]

### SUBCHAPTER D—RANGE MANAGEMENT (4000)

[Circular 2349]

### PART 4710—WILD FREE-ROAMING HORSE AND BURRO MANAGEMENT

**Protection, Management, Control and Reservation of Forage; Correction**

The purpose of this amendment is to incorporate in § 4712.1–2 the word "or" in the third line between the words "use" and "on", which was inadvertently omitted from the regulation when it was originally published in 38 FR 22004, August 15, 1973.

Since this amendment merely corrects an inadvertent typographical omission it is determined that the public participation procedure for proposed rulemaking is unnecessary. This amendment is hereby adopted and § 4712.1–2 as corrected is set forth below and shall be effective on September 7, 1973.

JACK O. HORTON,
*Assistant Secretary of the Interior.*

AUGUST 31, 1973.

**§ 4712.1–2 Intensity of management.**

Wild free-roaming horse or burro herds may be managed either as one of the components of public land use or on a specifically designated wild horse or burro range. Management practices shall be at the minimal feasible level and shall be consistent to the extent possible and practical with the maintenance of their free-roaming behavior. Management facilities should be designed and constructed to the extent possible to maintain the free-roaming behavior of the herds.

[FR Doc.73–19100 Filed 9–7–73;8:45 am]

## Title 50—Wildlife and Fisheries

### CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

### PART 32—HUNTING

The following special regulation is issued and is effective on September 10, 1973.

**§ 32.12 Special regulations; migratory game birds, for individual wildlife refuge areas.**

UTAH

FISH SPRINGS NATIONAL WILDLIFE REFUGE

The public hunting of ducks, coots, and mergansers on the Fish Springs National Wildlife Refuge, Utah, is permitted from October 6, 1973, through January 6, 1974, inclusive, but only on the area designated by signs as open to hunting. This open area comprises 7,192 acres and is delineated on maps available at refuge headquarters, 66 miles southwest of Dugway, Utah 84022, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West 6th Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all State and Federal regulations covering the hunting of ducks, coots, and mergansers, subject to the following special conditions:

(1) All hunters must register at the Visitor Information Station prior to hunting.

(2) Shooting upon or across dikes or roads is prohibited.

(3) Use of small boats, canoes, etc. is permitted during the hunting season, but no outboard motors or air thrust boats are allowed.

(4) Dogs may be used for hunting, but are to be kept under control at all times.

The provisions of these special regulations supplement the regulations that govern hunting on wildlife refuge areas generally that are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 6, 1974.

Dated August 30, 1973.

LELAND E. HERZBERGER,
*Refuge Manager, Fish Springs National Wildlife Refuge, Dugway, Utah.*

[FR Doc.73–19150 Filed 9–7–73;8:45 am]

### PART 32—HUNTING

**Certain National Wildlife Refuges in Idaho**

The following regulations are issued and are effective on September 10, 1973. These regulations apply to public hunting on portions of certain National Wildlife Refuges in Idaho.

*General conditions.*—Hunting shall be in accordance with applicable State regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. Special conditions applying to individual refuges are listed on the reverse side of the refuge hunting maps. No vehicle travel is permitted except on maintained roads and trails. Maps are available at refuge headquarters and from the office of the Regional Director, 1500 Northeast Irving Street, Portland, Oregon 97208.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

Waterfowl and coot may be hunted on the following refuge areas:

Bear Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83276.

Special condition. The use of airthrust boats is prohibited.

Camas National Wildlife Refuge, Hamer, Idaho 83425.

Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651.

Kootenai National Wildlife Refuge, Star Route #1, Box 88, Bonners Ferry, Idaho 83805.

Special condition. Hunting permitted only Sundays, Tuesdays, Thursdays, and Saturdays.

Minidoka National Wildlife Refuge, Route 4, Rupert, Idaho 83350.

**§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.**

Upland game birds may be hunted on the following refuge areas:

Bear Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83276.

Camas National Wildlife Refuge, Hamer, Idaho 83425.

Special condition. Pheasant and sage grouse only may be hunted.

Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651.

Kootenai National Wildlife Refuge, Star Route #1, Box 88, Bonners Ferry, Idaho 83805.

Special condition. Pheasants may be hunted only Sundays, Tuesdays, Thursdays and Saturdays.

Minidoka National Wildlife Refuge, Route 4, Rupert, Idaho 83350.

**§ 32.32 Special regulations; big game; for individual wildlife refuge areas.**

Big game animals may be hunted on the following refuge areas:

Camas National Wildlife Refuge, Hamer, Idaho 83425.

Special condition. Antelope only may be hunted.

Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651.

Special condition. Deer may be hunted on the Snake River Island sector only.

Grays Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83276.

Kootenai National Wildlife Refuge, Star Route # 1, Box 88, Bonners Ferry, Idaho 83805.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through June 30, 1974.

L. EDWARD PERRY,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

[FR Doc.73–19091 Filed 9–7–73;8:45 am]

### PART 32—HUNTING

**Certain National Wildlife Refuges in Nevada**

The following regulations are issued and are effective on September 7, 1973. These regulations apply to public hunting on portions of certain National Wildlife Refuges in Nevada.

*General conditions.*—Hunting shall be in accordance with applicable State regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on maintained roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1500 Northeast Irving Street, Portland, Oregon 97208.

**§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.**

Migratory game birds may be hunted on the following refuges:

Fallon National Wildlife Refuge, P.O. Box 592, Fallon, Nevada 89406.

Pahranagat National Wildlife Refuge, P.O. Box 232, Alamo, Nevada 89001.

Special conditions. (1) The use of motors on boats is not permitted.

(2) Refuge closed to goose hunting.

Ruby Lake National Wildlife Refuge, Ruby Valley, Nevada 89833.

Special condition. Waterfowl and snipe only may be hunted.

Stillwater Wildlife Management Area, P.O. Box 592, Fallon, Nevada 89406.

**§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.**

Upland game may be hunted on the following refuge areas:

Fallon National Wildlife Refuge, P.O. Box 592, Fallon, Nevada 89406.

Pahranagat National Wildlife Refuge, P.O. Box 232, Alamo, Nevada 89001.

Charles Sheldon Antelope Range, Nevada (Headquarters: P.O. Box 111, Lakeview, Oregon 97630).

Stillwater Wildlife Management Area, P.O. Box 592, Fallon, Nevada 89406.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through June 30, 1974.

L. EDWARD PERRY,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

[FR Doc.73–19092 Filed 9–7–73;8:45 am]

### PART 32—HUNTING

**Wheeler National Wildlife Refuge, Ala.**

The following special regulations are issued and are effective on September 10, 1973.

**§ 32.12 Special regulations; migratory birds; for individual wildlife refuge areas.**

ALABAMA

WHEELER NATIONAL WILDLIFE REFUGE

Hunting of geese, ducks, and coots on the Wheeler National Wildlife Refuge, Ala., is suspended for the 1973–74 season due to a serious decline in numbers of wintering geese in the refuge area.

C. EDWARD CARLSON,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 29, 1973.

[FR Doc.73–19095 Filed 9–7–73;8:45 am]

V 38-174 SEP 10 73 XUM

## PART 32—HUNTING

### Certain National Wildlife Refuges

The following special regulations are issued and are effective on September 5, 1973.

§ 32.22 Special regulations; upland game; for individual refuge areas.

ARKANSAS

BIG LAKE NATIONAL WILDLIFE REFUGE

Public hunting of squirrels and raccoons on Big Lake National Wildlife Refuge, Arkansas, is permitted on the entire refuge except for the area ¼ mile north and ¼ mile south of refuge headquarters, and other areas which may be designated as closed by marking with "Closed Area" signs. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of upland game subject to the following special conditions:

(1) Squirrel hunting permitted in accordance with State regulations, except season closes on the refuge the day duck season in the State opens. Dogs are not permitted.

(2) Raccoon hunting permitted from October 15, 1973, until opening day of the duck hunting season in the State. Hunting will open at 12:00 noon on October 15. Hunting permitted 24 hours per day. No limit on the number of coons that can be taken per day. Dogs required during night hunts.

(3) Shotguns or rifles not larger than .22 caliber may be used.

(4) Persons are prohibited from possessing, while on the refuge, either on their person or in their vehicle, game for which there is not an open season on the refuge.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through March 1, 1974.

LOUISIANA

CATAHOULA NATIONAL WILDLIFE REFUGE

Public hunting of squirrels on the Catahoula National Wildlife Refuge is permitted on the timbered portions of the refuge. Hunting shall be in accordance with State regulations governing the hunting of squirrels except that the season extends from October 6–19, 1973. Hunters may enter the area 30 minutes prior to legal shooting time (30 minutes before sunrise) and must be out of the refuge 30 minutes after legal shooting hours (30 minutes after sunset). Unmarked feral hogs may be taken by squirrel hunters. No vehicles with tires larger than 9.00 x 16'' can be used on the refuge. All vehicles must remain on established roads and trails.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 19, 1973.

MISSISSIPPI

YAZOO NATIONAL WILDLIFE REFUGE

Public hunting of raccoons and opossums on the Yazoo National Wildlife Refuge, Mississippi, is permitted only on the areas designated by signs as open to hunting. These open areas, comprising approximately 10,500 acres, are delineated on a map available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Georgia 30339. Hunting shall be in accordance with all applicable State regulations governing the hunting of raccoons and opossums subject to the following special conditions:

(1) The open season extends from December 1–15, 1973, Sundays excluded, from dark to daylight.

(2) The use of dogs is optional.

(3) Firearms: Shotguns, 10 gauge or smaller (no buckshot or slugs permitted, possession illegal), rifles limited to .22 caliber (22 magnum and 222 rifles prohibited). All shotguns must be plugged to hold three shells. Sidearms (pistols and revolvers) prohibited.

(4) No firearms may be discharged within 250 yards of refuge headquarters or residences.

(5) Carrying of loaded firearms in vehicles is prohibited and shooting from vehicles or shooting from or across State or County roads is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 15, 1973.

C. EDWARD CARLSON,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 29, 1973.

[FR Doc.73-19096 Filed 9-7-73;8:45 am]

## PART 32—HUNTING

### Noxubee National Wildlife Refuge, Miss.

The following special regulations are issued and are effective on October 15, 1973.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

MISSISSIPPI

NOXUBEE NATIONAL WILDLIFE REFUGE

Hunting shall be in accordance with applicable State regulations. Portions of the refuge which are open to hunting are designated by signs and delineated on maps available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Georgia 30329. Squirrels, rabbits, quail, turkey, raccoons, and opossum may be hunted in accordance with the following special conditions:

(1) Squirrels and rabbits may be hunted October 15–November 17, 1973.

(2) Quail may be hunted December 28, 1973–February 19, 1974.

(3) Turkey (gobblers only) may be hunted March 23–April 21, 1974.

(4) Raccoons and opossums may be hunted January 1–31, 1974. Hunt hours are from sunset to sunrise only.

(5) Sunday hunting is prohibited.

(6) Fires and cutting of trees are not permitted.

(7) Primitive camping is permitted in designated camping area only.

(8) Dogs are permitted during the quail, raccoon and opossum hunt only.

(9) Turkeys killed must be checked at refuge headquarters.

(10) Raccoons and opossums may be hunted only with .22 caliber firearms.

(11) Squirrels and rabbits may be hunted only with shotguns shooting No. 4 shot or smaller and .22 caliber rim fire guns.

(12) Quail may be hunted only with shotguns shooting No. 6 shot or smaller.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through April 21, 1974.

PHILLIP S. MORGAN,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 30, 1973.

## PART 32—HUNTING

### Catahoula National Wildlife Refuge, La.

The following special regulations are issued and are effective on September 10, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

LOUISIANA

CATAHOULA NATIONAL WILDLIFE REFUGE

Hunting of white-tailed deer on the Catahoula National Wildlife Refuge is suspended for the 1973–74 season because of damage to habitat by unusually high and prolonged flood waters and resulting stress on the deer population.

C. EDWARD CARLSON,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

AUGUST 29, 1973.

## PART 32—HUNTING

### Shiawassee National Wildlife Refuge, Mich.

The following special regulation is issued and is effective on September 10, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

MICHIGAN

SHIAWASSEE NATIONAL WILDLIFE REFUGE

Public hunting of deer with bow and arrow is permitted on the entire refuge

area from 6:00 a.m. to 7:00 p.m. each day from December 1, 1973, through December 31, 1973, only.

Hunting shall be in accordance with all State regulations covering the hunting of deer, subject to the following conditions:

(1) All hunters must exhibit their hunting license, deer tag, game, and vehicle contents to Federal and State Officers upon request.

(2) Bow and arrow hunting will be by valid Federal permit only from December 1, 1973, through December 9, 1973. No permit will be required from December 10, 1973, through December 31, 1973.

(3) Applications for bow and arrow hunting permit must be received at the refuge office on or before October 31, 1973.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

ROBERT H. TIMMERMAN,
*Refuge Manager, Shiawassee National Wildlife Refuge, Saginaw, Michigan.*

# Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 52 ]

### UNITED STATES STANDARDS FOR GRADES OF FROZEN CARROTS

### Proposed Amendments

Notice is hereby given that the United States Department of Agriculture is considering an amendment to the United States Standards for Grades of Frozen Carrots (7 CFR 52.701–52.711) pursuant to the authority contained in the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090, as amended, 7 U.S.C. 1624).

NOTE.—Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable state laws and regulations.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed amendment should file the same in duplicate by October 31, 1973, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250. All written submissions made pursuant to this notice will be available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

*Statement of consideration leading to the proposed amendment.*—The current United States Standards for Grades of Frozen Carrots have been in effect since 1962. The Department has received a request from the American Frozen Food Institute to increase the amount of allowable diameter variation between the largest and smallest carrots in U.S. Grade A whole style frozen carrots from 50% to 100%.

After careful consideration, the Department concurs with the request. The Grade A whole carrots that are currently marketed are generally quite small. The Department therefore concludes that (among such small units) that if the diameter of the largest carrot is not more than twice the diameter of the smallest carrot, the appearance or eating quality would not be affected to a noticeable degree.

In addition, the Department recommends that the allowable variation of size be extended (in like manner) to include the halved and quartered styles of frozen carrots.

In consideration thereof, the proposal would amend the requirements for uniformity of size and shape as applicable only:

(1) To the whole, halved and quartered styles; and

(2) To U.S. Grade A (or U.S. Fancy).

The amendment proposed is:

In Part 52, Subpart—United States Standards for Grades of Frozen carrots, in Table I, the (A) Classification portion only is deleted and the following tabular material substituted in lieu thereof:

(A)—CLASSIFICATION

| Styles | Measurement and/or shape of individual units | Uniformity in 90 percent by count, of units that are most uniform |
|---|---|---|
| Whole | 1⅜-inch maximum diameter | Unit with largest diameter, or width, is not more than twice that of unit with smallest diameter, or width. |
| Halved | 1½-inch maximum width | |
| Quartered | 1¼-inch maximum width | |
| Sliced | 2-inch maximum diameter; Approximate ¾-inch maximum thickness. | Unit with largest diameter is not more than twice that of unit with smallest diameter and uniformity of thickness does not vary markedly. |
| Diced | Approximate cube-shapes, ½ inch or less in size. | 10%, by weight, maximum may be other shapes and sizes.[1] |
| Double-diced | Approximate double-cube shapes, 1 inch or less long; ½ inch or less in cross-section diameter. | 12%, by weight, maximum may be other shapes and sizes.[1] |
| Strips | Approximate french-cut shapes, ½ inch or more long. | 12%, by weight, maximum may be less than ½ inch long. |
| Cuts | Units may vary considerably in size and shape provided over-all appearance is not materially affected. | |
| Chips | [Limited to Grade B or lower] | |

[1] Provided, presence of very small pieces does not materially affect appearance of product.

Authority.—Sec. 205, 60 Stat. 1090, as amended, 7 U.S.C. 1624.

Dated August 31, 1973.

### [ 7 CFR, Part 1073 ]

[Docket No. AO 173-A29]

### MILK IN THE WICHITA, KANSAS, MARKETING AREA

### Decision on Proposed Amendments to Marketing Agreement and to Order

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Wichita, Kansas, marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR, Part 900), at Wichita, Kansas, on April 3, 1973, pursuant to notice thereof issued on March 14, 1973 (38 FR 7234).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on June 25, 1973 (38 FR 17240), filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to the following modification: "3. Designating a cooperative as the handler on bulk tank milk," is completely changed.

The material issues on the record of the hearing relate to:

1. Diversion of producer milk.
2. Pool plant qualifications.
3. Designating a cooperative as the handler on bulk tank milk.
4. Reports included in uniform price computation.
5. Need for emergency action.

lowing findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Diversion of producer milk.* Milk diverted by a cooperative from pool plants to nonpool plants should be limited to a quantity not greater than the total producer milk physically received at all pool plants from the cooperative during the month; and milk diverted by the proprietary operator of a pool plant should not exceed the quantity of nonmember producer milk physically received at his plant. All diverted milk should be priced at the location of the plant to which diverted and only the milk of those producers from whom not less than 15 percent of their production during the month was physically received at a pool plant should qualify as diverted milk.

Diverted milk is now priced at the plant from which diverted, and none of a producer's milk must be received at a pool plant during the month to qualify his shipments to a nonpool plant as diverted milk. Also, no limitations now apply to the quantities of milk that cooperatives and proprietary handlers may divert in any month.

The changes in the diversion provisions adopted in this decision reflect substantially those proposed, and supported at the hearing, by the major cooperative in the market. It contended that, because they provide a means of associating milk with the market solely for manufacturing purposes at the expense of producers who regularly supply the market and on whom the market depends for its Class I needs, the present diversion provisions are inappropriate under current conditions in the Wichita order market. No testimony was presented in opposition to the cooperative's proposals to revise the order's diversion provisions.

The purpose of the diversion provisions is to facilitate marketing the reserve milk that is a necessary part of the market supply. Because of variations in market needs and in production, the milk of each producer is not needed every day for processing as fluid milk at the plant to which it is customarily delivered. It is necessary, however, that there be a reserve of qualified milk available for the fluctuating needs of handlers serving the market. At times, therefore, when milk of a dairy farmer regularly supplying the market is not needed at the plant to which it is usually shipped, it can be handled most economically by moving it as diverted milk from the farm to a nonpool manufacturing plant.

Only that milk from dairy farmers genuinely associated with the market, as evidenced by their deliveries to pool plants, should be eligible for diversion to nonpool plants. Otherwise, it cannot be said that such dairy farmers are supplying the Class I needs of the market. Therefore, it is provided that at least 15 percent of the production of a producer must be received at a pool plant during the month to qualify any of his production in the same month for diversion. The requirement herein adopted, which was proposed by proponent cooperative, is sufficient to establish a producer's continuing association with the fluid market and still permit the necessary flexibility in diverting milk not needed for fluid use.

Limiting diversions of producer milk by cooperatives and proprietary handlers to the quantities delivered to pool plants in the same month, as proposed by the cooperative, are reasonable standards under current conditions in the Wichita market. In conjunction with the order's performance requirements for pool plants, they will implement orderly marketing by facilitating the movement of reserve supplies of producer milk to the most practicable outlet.

Milk diverted to nonpool plants in excess of the limitations provided should not be considered producer milk. Hence, eligibility for pricing and pooling under the order would be forfeited on a quantity of milk equal to such excess. It would be the responsibility of the diverting handler to specify which milk is ineligible as producer milk. If the handler fails to make such designation, and the market administrator is unable to determine which milk is overdiverted, all milk diverted to nonpool plants by such handler would be ineligible as producer milk.

Providing for the diversion of producer milk to an other order plant for manufacturing purposes will contribute to orderly marketing. In some instances, a pool plant operator may find that his most desirable outlet for this purpose is an other order plant. Specifying under the order that such milk may be diverted as producer milk if a Class II or Class III classification is designated for such milk pursuant to the other order will tend to insure the integrity of both orders. Otherwise, such milk's eligibility to be included under a Federal order would more appropriately be determined at the other order plant where received. Diversion to such plants, if permitted unconditionally, could result in the pricing and pooling of the same milk under two orders.

As a corollary change, when milk from a dairy farmer is received at a pool plant as diverted from an other order plant, it should not be eligible for pooling as the milk of a producer under this order if a Class II or Class III classification under this order is designated for such milk and it is subject to the pricing and pooling provisions of another order.

The order's location adjustments recognize the greater value of producer milk f.o.b. plants in or near the principal population centers in the marketing area as compared to its value at other locations. In view of this, it would be inconsistent to continue to price milk as if delivered to a plant in or near the principal population centers in the market when actually delivered as diverted milk to a nonpool plant at a location at which a different price is appropriate based on the location adjustment that would be applicable to a pool plant at the same location.

When producer milk is received as diverted milk at a nonpool plant, its location value is similar to that of milk delivered by producers to a pool plant at the same distance from the market. Pricing milk at the location of the pool plant from which diverted (as now provided in the order) tends to subsidize, at the expense of producers generally, the more distant producers when the latter's milk is diverted to distant manufacturing plants rather than delivered to the market center. This is because the distant producers receive the f.o.b. market uniform price on milk that is not moved to the market and on which the full cost for the farm to market hauling has not been incurred.

2. *Pool plant qualifications.* The pooling percentage qualification for a distributing plant should be based on its total receipts of fluid milk products plus milk diverted from such plant under the diversion limits. Similarly, the quantities of milk on which the pooling percentage qualification of a supply plant is based should include milk diverted from the plant in addition to its receipts of producer milk. Qualifying percentages (unchanged by this decision) are now based on the producer milk physically received at a plant plus, in the case of distributing plants, receipts from supply plants.

"Automatic" pool status in January through August should be accorded a supply plant that was a pool plant in the preceding September through December. Automatic pooling is now provided in December–July for a supply plant that qualified as a pool plant in the preceding August–November.

A cooperative "balancing plant" should be designated a pool plant for the month if 50 percent (now 60 percent) of the producer milk of its members was received at pool plants during the month.

The proposals to amend the pooling provisions were made by the principal cooperative in the market. It stated that the present provisions are inappropriate under current conditions by providing undue incentive for pooling plants that have no real association with the market and on which the market cannot depend for its fluid needs. The changes proposed, according to the cooperative, are necessary to avoid possible dilution of returns to producers that would result from attaching milk supplies to the Wichita pool largely predestined for manufacturing.

The cooperative proposed increasing the monthly route disposition requirement for pooling distributing plants from 35 percent (25 percent in March–July) of a plant's receipts to 50 percent in all months. As proposed, the percentage would be based on a plant's total receipts of all fluid milk products (except filled milk) plus diverted milk. The percentage is now computed only on the basis of the total producer milk physically received from farms at the plant and receipts from supply plants. The cooperative also proposed that the present pooling requirement that not less than 10 percent of a distributing plant's receipts be disposed of on routes in the marketing area be changed to 15 percent of total route disposition from the plant.

The pooling qualifications for a distributing plant should be based on its route disposition relative to the quantity of approved fluid milk products physically received at such plant plus the milk of producers diverted therefrom by the plant operator or the cooperative through which the producers' milk is

V 38-174 SEP 10 73 XUM

marketed. All such milk is essentially an integral part of the plant's supply. It is appropriate, therefore, in determining a plant's pool status, to consider as its total supply all milk diverted from the plant together with all approved fluid milk products physically received at the plant. It is not necessary for this purpose to specify that such receipts be producer milk or receipts from supply plants, as now specified in the order, but should include approved milk from any source.

As indicated above, diverted milk may now be pooled without being considered as a part of the supply of the plant from which diverted in determining its qualifications to pool. In the case of a distributing plant receiving its total supply from producers, if 50 percent of producer milk associated with such plant is diverted without being counted as part of the plant's supply, the route disposition percentage requirement for pooling the plant is, in effect, reduced by 50 percent as compared to a plant that diverted no milk during the month.

Similarly, if 50 percent of producer milk associated with a pool supply plant were pooled by diversion to nonpool manufacturing plants, the supply plant, by shipping half the milk physically received at such plant to pool distributing plants, would remain pooled. In this circumstance, the plant could qualify as a pool plant by shipping as little as 25 percent of its producer milk to pool distributing plants. On the other hand, a supply plant that diverted no milk would have shipped 50 percent of its actual producer receipts to qualify for pooling.

The requirements adopted for both types of plants will provide a more equitable basis for pooling.

The quantities of fluid milk products physically received at or diverted from plants in determining their pool status should be that milk approved for fluid consumption by a "duly constituted regulatory agency." The terms "duly constituted health authority" and "approved health authority" are now used in the order to designate such approved milk. The cooperative spokesman suggested that the term "duly constituted regulatory agency" would be more appropriate in referring to approved milk throughout the order. That term is more inclusive than the designations now used for agencies having jurisdiction in this field. The agency responsible for approving milk for fluid consumption is not always specifically designated as a health authority. In some states, for example, this function is the responsibility of the state Department of Agriculture.

The cooperative's proposals to increase the monthly route disposition requirement for pooling a distributing plant from 35 percent (25 percent in March–July) of a plant's receipts to 50 percent in all months and to change the requirement for route disposition in the marketing area from 10 percent of a plant's receipts to 15 percent of the plant's total route disposition were intended to insure that only bona fide plants regularly associated with the market are pooled under the order. It can reasonably be expected that the present route disposition percentage requirements in conjunction with the changes in the other pooling provisions adopted in this decision (e.g., basing the route disposition percentage requirements on a plant's receipts of fluid milk products plus milk diverted from the plant instead of on the plant's receipts only) will substantially tend to achieve this end. In this circumstance, no change should be made on the basis of this record in the route disposition percentage requirements for pooling distributing plants.

As proposed by the cooperative, "automatic" pool status in January–August should be accorded a supply plant that qualified as a pool plant in the preceding September–December. Automatic pooling is now accorded in December–July to a plant that was a pool supply plant in the preceding August–November. In effect, August would replace December as one of the four months during which a supply plant must qualify as a pool plant to obtain automatic pool status for the eight other months of the year.

The proposed September–December qualifying period is the period of the year when supply for the market is lowest relative to fluid demand. Replacing August with December in this four-month qualifying period recognizes the change in recent years in seasonal production for the market. Although production for the market relative to demand was generally lower in August than December in the past, this is not the case now. In 1970, 1971 and 1972, for example, the proportion of producer milk used in Class I was significantly greater in December than in August. The December Class I utilization of producer milk in this three-year period exceeded that for August by an average of 5.5 percentage points. The average Class I utilization of producer milk during this period was 79.9 percent for December and 74.4 percent for August.

The cooperative's proposal to require a plant that was a pool supply plant in the preceding September-December to ship also at least 20 percent of its receipts to pool distributing plants in each subsequent month of January-August is denied. Such a plant is not now required to make any shipments to be pooled in the latter months. No testimony presented by proponent was directed specifically to the need or justification for this change in this market. It is highly questionable that in this relatively small market regular supplies of milk could be most economically handled if every plant (that might have demonstrated its regular association with the market in the preceding period of low production) were required to ship milk in the seasonally high production months when the milk is not needed for fluid processing.

A plant operated by a cooperative is now accorded pool plant status if not less than 60 percent of its producer members' milk is received at pool plants, either by direct delivery from producers' farms or as a transfer from the cooperative's plant. A plant that would qualify as a pool plant under this provision is commonly referred to as a "balancing plant."

The cooperative proposed changing the percentage qualification for a balancing plant to 50 percent (from 60 percent) of its producer members' milk received at pool distributing plants (instead of at pool distributing plants and at pool supply plants), either by direct delivery from producers' farms or as a transfer from the balancing plant. In addition, it proposed that the order be changed to require that such a plant be located in the marketing area.

A plant operated by the proponent cooperative (which incidentally now qualifies for pooling by meeting the shipping requirements for a supply plant) also serves the market as a balancing plant. In that capacity, it enables pool distributing plants to tailor their receipts each day to their bottling needs. A bottling plant that receives milk by direct delivery from the farms of designated producer members of the cooperative may accept a part or none of such deliveries on any day. That is, the total deliveries of such producers on the days the bottling plant is not operated, and the amounts in excess of its Class I needs on other days, are received at the cooperative's plant. When the direct deliveries of the producers assigned to such a distributing plant are inadequate for its needs, it obtains supplemental supplies from the cooperative's plant.

The cooperative's plant is the only pool supply plant now on the market. If this plant were to qualify for pooling as a balancing plant, rather than by meeting the shipping percentage as it now does, it would be on the basis of supplying the supplemental needs of pool distributing plants and receiving any producer member milk when it was not needed at such plants. Since the services provided by a balancing plant concern only pool distributing plants, milk received at or shipped to pool supply plants should not be included in the computation to determine a balancing plant's percentage qualification to pool.

The cooperative claims that changing conditions may make it increasingly difficult to qualify its plant for pooling on the basis of its shipping performance as a supply plant. This is because the cooperative's plant is operated to a substantial degree in carrying out the supply equalizing, or balancing function. The cooperative indicated it may need to qualify its plant under the pooling standards for a balancing plant instead of those for a supply plant. In that circumstance, the present pooling requirement for a balancing plant (supplying at least 60 percent of its total producer milk receipts to pool plants) could force it to make some unnecessary and uneconomic movements of milk.

Requiring at least 50 percent of a cooperative's member producer milk be received at pool distributing plants during the month, either by direct delivery from such members' farms or as a shipment from the cooperative's balancing plant, as proposed by the cooperative, is a reasonable basis to qualify a balancing plant for pooling in any month. The 50 percent rate is fully adequate for determining association with the market and provides sufficient safeguard against a cooperative's qualifying a plant to pool as a balancing plant in order to exploit the pool.

The proposal that a cooperative's plant must be located in the marketing area to qualify for pooling as a balancing plant should not be adopted. Proponent stated that such a provision would prevent the pooling of unneeded milk supplies, and would thereby insure that the balancing plant was genuinely associated with the market.

As above-stated, the primary function of a balancing plant is to receive a cooperative's producer member milk when it is not needed at the regulated plants to which it is regularly assigned and to provide supplemental supplies to such plants when the deliveries of the producers regularly assigned to them are inadequate for their needs. It cannot be concluded that the current situation concerning location of plants to be served in the Wichita market is such that a balancing plant must be located inside the marketing area to carry out its intended function.

3. *Designating a cooperative as the handler on bulk tank milk.* A cooperative should be the handler for milk of producers it receives for the account of the cooperative from the farm in a tank truck operated by, or under the control of, such cooperative for delivery to a pool plant. In addition, a cooperative should be the handler for all milk of producers it diverts from a pool plant to a nonpool plant.

Under the current order provisions, a cooperative may be a bulk tank handler, or a diverting handler, for milk of member producers. Also, it may elect whether to be the handler for member milk it receives from the farm for delivery to a pool plant in a tank truck owned and operated by, or under contract to, such association.

Milk produced for this market is handled through farm bulk tanks and moved to the market in tank trucks. Milk of any producer when commingled in a tank truck with that of other producers is indistinguishable from such other milk The amount of a producer's milk placed in a tank truck, and the butterfat content thereof, can be determined only by measurement at the farm and from milk samples taken at the farm. After the milk has been pumped from the farm tank into the tank truck and commingled with the milk of other producers, there is no further opportunity to measure, sample, or reject the milk of the individual producer.

When milk is picked up at the farm by a truck owned or operated by a cooperative, or by a person under contract to, or otherwise under the control of, such cooperative for delivery to a pool plant, it is the cooperative that determines the weight and butterfat content of each producer's milk. Frequently, the plant operator will not know the identity of the individual producers whose milk he receives, and will know only the aggregate amount of milk received. In such cases, the cooperative obviously must become the responsible handler for the milk as it leaves the farm.

As a bulk tank handler, a cooperative's obligation is basically limited to filing a payroll report showing the weights and butterfat content of the milk of the individual producers involved and of reporting the quantities of such milk delivered to each pool plant. The cooperative is responsible to the pool only for that portion of milk received from a producer's farm for delivery to pool plants that is not accounted as actually received at a pool plant because of a difference between the weight and test of the milk received at the plant and the weight and test as picked up at the farm. The cooperative's monetary obligaton to the pool normally will be for the difference in these amounts which usually will be shrinkage in accordance with its value under the shrinkage provisions. Even this small monetary obligation is eliminated, however, when, as in this market, the handler receives milk from the cooperative on the farm weights and tests.

The recommended decision provided that a cooperative would not be the handler for milk delivered from the farm in a tank truck under its control when such milk is received by a pool plant operator on the basis of farm weights and tests. A cooperative excepted to this provision because it believed it would be precluded from performing as a handler on any such milk.

When milk is picked up at producers' farms in a bulk tank truck under a cooperative's control and a pool plant operator receives such milk on the basis of farm weights and tests, such weights and tests are not determined by him. They are obtained by the pool plant operator from the cooperative under whose control the weight and test of the milk at each producer's farm are ascertained.

Accordingly, a cooperative should be designated as a handler, even though for somewhat limited purposes, on all tank truck milk under its control delivered to pool plants from producers' farms, whether or not it is received by the pool plant operator on the basis of farm weights and tests. This will facilitate the market administrator's obtaining the monthly reports of the weights and tests of the milk picked up at each producer's farm and of the quantity and test of such milk delivered to each pool plant. This is because, as a handler, a cooperative would be required to submit such reports directly to the market administrator instead of through the pool plant operator to whose plant the milk was delivered.

A cooperative expressed concern at the hearing that the modifications adopted might require a cooperative to be the handler for the milk of nonmember producers. Nothing in the amendments adopted would require a cooperative to pick up the milk of nonmember producers in tank trucks under the cooperative's operation or control. It does provide that if a cooperative should pick up milk of nonmember producers on routes under its control, it must assume varying degrees of responsibility with respect to such milk depending on the circumstances.

The provision adopted, which accommodates substantial flexibility in the arrangements under which cooperatives sell to pool plant operators, makes it possible for a cooperative to pick up, on its trucks or trucks under its control, the milk of nonmember producers for delivery to pool plants and for the pool plant operator to make payment directly to such nonmember producers for their milk. Thus, the degree of responsibility the cooperative will have for such milk will depend on the terms of the arrangements for its delivery to pool plants. At the same time, it will enable the cooperative to act as the marketing agent for a nonmember producer who, although he has not become a member of such cooperative, has contracted with the cooperative to act as the marketing agent for his milk. In this connection the cooperative may collect payment from pool plant operators for a nonmember producer provided such nonmember has given the cooperative authorization to make such collection.

The Capper-Volstead Act provides the criteria by which cooperative associations are determined to be qualified cooperatives under the Agricultural Marketing Agreement Act. This amendment to the order is consistent with that provision of the Capper-Volstead Act wherein it is recognized that cooperatives may "deal in the products of nonmembers" and limits such dealings to amounts not greater in value than such as are "handled by it for members."

In the event the milk of a nonmember producer is diverted as producer milk from a pool plant to a nonpool plant by a cooperative, the cooperative should be the diverting handler with respect to such milk. Here the cooperative performs the complete handling function and in such capacity obviously must be held to be responsible for order obligations applicable to such milk. Thus, all milk commingled in the truck should be handled in equal terms insofar as its producer status under the order is concerned.

Another question raised was whether, in paying a nonmember producer, a cooperative may reblend proceeds due such nonmember producer with those paid to its member producers. If the nonmember producer has signed a contract with the cooperative whereby he authorizes the cooperative to market his milk, collect payment therefor, and reimburse him on the same basis as though he were a member of the cooperative, the cooperative could pay such nonmember on the same basis as it pays its member producers. However, such a contract between the cooperative and the nonmember must specifically provide for a payment re-

V 38-174 SEP 10 73 XUM

flecting: (1) The same blending of proceeds as is otherwise done for members, (2) the same treatment of withholding for capital (revolving fund), (3) the same right of liquidation of certificates issued for a revolving fund or other capital withholding, and (4) the same privilege of sharing an ultimate distribution of proceeds if and when special distribution is made, such as dividends or returns of unused deductions.

In the absence of a written contract containing the terms set forth above, the cooperative would be required to pay a nonmember producer, for whose milk it is the handler at not less than the uniform price announced by the market administrator for the month.

4. *Reports included in uniform price computation.* The order provision excluding from the current month's uniform price computation the report of a handler who has not paid his producers for the preceding month is not appropriate under current marketing conditions.

The market administrator must compute the uniform price for each month by the 12th of the following month. Four weeks earlier (by the 14th of the month) handlers must have completed their payments for producer deliveries in the preceding month.

It is not administratively feasible to audit the records of all handlers between the final date when payments to producers for the preceding month were due and the date by which the next monthly uniform price must be computed. Within that limited period of time, it is not practicable for the market administrator to determine that each handler has actually completed his payments to individual producers and cooperatives. Handlers' cancelled checks, for example, are necessary to verify such payments. They are received by handlers from their banks periodically, usually monthly, and it cannot be expected that all handlers' cancelled checks would be available for audit within the necessary time period.

In view of the above, the requirement to exclude from the current month's uniform price computation the report of a handler who has not paid his producers for the preceding month should be discontinued.

5. *Need for emergency action.* Proponent cooperative stated that emergency conditions now exist that warrant the omission of a recommended decision on their proposals to revise the diversion provisions. It alleged that emergency action is necessary because another cooperative contemplates adding to the pool, as diverted milk, the milk of dairy farmers who would ship to a distant cheese plant. These dairy farmers, proponent claimed, are told they will receive the f.o.b. Wichita order uniform price without incurring the cost of transporting such milk to a pool plant in the marketing area. This, the cooperative argued, would result in their exploiting the Wichita pool at the expense of producers regularly supplying the market.

The conditions under which milk may be diverted and the location at which diverted milk is priced are important provisions of the order. They can significantly affect returns to producers for diverted milk. The proposed changes in the present diversion provisions could, therefore, have a significant effect on producers, currently and prospectively, subject to the order. In view of this there should be opportunity to file exceptions thereto. The request for omission of the recommended decision on proposals to revise the diversion provisions therefore is denied.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the the findngs and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents, a marketing agreement regulating the handling of milk, and an ORDER amending the order regulating the handling of milk in the Wichita, Kansas, marketing area which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

*It is hereby ordered,* That this entire decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

Determination of producer approval and representative period. July 1973 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Wichita, Kansas, marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on September 5, 1973.

CLAYTON YEUTTER,
*Assistant Secretary.*

*Order[1] amending the order, regulating the handling of milk in the Wichita, Kansas marketing area.*

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Wichita, Kansas, marketing area.

The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR, Part 900).

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Wichita, Kansas, marketing area, shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator, Regulatory Programs, on June 25, 1973, and published in the FEDERAL REGISTER on June 29, 1973 (38 FR 17240), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein subject to the following modifications in §§ 1073.8, 1073.41 and 1073.80.

1. Section 1073.7 is revised as follows:

**§ 1073.7 Producer.**

"Producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted regulatory agency, which milk is received at a pool plant, diverted to a nonpool plant pursuant to § 1073.14(b), or accounted for by a cooperative association pursuant to § 1073.14(c), except:

(a) A producer-handler as defined in any order (including this part) issued pursuant to the Act, or

(b) A person with respect to milk that is physically received at a pool plant as diverted milk from an other order plant if a Class II or Class III classification under this order is designated for such milk and it is subject to the pricing and pooling provisions of another order issued pursuant to the Act.

2. In § 1073.8, paragraphs (c) and (d) are revised as follows:

**§ 1073.8 Handler.**

* * * * * *

(c) Any cooperative association with respect to milk of producers it diverts from a pool plant to a nonpool plant;

(d) Any cooperative association with respect to milk it receives for its account from the farm of a producer in a tank truck owned and operated by, or under the control of, such association, for delivery to a pool plant(s); and

* * * * * *

3. Section 1073.10 is revised as follows:

**§ 1073.10 Distributing plant.**

"Distributing plant" means a plant approved by a duly constituted regulatory agency for the processing or packaging of Grade A milk and from which during the month route disposition is made in the marketing area.

4. Section 1073.11 is revised as follows:

**§ 1073.11 Supply plant.**

"Supply plant" means a plant from which fluid milk products, acceptable to a duly constituted regulatory agency for distribution under a Grade A label, are shipped during the month to, and physically received at, a distributing plant.

5. Section 1073.12 is revised as follows:

**§ 1073.12 Pool plant.**

"Pool plant" means a plant specified in paragraph (a), (b) or (c) of this section that is not an other order plant or a producer-handler plant.

(a) A distributing plant that has:

(1) Route disposition, except filled milk, during the month of not less than 35 percent (25 percent for each month of March through July) of the fluid milk products, except filled milk, that are approved by a duly constituted regulatory agency for distribution under a Grade A label and are physically received at such plant, or diverted therefrom by the plant operator or a cooperative association to a nonpool plant as producer milk pursuant to § 1073.14, and route disposition, except filled milk, in the marketing area during the month is not less than 10 percent of such fluid milk products. If the entire quantity of fluid milk products, except filled milk, disposed of in packages in a particular size and form is received in such packages from other plants, all such disposition shall be credited to the plant from which such packages were received and shall be deducted from the appropriate disposition of the receiving plant; or

(2) Qualified as a pool plant in the immediately preceding month on the basis of performance standards described in paragraph (a) (1) of this section.

(b) A supply plant from which during the month not less than 50 percent of the total quantity of Grade A milk approved by a duly constituted regulatory agency that was physically received at such plant from dairy farmers and handlers described in § 1073.8(d), or diverted therefrom by the plant operator or a cooperative association as producer milk to a nonpool plant pursuant to § 1073.14, is shipped to a plant(s) described in paragraph (a) of this section. A supply plant that was a pool plant pursuant to this paragraph in each of the months of September through December shall be a pool plant in each of the following months of January through August unless the plant operator requests the market administrator in writing that such plant not be a pool plant. Such nonpool status shall be effective the first month following such notice and thereafter until the plant again qualifies as a pool plant on the basis of shipments; and

(c) A plant that is approved by a duly constituted regulatory agency to handle milk for fluid consumption, that is operated by a cooperative association, and from which during the month not less than 50 percent of the milk of producer members of such association is delivered directly or is transferred by the association to pool plants described in paragraph (a) of this section, unless such plant qualifies for the month as a pool plant under another order issued pursuant to the Act by delivering 50 percent or more of its Grade A receipts from dairy farmers to plants qualified as pool distributing plants under such other order.

6. Section 1073.14 is revised as follows:

**§ 1073.14 Producer milk.**

"Producer milk" shall be that skim milk and butterfat in milk from producers that is:

(a) Received at a pool plant directly from a producer or a handler pursuant to § 1073.8(d);

(b) Diverted by the operator of a pool plant or by a cooperative association to a nonpool plant other than a producer-handler plant, subject to the conditions of paragraph (d) of this section; or

(c) The difference between the quantity of milk as received by a handler pursuant to § 1073.8(d) from producers' farms and the quantity of such milk delivered to pool plants. For the purposes of §§ 1073.53 and 1073.82, such milk shall be deemed to have been received by such handler at the pool plant to which all other producer milk in the same tank truck was delivered.

(d) The following conditions shall apply to milk diverted from a pool plant to a nonpool plant that is not a producer-handler plant:

(1) Such milk shall be accounted for as received by the diverting handler at the location of the nonpool plant;

(2) Milk of a producer shall not be eligible for diversion from a pool plant under this section if during the month less than 15 percent of total milk of such person as a producer is received at a pool plant;

(3) The total quantity of milk diverted by a cooperative association that is greater than the total quantity of producer milk received at all pool plants during the month from the cooperative association shall not be producer milk:

V 38-174 SEP 10 73 XUM

(4) The total quantity of milk diverted by the operator (other than a cooperative association) of a pool plant that is greater than the total quantity received at such plant during the month from producers who are not members of a cooperative association shall not be producer milk;

(5) The diverting handler shall designate the dairy farmers' deliveries that are not producer milk pursuant to this paragraph. If the handler fails to make such designation, no milk diverted by him to a nonpool plant shall be producer milk;

(6) To the extent that it would result in nonpool plant status for the pool plant from which diverted, milk diverted for the account of a cooperative association from the pool plant of another handler shall not be producer milk; and

(7) Milk diverted to an other order plant shall be producer milk only if a Class II or Class III classification is designated for such milk pursuant to the provisions of another order issued pursuant to the Act and such milk is not subject to the pricing and pooling provisions of such order.

7. In § 1073.30, paragraph (c) is revised as follows:

**§ 1073.30 Reports of receipts and utilization.**

* * * * *

(c) Each cooperative association shall report with respect to milk for which it is a handler pursuant to § 1073.8(c) and (d), as follows:

(1) Receipts of skim milk and butterfat in producer milk;

(2) The quantities delivered to each pool plant of another handler pursuant to § 1073.8(d) (the utilization of which is accountable by the latter under paragraph (a) of this section);

(3) The utilization of milk received under § 1073.8(d) but not delivered to the pool plant of another handler pursuant to such paragraph, and the utilization of milk for which the cooperative is the handler pursuant to § 1073.8(c); and

(4) Such other information as the market administrator may require.

8. In § 1073.53, the section title and the introductory paragraph are revised as follows:

**§ 1073.53 Location adjustments to handlers.**

For milk received from producers or from a handler pursuant to § 1073.8(d) at a plant and classified as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (d) of this section or for other source milk to which a location adjustment is applicable, the price at such plant when located:

* * * * *

9. In § 1073.61, paragraph (c) is revised as follows:

**§ 1073.61 Plants subject to other Federal orders.**

* * * * *

(c) A supply plant meeting the requirements of § 1073.12(b) that also meets the pooling requirements of another Federal order and from which greater qualifying shipments are made during the month to plants regulated under such other order than are made to plants regulated under this part, except during the months of January through August if such plant retains automatic pooling status under this part.

10. In § 1073.71, paragraph (a) is revised as follows:

**§ 1073.71 Computation of uniform prices.**

* * * * *

(a) Combine into one total the values computed pursuant to § 1073.70 for all handlers who filed the reports prescribed by § 1073.30 for the month, except those in default of payments required pursuant to § 1073.84 for the preceding month;

11. In § 1073.80, the introductory sentence in paragraph (d) is revised as follows:

**§ 1073.80 Time and method of payment.**

* * * * *

(d) Each handler who receives milk for which a cooperative association is the handler pursuant to § 1073.8(d), including the milk of producers who are not members of such association, and who the market administrator determines have authorized such cooperative association to collect for their milk, shall, on or before the second day prior to the date payments are due individual producers, pay such cooperative association for such milk as follows:

* * * * *

12. In § 1073.82, the section title and paragraph (a) are revised as follows:

**§ 1073.82 Location adjustments to producers and on nonpool milk.**

(a) For producer milk received at plants located outside Zone 1 there shall be added or deducted, as the case may be, an adjustment for each such plant for all milk at the rates specified in § 1073.53 (b) and (c); and

## Rural Electrification Administration

**[ 7 CFR Part 1701 ]**

### REA SPECIFICATIONS FOR RURAL TELEPHONE FACILITIES

**Proposed Revision for Building-Out Capacitors**

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), including the amendment thereto enacted by P.L. 93-32, REA proposes to issue REA Bulletin 345-23 to announce a revision in REA Specification PE-30 for building-out capacitors. On issuance of REA Bulletin 345-23, Appendix A to Part 1701 will be modified accordingly.

Persons interested in the revision of PE-30 may submit written data, views or comments to the Director, Telephone Operations and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, on or before October 9, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Telephone Operations and Standards Division during regular business hours.

A copy of the revision of REA Specification PE-30 may be secured in person or by written request from the Director, Telephone Operations and Standards Division.

The text of REA Bulletin 345-23 announcing the revision of the specification is as follows:

REA BULLETIN 345-23

SUBJECT: REA Specification for Building-Out Capacitors, PE-30

I. *Purpose.*—To announce a revision in REA Specification PE-30 for Building-Out Capacitors.

II. *General.*—REA Specification PE-30 has recently been revised to include several desirable changes. The principal changes involve the addition of requirements for pole and manhole mounted assemblies and for single-capacitor units designed for multiple mounting, improved electrical requirements and environmental testing procedures.

This specification becomes effective immediately upon issuance of this bulletin. Manufacturers of building-out capacitors now accepted in the REA program shall have a period of six months to comply in all respects with revised REA Specification PE-30. This does not preclude the adoption of the revised specification prior to the effective date.

III. *Availability of specification.*—Copies of the revised PE-30 are available upon request from the Telephone Operations and Standards Division, REA. Questions concerning the revised specifications may be referred to the Chief, Transmission Branch, Telephone Operations and Standards Division, Rural Electrification Administration, U.S Department of Agriculture, Washington, D.C. 20250, telephone number 202-447-3917.

Dated September 4, 1973.

C. R. BALLARD,
*Acting Assistant Administrator.*

## CIVIL AERONAUTICS BOARD

**[ 14 CFR Ch. II ]**

**[EDR-143B; Docket No. 19901]**

### AIR FREIGHT INDUSTRY

**Uniform Credit, Billing and Collection Practices; Termination of Rulemaking Proceeding**

SEPTEMBER 4, 1973.

By advance notice of proposed rulemaking EDR-143, dated August 23, 1968 (33 FR 12191), the Board gave notice that it had under consideration rulemaking action to establish uniform credit, billing, and collection practices within the domestic and international air freight industry. The background of the rulemaking proceeding is as follows:

On May 20, 1968, twenty-seven air freight forwarders filed an agreement with the Board relating to uniform credit, billing, and collection practices.[1] The agreement provided that charges would be payable in cash at the time shipments are accepted or collect shipments delivered, except that credit may be extended for ten days by advance arrangement.[2] If payment is not timely received, the air freight forwarder will use its internal procedures for collection of the delinquent account during the next ten days. If the aggregate overdue balance exceeds $250 at the end of that period, then, within five days thereafter, the forwarder will notify the customer that he will be placed on a cash basis unless the account is fully paid within the next ten days. If full payment is not received within such ten-day period, then the customer must be placed on a cash basis from which he may not be removed until full payment of all of his outstanding accounts with the forwarder.[3]

The agreement further provided that it would not become effective until the Board had made its essential provisions applicable to all Board-authorized forwarders, and in that connection the parties to the agreement submitted an appropriate petition for rule making contemporaneously with the agreement. The petitioners contended that such a regulation would contribute to the financial stability of the industry and reduce the use of varying periods of credit for shippers as a competitive weapon and a discriminatory tool, while at the same time avoiding the legal and economic difficulties which could result from an attempt by the forwarders to impose an industry-wide embargo upon customers.

The Board did not reach any tentative conclusions as to whether such a rule should be adopted. Rather, the Board issued advance notice of proposed rulemaking EDR-143,[4] inviting comments and data focusing upon certain questions which were posed in the advance notice.

Comments in response to the advance notice were filed by the Air Freight Forwarders Association, on behalf of the 27 petitioners; Airlift International, Inc.; the Air Transport Association of America, on behalf of certain member carriers; the American Retail Federation; Continental Air Lines; Control Data Corporation; Emerson Electric Co.; The Flying Tiger Line Inc.; Japan Air Lines; the National Industrial Traffic League; the National Retail Merchants Association; Pan American World Airways; Radio Corporation of America; Raytheon Co.; Society of American Florists and Ornamental Horticulturists; Thatcher Glass Manufacturing Co.; 3M Co.; United Air Lines; United Parcel Service Co.; UNIVAC Division of Sperry Rand Corporation; and jointly by Wings and Wheels Express, Inc., and Air Express International Corporation.

Although considerable support was expressed for the general concept of uniform credit and billing practices, the preponderance of the comments expressed opposition to the provisions suggested by the petitioners. Many shippers said that their internal procedures for payment of bills would not lend themselves to payment within the time suggested by the petitioners. It was also said that the provision for automatically cutting off credit to shippers whose overdue accounts exceeded $250 would be unduly rigid and harsh; in this connection, some shippers and carriers contended that a creditor should be free to deal with delinquent accounts on an individual basis, taking into account the particular shipper's circumstances and other relevant factors.

We have determined to terminate the rulemaking proceeding in Docket 19901. Although we continue to believe that uniformity in billing and credit practices may be generally desirable, the particular regulatory approach suggested by the instant petitioners appears to present too many practical difficulties to warrant further consideration in this proceeding. In this connection, it should be noted that we have recently authorized discussions to be held among direct air carriers, with the participation of indirect air carriers and shippers, concerning the general questions raised by air freight credit, billing, and collection practices in interstate and overseas air transportation,[5] and we are hopeful that these discussions may provide an adequate basis for our future consideration of realistic regulatory action with respect to the subject problem.

Accordingly, the Board hereby terminates the rulemaking proceeding in Docket 19901.[6]

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324))

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19167 Filed 9-7-73;8:45 am]

[1] Docket No. 18720.

[2] In such a case, billing will be made within ten days after acceptance of prepaid shipments, or ten days after delivery of collect shipments. The credit period will run from the date of billing until the date payment is mailed, such period not to exceed ten days.

[3] However, in the case of a contested billing, the customer need not be placed on a cash basis if he has properly paid the uncontested portion and explained the difference in writing to the air freight forwarder.

[4] In EDR-143, the Board also asked for comments as to whether any such rule should apply to direct air carriers and foreign air carriers, as well as to forwarders.

[5] Order 73-6-8, June 7, 1973, 38 FR 14974 (Docket No. 25398).

[6] By EDR-238B, being issued contemporaneously herewith, we are also terminating, for similar reasons, a rulemaking proceeding in Docket 24999 with respect to monthly reporting by route air carriers of amounts due from forwarders, and the age of such amounts.

**[ 14 CFR Part 241 ]**

**[EDR 238 B; Economic Regulations Docket No. 24999]**

### UNIFORM SYSTEM OF ACCOUNTS

**Monthly Reports; Termination of Rulemaking Proceeding**

SEPTEMBER 4, 1973.

By notice of proposed rulemaking EDR-238, dated December 12, 1972 (37 FR 26835), the Board proposed to amend Part 241 of its Economic Regulations (14 CFR Part 241) so as to require route air carriers to file a monthly report of the amounts due from air freight forwarders, international air freight forwarders, and foreign indirect air carriers of property only holding a section 402 permit (foreign air freight forwarders), and of the age of these amounts, on a new Schedule B-15 of the CAB Form 41 report.

The proceeding was instituted after a review of the major air carriers by the Board's audit staff revealed that a large percentage of forwarders' accounts with direct air carriers were overdue. The Board noted that such credit practices were in violation of the carriers' tariffs, and expressed concern that they were resulting in bad-debt losses to the carriers and consequently increasing the cost of services to the traveling and shipping public. Accordingly, the Board proposed to monitor the carriers' compliance with their tariffs by means of the reporting system set forth in EDR-238.

Comments in response to the notice were filed by Air Express International Corporation; the Air Freight Forwarders Association, on behalf of its members; the Air Freight Motor Carriers Conference; the Air Transport Association of America, on behalf of certain of its members; Delta Air Lines, Inc.; Emery Air Freight Corporation; Pan American World Airways, Inc.; and Seaboard World Airlines, Inc.

We have determined to terminate the rulemaking proceeding in Docket No. 24999. The preponderance of the comments opposed the proposed rule, pointing out that for various reasons it would result in burdens and other difficulties greater than any benefits which it might provide. Although we continue to believe that more information concerning air freight accounts may be generally desirable, the particular regulatory approach proposed in EDR-238 appears to present too many practical difficulties to warrant further consideration in this proceeding. In this connection, it should be noted that we have recently authorized discussions to be held among direct air carriers, with the participation of indirect air carriers and shippers, concerning the general questions raised by air freight credit, billing, and collection practices in interstate and overseas air transportation,[1] and we are hopeful that these discussions may provide an adequate basis for

[1] Order 73-6-8, June 7, 1973, 38 FR 14974 (Docket No. 25398).

V 38-174 SEP 10 73 XUM

our future consideration of realistic regulatory action with respect to the subject problem.

Accordingly, the Board hereby terminates the rulemaking proceeding in Docket No. 24999.[2]

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324))

By the Civil Aeronautics Board.

## [ 14 CFR Parts 298, 389 ]

[EDR 253; ODR 7; Economic Regulations Organization Regulations Docket No. 25853]

## CERTAIN FILING AND LICENSE FEES

### Notice of Proposed Rulemaking

SEPTEMBER 4, 1973.

Notice is hereby given that the Civil Aeronautics Board has under consideration proposed amendments of the above parts which would adjust the current level of fees and set forth additional fees for Board services. The principal features of the proposed amendments are further described in the Explanatory Statement, and the proposed amendments are set forth in the Proposed Rule. This regulation is proposed under the authority of section 204(a) of the Federal Aviation Act of 1958 (72 Stat. 743, 49 U.S.C. 1324) and Title V of the Act of August 31, 1951 (65 Stat. 290, 5 U.S.C. 140).

Interested persons may participate in the proposed rulemaking through submission of twelve (12) copies of comments addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. All relevant matter in communications received on or before October 11, 1973, will be considered by the Board before taking action on the proposal. Copies of such communications will be available for examination by interested persons in the Docket Section of the Board, Room 710, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., upon receipt thereof.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND, *Secretary.*

EXPLANATORY STATEMENT

The Board's current schedule of license and filing fees has been in effect since March 1, 1968 (14 CFR 389). The schedule was constructed to recover approximately 25 percent of the costs of four operating bureaus in the areas of activity covered by the fees.[1] This amount of recovery is no longer possible at existing levels, yet the Board remains convinced that this is an appropriate goal. The Board estimates that the current total annual costs of providing for fee-associated activities is approximately $4.2 million.[2] However, at present levels, only $415 thousand, or approximately 10 percent of these costs, was recovered during fiscal 1973.

Although the Board in past years has recovered a greater amount under the existing schedule than was recovered last year, it is apparent both that the levels of prior recovery would not achieve a 25 percent recovery by reason of greatly increased costs of operations, and that under present conditions the Board is unlikely to issue the number of new authorizations issued in prior years, with a concomitant decrease in amount of fees from this source at present levels. The principal item of increased costs is reflected in the Board's salary and expense appropriation, which has grown by 80 percent since fiscal year 1966 (from $7,923,000 for 610 employees in that year, to $14,289,000 for 670 employees, in fiscal 1973). In determining the approximately $4.2 million in costs now attributable to fee-related activities, we have followed approximately the same methodology as was previously employed in fixing the 1968 level. Precise computations cannot be made, but the general goal has been to establish filing fees which would recover approximately one-quarter of the cost attributable to the activity involved. In some instances more may be recovered, in others less. In no instance is it estimated that the recovery would exceed the cost attributable to the activity.[3]

In addition to increasing the level of existing fees in various respects (see Summary of Proposed Fees infra), we also propose to establish new fees in the following categories: [4]

1. *Motions.*—The current fee schedules do not impose specific charges for the filing of motions under the Board's rules of practice. The costs of processing and reviewing motions are largely included in the cost of an underlying application subject to a fee. However, we believe that certain motions should be subject to special charges because they confer benefits beyond those contemplated in the underlying application. These are (1) motions to file otherwise unauthorized documents, e.g., further briefs or answers not provided for in the Board's rules; (2) certain motions to strike which lend themselves to use in lieu of unauthorized documents; and (3) motions for expedited action. The Board proposes to charge a $50.00 filing fee for these motions. It seems clear that parties filing these motions typically are requesting or obtaining special treatment. With particular attention to motions to strike, we note that they generally function as procedural devices for removing scandalous, impertinent, redundant, or immaterial matters or pleadings. However, motions to strike redundant or immaterial pleadings, etc., frequently appear to be used as opportunity to further argue the merits of a case. Accordingly, we propose to charge a filing fee of $50.00 where motions to strike are filed for purposes other than removing scandalous or impertinent matters or pleadings.

2. *Aircraft transactions.*—The Board also proposes to amend § 389.25 so as to provide a fee of $50 for the filing of agreements pursuant to Part 299 of the Board's Regulations. This Part grants a general exemption to direct air carriers from the requirements of section 408(a)(2) and (3) of the Act insofar as such provisions prohibit (without prior Board approval) the purchase or lease of aircraft by one air carrier from another or from a person engaged in any phase of aeronautics. Agreements relating thereto must be filed with the Board, and are thereafter reviewed by the Board's staff for conformance with the Regulations. At the present time, there is no charge for such filing. However, our review indicates that there should be such charge in view of processing costs incurred by the Board and special benefits conferred upon the parties by the exemption. For example, there were 35 such filings in fiscal year 1972, requiring careful review by the Board's staff. Additionally, the benefits to the industry are substantial in that the Regulations eliminate a formal section 408 application, remove the "prior approval" requirement and thereby expedite the consummation of these arrangements.

3. *Agreements filed for prior approval.*—Section 412 of the Act does not require that agreements be approved by the Board prior to their implementation. Nevertheless, there are certain agreements which do not become effective unless and until approved by the Board. It is our experience that these are typically complex and controversial in nature and require a great deal of the staff's time for analytical review. Accordingly, agreements and contracts for which the Board's prior approval is requested, other than those for which the requirement for prior approval has been imposed by the Board, shall be assessed a filing fee of $200.

4. *Applications to extend embargo notices.*—Part 228 of the Board's Regulations sets forth procedures whereby a carrier can apply for an extension of a previously filed embargo notice. It is our experience that the processing and review of these applications involve time and effort on the part of the Board and its staff, and can result in measurable special benefit to the applicant. Accordingly, we propose to include applications to extend embargoes filed under Part 228 in our fee schedule, and have tentatively determined to charge a filing fee of $25.00 therefor.

5. *Waiver of fees.*—Since the fee system was inaugurated, carriers have submitted many requests under § 389.23 for waiver of filing or license fees. At the present time, no charge is imposed on a request for a waiver of such fees. However, it is clear that the processing and review of waiver requests involve time and effort on the part of the Board and its staff, and confer special benefits upon the parties, and should therefore be included in our fee schedule. Accordingly, we propose charging a nominal fee of $25 for the filing of such requests, or 10 percent of the fee for which a waiver is sought, whichever is less.

SUMMARY OF PROPOSED FEES

*Proposed Filing Fees*

| Section | Proposed Fee |
|---|---|
| 298.50, Air taxi registration fee | $ 15 |
| 389.25 | |
| (a)(1), Certificates of public convenience and necessity | 300 |
| (a)(2), License fees | See below |
| (b), Agreements, general | 50 |
| *Agreements and contracts filed for prior approval | 200 |
| (c), Air cargo pickup and delivery service | 175 |
| (d), Airport notice or authorization | 40 |
| (e), Service pattern change: | |
| Part 376 | 40 |
| Parts 202 and 203 | 300 |
| (f), Name change | 300 |
| (g)(1), Delay inauguration of, or temporarily suspend service | 400 |
| *(g)(2), Applications for extension of embargo notices | 25 |
| (h), Exemptions from section 401, waivers of Parts 207, 208, 372, 372a, 373, 378, and 378a, and special operating authorizations | 300 |
| (i), 403 exemptions | 50 |
| (j), Exemptions or waivers for the performance of a specific number of charters | 100 |
| For each additional charter | 10 |
| (k), Free or reduced-rate authority, waiver of tariff regulations, and special tariff permission | 10 |
| (l), Inclusive tour charter prospectus | 50 |
| (m), Bulk inclusive tour contracts and bonds | 50 |
| (n), Study group statements | 50 |
| (o), Travel group charters | 50 |
| (p), 409 interlocks | 250 |
| (q)(1), 408 applications, general | 150 |
| Mergers and control | 3,000 |
| *(q)(2), Lease/purchase agreements | 50 |
| *(r), Motions to file unauthorized documents, to strike, and for expedited action | 50 |
| (s), Operating authorization—air freight forwarders | 400 |
| (t)(1), Operating authorization—overseas military charter operators | 400 |
| (t)(2), Bonds covering overseas military charter operations | 50 |
| (u)(1), Tariffs issued by carriers (per page) | 2 |
| (u)(2), Tariffs issued by foreign air carriers | 0 |
| (v), Tariffs issued by publishing agents (per page) | 2 |
| *(w), Waiver of fees | 25 |

*New Item.

*Proposed License Fees*

| Revenue Bracket | Proposed Annual Gross Transport Fee |
|---|---|
| $0 to $100,000 | No fee |
| $100,000 to $1,000,000 | $2,000 |
| $1,000,000 to $5,000,000 | 10,000 |
| $5,000,000 to $10,000,000 | 20,000 |
| $10,000,000 or over | 40,000 |
| Point deletion | 1,500 |

PROPOSED RULE

It is proposed to amend Part 298 of the Board's Economic Regulation (14 CFR Part 298) and Part 389 of the Board's Organization Regulations (14 CFR Part 389) as follows:

### PART 298—CLASSIFICATION AND EXEMPTION OF AIR TAXI OPERATORS

1. Amend § 298.50(c)(3) to read as follows:

**§ 298.50 Filing for registration by air taxi operators.**

* * * * *

(c) Registration shall be * * *

(3) A Fifteen ($15) dollar registration fee. This shall be in the form of a check, draft, or postal money order, payable to the Civil Aeronautics Board.

* * * * *

### PART 389—FEES AND CHARGES FOR SPECIAL SERVICES

2. Amend § 389.25 to read as follows:

**§ 389.25 Schedule of filing and license fees.**

(a) *Certificates of public convenience and necessity.*—(1) The filing fee for an application, under section 401 of the Act, (i) for a certificate of public convenience and necessity to engage in air transportation, or (ii) to amend, modify, renew, or transfer a certificate or to abandon a route or a part thereof, is $300. The fee will be refunded, on request, if the application is withdrawn prior to hearing, is dismissed under the stale-application rule of § 302.911 of this chapter, is dismissed pursuant to the denial of consolidation rule of § 302.12(e) of this chapter, or is otherwise dismissed by the Chief Administrative Law Judge prior to hearing under the authority delegated to him in § 385.10(b) of this chapter.

(2) In addition to the filing fee, one of the following license fees shall be paid by each carrier which, pursuant to its application, is issued a certificate or has its certificate amended, modified, renewed, or transferred:

(i) A fee based on annual gross transport revenue increase, for the first full Board, resulting from new, amended, modified, renewed, or transferred authority year of operations, as estimated by the thority in accordance with the following schedule:

| Over | Fee |
|---|---|
| $0 to $100,000 | No fee |
| $100,000 to $1,000,000 | $2,000 |
| $1,000,000 to $5,000,000 | 10,000 |
| $5,000,000 to $10,000,000 | 20,000 |
| $10,000,000 or over | 40,000 |

(ii) A fee of $1,500 for each point deleted where annual gross transport revenues are not estimated by the Board to increase from deletion or consolidation of points.

(iii) Within the meaning of paragraph (a)(2)(i) of this section, annual gross transport revenue increase resulting from renewed authority or authority issued to replace exemption authority shall be deemed equivalent to the difference between such revenues which the carrier will earn with the Board's authorization and such revenues which the carrier would have earned if the Board had denied such authority and the carrier's comparable prior certificate or exemption authority had expired. In the case of mergers, such annual gross transport revenue increase from transferred authority shall be deemed equivalent to the difference between such revenues which the new (or surviving) carrier will earn with the Board's authorization and such revenues which the merging carriers would have earned under their pre-existing authority if the Board had disapproved the merger. Except as provided hereinafter, such annual gross transport revenue increase from transferred authority in nonmerger cases shall be deemed equivalent to the difference between such revenues which the person acquiring the route will earn with the Board's authorization and such revenues which such person would have earned if the Board had disapproved the transfer. In cases of transfer of authority due to a reincorporation not involving any merger, consolidation or change of ownership, or to the creation of a new corporation pursuant to an acquisition of control which the Board approves under section 408 of the Act and which involves only a substitution of the new corporation for the old, no gross transport revenue increase shall be deemed to result from the transfer of authority.

(b) *Agreements.*—(1) The filing fee for a contract or agreement filed under section 412(a) of the Act is $50; except that the fee is $200 where such filing seeks Board approval prior to the effective date of the contract or agreement. *Provided, however,* That the fee shall be $50 where the Board requires a contract or agreement to be filed for prior approval.

(2) Where a filing seeks approval of more than one contract, agreement, or conference resolution, a separate filing fee will be assessed for each separate contract, agreement, or resolution. *Provided, however,* That identical resolutions in the same filing applicable to dif-

---

[1] See, OR-27, 33 FR 68, January 4, 1968. The operating Bureaus noted therein are the Bureau of Administrative Law Judges, the Bureau of Economics, the Bureau of Operating Rights, and the Office of General Counsel.

[2] These costs include certain indirect costs which were not taken into account in fixing the 1968 level of fees. Total indirect cost items now included consist of a proportionate share of management and supervisory costs, rent and depreciation of property and equipment, costs of collecting fees, costs of leave earned by the Board's employees, and other nonsalary objects such as office supplies and material etc. Indirect costs are specified by OMB Circular A-25 as an item to be included.

[3] For applications filed under section 401, the prescribed filing fees recover only a fraction of the goal of 25 percent recoupment of allocated cost and the license fees are intended to recover the balance.

[4] As can be seen from an examination of the proposed rule, we have also taken this opportunity to make certain changes to § 389.25 for the purposes of organizational clarity.

[2] By EDR-143B, being issued contemporaneously herewith, we are also terminating, for similar reasons, a rulemaking proceeding in Docket 19901 with respect to the establishment of uniform credit, billing, and collection practices within the air freight industry.

V38-174 SEP 10 73 XUM

ferent IATA conference areas will be counted as one resolution.

(c) *Air cargo pickup and delivery service.*—The filing fee for an application, under § 222.3 of this chapter, for tariff-filing authority providing for pickup and delivery service is $175.

(d) *Airport notice or authorization.*—The filing fee (1) for an airport notice, under § 202.3(a) or § 203.5(a) of this chapter, to permit a certificated route carrier to serve a point regularly through an airport not then regularly used by such carrier, or (2) for an application, under § 202.3(b)(2) of this chapter, for permission to use an airport, is $40.

(e) *Change in service pattern.*—The filing fee for an application for change in service pattern or an approved service plan is $40 for an application under Part 376 of this chapter and $300 for an application under Parts 202 and 203 of this chapter.

(f) *Change of name.*—The filing fee for an application, under Part 215 of this chapter, for a change of name or use of a trade name is $300.

(g) *Delay inauguration of or temporarily suspend service, and applications to extend property embargo notices.*—(1) The filing fee for an application, under Part 205 of this chapter, for authority to delay inauguration of service or to temporarily suspend service is $400.

(2) The filing fee for an application, under Subpart B of Part 228 of this chapter to extend a notice of embargo beyond thirty days is $25.

(h) *Exemptions from section 401, waivers of Parts 207, 208, 372, 372a, 373, 378, and 378a, and special operating authorizations.*—The filing fee for an application (1) for an exemption under section 416(b) or section 101(3) of the Act from the provisions of section 401 of the Act (except an application dealing with a specific number of charters), or (2) for a waiver of Parts 207, 208, 372, 372a, 373, 378, or 378a (except an application dealing with a specific number of charters), or (3) for a special operating authorization under section 417 of the Act, is $300.

(i) *Exemptions from section 403.*—The filing fee for an application for exemption under section 416(b) of the Act from the provisions of section 403 of the Act is $50.

(j) *Exemptions or waivers for the performance of a specific number of charters.*—The filing fee for an application for an exemption under section 416(b) or section 101(3) of the Act from the provisions of section 401 of the Act, or a request for a waiver of Parts 207, 208, 372, 372a, 373, 378 or 378a, for the performance of a specific number of charters (one-way or round-trip) is $100 plus $10 for each charter (one-way or round-trip) described, subject to a maximum fee of $300.

(k) *Free or reduced-rate authority, waiver of tariff regulations, and special tariff permission.*—The filing fee for applications (1) under § 223.8 of this chapter for authority to furnish free or reduced-rate overseas or foreign air transportation (except an application filed at the request of a U.S. Government agency or a foreign government), (2) under § 221.200 of this chapter for waiver or modification of the provisions of Part 221 with respect to the filing and posting of tariffs, or (3) for special permission under § 221.133 or § 221.191 of this chapter, is $10. With respect to applications for waiver or special tariff permission, such fee does not apply to an application which a foreign air carrier files or which a tariff publishing agent files on behalf of foreign air carriers exclusively.

(l) *Inclusive tour charter prospectus.*—The filing fee for each tour prospectus filed pursuant to § 378.10 or § 378.19 of this chapter is $50.

(m) *Bulk inclusive tour contracts and bonds.*—The filing fee for contracts and bonds covering a bulk inclusive tour or series of tours filed pursuant to § 378a.10 of this chapter is $50.

(n) *Study group statements.*—The filing fee for each study group statement filed pursuant to § 373.10 of this chapter is $50.

(o) *Travel group charters.*—The filing fee for each travel group charter filing pursuant to § 372a.22(a) of this chapter is $50.

(p) *Interlocking relationships under section 409.*—The filing fee for an application for approval of interlocking relationships under section 409 of the Act is $250.

(q) *Merger, acquisition of control etc., under section 408, and lease or purchase agreements under Part 299.*—(1) The filing fee for an application under section 408 of the Act is $150; except that the filing fee for an application for merger, consolidation, or acquisition of control of certificated air carriers is $3,000 for each certificated air carrier named in the merger, consolidation or acquisition of control.

(2) The filing fee for a lease or purchase agreement filed under Part 299 of this chapter is $50.

(r) *Motions.*—The filing fee for a motion, under Part 302 of this chapter, to strike, for leave to file an otherwise unauthorized document, or for expedited action is $50; except that there shall be no filing fee for a motion to strike impertinent or scandalous matters or pleadings.

(s) *Operating authorization—air freight forwarder.*—The filing fee for an application, under Part 296 or 297 of this chapter, for operating authorization as an air freight forwarder or international air freight forwarder is $400.

(t) *Operating authorization—overseas military personnel charter operator, and bonds covering overseas military personnel charter operations.*—(1) The filing fee for an application, under Part 372 of this chapter, for operating authorization as an overseas military personnel charter operator is $400.

(2) The filing fee for bonds covering overseas military personnel charter operations filed pursuant to § 372.24 of this chapter is $50.

(u) *Tariffs issued by carriers.*—(1) The filing fee for tariffs (including supplements and revised or additional original pages thereto) issued by an air carrier pursuant to section 403 or 1003 of the Act is $2 per page. That fee is applicable notwithstanding that the tariff contains participating foreign air carriers, but it is not applicable to a blank looseleaf page unless it cancels matter on the preceding issue of the page.

(2) There shall be no filing fee for tariffs issued by a foreign air carrier notwithstanding that the tariff contains participating air carriers.

(v) *Tariffs issued by publishing agents.*—The filing fee for tariffs (including supplements and revised or additional original pages thereto) issued by a publishing agent pursuant to section 403 or section 1003 of the Act is $2 per page, subject to the following conditions:

(1) If the tariff is issued on behalf of one or more air carriers exclusively, the filing fee is applicable to any page.

(2) If the tariff is issued on behalf of one or more foreign air carriers exclusively, no filing fee is applicable to any page.

(3) If the tariff is issued on behalf of one or more air carriers and one or more foreign air carriers, the filing fee is applicable to any page except to a page which the issuing agent states in his accompanying letter of tariff transmittal contains only:

(i) Matters pertaining exclusively to foreign air carriers, or

(ii) Changes only in matter pertaining exclusively to foreign air carriers when included on the same page together with matter (other than matter pertaining exclusively to foreign air carriers) which is reissued without change.

(4) The filing fee is not applicable to a blank looseleaf page unless it cancels matter on the preceding issue of the page other than matter pertaining only to foreign air carriers exclusively.

(5) Where two pages are published back-to-back on the same leaf and one page is not subject to a fee pursuant to paragraph (q)(3) of this section and the page on the reverse side is issued without change (except for pagination, correction number, and issued and effective dates), no fee is applicable to the latter page.

(6) The filing fee is applicable to a loose-leaf page containing a correction number check sheet unless all other pages of the tariff are exempt from filing fees.

(w) *Waivers.*—The filing fee for an application under § 389.23 of this chapter for a waiver or modification of fee is $25, or 10 percent of the fee for which a waiver is sought, whichever is less.

[SPOR 33; Special Regulations Docket No. 25854]

## CERTIFICATED AND FOREIGN AIR CARRIERS

### Travel Group Charters

SEPTEMBER 4, 1973.

Notice is hereby given that the Civil Aeronautics Board proposes to amend Part 372a of its Special Regulations (14

CFR Part 372a) so as to authorize certificated air carriers and foreign air carriers to perform foreign-originating travel group charters organized in compliance with the rules of the country of origin, so long as: (1) those foreign rules are substantially similar to Part 372a, and (2) there is in effect, between the country of origin and the United States a formal agreement with respect to the charterworthiness of such operations. The purpose of the proposed amendment is explained in the attached explanatory statement, and the proposed amendment is set forth in the proposed rule. The amendment is proposed under the authority of section 101(3), 204(a), 401, 402, 407, 416, and 1102 of the Federal Aviation Act of 1958, as amended, (72 Stat. 737 (as amended by 75 Stat. 467, 76 Stat. 143, 82 Stat. 867, 84 Stat. 921), 743, 754, 757, 766, 771, and 797; 49 U.S.C. 1301, 1324, 1371, 1372, 1386, and 1502).

Interested persons may participate in the proposed rulemaking through submission of twelve (12) copies of written data, views, or arguments pertaining thereto, addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. All relevant material received on or before October 10, 1973, will be considered by the Board before taking final action on the proposed rule. Copies of such communications will be available for examination by interested persons in the Docket Section of the Board, Room 712 Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., upon receipt thereof.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

EXPLANATORY STATEMENT

Part 372a of the Board's Special Regulations (14 CFR Part 372a)[1] governs the operation of Travel Group Charters (TGC). Essentially the part permits groups of 40 or more persons having no "prior affinity" to hire all or part of an aircraft for round-trip transportation provided the group is formed at least ninety days in advance of the flight departure date, and each participant pays at least a twenty-five percent nonrefundable deposit. The actual cost of the trip is to be borne by the participants on a pro rata basis. The part authorizes the performance of charter flights by both U.S. and foreign direct air carriers in connection with foreign-originating as well as U.S.-originating TGC's, subject to compliance with the various conditions and restrictions set forth therein.

In adopting Part 372a, the Board had been motivated by the discrimination inherent in the "prior affinity" concept, and the fact that our existing rules had proven to be extremely difficult to enforce. These concerns as to the inherent failings of the "prior affinity" concept had been shared for some time by the regulatory authorities of many other countries. During the pendency of the rulemaking proceeding which culminated in the adoption of Part 372a, several participants had argued for the adoption of special rules with respect to foreign-originating TGC's, so as to permit such charters to be operated in conformance with the originating country's rules governing TGC's (or counterpart charter concept, however designated), so long as the foreign country's rules were substantially similar to those prescribed by Part 372a. However, at the time the Board adopted Part 372a, no foreign country had as yet promulgated comparable charter rules, and the Board therefore considered it premature to attempt then to prescribe standards for determining whether another country's future rules would be substantially similar to ours. The Board did, however, express agreement in principle with the merits of the proposed "law of the country of origin" approach, and indicated its willingness to deal with this matter later, in light of future developments in the international air transportation community, and to take appropriate implementing action—by amending our rules, granting waivers, or otherwise—giving due consideration to the interests of the public and the various competing classes of carriers.[2]

Subsequent to the Board's adoption of its TGC rule and an announcement by the United Kingdom of its intention to adopt an Advance-Booking Charter (ABC) rule, embodying a comparable concept, representatives of the governments of the United States, Canada, and the 20 member states of the European Civil Aviation Conference (ECAC), met in Ottawa, Canada, from October 17 to 19, 1972, and duly issued a joint Declaration of Agreed Principles for North Atlantic Charter Flights (Ottawa Principles). The Ottawa Principles were developed as a means to establish, during a period of experimentation with non-affinity charter concepts, a generally agreed framework which would permit all North Atlantic countries to establish substantially similar rules which could be reciprocally recognized. For its part, the Department of State in announcing acceptance by the United States of the Ottawa Principles, expressed its willingness to undertake discussions with other interested authorities in order "to arrive at [a] mutually agreeable regime for particular bilateral traffic flows and to ensure fully reciprocal treatment for U.S.-originating TGC flights."[3]

By now, a number of other foreign governments have adopted their own charter regulations, which are based upon the Ottawa Principles and incorporate restrictive features similar, but not identical, to those contained in Part 372a. Moreover, bilateral agreements have been concluded between the United States and some of those foreign governments, following discussions conducted in accordance with the above-described announcement of the State Department.

In light of the above, the Board believes that it would now be appropriate to propose amending Part 372a so as to authorize foreign air carriers holding section 402 permits, as well as all certificated U.S. air carriers, to perform foreign-originated TGC's or advance-booking charters, organized in compliance with the rules of the country of origin, so long as: (1) those foreign rules are substantially similar to ours, and (2) there is in effect, between the country of origin and the United States, a formal agreement with respect to the charterworthiness of such operations.

The Board has tentatively concluded that, in order for a foreign country's rules to be considered substantially similar to our own, they must embody, at a minimum, the following restrictions and conditions:

1. The participants in each TGC/ABC group must travel together on both the outbound and inbound portions of the trip.

2. Each TGC/ABC contract must cover at least forty seats.

3. The list of actual participants (i.e., persons contractually bound to pay for a specifically identified flight) in each TGC/ABC group must be filed with appropriate regulatory authorities at least ninety days in advance of flight departure.

4. If there is to be a list of "standbys" (i.e., eligible substitutes for participants) for a TGC/ABC, and if the cost of the TGC/ABC is prorated among participants, then the number of such standbys shall not exceed three times the number of participants; but if the cost to individual TGC/ABC participants is not prorated, then the number of standbys shall not be greater than the number of seats contracted for.

5. No person shall be added to a standby list within ninety days prior to flight departure.

6. If the cost of the TGC/ABC is prorated among participants, then standbys may be substituted for participants at any time prior to flight departure; but if the cost to individual TGC/ABC participants is not prorated, then standbys may not be substituted for participants within thirty days prior to flight departure.

7. If the cost of the TGC/ABC is prorated among participants, then no more than twenty percent of the participants in any TGC/ABC group may be persons whose names were included on the standby list for that TGC/ABC flight; but if the cost to individual TGC/ABC participants is not prorated, then no more than fifteen percent of the number of seats contracted for may be sold to persons whose names were on the standby list relating to such flight.

---

[1] SPR-61, adopted September 27, 1972, 37 FR 20808, October 4, 1972.

[2] SPR-81, pp. 22-23 (mimeo).

[3] See Department of State Press Release # 296, dated December 1, 1972, containing the text of a letter from Deputy Assistant Secretary of State for Transportation and Telecommunications, Bert W. Rein, addressed jointly to the Chairman of the Canadian International Transport Policy Committee, Canadian Transport Commission, and the President of the European Civil Aviation Conference.

V 38-174 SEP 10 73 XUM

8. A TGC/ABC must be "round-trip" (i.e., including both a departure and return flight).

9. If the cost of the TGC/ABC is prorated among participants then a TGC/ABC must be for a minimum duration of at least seven days in the case of North American charters, and a minimum duration of at least ten days in the case of all other charters; but if the cost to individual TGC/ABC participants is not prorated, then during the period of April 1 to October 31, the TGC/ABC must provide for a minimum duration of at least fourteen days, and during the period of November 1 to March 31, the minimum duration must be at least ten days: *Provided, however,* That the minimum duration of non-prorated North American TGC/ABC's need not be greater than seven days.

10. If the cost of the TGC/ABC is prorated among participants, then commingling of TGC/ABC groups with other categories of charter traffic is permitted but if the cost to individual TGC/ABC participants is not prorated, then no commingling of TGC/ABC groups with other categories of charter traffic shall be permitted.

11. The direct air carrier shall maintain a list of the passengers actually carried on each TGC/ABC flight.

Our proposal to recognize the charterworthiness of foreign-originated TGC/ABC's operated pursuant to the rules of the country of origin so long as those rules embody the above-listed restrictions is grounded on our tentative conclusion that the proposed special rules will maintain, as our present rules have recently been held to maintain, "the necessary distinction between group and individually ticketed travel • • •."[4]

Although the minimum conditions which we are proposing to prescribe for foreign TGC/ABC rules include some which are less restrictive than those which we have imposed on U.S.-originating TGC's, others are included which are more restrictive than those presently contained in Part 372a. Viewed as a whole, we tentatively find that the cumulative effect of the various restrictions which we propose herein would be "to insure that charter travel [does] not become a guise for individually ticketed services."[5]

In reaching our conclusion to modify the inbound charter rules, we have given great weight to the fact that the pro rata characteristic of our TGC rule appears to be unacceptable to a number of foreign governments for charters originating in their territory. Our insistence on this one requirement, regardless of the country of origin or the flag of the carrier, could thus result in effectively aborting the TGC experiment. Moreover, as a general principle, we are mindful that the international aviation system cannot maintain its viability if every government rigidly insists on imposing its own regulatory concepts on other sovereign states. Our approach here, which is designed, as a matter of comity, to recognize the validity of rules of foreign governments for charters originating in their territory, while maintaining our own rules for charters originating in this country, represents a reasonable accommodation of the divergent viewpoints of various sovereign members of the international aviation community in dealing with a common problem.

The proposed rules should generally enable inbound TGC/ABC charters to be operated from all countries with which the United States has concluded a formal agreement with respect to the charterworthiness of this new class of charters. These agreements have thus far included, and future agreements are expected to include, a stipulation that the subject rules of the signatories are "substantially similar." To the extent that the rules of a particular foreign signatory may embody variations which do not completely comply with our proposed restrictions, authority to operate charters under such foreign rules would have to be obtained by waiver, pursuant to § 372a.3.

Finally, we are proposing a technical amendment to §372a.31, which would impose on TGC organizers who organize foreign-originated TGC/ABC flights certain requirements as to retention and disclosure of relevant records which will enable us to determine whether the rules of the country of origin are actually being followed.[6]

PROPOSED RULE

It is proposed to amend Part 372a of the Special Regulations (14 CFR Part 372a) as follows:

1. Amend the table of contents by adding a new Subpart F, the table as amended to read in part as follows:

**Subpart E—Reporting Requirements**

Sec.
372a.50 Reporting requirements.

**Subpart F—Foreign-Originating Travel Group Charters**

372a.60 Foreign-originating travel group charters.

2. Amend the definitions of "travel group charter" and "travel group charter organizer" in § 372a.2 to read as follows:

**§ 372a.2 Definitions.**

As used in this part, unless the context otherwise requires—

• • • • •

"Travel group charter" means a round-trip charter to be performed by one or more direct air carrier which is arranged and sponsored by a charter organizer for a travel group and which meets the requirements set forth in §§372a.10 or 372a.60, whichever is applicable.

"Travel group charter organizer" means (1) any citizen of the United States, as defined in section 101(13) of the Act (other than a direct air carrier), who is authorized hereunder to engage in the formation of travel groups in accordance with the provisions of this part; or (2) a foreign charter organizer.

3. Amend § 372a.22 by adding, as a new paragraph (e), matter deleted hereinabove from § 372a.2, the section, as amended, to read as follows:

**§ 372a.22 Operating authorization of charter organizer.**

• • • • •

(d) On and after May 30, 1973, • • •

• • • • •

(e) With respect to the charter contract, such charter organizer acts solely as agent for, and holds all moneys received from any source in connection therewith as agent for, the members of the travel group.

4. Amend § 372a.31 by inserting, following paragraph (a) a new paragraph (a–1), and by revising paragraph (b), the entire section, as amended, to read as follows:

**§ 372a.31 Record retention.***

(a) Every charter organizer (other than a foreign charter organizer over whom the Board has declined to exercise its jurisdiction) conducting a travel group charter pursuant to this part shall retain for 2 years after completion of the charter or series of charters true copies of the following documents at its principal or general office in the United States (or, if it is a foreign charter organizer, then at its principal or general office):

(1) All documents which evidence or reflect deposits made by, and refunds made to, each charter participant;

(2) All statements, invoices, bills, and receipts from suppliers or furnishers of goods and services in connection with the travel group charter or series of charters.

(a–1) Every charter organizer (other than a foreign charter organizer over whom the Board has declined to exercise its jurisdiction) conducting a travel group charter pursuant to Subpart F of this part shall retain for 2 years after completion of the charter at its principal or general office in the United States true copies of all documents which it is required by the applicable rules of the originating country to file with the regulatory authorities of that country or to maintain in its own files for any specified period.

(b) Every such charter organizer shall make the documents required to be retained by the provisions of the foregoing paragraphs (a) or (a–1), as the case may be, available upon request by an authorized representative of the Board and shall permit such representative to make such notes and copies thereof as he deems appropriate.

5. Amend § 372a.40 to read as follows:

**§ 372a.40 Charter not to be performed unless in compliance with part.**

A direct air carrier shall not perform air transportation in connection with a travel group charter unless it has made a reasonable effort to verify that all provisions of this part have been complied with (or, if it is a foreign-originated charter to which Subpart F applies, that all provisions of the rules of the country of origin have been complied with), and that the charter organizer's authority under this part has not been suspended by the Board (or, if it is a foreign-originated charter to which Subpart F applies, that the charter organizer's authority has not been suspended by the regulatory authorities of the country of origin): *Provided, however,* That except with respect to foreign-originated charters operated pursuant to Subpart F of this part, where a travel group is organized by a foreign charter organizer over whom the Board has declined to exercise its jurisdiction pursuant to § 372a.20a, no direct air carrier may perform air transportation in connection with such travel group charter unless the charter is formed and implemented in accordance with the general conditions and limitations set forth in Subpart B of this part and the charter organizer performs all the acts and duties which this part requires to be performed by charter organizers within the Board's jurisdiction, other than the provisions set forth in §§ 372a.22(b)(4)(iii), 372a.25 and 372a.31.

6. Amend Part 372a by adding a new Subpart F to read as follows:

**Subpart F—Foreign-Originating Travel Group Charters**

**§ 372a.60 Foreign-originating travel group charters.**

(a) Notwithstanding the general conditions and limitations set forth in Subpart B of this part or the conditions set forth in §§ 372a.22, 372a.25, 372a.27 through 372a.30, 372a.31(a)(1), or the prohibitions set forth in §§ 372a.41 and 372a.42, or the reporting requirements set forth in Subpart E of this part, direct air carriers and charter organizers (other than a foreign charter organizer over whom the Board has declined to exercise its jurisdiction) are authorized to operate and organize foreign-originating travel group or advance-booking charters (referred to herein as TGC/ABC) in compliance with the applicable rules of the originating country, so long as (1) such foreign rules conform to paragraph (b) of this section, and (2) there is in effect a formal agreement between the originating country and the United States with respect to the charterworthiness of such operations.

(b) The following are the restrictions and conditions to which foreign rules must conform in order for direct air carriers and charter organizers to operate and organize foreign-originating TGC/ABC charters pursuant to paragraph (a) of this section:

(1) The participants in each TGC/ABC group must travel together on both the outbound and inbound portions of the trip.

(2) Each TGC/ABC contract must cover at least forty (40) seats.

(3) The list of actual participants (i.e., persons contractually bound to pay for a specifically identified flight) in each TGC/ABC group must be filed with appropriate regulatory authorities at least ninety (90) days in advance of flight departures.

(4) If there is to be a list of "standbys" (i.e., eligible substitutes for participants) for a TGC/ABC, and if the cost of the TGC/ABC is prorated among participants, then the number of such standbys shall not exceed three times the number of participants; but if the cost to individual TGC/ABC participants is not prorated, then the number of standbys shall not be greater than the number of seats contracted for.

(5) No person shall be added to a standby list within ninety (90) days prior to flight departure.

(6) If the cost of the TGC/ABC is prorated among participants, then standbys may be substituted for participants at any time prior to flight departure; but if the cost to individual TGC/ABC participants is not prorated, then standbys may not be substituted for participants within thirty (30) days prior to flight departure.

(7) If the cost of the TGC/ABC is prorated among participants, then no more than twenty percent of the participants in any TGC/ABC group may be persons whose names were included on the standby list for that TGC/ABC flight; but if the cost to individual TGC/ABC participants is not prorated, then no more than fifteen percent of the number of seats contracted for may be sold to persons whose names were on the standby list relating to such flight.

(8) A TGC/ABC must be "round-trip" (i.e., including both a departure and return flight).

(9) If the cost of the TGC/ABC is prorated among participants, then a TGC/ABC must be for a minimum duration of at least seven days in the case of North American charters, and a minimum duration of at least ten days in the case of all other charters; but if the cost to individual TGC/ABC participants is not prorated, then during the period of April 1 to October 31, the TGC/ABC must provide for a minimum duration of at least fourteen days, and during the period of November 1 to March 31, the minimum duration must be at least ten days: *Provided, however,* That the minimum duration of a nonprorated North American TGC/ABC need not be greater than seven days.

(10) If the cost of the TGC/ABC is prorated among participants, then commingling of TGC/ABC groups with other categories of charter traffic is permitted, but if the cost to individual TGC/ABC participants is not prorated, then no commingling of TGC/ABC groups with other categories of charter traffic shall be permitted.

(11) The direct air carrier shall maintain a list of the passengers actually carried on each TGC/ABC flight.

### EXECUTIVE AND VARIABLE COMPENSATION

**Notice of Proposed Rulemaking**

*Correction*

In FR Doc. 73-18704 appearing at page 23628 in the issue for Friday, August 31, 1973, § 152.130(e)(1) in the second column on page 23640 should be corrected to read as set forth below:

(e) *Limitation on incentive compensation*—(1) *General.* Payments, awards, or grants of incentive compensation pursuant to incentive compensation plans or practices subject to the provisions of § 152.124 or § 152.125, made with respect to a fiscal year with respect to employees who are members of an executive control group, shall not exceed an amount which is equal to the product of the allowable amount for the plan or practice unit (determined pursuant to § 152.124 or § 152.125, as applicable, and before adjustment for changes in size of plan or practice unit) and the apportionment factor for the plan or practice determined pursuant to paragraph (e)(2) of this section, multiplied by the adjustment factor for the executive control group determined pursuant to paragraph (e)(3) of this section.

## ENVIRONMENTAL PROTECTION AGENCY

[ 40 CFR Part 180 ]

### TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

**Sodium Chlorate; Proposed Exemption From Requirement of a Tolerance**

On the initiative of the Administrator it is proposed that sodium chlorate, when used with urea as a fire retardant, be exempted from the requirement of a tolerance in or on the raw agricultural commodity sorghum grown for seed only.

Based on available data it is concluded that:

[4] Saturn Airways, Inc. v. CAB, No. 72-1904, D.C. Cir., July 11, 1973, at 19.

[5] Id., at 21.

[6] The attached proposed rule also includes technical revisions of the definitions of "travel group charter" and "travel group charter organizer" in § 372a.2 so as to conform to the proposed substantive amendments, and would eliminate from the definition of the latter term certain substantive material, which would become incorporated in § 372a.22.

[*] Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious, or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious, or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both. Title 18, U.S.C. § 1001.

V 38-174 SEP 10 73 XUM

1. The pesticide is useful for the purpose for which the exemption is proposed.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

3. The proposed exemption will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), it is proposed that § 180.1020 be amended by adding a new paragraph as follows:

**§ 180.1020 Sodium chlorate; exemption from the requirement of a tolerance.**

* * * * *

Sodium chlorate, when used with urea as a fire retardant, is exempted from the requirement of a tolerance for residues in or on sorghum grown for seed only when used in accordance with good agricultural practice as a desiccant in sorghum seed production.

Any person who has registered or submitted an application for the registration of an economic poison under the Federal Insecticide, Fungicide, and Rodenticide Act containing any of the ingredients listed herein may request, on or before October 10, 1973, that this proposal be referred to an advisory committee in accordance with section 408(e) of the act.

Interested persons may, on or before October 10, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th & M Streets SW., Waterside Mall, Washington, D.C. 20460, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. All written submissions made pursuant to this proposal will be made available for public inspection at the office of the Hearing Clerk.

Dated August 30, 1973.

HENRY J. KORP,
*Deputy Assistant Administrator for Pesticide Programs.*

## SECURITIES AND EXCHANGE COMMISSION

**[ 17 CFR Part 230 ]**

[Release No. 33-5419]

### EXEMPTION OF CERTAIN PROMISSORY NOTES

**Notice of Proposed Rule Making**

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposed new Rule 239 (17 CFR 230.239) under the Securities Act of 1933 (Act). The proposed rule would provide an exemption pursuant to section 3(b) of the Act for certain promissory notes directly secured by a first lien on a parcel of residential real estate. Section 3(b) authorizes the Commission to exempt from the registration requirements of the Act any issue of securities if the aggregate amount at which such issue is offered to the public does not exceed $500,000 and if the Commission finds that the enforcement of the Securities Act with respect to such securities is not necessary in the public interest and for the protection of investors by reason of the small amount involved or the limited character of the public offering.

Proposed Rule 239 exempts from registration certain first lien promissory notes. The exemption will apply only to notes originated by certain banking institutions or other regulated mortgages. In order to insure the small-issue aspect of the exemption, the following requirements are contained within the rule: (1) the aggregate unpaid principal amount of the notes and the aggregate offering price to the public cannot exceed $500,000; (2) the aggregate unpaid debt secured by the lien cannot exceed 95 percent of the property's appraised valuation; (3) the unpaid principal amount of each note cannot be less than $15,000; and (4) the notes shall be sold for cash or purchasers' obligations to pay cash within 60 days after sale.

For purposes only of the proposed rule, the term "issuer" is defined as the mortgagor or such other person who may be primarily obligated on the evidence of indebtedness secured by the lien on the property. Further, the rule makes clear that the insuring of mortgages will not destroy the exemption afforded by it.

It should be noted that the proposed rule resembles in many respects existing Rule 234 (17 CFR 230.234) under the Act. Rule 234 is designed basically to provide an exemption from registration for owners of real estate who have a limited investment in their property and issue first lien notes thereon. Rule 239, on the other hand, would generally exempt the resale of first lien mortgage notes in the so-called secondary market, which is generally limited to institutional or similar investors. The Commission proposes to retain Rule 234 in its present form in order to continue to provide an exemption from registration for homeowners and others who now rely upon it, while at the same time adopting Rule 239 to validate, within certain specified limits, the operation of the ongoing secondary market in mortgages, which appears to have operated for many years without any significant abuses.

The text of the proposed rule follows:

**§ 230.239 Exemption of certain promissory notes directly secured by a first lien on real estate.**

(a) Promissory notes directly secured by a first lien on a single parcel of real estate upon which is located a dwelling or other residential structure shall be exempt from registration under the Act if such notes are offered in accordance with the following terms and conditions:

(1) Neither the aggregate unpaid principal amount of the notes secured by the lien on the property nor the aggregate amount at which such notes are offered by the issuer to the public shall exceed $500,000;

(2) The aggregate unpaid principal amount of all indebtedness secured by the first lien on the property shall not exceed 95 percent of the appraised value of such property;

(3) The promissory notes secured by the lien on the property must be or have originated by a savings or loan association, savings bank, commercial bank, or similar banking institution which is supervised and examined by a Federal or State authority or by a mortgagee approved by the Secretary of Housing and Urban Development pursuant to 12 U.S.C. §§ 1703, 1707(b);

(4) The unpaid principal amount of each note to be offered shall not be less than $15,000;

(5) The notes shall be sold for cash or purchasers' obligations to pay cash within 60 days after sale.

(b) Interests or participations in, or promissory notes secured by a lien upon another note or notes which are in turn secured by a first lien upon real estate shall not be deemed to be directly secured by a first lien on real estate within the meaning of this rule.

(c) For purposes of this rule, the issuer is deemed to be the mortgagor or such other person who may be primarily obligated on the evidence of indebtedness secured by the lien on the property.

(d) Private mortgage insurance applicable to a promissory note or notes shall not affect the availability of the exemption afforded by this rule.

(e) No exemption shall be available under this rule for any investment contract or other security the offering of which is involved in the offering of the notes secured directly by a first lien upon residential real estate.

The foregoing action is taken pursuant to the Securities Act of 1933, particularly sections 3(b) and 19(a) thereof.

All interested persons are invited to submit their views on the proposed rule, in writing, to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, to be received on or before October 11, 1973. All such communications will be available for public inspection and should refer to File No. S7-493.

(Secs. 3(b), 19(a), 48 Stat. 75, 85, sec. 209, 48 Stat. 908, 59 Stat. 167, 84 Stat. 1480, 15 U.S.C. 77c(b), 77s(a).)

By the Commission.

GEORGE A. FITZSIMMONS,
*Secretary.*

## DEPARTMENT OF THE TREASURY

**Office of the Secretary**

### CALCIUM PANTOTHENATE FROM JAPAN

**Antidumping; Determination of Sales at Less Than Fair Value**

SEPTEMBER 6, 1973.

Information was received in proper form on October 20, 1972, that calcium pantothenate from Japan was being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act").

A "Withholding of Appraisement Notice" issued by the Secretary of the Treasury was published in the FEDERAL REGISTER of June 8, 1973 (38 FR 15086).

I hereby determine that for the reasons stated below, calcium pantothenate from Japan is being, or is likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

*Statement of reasons on which this determination is based.*—The information before the U.S. Customs Service indicates that the proper basis of comparison for fair value purposes is between purchase price and the adjusted home market price of such or similar merchandise.

Purchase price was calculated on the basis of an ex-godown or c.i.f. price, as appropriate, for exportation to the United States, with deductions for ocean freight, inland freight, insurance charges, and shipping charges, as applicable.

Home market price was calculated on the basis of a weighted-average delivered price to purchasers in the home market with deductions, as appropriate, for inland freight charges, insurance charges, and sales promotion rebates. An adjustment was made for differences in credit costs.

Using the above criteria, purchase price was found to be lower than the adjusted home market price of such or similar merchandise.

Calcium pantothenate produced and sold by Fuji Chemical Industries, Ltd., of Tokyo, Japan, is excluded from this determination of sales at less than fair value since 100 percent of its export sales during the period under consideration were examined, and the home market price of its merchandise was found to be lower than the purchase price of such or similar merchandise in every instance.

The United States Tariff Commission is being advised of this determination.

This determination is being published pursuant to section 201(c) of the Act (19 U.S.C. 160(c)).

[SEAL] EDWARD L. MORGAN,
*Assistant Secretary of the Treasury.*

### ADVISORY COMMITEE MEETINGS

*Correction*

The Department of Defense Advisory Group on Electron Devices notice of meetings published at 38 FR 22806, August 24, 1973, is changed to read as follows:

The Department of Defense Advisory Group on Electron Devices, and various working groups thereof, will meet in closed sessions on dates indicated below. Unless otherwise indicated, meetings will be held at 201 Varick Street, New York, New York.

Advisory Group on Electron Devices, September 11, 1973.
Working Group on Special Devices, September 11, 1973.
Working Group on Passive Devices, September 18, 1973.
Working Group on Low Power Devices, September 21, 1973.
Meeting to be held at the Naval Electronics Laboratory Center, 271 Catalina Boulevard, San Diego, California.
Working Group on High Power Devices, September 25–26, 1973.

The purpose of the DoD Advisory Group on Electron Devices is to provide the Director of Defense Research and Engineering and the Military Departments with advice and recommendations on the conduct of economical and effective research and development programs in the field of electron devices, e.g., lasers, radar tubes, transistors, infrared sensors, etc. The group is also the vehicle for interservice coordination of planned R&D efforts.

In accordance with Public Law 92-463, Section 10d, the Director of Defense Research and Engineering has determined, on 28 Feb 1973, that the meetings of the Advisory Group are matters which fall within policies analogous to those recognized in Section 552(b) of Title 5 of the United States Code and that the public interest requires such activities to be withheld from disclosure insofar as the requirements of subsection (a)(1) and subsection (b) of section 10, Public Law 92-463 are concerned.

September 5, 1973.

MAURICE W. ROCHE,
*Director, Correspondence and Directives, OASD (Comptroller).*

## DEPARTMENT OF THE INTERIOR

**Bonneville Power Administration**

### BONNEVILLE REGIONAL ADVISORY COUNCIL

**Notice of Public Meetings**

The Bonneville Regional Advisory Council will hold a series of regional meetings to discuss the energy situation in the Pacific Northwest. The dates and places of the meetings are as follows:

Tuesday, September 18—Burley, Idaho (Ramada Inn).
Tuesday, September 25—Portland, Oregon (Sheraton Motor Inn).
Wednesday, September 26—Spokane, Wash. (Ridpath Motor Inn).
Wednesday, October 3—Pasco, Wash. (Red Lion Inn).
Thursday, October 4—Seattle, Wash. (Seattle Downtown Hilton Hotel).

Each meeting will begin at 10:15 a.m. and will be open to interested members of the public. There is no registration fee, but there will be a charge for the no-host luncheon.

The main purpose of the meeting will be to discuss the near-term power outlook, energy conservation and curtailment, the proposed upcoming BPA rate increase, and the long-range implementation of the Hydro-Thermal Power Program.

The regional meetings of the Bonneville Regional Advisory Council provide a general forum for the free exchange of ideas as to the best ways of utilizing the energy resources of the region.

Copies of the proceedings of each meeting will be furnished on request to the Executive Secretary, Bonneville Regional Advisory Council, P.O. Box 3621, Portland, Oreg. 97208.

Dated August 29, 1973.

DAN W. SCHAUSTEN,
*Executive Secretary, Bonneville Regional Advisory Council.*

## NUNIVAK NATIONAL WILDLIFE REFUGE

### Notice of Public Hearing Regarding Wilderness Proposal

Notice is hereby given in accordance with provisions of the Wilderness Act of September 3, 1964 (P.L. 88-577;78 Stat. 890-896; 16 U.S.C. 1131-1136), that a public hearing will be held beginning at 7 p.m. on October 17 at the school house, Medoryuk Island, 2nd. Judicial District, Alaska, and to be continued on October 24, at 7 p.m., at the Loussac Library, Anchorage, Third Judicial District, Alaska, on a proposal leading to a recommendation to be made to the President of the United States by the Secretary of the Interior regarding the desirability of including a portion of the Nunivak Refuge within the National Wilderness Preservation System. The wilderness study included the entire acreage within Nunivak National Wildlife Refuge, which is located in the 2nd Judicial District, State of Alaska.

A study summary containing a map and information on the Nunivak Wilderness Study may be obtained from the Refuge Manager, Clarence Rhode National Wildlife Range, Box 346, Bethel, Alaska 99559, or the Area Director, Bureau of Sport Fisheries and Wildlife, 813 D Street, Anchorage, Alaska 99501.

Individuals or organizations may express their oral or written views by appearing at this hearing, or they may submit written comments for inclusion in the official record of the hearing to the Regional Director at the above address by November 23, 1973.

Dated September 4, 1973.

CHARLES M. LOVELESS,
*Acting Director, Bureau of Sport Fisheries and Wildlife.*

## INDIANA DUNES NATIONAL LAKESHORE ADVISORY COMMISSION

### Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Indiana Dunes National Lakeshore Advisory Commission will be held at 9:30 a.m., E.D.T., on Friday, September 28, 1973, at the Sleeping Bear Dunes National Lakeshore Interim Visitor Center, Intersection of 109 & Welch Road, 4.4 miles south of Glen Haven, Michigan.

The purpose of the Indiana Dunes National Lakeshore Advosiry Commission is to meet and consult with the Secretary of the Interior on general policies and specific matters relating to the administration and development of the Indiana Dunes National Lakeshore.

The members of the Commission are as follows:

Mr. William L. Lieber (Chairman), Indianapolis, Indiana.
Mr. Harry W. Frey, Michigan City, Indiana.
Mrs. Ione F. Harrington, Chesterton, Indiana.
Mr. John A. Hillenbrand II, Batesville, Indiana.
Mr. Ed Masiulis, Beverly Shores, Indiana.
Mr. Harold G. Rudd, Portage (Ogden Dunes), Indiana.
Mr. John R. Schnurlein, Valparaiso, Indiana.

The matters to be discussed at this meeting include:

1. Superintendent's report on matters relevant to Indiana Dunes National Lakeshore since the last meeting.
2. Land Acquisition Officer's report on matters relevant to Indiana Dunes National Lakeshore since the last meeting.
3. Discussion of the Gary-Lake-Porter County Regional Transportation Planning Commission Suggestions on West Beach Parking Facility.

The meeting will be open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact James R. Whitehouse, Superintendent, Indiana Dunes National Lakeshore, at 219-926-7561. Minutes of the meeting will be available for public inspection three weeks after the meeting at the Superintendent's Office of the Indiana Dunes National Lakeshore located at the intersection of State Park Road and U.S. Highway 12, Chesterton, Indiana.

Dated August 28, 1973.

IRA WHITLOCK,
*Acting Associate Director, National Park Service.*

## MINUTE MAN NATIONAL HISTORICAL PARK ADVISORY COMMISSION

### Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Minute Man National Historical Park Advisory Commission will be held, commencing at 8:00 p.m., on Thursday, September 27, 1973, at Park Headquarters on Route 2A, Lincoln, Massachusetts.

The Commission was established by Public Law 86-321 to advise the Secretary of the Interior on the development of Minute Man National Historical Park.

The members of the Advisory Commission are as follows:

Mr. James DeNormandie, Lincoln, Massachusetts.
Mr. Donald E. Nickerson, Lexington, Massachusetts.
Mr. Francis S. Moulton, Jr., Concord, Massachusetts.
Mrs. Katharine S. White, Lincoln, Massachusetts.

The matters to be discussed at this meeting include land acquisition and proposed developments. In addition, the Superintendent will give a report on activities and park operations since the last Commission meeting.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and it is expected that not more than 35 persons will be able to attend. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements may contact Herbert Olsen, General Superintendent, Boston Group, National Park Service, at 617-369-6993. Minutes of the meeting will be available for public inspection four weeks after the meeting at the Office of the Boston Group, National Park Service, Liberty Street, Concord, Massachusetts.

Dated August 28, 1973.

IRA WHITLOCK,
*Acting Associate Director, National Park Service.*

Agricultural Marketing Service

## MILK IN SOUTHEASTERN MINNESOTA-NORTHERN IOWA AND MINNEAPOLIS-ST. PAUL, MINNESOTA, MARKETING AREAS

### Determination of Equivalent Prices in August 1973 for New York Grade AA (93-Score) Butter

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable provisions of the orders, as amended, regulating the handling of milk in the aforesaid milk marketing areas, hereinafter referred to as the "orders", it is hereby found and determined as follows:

(1) Due to the limited number of days on which a price for Grade AA (93-score) butter at New York was reported by the Dairy and Poultry Market News Service, U.S. Department of Agriculture, Agricultural Marketing Service, we conclude that the prices reported do not provide an adequate basis for computing an average price for such grade of butter for August 1973.

Dairy and Poultry Market News Service regularly reports wholesale bulk butter prices for New York Grade AA (93-score) butter on Tuesday, Thursday, and Friday of each week. The average of such prices during the month is used to determine the Class II butterfat differentials pursuant to the two specified milk orders. For the first two weeks of August 1973, no quotations were reported for the New York 93-score butter. For the second half of the month, only two quotations were reported. An average of these wholesale prices is not representative for the month because the end-of-month quotations do not give proper weight to the lower level of spot market prices in the beginning of the month. It is therefore determined to be necessary to provide equivalent prices for those reporting days on which the wholesale prices at New York for Grade AA (93-score) butter were lacking.

Such equivalent prices have been determined based on spot market prices for New York Grade AA (93-score) butter on the New York Mercantile Exchange plus a normal differential between such spot prices and wholesale bulk selling prices. Using these equivalent prices in conjunction with the wholesale bulk New York Grade AA (93-score) butter prices reported during the month, it is hereby determined that the average New York Grade AA (93-score) butter price for August 1973, for purposes specified in the aforesaid orders, is 78.02 cents.

(2) Notice of proposed rulemaking, public procedure thereon, and 30 days prior notice of the effective date hereof are impracticable, unnecessary and contrary to the public interest, in that (a) the daily wholesale bulk selling price for New York Grade AA (93-score) butter has been reported by the Dairy and Poultry Market News Service, U.S. Department of Agriculture, Agricultural Marketing Service, on only two days during August 1973, and such prices are not representative prices for the entire month of August 1973; (b) the need for determination of equivalent prices could not be known until the end of August 1973, and such determination could not be made until all available data for the month had been obtained; (c) the determination of such equivalent prices is necessary to make possible the announcement of butterfat differentials pursuant to the orders on September 5, 1973; (d) this determination is necessary to give notice to all interested persons that the average of the New York Grade AA (93-score) wholesale bulk butter prices reported by the Dairy and Poultry Market News Service during August 1973 will not be the price used in computing butterfat differentials under the aforesaid orders; and (e) this determination does not require substantial or extensive preparation by any person.

Signed at Washington, D.C., on September 5, 1973.

CLAYTON YEUTTER,
*Assistant Secretary.*

Office of the Secretary

## AGRICULTURE GRANT AND AGREEMENT REGULATIONS

### Notice of Promulgation of Policies and Procedures

Notice is hereby given that the U.S. Department of Agriculture has promulgated uniform policies and procedures applicable to administrative processes of grants and cooperative agreements.

These policies and procedures are set out as Title 4, USDA Administrative Regulations, "Agriculture Grant and Agreement Regulations."

Copies of Title 4 or any part thereof may be obtained in person or by mail from the Office of the Director, Office of Plant and Operations, U.S. Department of Agriculture, Washington, D.C. 20250.

As these policies and procedures relate to agency management, grants, and contracts, they are not subject by law to the notice and public procedure requirements for rulemaking under 5 U.S.C. 553. They are, however, subject to the Secretary's Statement of Policy (36 FR 13804). These policies and procedures incorporate existing policy contained in the Code of Federal Regulations and embody existing Government-wide policy promulgated by the Office of Management and Budget. No useful purpose would be served by public participation, and it is found upon good cause, in accordance with the Secretary's Statement of Policy, that notice and other public procedures with respect to this issuance are impracticable and unnecessary.

After review of these policies and procedures, interested parties are encouraged to submit written comments, views, or data to the Director, Office of Plant and Operations. Such comments, views, or data will be considered in future changes.

*Effective date.*—This notice shall be effective September 10, 1973.

Done at Washington, D.C., this 5th day of September 1973.

JOSEPH R. WRIGHT, Jr.,
*Assistant Secretary for Administration.*

# DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-387]

## WATERMAN STEAMSHIP CORP.

### Notice of Application

Notice is hereby given that Waterman Steamship Corporation has applied for amendment of its Operating-Differential Subsidy Agreement, Contract No. MA/MSB-115 covering subsidized service on Trade Route No. 18 (U.S. Atlantic and Gulf/India, Persian Gulf, Red Sea) to permit it to carry inbound cargo from the ports of Bombay, Karachi or Cochin for discharge at United States Atlantic ports. The applicant's contract presently specifically prohibits the carriage of such cargo.

Any person, firm or corporation having any interest in such application and desiring a hearing on issues pertinent to Section 605(c) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1175), should by the close of business on September 19, 1973, notify the Secretary, Maritime Subsidy Board in writing, in triplicate, and file petition for leave to intervene in accordance with the Rules of Practice and Procedure of the Maritime Subsidy Board.

In the event a section 605(c) hearing is ordered to be held, the purpose thereof will be to receive evidence relevant to (1) whether the application is one with respect to a vessel to be operated in an essential service, served by citizens of the United States which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of United States registry in such essential service is inadequate, and (2) whether in the accomplishment of the purpose and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board will take such action as may be deemed appropriate.

By order of the Maritime Subsidy Board/Maritime Administration.

Dated September 6, 1973.

JAMES S. DAWSON, Jr.,
*Secretary.*

National Bureau of Standards

## SECURITY EQUIPMENT CATALOG AND A DIRECTORY OF SECURITY RESOURCES

### Proposed Development

The Law Enforcement Standards Laboratory (LESL), sponsored by the National Institute of Law Enforcement and Criminal Justice, proposes to develop a Security Equipment Catalog and a Directory of Security Resources. The catalog will present descriptions of security devices and equipment in generic classes. It will include a separate section listing manufacturers. The directory will identify resources which are capable of providing security planning or consulting services, and describe community action groups which could affect support of communitywide security projects. The purpose of this notice is to solicit comments on and contributions to the two publications.

Product listings in the catalog will describe the following aspects: the function performed, methods of operation, usual applications, cost ranges of available devices, essential and optional features, and known manufacturers currently producing that type of item. An appendix to the catalog will present the manufacturers' names, addresses, classes of security items produced, and whether purchases can be made directly or only through distributors or retailers. The catalog will be limited to those items associated with the security of homes, small business buildings, vehicles, and pedestrians. Manufacturers' catalogs and price sheets will be an acceptable response to this notice.

For inclusion as a security resource in the directory, the following information is essential: name, address, telephone number, services provided, usual type of client, years of operation, man-years of experience, and usual geographic area of operation. For community action groups the following information is essential: name, address, telephone, membership requirements, number of members, date of organization, types of projects, and modes of publicity.

V38-174 SEP 10 73 XUM

Both publications are intended to be distributed to police departments, security firms, and to the general public. Equipment descriptions and specifications and summaries of resource capabilities will be collected from interested individuals, firms, and organizations until October 31, 1973.

Send comments and contributions to:

LESL Security Equipment Project
Building 225, Room A122
National Bureau of Standards
Washington, D.C. 20234

Dated September 4, 1973.

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Center for Disease Control

### NOTICE OF MEETINGS

The Director, Center for Disease Control announces the meeting dates and other required information for the following National Advisory bodies scheduled to assemble during the month of September 1973.

| Committee name | Date, time, place | Type of meeting and/or contact person |
|---|---|---|
| Safety and Occupational Health Study Section. | Sept. 13-14, 9:00 a.m., Parklawn Bldg., 5600 Fishers Lane, Rockville, Md. | Open—9:00 a.m.—2:35 p.m. on Sept. 13. Closed—remainder of meeting. Contact Dr. John F. Bester, Room 9A-16, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md. Code 301-443-4436 |

Purpose: The committee is charged with the initial review of research, training, demonstration, and fellowship grant applications for Federal assistance in programs areas administered by the National Institute for Occupational Safety and Health, and with advising the Institute staff on training and research needs.

Agenda: From 9:00 a.m. to 2:35 p.m. on September 13, the Study Section will be open for administrative and staff reports, current status of support for training, NIOSH manpower development plans, occupational medicine residence support, retention of existing training programs and stimulation of additional programs, and planned conference on training for black colleges. From 2:35 p.m. on September 13 through the end of the meeting, the Study Section will be reviewing research and demonstration grant applications and will not be open to the public, in accordance with the determination by the Director, Center for Disease Control, pursuant to the provisions of Public Law 92-463, Section 10 (d).

| Committee name | Date, time, place | Type of meeting and/or contact person |
|---|---|---|
| Venereal Disease Control Advisory Committee. | Sept. 12-14, 9:00 a.m., Room 207, Bldg. 1, Center for Disease Control, Atlanta, Ga. | Open—Contact Mr. Joe H. Miller, Room 320, Bldg. B, Center for Disease Control, Atlanta, Ga. Code 404-633-3637 |

Purpose: The committee is charged with advising on means and methods of implementing venereal disease control programs, reviewing current and proposed program operations and suggesting new areas of control emphasis.

Agenda: Items will include a status report on venereal disease, orientation and background discussion of current program emphasis, the "Venereal Disease Communications Plan" and its implementation, current and future operational research, and new areas of program emphasis.

Agenda items are subject to change as priorities dictate.

A roster of members and other relevant information regarding the open/closed sessions may be obtained from the contact persons listed above.

Dated August 29, 1973.

DAVID J. SENCER,
*Director,*
*Center for Disease Control.*

## BOARD OF ADVISORS TO THE FUND FOR THE IMPROVEMENT OF POSTSECONDARY EDUCATION

### Notice of Meeting

Notice of Public Meeting of the Board of Advisors to the Fund for the Improvement of Postsecondary Education.

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that a meeting of the Board of Advisors to the Fund for the Improvement of Postsecondary Education will be held on September 12, 1973, beginning at 7:30 p.m., and on September 13 and 14, beginning at 9:00 a.m., at Glenwood Manor, Overland Park, Kansas.

The purpose of the meeting is to consider priorities and procedures for fiscal 1974 guidelines for the program of Support for Improvement of Postsecondary Education authorized by section 404 of the General Education Provisions Act.

The meeting shall be open to the public. Records shall be kept of all proceedings and shall be available for public inspection at the Fund for the Improvement of Postsecondary Education, 400 Maryland Avenue SW., Room 3139, Washington, D.C. 20202, telephone number 202-962-3704.

Signed at Washington, D.C., on September 5, 1973.

VIRGINIA B. SMITH,
*Director, Fund for the Improvement of Postsecondary Education.*

## SOCIAL SECURITY ADMINISTRATION

### Statement of Organization, Functions, and Delegations of Authority

The Statement of Organization, Functions, and Delegations of Authority for the Office of Administration in the Social Security Administration (Chapter 8 of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare), is hereby revised to reflect the abolishment of the two present positions of Deputy Assistant Commissioner for Administration; to reflect the establishment of the new position of Director of Human Resources, with responsibility for overall guidance and direction of all employee-oriented functional components within the Office of Administration, except the Special Staff for Labor Relations and Equal Opportunity; to reflect the abolishment of the SSA Operations Research Staff; and to reflect the present functions assigned to the components of the Office of Administration. The new Statement for the Office of Administration (OA) reads as follows:

MISSION

The Office of Administration plans and directs the management program of the Social Security Administration (SSA). It provides overall administrative leadership for the Commissioner of Social Security in coordinating program administration throughout SSA, and in planment programs, policies, and activities.

ORGANIZATION

The Office of Administration, under the supervision of the Assistant Commissioner for Administration, consists of:

1. The Assistant Commissioner for Administration
2. The Immediate Office of the Assistant Commissioner for Administration
3. Functional Components within the Office of Administration

*The Assistant Commissioner for Administration.*—A. The Assistant Commissioner for Administration is directly responsible to the Commissioner of Social Security and provides general supervision to each component in the Office of Administration.

B. In the event of the absence or disability of the Assistant Commissioner for Administration, or in the event of a vacancy in this position, the Deputy Assistant Commissioner for Administration acts for him.

C. In the event of the absence or disability of both the Assistant Commissioner for Administration and the Deputy Assistant Commissioner for Administration, or in the event of vacancies in both positions, a designated OA Executive acts for them.

*Immediate Office of the Assistant Commissioner for Administration.*—The Immediate Office of the Assistant Commissioner for Administration consists of:

1. The Assistant Commissioner for Administration.
2. The Deputy Assistant Commissioner for Administration.
3. The Executive Officer.
4. The Management Coordination and Special Projects Staff.
5. The Special Staff for Labor Relations and Equal Opportunity.

*Functional Components Within the Office of Adminstration.*—The Office of Administration consists of the following functional components, each under the immediate day-to-day supervision of a director:

1. Office of the Director, Human Resources.
2. Division of Administrative Appraisal and Planning.
3. Division of Financial Management.
4. Division of Operating Facilities.
5. Division of Systems Coordination and Planning.

FUNCTIONS

*The Office of Administration* is responsible for:

1. Planning, directing, and controlling SSA management programs, policies, and activities.

2. Administering SSA-wide programs in the areas of: labor relations and equal opportunity; personnel administration; training and employee career development; administrative appraisal and planning; budget and financial management; planning, analysis and coordination of all SSA systems; facilities management and other management support activities; procurement and supply management; employee communications; audit liaison and coordination; and employee health services.

3. Providing overall administrative leadership for the Commissioner of Social Security in coordinating program administration throughout SSA.

4. Representing SSA on matters of overall program administration and management with DHEW, other Federal agencies, and non-Federal organizations.

*Immediate Office of the Assistant Commissioner for Administration.*—A. The Assistant Commissioner for Administration:

1. Is responsible to the Commissioner of Social Security for provision of overall executive leadership in coordinating program administration throughout SSA, so as to achieve the total program mission of SSA.

2. Plans, directs and controls the management, personnel and administrative programs of SSA, in order to meet the needs of SSA program administration, goals and objectives.

B. The Deputy Assistant Commissioner for Administration assists the Assistant Commissioner for Administration in the carrying out of his responsibilities and performs such duties as the Assistant Commissioner prescribes.

C. The Executive Officer assists the Assistant Commissioner for Administration and Deputy Assistant Commissioner for Administration in the overall management of OA.

D. The Management Coordination and Special Projects Staff:

1. Serves as the personal staff to the Assistant Commissioner for Administration by aiding him in coordinating and integrating the many-faceted and interrelated activities of OA, and by providing him with advice, assistance, problem identification, and recommendations for problem resolution with respect to projects, negotiations or work areas of special interest or concern to the Assistant Commissioner.

2. Conducts or directs projects of major SSA-wide importance and significance on assignment by the Assistant Commissioner for Administration.

E. The Special Staff for Labor Relations and Equal Opportunity:

1. Assists the Assistant Commissioner for Administration in directing, coordinating, developing, and appraising the effectiveness of policies for SSA-wide programs of labor relations (LR) and equal opportunity (EO), as provided for under Executive Orders 10988, 11246, 11375 and 11491, as amended.

2. Reviews the employment posture of health insurance intermediaries under contract with SSA, for compliance with the EO requirements of Executive Order 11246.

3. Conducts liaison with DHEW, other Federal agencies and various other public or private organizations on matters concerning LR, EO and civil rights.

*Functional Components Within the Office of Administration.*—The functional components within the Office of Administration have the following responsibilities:

1. *Office of the Director, Human Resources.*—The Director of Human Resources is responsible for:

a. Providing direction to the development, implementation, and maintenance of a totally integrated and coordinated SSA program responsive to the needs of SSA's human resources.

b. Representing SSA in dealings with DHEW, other Federal agencies, and sources outside the Federal establishment with respect to matters concerning personnel and human resources management programs.

c. Providing executive-level line direction and supervision to the following Human Resources components:

(1) The Division of Personnel, which is responsible for:

(a) Directing the personnel management program of SSA and developing its personnel management objectives, policies, standards and procedures.

(b) Conducting and coordinating SSA's position classification, recruitment, placement, counseling, and employee relations programs; providing personnel operations services for headquarters offices; and assisting SSA components in their personnel operations, centrally and regionally.

(c) Evaluating personnel administration in SSA and recommending or taking action to correct deficiencies.

(d) Participating in administration of programs for labor relations, equal opportunity, and employee communications.

(2) The Division of Training and Career Development, which is responsible for:

(a) Directing the employee development program of SSA and developing its employee development objectives, policies, standards, and procedures.

(b) Conducting training programs throughout SSA and overseeing, coordinating, and appraising employee development activities of SSA components.

(c) Identifying, evaluating, and developing improved training methods, aids, and techniques and negotiating for use of outside facilities and specialists in meeting training needs.

(d) Administering and coordinating the SSA Center for Continuing Education; the SSA Career and Educational Guidance Program; and the SSA Upward Mobility College.

(3) The SSA Employee Communications Staff, which is responsible for:

(a) Directing the management-employee communications program of SSA; identifying weaknesses in management-employee communications and recommending improvements; providing advice and consultation on management communications with employees; and providing assistance to and appraising management-employee communications activities in the field.

(b) Publishing a variety of informational materials, including a monthly employee magazine, a semi-monthly management newsletter, and a weekly central office bulletin; and preparing and editing administrative reports and presentations.

(4) The SSA Employee Health Service, which is responsible for:

(a) Directing the preventive health program for SSA and promoting the health, efficiency, and productive longevity of its employees, through administering mass screening programs, offering individual services, and conducting physical examination programs.

(b) Treating all types of medical emergencies in work situations, arranging other Governmental and private medical or surgical services, and providing referrals to appropriate private and community resources.

(c) Establishing and enforcing standards of employee health and comfort through a broad environmental health program, and conducting a continuing health education program.

2. The Division of Administrative Appraisal and Planning, which is responsible for:

a. Directing the appraisal of total SSA administration, planning for efficient SSA organization and operations, and developing major operating and administrative goals and measures of effectiveness for SSA program administration.

b. Identifying current and emerging administrative problems, recommending remedial actions, and continually appraising organizational effectiveness.

c. Appraising the need for and promulgating delegations of program and administrative authority throughout SSA.

d. Conducting, coordinating, and integrating long-range operational, organizational, and administrative planning; providing leadership in administrative planning for pending legislation; and developing consistent and progressive administrative policy and philosophy.

e. Representing SSA in dealings with DHEW Audit Agency and GAO site audit teams.

f. Investigating alleged program and criminal violations, employee misconduct, and other irregularities.

g. Conducting an SSA historical research program and directing SSA emergency preparedness activities.

h. Representing SSA in dealings with DHEW, other Federal agencies, and various other public or private organizations on matters of concern to the administration of SSA programs and the fulfillment of the Division's mission.

3. The Division of Financial Management, which is responsible for:

V38-174 SEP 10 73 XUM

a. Directing the financial management program of SSA; developing its financial management objectives, policies, standards, and procedures; and providing financial advice on program matters and initiating cost studies.

b. Planning, preparing, justifying, and executing the SSA budget and preparing and justifying budget estimates to finance program and other legislative changes.

c. Conducting continuing evaluation of expenditures of funds, taking actions to improve fiscal effectiveness; conducting continuing evaluation of financial systems and implementing improvements; and insuring that financial systems are integrated within SSA and with DHEW.

d. Maintaining administrative accounts, certain trust fund expenditure and receipt accounts; auditing and certifying of vouchers for administrative expenses; and preparing basic and required financial reports.

e. Representing SSA in financial management dealings with DHEW, other Federal agencies and various other public or private organizations.

4. The Division of Operating Facilities, which is responsible for:

a. Directing the management support program of SSA and developing its management support objectives, policies, standards, and procedures.

b. Directing SSA activities in the areas of: the SSA library and related services; centralized headquarters secretarial, dictation, transportation and parking services; construction or leasing of buildings; space utilization; forms and records management; printing and graphics; real and personal property management; procurement; supply and mail systems; employee safety; civil defense; and physical security.

c. Providing SSA liaison with the General Services Administration on matters related to the maintenance and servicing of headquarters facilities, and with DHEW, other Federal agencies and various other public or private organizations on matters related to the Division's mission.

5. The Division of Systems Coordination and Planning, which is responsible for:

a. Providing SSA-wide leadership and direction for systems planning and coordination, and developing, maintaining, and improving its total data processing system and plans.

b. Establishing systems policies and standards; planning overall specifications for SSA systems; and reviewing and evaluating proposed systems and equipment changes for conformance with longer range SSA systems planning goals and integration with existing SSA systems.

c. Representing SSA in dealings with DHEW, other Federal agencies, and various other public or private organizations on systems coordination, planning and policy matters.

Dated August 31, 1973.

S. H. CLARKE,
*Acting Assistant Secretary for Administration and Management.*

### Federal Highway Administration

### IOWA'S PROPOSED ACTION PLAN

#### Notice of Availability

The Iowa State Highway Commission has submitted to the Federal Highway Administration of the U.S. Department of Transportation a proposed Action Plan as required by Policy and Procedure Memorandum 90-4 issued on June 1, 1973. The Action Plan outlines the organizational relationships, the assignments of responsibility, and the procedures to be used by the State to assure that economic, social and environmental effects are fully considered in developing highway projects and that final decisions on highway projects are made in the best overall public interest, taking into consideration: (1) needs for fast, safe, and efficient transportation; (2) public services; and (3) costs of eliminating or minimizing adverse effects.

The proposed Action Plan is available for public review at the following locations:

1. Iowa State Highway Commission
   Library
   826 Lincoln Way
   Ames, Iowa 50010
2. Federal Highway Administration
   Iowa Division
   P.O. Box 627
   Ames, Iowa 50010
3. Federal Highway Administration
   Region 7 Office
   P.O. Box 7186—Country Club Station
   Kansas City, Missouri 64113
4. U.S. Department of Transportation
   Federal Highway Administration
   Environmental Development Division
   Nassif Building, Room 3246
   400 7th Street SW.
   Washington, D.C. 20590

Comments from interested groups and the public on the proposed Action Plan are invited. Comments should be sent to the FHWA Regional Office shown above before October 4, 1973.

Issued on August 31, 1973.

NORBERT T. TIEMANN,
*Federal Highway Administrator.*

### Office of the Secretary

### CITIZENS ADVISORY COMMITTEE ON TRANSPORTATION QUALITY

#### Notice of Open Meeting

The Citizens' Advisory Committee on Transportation Quality of the Department of Transportation announces its regular meeting on Monday and Tuesday, September 17 and 18, 1973. Below is an agenda telling about the purpose and content of the meeting.

The Citizens' Advisory Committee on Transportation Quality is made up of 21 citizens from various parts of the United States who represent, as far as possible a cross-section of the Nation's citizenry. The functions of the Committee are solely advisory. Its recommendations result from the Committee's independent judgement.

The Office of Consumer Affairs, which provides staff services for the Citizens' Committee, requests that if any members of the general public are planning to attend those sessions indicated below that are open to the public, they should call in advance so that seating arrangements can be provided and so that they can be informed of any subsequent changes in arrangements. Call 202/426-4520 and ask for Mr. Kent R. Larrabee, Executive Director.

AGENDA

CITIZENS' ADVISORY COMMITTEE ON TRANSPORTATION QUALITY, SEPTEMBER 17–18, 1973—KI SUH PARK, CHAIRMAN

The meeting will convene at the Management Information Center at the Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Room 10214 (10th floor—south side of the building).

9:30—Welcome—Benjamin O. Davis, Jr., Assistant Secretary for Environment, Safety, and Consumer Affairs.

*Overview of DOT.*—"This is the Department of Transportation"—a 12-minute slide presentation.

10:10—Discussion of the morning.

*A Balanced National Transportation System.*—What is it? What issues are involved? How can it be achieved?

*Discussion.*—General discussion of issues presented, of suggestions and exploration of possible recommendations to the Secretary.

12:30—Lunch.

Informal remarks by Honorable Claude S. Brinegar, Secretary of Transportation. (This session is closed to the public.)

2:00—Room 10214

*The Highway Act of 1973—how will it be implemented?* Features of the 1973 Act which are of particular interest to citizens, consumers and community groups. Committee discussion and interaction with staff.

3:45—*The growing edge of highway safety programs.*—How can this Committee assist the personal involvement of the citizenry in the cause of traffic safety? What future programs for the saving of human lives make sense but need greater citizen support? What recommendations should the Committee consider?

4:15—Committee discussion and interaction with staff.

4:45—Adjournment.

Tuesday morning, September 18, 1973. Committee will meet at the Federal Aviation Administration Building, 800 Independence Avenue, SW. Come to Conference Rooms B and C on the 8th floor.

9:30—*An orientation to the Federal Aviation Administration.*—Includes a slide presentation telling about the FAA.

10:15—*Some needs and problems within aviation today.*—Focus will be on those needs and problems that are related to consumer, citizen and community interests. Questions and interaction with the speaker.

11:00—Committee business meeting. (This session is closed to the public).

2:30—Adjournment.

This notice is given pursuant to section 10, Federal Advisory Committee Act (Public Law 92-463) and Executive Order 11686 (37 FR 21421).

Issued in Washington, D.C., on September 4, 1973.

BENJAMIN O. DAVIS, Jr.,
*Assistant Secretary for Environment, Safety and Consumer Affairs.*

## CIVIL AERONAUTICS BOARD

[Docket No. 25663; Order 73-9-2]

### COMPAGNIE NATIONALE AIR FRANCE ET AL.

#### Order of Investigation and Suspension

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of August 1973.

Seaboard World Airways, Inc. (Seaboard), on June 29, 1973, filed a complaint with the Board requesting suspension and investigation of cargo charter tariffs filed by Compagnie Nationale Air France (Air France), Lufthansa German Airlines (Lufthansa), Pan American World Airways, Inc. (Pan American), and Trans World Airlines, Inc. (TWA) for multiple routings from New York to Frankfurt and Paris.[1]

In its complaint, Seaboard alleges that the charter rates are unjust, unreasonable, and unjustly discriminatory and unduly prefer one shipper (I.B.M. World Trade Corporation), and should be suspended and investigated. Seaboard asserts that the rates are substantially below cost and represent unjustified discounts from existing cargo charter rates which are widely acknowledged to be uneconomic; that the special and unusual routing effectively limits their use to only one shipper and, therefore, they are unjustly discriminatory and unduly preferential; and that the rates are the product of coercive competitive bidding by IBM for varying numbers of cargo charters and constitute unlawful multicharter rates.[2]

In support of its allegations that the rates in question are uneconomic and below cost and in reply to the answers of the carriers,[3] Seaboard contrasts the derived rates per mile, ranging from $3.02 to $3.45, with Pan American's and TWA's fiscal year 1973 scheduled transatlantic freighter operating costs estimated respectively at $4.99 and $4.05 per plane mile.[4] Additionally, Seaboard contrasts these derived rates per mile with the applicable $3.60 to $4.25 general rate per mile for cargo charters of the subject carriers which Seaboard asserts are widely known to be uneconomic and have become even more uneconomic since the recent dollar devaluation. Seaboard points out that Lufthansa's claims that the Board has no jurisdiction in this matter under terms of the U.S.-Germany bilateral air agreement are not relevant since procedures of the bilateral do not govern charter rates. The carrier further maintains that Lufthansa is using direct mileages between New York on the one hand and Frankfurt and Paris on the other in computing per-mile rates and not the actual New York-Paris-Frankfurt and New York-Frankfurt-Paris mileages as its tariff routing requires.

Seaboard also maintains that the spreads between TWA's scheduled per-mile cargo costs of $4.05 and its per-mile charter rates and similarly those

[1] Appendix A which is filed as part of the original document sets forth a synopsis and analysis of the tariffs.

[2] IBM has filed a letter in Docket 25663 in which it defends its bidding practices for transatlantic cargo service. In general it maintains that all bidding carriers must comply with "all tariff, C.A.B., IATA, local, state, and federal requirements."

[3] On July 17, 1973, Seaboard filed a motion for leave to file a reply which will be received.

[4] In arriving at these estimated costs Seaboard has relied upon data submitted by the carriers as justification in Docket 23333 and Board figures published in Order 72-6-137 dated June 29, 1972. The carriers in responses to the instant complaint do not dispute the dollar levels of these estimated costs.

V 38-174 SEP 10 73 XUM

between Pan American's per-mile costs and charter rates are vastly greater than can possibly be offset by planeload operation economics; that TWA offers no actual cost figures for its cargo charter operations, and claiming that incremental costing theories are justification for these rates does not overcome this lack of cost figures. Finally, Seaboard states that at the recent IATA Cargo Conference in Geneva the four carriers agreed that $4.25 is the minimum level for operation of compensatory cargo charter service.

Air France, Lufthansa, Pan American, and TWA have all filed responses requesting Seaboard's complaint be dismissed. In general the respondents assert that Seaboard's allegations of discriminatory and preferential treatment are untenable inasmuch as the tariffs in question are open to all shippers; that the routings are not so unusual as to preclude use by any interested shipper; and that in offering these rates they will be able to utilize otherwise idle personnel and equipment thus contributing to revenues. Air France further asserts that the questioned rates are justified since any weekend rates established at higher levels would not enable Air France to attract the traffic.

Additionally, Lufthansa moves that Seaboard's complaint be dismissed on technical grounds since the procedures for rate suspension as set forth in the U.S.-Germany bilateral treaty were not followed in this case and, therefore, the Board has no jurisdiction to suspend these rates. In the alternative, Lufthansa answers the complaint on its merits maintaining Seaboard has presented no real evidence to show that the challenged rates are below cost or uneconomic; that Seaboard's charter-rate-per-mile computations in its complaint are predicated on erroneous mileage and should be 6 cents and 24 cents higher than Seaboard's figures of $3.39 and $3.21, respectively; that the El Al charter rate cited by Seaboard and recently suspended by the Board was substantially lower than Lufthansa's rates; [6] that there is no implication in the tariffs that the rates are "multiple-flight" rates; and that apparently Seaboard's complaint is based upon unwillingness to meet competition which is insufficient reason to suspend the challenged rates.

Pan American asserts that its proposed charter rate is based on $3.60 per mile, and easily justified in that the carrier expects to have spare time on a B–707 freighter; that the $3.60 per-mile rate is further justified since the carrier will save indirect costs (such as promotion and advertising) while obtaining additional revenues; and that some of the charges in question have been effective since early May 1973 at rates as low as $3.10 [8] per mile which the Board has not seen fit to suspend and, therefore, Board suspension of Pan American's rates would be inconsistent and unjustified. In response to a Seaboard challenge of its reference to a $3.60 basic per-mile rate instead of the actual $3.27 per-mile rate derived from its tariff filing, Pan American [7] notes that the difference results from a $1,300 containerization allowance applied to the $3.60 rate.[8] Further, the carrier points out that Seaboard allows an $1,800 containerization discount on its 30,000-kilogram shipment rate.

Finally, TWA moves the complaint be dismissed as untimely since Seaboard has failed to catalogue compelling reasons for not having requested suspension within the 25-day period before the effective date as required; that Seaboard has totally discounted established economic advantages of cargo charters in its comparison of the challenged rates with the forecast scheduled per-mile transatlantic freighter costs of $4.99 and $4.05 for Pan American and TWA, respectively. The carrier, moreover, contends these rates are economically justified since they are restricted to weekends; that use of the questioned rates is not conditioned upon use of a minimum number of flights; that TWA's response to IBM's competitive solicitations does not necessarily make such rates discriminatory; and that the practice of tailoring a rate to meet the shipper's needs and purposes is similar to the established practice of introducing specific commodity rates designed to afford a particular shipper opportunity to use air transportation.

Upon consideration of the tariffs, complaint and responses, the Board finds that the charter rates at issue may be unjust, unreasonable, unjustly discriminatory, unduly preferential or unduly prejudicial and should be suspended pending investigation. We are not persuaded by the various arguments advanced that the complaint be dismissed on technical or jurisdictional grounds. The procedures set forth in the U.S.-Germany bilateral air agreement apply only to scheduled services, not to charter services. Therefore, the procedures set therein do not apply to the issue at hand. Similarly, we are not persuaded by TWA's arguments that the complaint be dismissed as untimely since it is our understanding that Seaboard delayed filing its complaint only until all subject tariffs were filed in order to file a consolidated complaint.

Turning to the level of the rates, the carriers would justify the level in terms of weekend off-peak aircraft usage, increased utilization, or aircraft positioning.[9] No attempt is made to show that the rates would cover fully-allocated costs for the eastbound charters, or for a round trip involving these rates in the eastbound direction, nor does it appear that such a showing could be made. As adverted to above, Pan American's and TWA's scheduled cargo costs in fiscal 1973 are estimated to be $4.99 and $4.05 per mile, respectively. While scheduled cargo costs may not be determinative of the minimum rates permissible for cargo charter service, the differential between the charter cargo rates and the scheduled cargo costs of the U.S. carriers is significant.

Moreover, it would appear that costs are higher for multiple-stop charter operations than for normal point-to-point operations since additional expenses for items such as landing fees, fuel, and labor are incurred. Current general charter tariffs on file show a $550 stopover charge for TWA and a $1,000 accessorial charge (for loading and/or unloading cargo at specified additional points of landing at the charterer's request) for Air France and Lufthansa in addition to per-mile charges ranging from $3.60 to $4.25. Since the rates in question range from $3.02 to $3.45 per plane mile, and with one exception involve multiple stops, we conclude in the absence of any detailed cost information by the four carriers that the questioned rates are not cost supported. A further economic question is presented by the situation in which a carrier charges a lesser total price for a greater distance flown. Air France's tariffs show a charter price of $13,500 for a New York-Paris-Frankfurt [10] routing of 3,917 miles, and a charter price of $12,500 for a New York-Frankfurt-Paris routing of 4,140 miles, $1,000 less for 223 more miles.

Finally, we note that the same carriers proposing charter charges at these low levels for B–707 equipment are among the carriers who indicated at the recent IATA North Atlantic Cargo Conference in Geneva that a four dollar per plane-mile rate for DC–8–55 and B–707 equipment (plus a six percent currency surcharge from U.S. points) is the minimum point-to-point cargo charter rate [11] on a fully compensatory basis.

The Board has considered carefully the carriers' contentions that these rates are justified on the basis of aircraft positioning, spare time use of aircraft for weekends or off-peak usage, and alleged increased aircraft utilization. We cannot find that such considerations here justify rates which appear to be *prima facie* uneconomic. Basically the Board considers that cargo charter rates should be geared to fully-allocated costs.[12] It is recognized that the Board on occasion has found lawful charter rates which (1) upon their own or in conjunction with the rate applicable in the opposite direction make a contribution to profits, and (2) do not have an adverse impact upon other carriers in the market.[13] However, we cannot make findings to this effect under the circumstances here present. In *Directional Charter Rates, supra,* the Board found a unique situation to justify low charter rates, including a pronounced directionality of traffic in the Pacific due to the heavy volume of MAC traffic moving westbound, and an opportunity for eastbound charters from Hawaii to California to move papaya, a highly perishable tropical fruit which would not move by air at high rates. This is to be contrasted with the present situation where there is no marked directionality in the markets involved.[14] Further from all the matters before us it appears that a high volume of traffic is expected to move under the tariffs in question [15] consisting generally of a commodity which typically moves by air at higher rates than here under consideration and is of a relatively high value with a corresponding high value of service for the transportation involved.

We have noted the contentions before us that the routings and competitive bidding procedures employed prior to the filings of the tariffs resulted in unlawful tariffs. Without passing upon such contentions at this time, these allegations will constitute an issue in the proceeding.

In sum, the volume of traffic involved, its nature and susceptibility to movement by air at higher rates, the marked absence of pronounced directionality in the markets and the bidding procedures employed combine to convince us that the charter rates in issue do not come within the limited situation found to exist in *Directional Charter Rates* and should not be permitted to continue in effect pending investigation.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 801 and 1002(j) thereof,

*It is ordered,* That:

1. An investigation be instituted to determine whether the rates and provisions on the tariff pages in Appendix B and rules, regulations, and practices affecting such rates and provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to take appropriate action to prevent the use of such rates and provisions or rules, regulations, or practices;

2. Pending hearing and decisions by the Board, the rates and provisions on the tariff pages in Appendix B are suspended and their use deferred to and including September 4, 1974, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order of special permission of the Board;

3. This order shal be submitted to the President [16] and shall become effective September 4, 1973.

4. The investigation ordered herein be assigned for hearing before an Administrative Law Judge of the Board at a time and place hereafter to be designated;

5. Copies of this order be served upon Seaboard World Airways, Inc., Compagnie Nationale Air France, Lufthansa German Airlines, Pan American World Airways, Inc., and Trans World Airlines, Inc. which are hereby made parties to this proceeding; and

6. Motions by Seaboard and Pan American for leave to file replies are granted.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[17]

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19163 Filed 9-7-73;8:45 am]

[Docket No. 25577; Order 73-8-153]

## EASTERN AIR LINES, INC. AND SEABOARD WORLD AIRLINES, INC.

### Order To Show Cause and Setting Matter for Hearing

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 31st day of August 1973.

On May 30, 1973, Eastern Air Lines and Seaboard World Airlines filed a joint application requesting approval of an equipment interchange agreement which would permit through-plane air transportation on all cargo aircraft of property and mail between Houston, Texas, and New Orleans, Louisiana, on the one hand, and London, England, on the other hand, over the junction point of New York, New York.

Petitions for leave to intervene have been filed by Delta Air Lines, National Airlines, the City and Chamber of Commerce of Houston, Texas, Airlift International, TWA, Pan American, and the City and Chamber of Commerce of New Orleans, Louisiana.[1] In addition, Delta has filed a request for a hearing on the joint application and the New Orleans parties have filed a motion for expeditious treatment. An answer in opposition to the motion of the New Orleans parties was filed by National.

Upon consideration of the pleadings and all of the relevant facts, the Board has decided to set this matter for hearing in accordance with the request of Delta. However, the Board is of the tentative view that, pending final decision upon the application following the hearing provided for herein, the public interest requires interim approval of the Agreement under sections 408 and 412 of the Act, in order to permit the parties to promptly inaugurate the all-cargo interchange services contemplated by the Agreement. The Board will, therefore, direct all interested parties to show cause, within 20 days of the service date of this order, why the tentative findings and conclusions contained herein should not be made final, and why such interim approval should not be granted. Replies to answers so filed may be filed by any interested person within 10 days following Board receipt of such answers.

For purposes of considering whether such interim approval should be granted, the Board will direct all responding parties to set forth with specificity the reasons why such approval should or should not be granted. There should be included as part of any answers or replies such evidence as is relied upon or deemed appropriate, supported by affidavits, and setting forth data in sufficient detail that without further clarification final results may be obtained from the basic data.[2]

While the Board is currently following a policy of caution in setting down route cases which could result in introducing new competition in markets where it might have an adverse effect on the overall health of the air transportation industry, the present application contemplates the award of no new operating authority. Rather, it is an attempt by the two carriers to improve their financial results by operating through services pursuant to the existing authority of each. By providing a new through single-plane all-cargo service pursuant to the interchange arrangement, significant public benefits can be achieved in a manner which will minimize potential diver-

[1] Since each petitioner has demonstrated a substantial interest in the subject matter of this proceeding the petitions will be granted.

[2] The parties should provide, in the form of footnotes or otherwise, the sources of any data included and the basis and methodology used in constructing the evidentiary material. Estimates, such as growth rates, which contain elements of judgment, should be clearly identified and the basis thereof explained in detail, and the supporting affidavit should affirm that such judgment is the best judgment of the proponent.

[6] Order 73–6–100, dated June 12, 1973.

[7] Filed by TWA effective June 21, 1973, and included by Seaboard in the instant complaint.

[7] On July 18, 1973, Pan American filed a motion for leave to file a reply to Seaboard which will be received.

[8] Pan American's original tariff filing omitted a containerization requirement although its tariff justification assumed the traffic would be containerized. Its tariff was amended to require containerization subsequent to the filing of the Seaboard complaint.

[8] We find this justification puzzling in the case of Pan American since the carrier recently has made application for exemption to carry military traffic on scheduled services at MAC charter rates pleading difficulties arising from tight aircraft and crew scheduling during peak July and August months.

[10] The tariff actually reads "Via a point in France," but for mileage computation purposes it is assumed to be Paris since this is Air France's home base.

[11] Further, we note that under the minimum cargo charter rates package currently contemplated by IATA and subject to Board approval, the subject rates would be disallowed after October 1, 1973.

[12] See Cargo Charter Charges Established by Universal Airlines, Inc., Order 72–2–30, dated February 9, 1972.

[13] *Directional Charter Rates,* 40 C.A.B. 752, 755 (1964).

[14] A comparison of North Atlantic eastbound versus westbound traffic for the 12 months ending May 1973 indicates eastbound scheduled and charter cargo traffic is 96.5% of the westbound traffic. (Source *IATA (Monthly) Summary of North Atlantic Revenue Cargo and Mail*).

[15] IBM has submitted a letter in connection with the complaint enclosing material indicating as many as 260 flights are contemplated over a one-year period.

[16] This order was submitted to the President on August 24, 1973.

[17] Appendix A and B filed as part of original document.

V 38-174
SEP 10 73
XUM

sion from other carriers operating all or part of competitive routes.[2]

At present there exists no through single-plane all-cargo service between New Orleans and Houston on the one hand, and London on the other.[4] It is patent that a through single-plane all cargo service offers public service benefits which are not available from alternative combination through services, or even connecting service in part on all-cargo aircraft. Thus, the scheduling of all-cargo flights will be determined solely on the basis of the peculiar requirements for air cargo shipments. Moreover, significant cost and time savings can achieved in avoiding the loading and unloading process inherent in a transshipment service. Since the provision of such through all-cargo service is in major part under the authorization of a carrier holding license authority limited solely to the provision of all-cargo service, it may be anticipated that primary attention will be devoted to the peculiar needs of cargo shipments.

We recognize that in the past the Board has customarily held evidentiary hearings before determining whether to approve or disapprove interchange agreements under sections 408 and 412 of the Act. See, e.g., Capital-National Equipment Interchange, 10 C.A.B. 231 (1949). C./., Eastern-American Agreement, 34 C.A.B. 828 (1961). However, the New Orleans parties have urged that the present application be granted expeditious treatment, and the applicants have contemplated possible inauguration of service by September 15, 1973. It appears, for the reasons set forth above, that prompt implementation of the service will indeed provide a significant contribution to the facilitation of the international trade of the cities of New Orleans and Houston, as well as of the United States.

In view of the foregoing, the Board has tentatively concluded that the public interest in prompt inauguration of the proposed services outweighs any apparent detriment that may be incurred as a result of contemplated diversion from alternative international cargo services for the period pending final decision on this application after hearing. Therefore, the Board has further tentatively concluded that the public interest requires such interim approval. The parties should be advised, however, that our proposed interim approval herein should not be construed as any prejudgment of the issues to be considered at the evidentiary hearings.

Our tentative conclusions as to the public interest in granting interim approval, under the circumstances of this case, draw attention to a basic question of procedure in the Board's approval of interchange agreements which the parties hereto, and other interested persons, may wish to consider in submitting comments pursuant to this Order. The Board has tenatively reached the conclusion that on many occasions no major regulatory purpose is served by requiring protracted full-blown evidentiary hearing procedures in connection with approval of interchange agreements. Under section 412 of the Act the Board has been given authority to approve intercarrier agreements involving cooperative working arrangements similar in nature to interchange agreements, without the necessity for a hearing. In section 412 proceedings, the Board, in determining whether an interchange agreement would be adverse to the public interest, would fully consider the central issues of such an interchange arrangement, namely whether the public benefits arising from the provision of a new through service, not involving the grant of additional route authority to any carrier, outweigh any detriments that might arise from the provision of such services in terms of diversion from the services of other carriers operating competing alternative services. Since the Board has considered that interchange agreements require further approval under section 408 of the Act with respect to the control and property lease aspects of the arrangement, it has habitually required an evidentiary hearing at which both section 408 and section 412 issues are litigated. It appears, nevertheless, that the section 408 issues involved in interchange agreements are not so complex that full protection of the parties' interests could not be achieved by shortened hearing procedures; or in appropriate cases, the time consuming hearing procedures might be dispensed with. The prompt implementation of the public service benefits arising from interchange arrangements found neither adverse to nor inconsistent with the public interest, would constitute a significant public interest factor in adopting such shortened procedures.

The Board is therefore considering the adoption by rule making, or otherwise, of procedures which would allow interchange agreements to be processed expeditiously with either compressed documentary presentations,[5] or wholly without hearing. In order not to delay the implementation of the instant interchange agreement, pending consideration and adoption of such revised procedures, the Board has concluded that it will follow the normal hearing procedures in this case, subject to interim *pendente lite* approval of the arrangement. In this respect our consideration of a changed procedural policy will be prospective only. However, the Board takes this occasion to invite the parties hereto, any other interested elements of the aviation industry, and interested government agencies, to submit comments in response to this order, bearing upon the public interest and legal considerations involved in the adoption of such shortened procedures.

*Accordingly, it is ordered*, That:

1. The joint application of Eastern Air Lines, Inc., and Seaboard World Airlines, Inc., for approval of an equipment interchange agreement, be and it hereby is set for hearing before an Administrative Law Judge of the Board, at a time and place to be hereafter designated.

2. The Petitions to Intervene in this proceeding filed by Delta Air Lines, Inc.; National Airlines, Inc.; the City and Chamber of Commerce of Houston, Texas; Airlift International, Inc.; Trans World Airlines, Inc.; Pan American World Airways, Inc.; and the City and Chamber of Commerce of New Orleans, Louisiana, be and they are hereby granted.

3. The joint applicants, all other parties herein, and any other interested person, be and they hereby are directed to show cause, within 20 days from the date of this Order, why the Board should not make final the tentative findings and conclusions herein, and why the Board should not issue an order temporarily approving the proposed interchange agreement pursuant to sections 408 and 412 of the Act, pending final Board decision on the application following the hearing provided for herein.

4. Answers filed pursuant to paragraph 3 shall be served upon the persons listed in paragraph 7; shall set forth with specificity the reasons why such interim approval should or should not be granted; and shall be accompanied by such supporting evidence and affidavits, in the manner described herein, as are relied upon or deemed appropriate.

5. Within 10 days after the date of filing of the answers referred to in paragraph 4, any interested person may serve and file a reply to one or more of such answers, directed solely to matters raised by such answers, and shall affix to such reply evidence and affidavits as set forth above.

6. The request of Delta Air Lines, Inc. for a hearing, and the motion of the New Orleans parties for expeditious treatment, be and they hereby are granted to the extent provided for herein, and are otherwise denied.

7. A copy of this Order shall be served upon Eastern Air Lines, Inc.; Seaboard World Airlines, Inc.; Delta Air Lines, Inc.; Pan American World Airways, Inc.; Trans World Airlines, Inc.; Airlift International, Inc.; National Airlines, Inc.; the Cities of Houston, Texas, and New Orleans, Louisiana; the Houston, Texas and New Orleans, Louisiana, Chambers of Commerce; the Departments of Transportation, Justice, Defense, and Commerce; the Postmaster General; and the Federal Aviation Administration.

8. Copies of this Order shall also be served upon all other certificated U.S. direct air carriers, and all authorized U.S. air freight forwarders.

This Order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19161 Filed 9-7-73;8:45 am]

[Docket No. 24488; Order 73-8-137]

## INTERNATIONAL AIR TRANSPORT ASSOCIATION

### Order Relating to Passenger Fare Matters

Issued under delegated authority August 28, 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of Traffic Conference 1 of the International Air Transport Association (IATA). The agreement, which was adopted by mail vote, has been assigned the above-designated C.A.B. agreement number.

The agreement would defer the deadline for a special meeting of TC1 from June 30, 1973, to October 31, 1973, to discuss the continued effectiveness of the (1) TC1 Advance Purchase Travel Group Fares (USA-Mexico); and (2) TC1 Group Inclusive Tour Fare (Canada-Mexico).

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the following resolutions, which are incorporated in Agreement C.A.B. 23888, R-1 and R-2, are adverse to the public interest or in violation of the Act:

100(Mail 928)075u
100(Mail 928)084tt

Accordingly, *It is Ordered*, That:

Agreement C.A.B. 23888, R-1 and R-2, be and hereby is approved.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

[SEAL] EDWIN Z. HOLLAND,
*Secretary.*

[FR Doc.73-19162 Filed 9-7-73;8:45 am]

## COMMISSION ON CIVIL RIGHTS

### MARYLAND STATE ADVISORY COMMITTEE

#### Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Maryland State Advisory Committee will convene at 8:00 p.m. on September 13, 1973, in Room G-20, Social Security Administration Building, 6401 Security Boulevard, Woodlawn, Maryland 21235.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Mid-Atlantic Regional Office of the Commission, in Room 510, 2120 L Street Northwest, Washington, D.C. 20425.

The purpose of this meeting shall be to discuss a proposed Baltimore County Education Study and an Indian Project.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., September 5, 1973.

ISAIAH T. CRESWELL, JR.,
*Advisory Committee Management Officer.*

[FR Doc.73-19142 Filed 9-7-73;8:45 am]

### NEW HAMPSHIRE STATE ADVISORY COMMITTEE

#### Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the New Hampshire State Advisory Committee will convene at 7:30 P.M. on September 12, 1973, at the New Hampshire Highway Motel, Concord, New Hampshire 03301.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Northeastern Regional Office of the Commission, Room 1639, 26 Federal Plaza, New York, New York 10007.

The purpose of this meeting shall be to determine the status of the New Hampshire Corrections System Project and discuss further plans for proceeding with the study.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., September 4, 1973.

ISAIAH T. CRESWELL, JR.,
*Advisory Committee Management Officer.*

[FR Doc.73-19141 Filed 9-7-73;8:45 am]

### OHIO STATE ADVISORY COMMITTEE

#### Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Ohio State Advisory Committee will convene at 10:00 A.M. on September 15, 1973, at the Cleveland Sheraton Hotel, 219 Superior Avenue, Cleveland, Ohio 44101.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Midwestern Regional Office of the Commission, Room 1428, 219 South Dearborn Street, Chicago, Illinois 60604.

The purpose of this meeting shall be to discuss plans to develop a report and design followup activities to the recent factfinding meeting on Ohio Prisons.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., September 5, 1973.

ISAIAH T. CRESWELL, JR.,
*Advisory Committee Management Officer.*

### RHODE ISLAND STATE ADVISORY COMMITTEE

#### Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Rhode Island State Advisory Committee will convene at 4:30 p.m. on September 13, 1973, at the Central Congregational Church, 296 Angell Street, Providence, Rhode Island 02903.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Northeastern Regional Office of the Commission, Room 1639, 26 Federal Plaza, New York, New York 10007.

The purpose of this meeting shall be to formulate plans for a factfinding meeting on the Rhode Island State Advisory Committee's proposed Public Employment Project.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., September 5, 1973.

ISAIAH T. CRESWELL, JR.,
*Advisory Committee Management Officer.*

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN HAITI

#### Entry or Withdrawal From Warehouse for Consumption

SEPTEMBER 6, 1973.

On November 3, 1971, the United States Government, in furtherance of the objectives of, and under the terms of, the Long-Term Arrangement Regarding In-

[2] Obviously the Agreement has competitive implications and would, if approved, result in some diversion from other carriers. We will carefully consider the implications of such diversion, even on a temporary basis, in our consideration of whether, in light of the answers and replies filed pursuant to this Order, interim approval should in fact be granted.

[4] While the Pan American and Delta interchange provides combination services between New Orleans and London, the Board specifically declined to authorize all-cargo interchange services pursuant to that Agreement since no such service had been proposed by the parties at the time the interchange agreement was approved. (Sec, Order E-20806, May 12, 1964.)

V 38-174
SEP 10 73
XUM

ternational Trade in Cotton Textiles done at Geneva on February 9, 1962, concluded a new comprehensive bilateral cotton textile agreement with the Government of Haiti concerning exports of cotton textiles and cotton textile products from Haiti to the United States over a five-year period beginning on October 1, 1971, and extending through September 30, 1976. Among the provisions of the agreement are those establishing a consultation level of 367,500 square yards equivalent for cotton textile products in each category not having a specific limit in Categories 39 through 63 for the second agreement year which began on October 1, 1972. Imports of cotton textile products in Category 63 from Haiti have exceeded the consultation level for the second agreement year.

Accordingly, there is published below a letter of September 6, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, directing that upon publication of that letter in the FEDERAL REGISTER, and until further notice, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 63, produced or manufactured in Haiti and exported therefrom to the United States during the period beginning October 1, 1972 and extending through September 30, 1973, be prohibited.

SETH M. BODNER,
*Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.*

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
*Department of the Treasury,*
*Washington, D.C. 20229.*

SEPTEMBER 6, 1973.

DEAR MR. COMMISSIONER: Under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, pursuant to the bilateral cotton textile agreement of November 3, 1971, between the Governments of the United States and Haiti, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective upon publication of this letter in the FEDERAL REGISTER, and until further notice, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 63, produced or manufactured in Haiti and which have been exported to the United States during the period beginning October 1, 1972, and extending through September 30, 1973.

Cotton Textile products in Category 63, produced or manufactured in Haiti, which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the Categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on April 29, 1972 (37 FR 8802), as amended on February 14, 1973 (38 FR 4336).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Haiti and with respect to imports of cotton textiles and cotton textile products from Haiti have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States.

Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely yours,

SETH M. BODNER,
*Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.*

## COMMITTEE FOR PURCHASE OF PRODUCTS AND SERVICES OF THE BLIND AND OTHER SEVERELY HANDICAPPED

### PROCUREMENT LIST 1973

#### Addition

Notice of proposed addition to the Initial Procurement List, August 26, 1971 (36 FR 16982), was published in the FEDERAL REGISTER on December 14, 1972 (37 FR 26628).

Pursuant to the above notice the following commodity is added to Procurement List 1973, March 12, 1973 (38 FR 6742).

COMMODITY

| CLASS 6230 | *Price* |
|---|---|
| Light, Marker, Distress (RF) | |
| 6230-067-5209 | Ea. $10.72 |

By the Committee.

CHARLES W. FLETCHER,
*Executive Director.*

### PROCUREMENT LIST 1973

#### Notice of Proposed Additions

Notice is hereby given pursuant to Section 2(a)(2) of Public Law 92-28; 85 Stat. 79, of the proposed additions of the following commodities and services to Procurement List 1973, March 12, 1973 (38 FR 6742).

COMMODITIES

CLASS 7340

Spoon, Plastic, Single Pack
7340-J19-1300

CLASS 8105

Bag, Cloth, Lunch
8105-664-3715

SERVICES

INDUSTRIAL CLASS 0782

Grounds Maintenance
Goddard Space Flight Center—NASA
Greenbelt, Maryland

INDUSTRIAL CLASS 7641

Furniture Rehabilitation
Houston, Texas plus 25 mile radius

Comments and views regarding these proposed additions may be filed with the Committee not later than 30 days after the date of this FEDERAL REGISTER. Communications should be addressed to the Executive Director, Committee for Purchase of Products and Services of the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

By the Committee.

CHARLES W. FLETCHER,
*Executive Director.*

## COUNCIL ON ENVIRONMENTAL QUALITY

### ENVIRONMENTAL IMPACT STATEMENTS

#### List of Statements

Environment impact statements received by the Council on Environment Quality from August 27 through August 31, 1973.

NOTE.—At the head of the listing of statements received from each agency is the name of an individual who can answer questions regarding those statements.

DEPARTMENT OF AGRICULTURE

Contact: Dr. Fred H. Tschirley, Acting Coordinator, Environmental Quality Activities, Office of the Secretary, U.S. Department of Agriculture, Room 331-E, Administration Building, Washington, D.C. 20250, 202-447-3965.

FOREST SERVICE

*Draft*

White Pine Planning Unit, Clearwater National Forest, Latah and Benewah Counties, Idaho, August 16: The statement refers to the proposed implementation of a multiple use plan for the 16,750 acre White Pine Planning Unit of the Clearwater National Forest. The Unit is broken into seven areas which will be managed for such values as timber, browse production, and recreation. Adverse impact will include soil disturbance and possible stream siltation (73 pages). (ELR Order No. 31361.) (NTIS Order No. EIS 73 1361-D.)

*Final*

Burnt Fork Planning Unit, Bitterroot National Forest, Ravalli County, Mont., August 28: The statement refers to a revised Multiple Use Plan for the Burnt Fork Planning Unit of the Bitterroot National Forest. Approximately 20,905 acres of the unit would continue to be roadless, and would be managed with an emphasis on back-country values. The remaining 28,265 acres would be open for development options and more intensive managing practices, for such values as timber, mineral, watershed, wildlife, esthetics, and recreation; 10,353 acres of previously unroaded land will be developed with roads. There will be adverse impacts upon air, soil, and water quality, and wildlife habitat (143 pages). Comments made by: USDA, EPA, and concerned citizens. (ELR Order No. 31415.) (NTIS Order No. EIS 73 1415-F.)

RURAL ELECTRIFICATION ADMINISTRATION

*Draft*

Transmission Line, Ryceville to Lexington Park, St. Marys and Charles Counties, Md., August 28: The statement refers to the proposed lending of funds to Southern Maryland Electric Cooperative, Inc., for the construction of 22.3 miles of 230 kV transmission line from Ryceville to Lexington Park, a tap switching station, and a step-down substation. There will be some construction disruption and visual impact (110 pages). (ELR Order No. 31417.) (NTIS Order No. EIS 73 1417-D.)

SOIL CONSERVATION SERVICE

*Final*

Spring Brook Watershed, Langlade and Marathon Counties, Wis., August 28: The statement considers the implementation of flood control measures on the watershed, including conservation land treatment. Structural features of the project would consist of one new flood control structure and one to replace the Antigo Lake outlet, and a 3 feet high, 1,340-feet long dike. Also included would be the clearing and snagging of 10,340 feet of Spring Brook. The project will require approximately 138 acres of agricultural land; an additional 448 acres will be occasionally flooded (63 pages). Comments made by: USDA, COE, HEW, DOI, EPA, State and regional agencies. (ELR Order No. 31416.) (NTIS Order No. EIS 73 1416-F.)

Pocatalico River Basin, several counties in West Virginia, August 29: The statement refers to a project which would involve the use of land treatment measures on 2,400 acres and the construction of 2 multipurpose dams (for water supply, flood control, sediment prevention, and low-flow augmentation). Approximately 11.5 miles of stream and 440 acres of land will be inundated; 40 residences would be displaced (65 pages). Comments made by: ARC, DOC, EPA, HEW, HUD, DOI, DOT, State, and regional agencies. (ELR Order No. 31420.) (NTIS Order No. EIS 73 1420-F.)

DEPARTMENT OF DEFENSE

AIR FORCE

Contact: Dr. Billy Welsh, Room 4D 873, The Pentagon, Washington, D.C. 20330, 202-OX 7-9297.

*Draft*

U.S. Air Force Space Launch Vehicles, California and Florida, August 30: The statement refers to the environmental impact of the Titan III, Atlas, and Scout family of space launch vehicles. The vehicles were developed and/or are being operated under the direction of the Space and Missile Systems Organization. The major activity covered by the statement is the launch, which is concentrated in, but not restricted to, California and Florida. The major environmental impact is that of short-term, nonpersistent air pollution (116 pages). (ELR Order No. 31431) (NTIS Order No. EIS 73 1431-D.)

Accounting and Finance Center, Lowry Air Force Base, Colo., August 29: The statement refers to the proposed construction of a 601,375 sq. ft. building at Lowry Air Force Base, and the relocation of the Air Force Accounting and Finance Center from its present location at 3800 York St. in Denver to the new facility. Adverse impact will include construction disruption and an increase in automobile traffic at the new facility (44 pages). (ELR Order No. 31421.) (NTIS Order No. EIS 73 1421-D.)

ARMY CORPS

Contact: Mr. Francis X. Kelly, Director, Office of Public Affairs, Attn: DAEN-PAP, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314, 202-693-7168.

*Draft*

Great Lakes and St. Lawrence Seaway, August 28: The statement refers to the proposed 1974 navigation season extension demonstration program on the Great Lakes and St. Lawrence Seaway. The program involves the examination of methods used to extend navigation operations which are usually suspended during the winter because of extensive ice formation. Among the methods used are ice breaking, and the use of heat additives and bubbler systems. Adverse impact includes that resulting from dredging, and possible thermal shock to fish populations if heat additives are abruptly terminated (Detroit District) (126 pages). (ELR Order No. 31419.) (NTIS Order No. EIS 73 1418-D.)

Port Everglades Harbor, Broward County, Fla., August 27: Proposed is the deepening and modifying of harbor dimensions in order to handle larger ships. An increase in shipping activity is expected to result. Dredged material will be used for beach replenishment, artificial fishing reef construction, or be deposited in diked upland areas. Construction will cause temporary turbidity. Increased traffic could increase the pollution potential of the harbor (Jacksonville District) (54 pages). (ELR Order No. 31408) (NTIS Order No. EIS 73 1408-F.)

Yazoo Headwater Project, Mississippi, August 20: The statement refers to a proposed flood control project for Ascalmore Creek and Tippo Bayou. Project measures will include levee improvement; channel work on 17 miles of channel; and the construction of water control structures and a stoplog weir. Woodland, wetland, and stream habitat totalling 6,300 acres would be committed to the project, with a reduction in extent and quality of fish and wildlife habitat, timber resources, and aesthetic amenities (Vicksburg District) (94 pages). (ELR Order No. 31382.) (NTIS Order No. EIS 73 1382-D.)

Passaic River Basin, New Jersey and New York, August 27: The statement refers to proposed Congressional authorization of flood control works in the Passaic River Basin. The major component of the project would be a dam across the Pompton and Passaic Rivers, with channel enlargement, levees, flood walls, and grading as related measures. Stream systems, fish and wildlife populations, and existing land use would be altered by the project (120 pages). (ELR Order No. 31412.) (NTIS Order No. EIS 73 1412-D.)

Bowline Point Generating Station, New York, August 23: The statement, a revised draft, refers to the proposed granting of a permit to Orange and Rockland Utilities, Inc., and the Consolidated Edison Company of New York, Inc., for a two unit, 1200 MW oil-fueled electric generating station. The station will occupy a 146-acre site, with a marine fuel oil receiving terminal extending 500 feet into the Hudson River, and subaqueous water discharge pipes. There will be construction disruption; potential for damage to marine life; a local increase in air pollution; and a loss of wetlands area. (The original draft statement was filed with the Council on October 24, 1972.) (New York District) (94 pages). (ELR Order No. 31401.) (NTIS Order No. EIS 73 1401-D.)

Falls Lake, Neuse River, Wake, Durham, and Granville Counties, N.C., August 29: The statement refers to the proposed construction and operation of a multipurpose (flood control, water supply and quality control, recreation, and fish and wildlife conservation) reservoir project on the Neuse River, near Raleigh. The project will require the acquisition of 42,259 acres, of which 12,490 acres, along with 22 miles of stream, will be inundated. There will be changes in land use, as well as economic impact, potential impact to rare and endangered species, and loss of archeological sites, along other impacts (Wilmington District) (five volumes). (ELR Order No. 31424.) NTIS Order No. EIS 73 1424-D.)

Pennypack Marine Terminal, Pa., August 29: The statement refers to the proposed granting of a permit to the Philadelphia Port Corporation for the construction of a marine terminal on the Delaware River. The project requires the rechannelization of Pennypack Creek, and an encroachment into the Delaware not to exceed 395 feet. Pennypack Creek will lose its natural meandering course, and its ecosystem will be altered. Residents of the Riverview Home for the Indigent and the House of Correction will be subjected to higher noise levels (Philadelphia District) (64 pages). (ELR Order No. 31419.) (NTIS Order No. EIS 73 1419-D.)

Alpine Lake Project, Texas, August 27: The statement refers to a recommendation of Congressional authorization for a small reservoir which will provide flood control, recreation, and water supply for the town of Alpine. Adverse impact will include the loss of 784 acres of wildlife habitat and grazing land (Albuquerque District) (44 pages). (ELR Order No. 31406.) (NTIS Order No. EIS 73 1406-D.)

*Final*

Dredging of Lewis and Clark Connecting Channel, Clatsop County, Oreg., August 29: Proposed is the dredging of a navigation channel in the lower Lewis and Clark River to connect with an existing channel in Young's Bay. The channel will be 4.4 miles long, 10 feet deep, 150 wide in the lower 8,000 feet and 100 feet wide upstream. Approximately 227,000 cubic yards of dredged material will be deposited on three diked disposal areas. Dredging will disturb 57 subaqueous acres, removing bottom organism. Other effects of the action are temporary turbidity; upstream intrusion of salt water with associated changes; and elimination or displacement of vegetation and animal life (81 pages). Comments made by: AHP, USDA, EPA, DOC, FPC, HUD, DOI, USCG, State, local, and regional agencies and citizen groups. (ELR Order No. 31422.) (NTIS Order No. EIS 73 1422-F.)

Trexler Lake, Lehigh County, Pa., August 30: The statement considers the construction of an earthfill dam on Jordan Creek, for the purposes of recreation, water supply, and flood control. Approximately 3,200 acres (1,200 of which will be inundated), will be acquired for the project; land will be taken from agricultural use and from state game preserves. Fifty percent of the Town of Lowhill, with an unspecified number of residences, will be acquired for the project (Philadelphia District). Comments made by: DOI, EPA, HEW, USDA, HUD, DOC, local agencies, and concerned citizens. (ELR Order No. 31430.) (NTIS Order No. EIS 73 1430-F.)

NAVY

Contact: Mr. Joseph A. Grimes, Jr., Special Civilian Assistant to the Secretary of the Navy, Washington, D.C. 20350, 202-697-0892.

*Draft*

ORV Use, Mirror Lake Weapons Center, Calif., August 27: The statement refers to the proposed establishment of a 180-acre Mirror Lake area of the Naval Weapons Center, China Lake, for operation of off-road vehicles. There may be increased noise and air (dust) pollution (71 pages). (ELR Order No. 31411.) (NTIS Order No. EIS 73 1411-d.)

*Supplement*

Submarine Base, New London. Supplement, Connecticut, August 27: The document supplements a draft statement which covers the proposed dredging of the Thames River at the U.S. Navy Submarine Base, New London. The draft statement was filed with the Council on May 17, 1973. The supplement details alternative means of dredge spoil dis-

posal (96 pages). (ELR Order No. 31409.) (NTIS Order No. EIS 73 1409–D.)

FEDERAL POWER COMMISSION

Contact: Dr. Richard F. Hill, Acting Advisor on Environmental Quality, 441 G Street NW., Washington, D.C. 20426, 202–386–6084.

*Draft*

Davis Pumped Storage Project No. 2709, Tucker and Grant Counties, W. Va., August 16: The statement refers to an application by the Monongahela Power Co., the Potomac Edison Co., and the West Penn Power Co. for the construction, operation, and maintenance of the project, to be located on the Blackwater River and Red Creek. The project will consist of a 600 acre upper reservoir, a 7,000-acre lower reservoir, a powerhouse with four 50 MW units, 12 miles of 500-kV transmission line, and recreation facilities. The project will result in the inundation of 7,600 acres, eliminating wildlife habitat and livestock grazing land, as well as a section of a free flowing river and its sport fishery. (ELR Order No. 31359.) (NTIS Order No. EIS 73 1359–D.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202–343–3891.

*Final*

Prototype Oil Shale Leasing Program, August 29: The statement refers to the proposed leasing of six tracts of not more than 5,120 acres each for the purpose of Oil Shale development. Two tracts are located in each of the states of Colorado, Utah, and Wyoming. Impacts of the action will include those on the land itself, on water and air quality, on fish and wildlife habitat, on competing land uses, and on social and economic patterns. The statement assesses the impacts from both prototype development and a mature industry (6 volumes). Comments made by: DOI, EPA, FPC, OEP, USDA, AEC, DOC, HEW, HUD, USN, agencies of California, Colorado, and Wyoming, and concerned citizens. (ELR Order No. 31423.) (NTIS Order No. EIS 73 1423–F.)

BUREAU OF SPORTS FISHERIES AND WILDLIFE

*Draft*

Turnbull National Wildlife Refuge, Spokane County, Wash., August 27: Proposed is the continued operation, maintenance and development of the Turnbull National Wildlife Refuge, including the acquisition of 2,795.5 acres of additional lands. The action would result in continued protection of a relatively undisturbed section of natural environment (58 pages). (ELR Order No. 31405.) (NTIS Order No. EIS 73 1405–D.)

NATIONAL SCIENCE FOUNDATION

Contact: Dr. Thomas O. Jones, Deputy Assistant to the Director, National and International Programs, Room 703, Washington, D.C. 20550, 202–632–4180.

*Draft*

Dry Valley Drilling Project, Antarctica, August 30: The statement refers to proposed support of the Dry Valley Drilling Project at McMurdo Sound, Antarctica, during the 1973–1974 austral summer. The project, part of the U.S. Antarctic Research Program, is planned to study the diverse geological framework of the region, which contains rocks and sediments ranging in age from the Precambrian to Recent. From 10 to 15 boreholes are scheduled, with core drilling to a depth of 300 meters. The most likely impact would be that resulting from unexpecting spillage of drilling muds (106 pages). (ELR Order No. 31425.) (NTIS Order No. EIS 73 1425–D.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Quality, 400 7th Street SW., Washington, D.C. 20590, 202–466–4357.

FEDERAL HIGHWAY ADMINISTRATION

*Draft*

S.R. 35, Jackson County, Ala., August 30: The proposed project is the construction of SR 35 for 5.3 miles in Jackson County. The project will require 130 to 160 acres of land and displace 10 to 23 families and 2 businesses. Loss of wildlife habitat and increased water pollution will occur (50 pages). (ELR Order No. 31426.) (NTIS Order No. EIS 73 466–5347.

I–40, Kingman-Ash Fork Highway, Yavapai County, Ariz., August 22: Proposed is the construction of a 3.41-mile section of I–40 south of the Town of Ash Fork. Adverse effects of the action include acquisition of land for right of way, alteration of the natural terrain, removal of vegetation, and inconvenience to the community during construction (50 pages). (ELR Order No. 31398.) (NTIS Order No. EIS 73 1398–D.)

Atlantic Boulevard Extension, SR 814, Broward County, Fla., August 30: The proposed project is the construction of SR 814 (Atlantic Boulevard Extension) for 3 miles. Six acres of land will be acquired for right of way. Adverse impacts are loss of agricultural and timber land, and increased noise, air and water pollution. (ELR Order No. 31429.) (NTIS Order No. EIS 73 1429–D.)

S.R. 234, Dougherty County, Ga., August 28: The project consists of widening a four mile section of S.R. 234 from two to four lanes. The project will extend from U.S. 19 west to Beattie Road. Four businesses may be displaced and an unspecified amount of land acquired for right of way. Section 4(f) land from Baldwin Park will be acquired (86 pages). (ELR Order No. 31413.) (NTIS Order No. EIS 73 1413–D.)

F.A.S. Route 471, Sanders County, Mont., August 27: Proposed is the reconstruction of approximately 8.5 miles of F.A.S. No. 471. The project follows the Prospect Creek Drainage from Glidden Gulch on the west to Daisy Creek on the east. Adverse effects of the action include acquisition of right of way, and increased noise, air, and water pollution during construction (50 pages). (ELR Order No. 31410.) (NTIS Order No. EIS 73 1410–D.)

North Freeway, Omaha, Douglas County, Nebr., August 27: Proposed is the construction of a 0.7 mile extension to the present North Freeway in Omaha. Adverse effects of the project include acquisition of right of way, relocation impacts on wildlife, possible erosion and water pollution, and conflicts with present utilities (20 pages). (ELR Order No. 31407.) (NTIS Order No. EIS 73 1407–D.)

*Final*

S.R. 331, Mushawaka, St. Joseph County, Ind., August 30: The proposed project is the construction of 0.92 miles of SR 331 in Mushawaka. The project will displace 18 families, a church, and 4 businesses. An increase in noise levels will occur (58 pages). Comments made by: USDA, DOI, EPA, and one State agency. (ELR Order No. 31432.) (NTIS Order No. EIS 73 1432–F.)

Newcastle Marginal, Weston County, Wyo., August 30: The statement is concerned with construction of a marginal route for U.S. 16 along the southern edge of the City of Newcastle. Project length is approximately 1.8 miles. Increased noise levels, dust, soil exposure and traffic disruption will occur (25 pages). Comments made by: USDA, DOI, EPA, and HUD. (ELR Order No. 31433.) (NTIS Order No. EIS 73 1433–F.)

VETERANS ADMINISTRATION

Contact: Mr. Arthur W. Farmer, Assistant Chief, Medical Director for Administration and Facilities, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420.

*Draft*

VA Replacement Hospital, Bronx, N.Y., August 28: Proposed is the construction of a 702-bed hospital to replace the existing 1,150-bed facility which comprises the Bronx Veterans Administration Hospital. Three existing buildings will be retained and the rest demolished after construction of the new building. Adverse impacts stemming from the project are: inconvenience to hospital operation during the four-year construction period; disposal of demolition debris; and degradation of aesthetics along Segdwick Avenue (37 pages). (ELR Order No. 31414.) (NTIS Order No. EIS 73 1414–D.)

TIMOTHY ATKESON,
*General Counsel.*

## ENVIRONMENTAL PROTECTION AGENCY

### AMCHEM PRODUCTS, INC.

#### Establishment of Temporary Tolerance

Amchem Products, Inc., Ambler, Pa. 19002, submitted a petition (PP 3G1341) requesting establishment of a temporary tolerance for residues of the plant regulator ethephon (2-chloroethyl) phosphonic acid) in or on the raw agricultural commodity grapes at 5 parts per million.

Subsequently, the petitioner amended the petition by increasing the proposed temporary tolerance for ethephon residues in or on grapes to 10 parts per million.

It has been determined that a temporary tolerance for residues of the plant regulator in or on grapes at 10 parts per million will protect the public health. It is therefore established as requested on condition that the plant regulator be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the Amchem Products, Inc., name.

This temporary tolerance expires Aug. 30, 1974.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated August 30, 1973.

HENRY J. KORP,
*Deputy Assistant Administrator for Pesticide Programs.*

### ALLIED CHEMICAL CORP.

[I.F. & R. Docket No. 146]

#### Determination and Order

In re Allied Chemical Corporation, Petitioner, Registration Numbers 218–495, –516, –548, –564, –565, –586, –590, –628, and –638.

By Determination and Order of March 28, 1973 (38 FR 8615), the Administrator granted a temporary and minor modification to the May 3, 1972 Order (37 FR 10987) and the June 30, 1972, Order restricting the application of Mirex bait (38 FR 13299). Because of continuing controversy since June 30, 1972, over the use of Mirex, the March 28, 1973, Order was accompanied by a Notice of Intent to Hold a Hearing to Determine whether the registration of Mirex should be cancelled or amended (38 FR 8616). The March 28 modifications were granted, primarily, to permit the United States Department of Agriculture to go forward with its Spring application program for the control of the imported fire ant, by clarifying certain restrictions in the previous Mirex Order which prohibited application of Mirex "on or near aquatic areas." As construed literally, this prohibition had included all aquatic sectors, and required that United States Department of Agriculture in its aerial program cut off Mirex application over even very small bodies of water, such as farm ponds or small streams. The need to avoid such small sectors allegedly resulted in the inability to treat large areas which were infested with fire ants. The March 28 interpretative order thereby permitted for the Spring 1973 application, the use of Mirex on or near those very small streams and farm ponds which are not shown on U.S. Geological Survey maps with a scale of 1:24,000.

The necessity for this and other slight modifications was to be considered in depth as a part of the overall risk-benefit considerations at the Mirex hearings, which it was anticipated would be completed before the Fall spraying season was underway.

However, because of the need for additional time for all interested parties to prepare adequately for a public hearing on the numerous questions posed by Mirex application, it has not been possible for hearings to be initiated and a fully developed record completed before the Fall application season. Consequently, I hereby extend for the Fall application season, the minor modifications of the March 28 Order as to the United States Department of Agriculture aerial program for control of the imported fire ant.

I further urge that, in the upcoming Mirex hearings, United States Department of Agriculture, the Registrant, Allied Chemical Corporation, as part of their evidence on the overall questions in issue at those hearings, adduce evidence in support of the contention of the United States Department of Agriculture that the modifications contained in the March 28 Order will not permit an unreasonable adverse effect on the environment and that these modifications are necessary to an effective program for the control of the imported fire ant.

All future orders as to the registered uses of Mirex will be contingent upon and derived from the evidence of record adduced at the upcoming hearings.

ORDER

1. For the Fall 1973 application, aerial broadcast of Mirex pesticides is prohibited within coastal counties; and all broadcast application aerial or otherwise is prohibited in or near aquatic areas and heavily forested areas as defined herein.

Aquatic areas are defined as: Any aquatic system including estuaries, rivers, streams, swamps, marshes, lakes, bays, ponds, or other bodies of water which are shown on U.S. Geological Topographic Surveys maps at a scale of 1:24,000, excluding intermittent streams as defined herein, but not excluding intermittent streams with a flow during the period of application, and farm ponds as defined herein, but not excluding ponds used for food production or human consumption.

Farm ponds are defined as: Man-made impoundments of water occurring on farms to be utilized for purposes such as irrigation, stock-watering, recreation.

Intermittent streams are defined as: Those streams that have continuous flow during periods of heavy rainfall, but with little or no flow during the remainder of the year.

Heavily forested areas are defined as: Forest stands having 80 percent or more crown closure with trees of any size.

2. It is urged that Registrant and U.S. Department of Agriculture, parties to the upcoming Mirex hearings as part of their evidence on the overall questions in issue, adduce whatever evidence may support the contention of USDA that the modifications contained in this Order will not permit an unreasonable adverse effect on the environment and that these modifications are necessary to an effective program for the control of the imported fire ant.

3. All other provisions and restrictions of the May 3 determination and order and the June 30 determination and order on Mirex remain in full force and effect.

AUTHORITY: 7 U.S.C. 135b.

Dated August 28, 1973.

CHARLES L. ELKINS,
*Acting Assistant Administrator for Hazardous Materials Control.*

### ATRAZINE

#### Notice of Filing of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), notice is given that a petition (PP 4F1425) has been filed by CIBA-GEIGY Corp., Post Office Box 11422, Greensboro, N.C. 27409, proposing establishment of a tolerance (40 CFR Part 180) for negligible residues of the herbicide atrazine (2-chloro-4-ethylamino-6-isopropylamino-s-triazine) in or on the raw agricultural commodity range grasses at 0.1 part per million.

The analytical method proposed in the petition for determining residues of the herbicide is a gas chromatographic procedure using chloride specific microcoulometric detection.

Dated August 30, 1973.

HENRY J. KORP,
*Deputy Assistant Administrator for Pesticide Programs.*

### NIPAK, INC.

#### Notice of Withdrawal of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), the following notice is issued:

In accordance with § 180.8 *Withdrawal of petitions without prejudice* of the pesticide procedural regulations (40 CFR 180.8), NIPAK, Inc., Post Office Box 338, Pryor, Okla. 74361, has withdrawn its petition (PP 2F1270), notice of which was published in the FEDERAL REGISTER of October 7, 1972 (37 FR 21364), proposing establishment of an exemption from the requirement of a tolerance for residues of the plant regulator bluret on sugar beets.

Dated August 30, 1973.

HENRY J. KORP,
*Deputy Assistant Administrator for Pesticide Programs.*

### UNIROYAL CHEMICAL

#### Notice of Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 4H5041) has been filed by Uniroyal Chemical, Division of Uniroyal, Inc., Bethany, Conn. 06525, proposing establishment of a food additive tolerance (21 CFR Part 121) for residues of the plant regulator succinic acid 2,2-dimethylhydrazide in dried prunes at 135 parts per million resulting from application of the plant regulator to growing plums.

Dated August 30, 1973.

HENRY J. KORP,
*Deputy Assistant Administrator for Pesticide Programs.*

## FEDERAL COMMUNICATIONS COMMISSION

[Report No. 664]

### COMMON CARRIER SERVICES INFORMATION [1]

### Domestic Public Radio Services Applications Accepted for Filing [2]

SEPTEMBER 4, 1973.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an appli-

[1] All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

[2] The above alternative cutoff rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio and Local Television Transmission Services (Part 21 of the Rules).

V38-174 SEP 10 73 XUM

cation, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cutoff dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60 day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
*Acting Secretary.*

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

20155–C2–P–74—The Mountain States Telephone and Telegraph Company (KOE512). C.P. to change antenna system and location and to relocate all facilities operating on 152.66 and 152.78 MHz at 11.7 miles east-northeast of Cody, Wyoming.

20206–C2–P–(4)–74—Mobile Tel & Pager, Inc. (NEW) C.P. for a new 2-way station to operate on 454.025, 454.050, 454.250, & 152.240 MHz to be located at 1.5 miles N.E. of Barnesville on Hog Mountain, Barnesville, Georgia.

20207–C2–P–74—Radio Telephone of Mississippi, Inc. (NEW) C.P. for a new 2-way station to operate on 152.180 MHz to be located at approximately 2 miles E. of Belzoni, Mississippi.

20208–C2–P–74—Mobile Dispatch Service (KIR204) C.P. to change antenna location at Loc. #1 operating on 152.120, 454.100, 454.250, 454.325, and 454.275 MHz located at 1400 NW. 23rd Avenue, Fort Lauderdale, Florida.

20209–C2–P–74—Airvoice, Inc. (NEW) C.P. for a new 1-way signaling station to operate on 158.70 MHz to be located at 1 mile south of Americus on Murphy Mill Road, Americus, Georgia.

20210–C2–P–74—Mobile Dispatching Service (KRM963) C.P. to change antenna location operating on 158.70 MHz at 1400 NW 23rd Avenue, Ft. Lauderdale, Florida.

20211–C2–P–74—Coastal Utilities, Inc. C.P. for a new 1-way signaling station to operate on 162.840 MHz to be located at 1.24 miles South of intersection U.S. Hwy. 82 and Atlantic Coast Line Railroad, Near McIntosh, Georgia.

20212–C2–P–(2)–74—E & J Mobile Radio Service (NEW) C.P. for a new 2-way station to operate on 454.200 and 454.225 MHz to be located at 1.5 miles NE. of Hillsboro, Ohio.

20213–C2–P–(2)–74—Mobile Telephone Company of New Jersey (NEW) C.P. for a new 2-way station to operate on 454.250 and 454.275 MHz to be located at Rt. 72, 1.7 miles NW. intersection of Rt. 539, Barnegat, New Jersey.

20214–C2–P–(2)–74—Mobile Telephone Company of New Jersey (NEW) C.P. for a new 2-way station to operate on 454.075 and 454.200 MHz to be located at 2953 White Horse Pike, Egg Harbor City, New Jersey.

20215–C2–TC–74—Colfax Telephone Exchange (KMM688) Consent to Transfer of Control from Chester A. and Gladys M. Gibbs, TRANSFEROR, to Continental Telephone Corporation. TRANSFEREE. Station: KMM688, Colfax, California.

20216–C2–P–74—Lett Electronics, Inc. (KTS-250) C.P. to change antenna system operating on 158.70 MHz at 15 East 2nd Street, Hutchinson (Reno), Kansas.

20217–C2–P–74—Lett Electronics, Inc. (KEK-275) C.P. to change antenna system operating on 152.12 MHz at Loc. #2: 15 East 2nd Street, Hutchinson, Kansas.

*MAJOR AMENDMENTS*

8178–C2–P–72—Paging, Inc. (NEW) Amend to change transmitter and antenna system. All other particulars are to remain as reported on PN #597 dated May 22, 1972.

*INFORMATIVE*

It appears that the following applications may be mutually exclusive and subject to the Commission's Rules regarding ex parte presentations, by reasons of potential electrical interference.

*NEW MEXICO*

Western Mobilphone, Inc. (KKM582), 7923–C2–P–(4)–72.
Contact of Farmington, Inc. (NEW), 57–C2–P–73.

*CORRECTIONS*

20192–C2–P–74—Aircall, Inc. (KIY779) Correct PN to add; change antenna system, replace transmitter, and change emission operating on 152.24 MHz on top of Spivey Mountain, Asheville, North Carolina. All other particulars to remain as reported on PN #663 dated August 27, 1973.

21202–C2–P–74—The Mountain States Telephone and Telegraph Company (KKH476). Correct PN to change file number to 20202–C2–P–74. All other particulars to remain as reported on PN #663, dated August 27, 1973.

21203–C2–P–(4)–74—General Telephone Company of Florida (KIY397). Correct PN to change file number to 20203–C2–P–(4)–74. All other particulars to remain as reported on PN #663, dated August 27, 1973.

21204–C2–MP–(4)–74—General Telephone Company of Florida (KRS647). Correct PN to change file number to 20204–C2–MP–(4)–74. All other particulars to remain as reported on PN #663, dated August 27, 1973.

RURAL RADIO SERVICE

60046–C6–P–(2)–74—Arvig Telephone Company (NEW) C.P. for a new rural subscriber station to operate on 157.83 and 158.07 MHz temp-fixed.

60047–C6–P–74—Arvig Telephone Company (NEW) C.P. for a new rural subscriber station to operate on 459.650 to be located at Elephant Lake Lookout Tower, 0.6 mile South of Elephant Lake, Minnesota.

60048–C6–P–74—Arvig Telephone Company (NEW) C.P. for a new rural subscriber station to operate on 459.650 MHz, temp-fixed.

60049 (NEW) C.P. for a new Central office station to operate on 454.650 MHz to be located at 1.8 miles North of Ash River Falls, Minnesota.

*MAJOR AMENDMENTS*

983–C1–P/L–73—The Chesapeake and Potomac Telephone Company of Virginia. (NEW) Amend to correct frequency 152.53 to frequency 152.24. All other particulars to remain as reported on PN #611, dated August 28, 1972.

987–C1–P/L–73—The Chesapeake and Potomac Telephone Company of Virginia. (NEW) Amend to correct frequency 152.53 to frequency 152.54 and add frequency 459.375. All other particulars to remain as reported on PN #661, dated August 28, 1972.

POINT-TO-POINT MICROWAVE RADIO SERVICE

497–C1–P–74—American Telephone and Telegraph Company. (KKP96) 3.5 miles N. of Terrell, Texas. Lat. 32°47'48" N., Long. 96°16'38" W. C.P. to add a transmitter and frequencies: 3950H toward Emory, Texas, on azimuth 83°50'; 3990H toward Lindale, Texas, on azimuth 127°38'; 3950H toward East Mountain, Texas, on azimuth 79°54'; 3990H toward Marshall, Texas, on azimuth 89°24'; 3950H toward Leigh, Texas on azimuth 92°30' and 3990H toward Shreveport, La., on azimuth 107°28'.

498–C1–P–74—Same. (KKP97) 4.5 miles SW. of Emory, Texas. Lat. 32°50'12" N., Long. 95°49'50" W. C.P. to add a transmitter and frequencies: 3950H toward Emory, Texas, on azimuth 83°50'; 3990H toward Lindale, Texas, on azimuth 127°38'; 3950H toward East Mountain, Texas, on azimuth 79°54'; 3990H toward Marshall, Texas, on azimuth 89°24'; 3950H toward Leigh, Texas, on azimuth 92°30'; 3990H toward Shreveport, La., on azimuth 107°28'.

499–C1–P–74—Same. (KKP98) 2.5 miles NE. of Lindale, Texas. Lat. 32°32'16" N., Long. 95°22'27" W. 504–C1–P–74—American Telephone and Telegraph Company (KEE58) 4 miles North of Kingston, New York. Lat 41°59'22" N., Long. 74°01'06" W. C.P. to add a transmitter and frequencies: 3710V toward Kinderhook, New York, on azimuth 169°11'; 3750V toward Albany, New York, on azimuth 349°14'; 3750V toward Halihan, New York, on azimuth 213°55'; 3710V toward Kinderhook, New York, on azimuth 33°41'.

505–C1–P–74—Same (KEG61) 2.4 miles SE. of Kinderhook, New York. Lat. 42°21'42" N., Long. 73°41'00" W. C.P. to add a transmitter and frequencies: 3710V toward Kinderhook, New York, on azimuth 169°11'; 3750V toward Albany, New York, on azimuth 349°14'; 3750V toward Halihan, New York, on azimuth 213°55'; 3710V toward Kinderhook, New York, on azimuth 33°41'.

506–C1–P–74—General Telephone Company of the Southwest. (KLO90) 320 North Shipp Street, Hobbs, New Mexico. Lat. 32°42'09". Long. 103°08'08" W. Proposed path to Buckeye, New Mexico, on frequency 6375.2H, change antenna system and replace transmitters toward Lovington, New Mexico.

507–C1–P–74—Same. (KLO91) 8.0 miles Southwest of Buckeye, New Mexico. C.P. for proposed paths to Hobbs and Moroon Cliffs, New Mexico, on 6123.1H and 6034.2H respectively. Change antenna system and change in location to Lat. 32°41'42" N., Long. 103°33'14" W.

508–C1–P–74—Same. (KLO92) 313 West Fox Street, Carlsbad, New Mexico. Lat. 32°25'-07" N., Long. 104°13'45" W. C.P. to change antenna system, replace transmitters, and add frequency 1079.5V toward on azimuth 287°00' toward Carlsbad RI, New Mexico.

509–C1–P–74—Same. (NEW) 1 mile West of Carlsbad, New Mexico. Lat. 32°35'42" N., Long. 104°16'00" W. C.P. for a new station on frequencies: 6078.6H toward Maroon Cliffs, N. Mex., on azimuth 73°43'; 1132.5V toward Carlsbad, N. Mex., on azimuth 106°59'.

510–C1–P–74—Same. (New) 22 miles East of Carlsbad, New Mexico. Lat. 32°31'22" N., Long. 103°52'58" W. C.P. for a new station on frequencies: 6286.2H toward Buckeye, N. Mex., on azimuth 58°10'; 6330.7H toward Carlsbad RI, New Mexico, on azimuth 253°55'; 6256.5V toward Artesia Jct., N. Mex., on azimuth 318°29'.

595–C1–P–74—East Texas Transmission Company. (New). Goodman Mountain, 5.0 miles WNW of Kilgore, Texas. Lat. 32°24'39" N., Long. 94°59'16" W. C.P. for a new station on frequencies: 6226.9V, 6286.2V, and 6345.5V toward Gladewater, Texas, on azimuth of 16°17'. (NOTE.—This application "reinstates" proposed service to Gladewater, Texas, which was recently severed from pending application (1078–C1–P–72). Waiver of section 21.701(1) is requested by East Texas.)

596–C1–P–74—United Video, Inc. (New) 44th Street and Sheridan Road, Tulsa, Oklahoma. Lat. 36°05'58" N., Long. 95°54'05" W. Application for a new station on frequency 6034.2H toward Avant, Oklahoma, on azimuth 339°26'. (NOTE.—A waiver of Section 21.701(1) is requested by United.)

597–C1–P–74—United Video, Inc. (New) 4 miles South of Avant, Oklahoma. Lat. 36°26'27" N., Long. 96°03'36" W. Application for a new station on frequency: 6286.2H toward Bartlesville, Oklahoma, on azimuth 15°14'.

598–C1–P–74—MCI Telecommunications Corporation (formerly MCI Indiana-Ohio, Inc) (New) 3.0 miles SSE. of Medina, Ohio. Lat. 41°04'48" N., Long. 81°50'32" W. C.P. for a new station on frequency 6286.2H toward Nova, Ohio, on azimuth 256°28'. (Informative: Point of communication proposed in this application has been deleted from pending application 4124–C1–P–72 for the same station in order to allow for the separate consideration of the two proposals. Frequency 6226.9H toward Nova, Ohio, on azimuth 256°25' is also deleted from pending application 4124–C1–P–72).

599–C1–P–74—Same (New) 0.1 mile NE. of Hilliard, Ohio. Lat. 40°00'37" N., Long. 83°11'16" W. C.P. for a new station on frequency 10775.0V toward Columbus, Ohio, on azimuth 107°57'. (Informative: Frequencies and point of communication proposed in this application have been deleted from pending application 8878–C1–P–70 for the same station in order to allow for the separate consideration of the two proposals).

600–C1–P–74—Continental Telephone Company of California. (KNB40). Near Garberville, California. C.P. to change antenna system, replace transmitter, and add frequency 2118.4V toward Zenia, California, on azimuth 60°33'.

601–C1–P–74—Same. (KNB42) Zenia, California. Lat. 40°12'26" N., Long. 123°29'20" W. C.P. to change antenna system, replace transmitter, and add frequency 2168.4V toward Garberville, California, on azimuth 240°41'.

602–C1–MP–74 through 623–C1–MP–74—The Western Union Telegraph Company. (KGB42, KGH87, KQG27, KQG28, KQG29, KQG30, KQG31, KQG32, KQG33, KQG34, KQG35, KSG77, KSG78, KSG79, KSG80, KSG89, KSG90, KSG91, KSG92, KSG93, KSG94, KSG95). Location on existing Microwave route between Chicago, Illinois, and Pittsburgh, Pennsylvania. Mod. C.P.'s (22) to replace transmitters and reduce power from 10 to 3.5 watts on its existing construction permits file numbers 78–C1–P 72 through 99–C1–P–72.

635–C1–P–74—Western Tele-Communications, Inc. (New) C.P. for a new station at Salt Lake City, Utah, 1251 Wilmington Avenue at Lat. 40°43'25" N., Long. 111°-51'17" W. Frequency 10835V on azimuth 243°43', toward Nelson Peak, Utah.

636–C1–P–74—Same. (KPT21) Nelson Peak, Utah, 18 miles SW. of Salt Lake City, Utah. Lat. 40°36'30.5" N., Long. 112°09'34" W. C.P. to add frequency 6390.0H toward Curlew, Idaho, on azimuth 349°28'.

637–C1–P–74—Same. (KPT22) Curlew, Idaho. 17.5 miles WNW. of Malad City, Idaho. Lat. 42°16'32" N., Long. 112°34'38" W. C.P. to add frequencies: 5960.0H, 5989.7V, 6019.3H, 6078.6H, 6108.3V, and 6137.9H toward Harrison Mountain, Idaho, on azimuth 274°47'.

638–C1–P–74—Western Tele-Communications, Inc. (New) C.P. for a new station at Harrison Mtn., Idaho 12.4 miles WNW. of Malta, Idaho, at Lat. 42°20'05" N., Long. 113°36'16" W. Frequencies: 6197.2H, 6226.9V, 6286.2V, 6345.5V, 6404.8V, and 6375.2H toward Castleford, Idaho, on azimuth 280°01'. Frequencies: 6226.9H, 6286.2H, 6345.5H, and 6404.8H toward Twin Falls, Idaho, on azimuth 289°39'. Frequencies: 6226.9H, 6286.2H, 6245.5H, and 6404.8H on azimuth 306°34' toward Gooding, Idaho. Frequencies: 6226.9H, 6286.2H, 6345.5H, and 6404.8H on azimuth 342°50' toward Burley-Ruppert, Idaho.

639–C1–P–74—Same (New). C.P. for a new station at Castleford, Idaho. 8.0 miles WSW. of Castleford, Idaho. Lat. 42°30'41" N., Long. 115°01'20" W. Frequencies 5945.2H, 6004.5H, and 6123.1H on azimuth 337°44' toward Bennett Mtn., Idaho. Frequencies 5945.2H, 6004.5H, 6034.2V, and 6123.1H on azimuth 60°24', toward Jerome (Drop), Idaho.

640–C1–P–74—Same. (New). C.P. for a new station at Bennett Mtn., Idaho, 4.5 miles South of Dixie, Idaho. Lat. 43°14'55" N., Long. 115°26'09" W. Frequencies 6375.2V, 6404.8H, and 6345.5H on azimuth 315°31' toward Deer Point, Idaho.

641–C1–P–74—Same. (New). C.P. for a new station at Deer Point, Idaho, 9 miles NE. of Boise, Idaho. Lat. 43°44'37" N., Long. 116°06'32" W. Frequencies: 11175V, 10935V, and 11095V on azimuth 278°49' toward Apple Valley, Idaho.

642–C1–P–74—Same. (New). C.P. for a new station at Apple Valley, Idaho. 5.8 miles ESE. of Apple Valley, Idaho. Lat. 43°49'32" N. Long. 116°51'40" W. Frequencies: 11385V, 11625V, and 11505H on azimuth 299°18' toward New Vale, Idaho. Frequencies 11385V, 11625V, and 11505H on azimuth 354°59' toward Payette, Idaho. Frequencies 11385V, 11625V, and 11505H on azimuth 351°12' toward Weiser, Idaho. Frequencies 11385V, 11625V, and 11505H on azimuth 82°17' toward Emmett, Idaho. Frequencies 11385V, 11625V, and 11505H on azimuth 114°41' toward Boise, Idaho. Frequencies: 11585H, 11625V, and 11505H on azimuth 140°15' toward Nampa, Idaho. Frequencies: 11385V, 11625V, and 11505H on azimuth 267°23' toward Parma, Idaho.

643–C1–P–74—The Chesapeake and Potomac Telephone Company of Maryland. (KGO71) On Route #135, 1 mile SE. of Swanton, Maryland. Lat. 39°27'02" N., Long. 79°12'-59" W. C.P. to change power, replace a transmitter, and change frequency 6071.2V to 6078.6V toward Terra Alta. West Virginia on azimuth 283°35'.

644–C1–P–74—The Pacific Telephone and Telegraph Company. (KMA38) 434 South Grand Avenue, Los Angeles, California. Lat. 34°03'03" N., Long. 118°15'08" W. C.P. to add a transmitter and frequency 3770H toward Padua Hills, California, on azimuth 78°05'.

645–C1–P–74—Same. (KMQ33) 9 miles North of San Bernardino, California. Lat. 34°13'55" N., Long. 117°14'04" W. C.P. to add a transmitter and frequency 3770H toward Padua Hills, California, on azimuth 257°40'.

646–C1–P–74—The Pacific Telephone and Telegraph Company. (KMW74). Padua Hills, 3 miles North of Claremont, California. Lat. 34°08'33" N., Long. 117°43'17" W. C.P. to add transmitter and frequencies: 3730H toward Strawberry Peak, Calif., on azimuth 77°24'; 3730H toward Los Angeles, Calif., on azimuth 258°23'.

449–C1–MP–74 — MCI Telecommunications Corporation. (WOE51). Ann Arbor, Michigan. Mod. of C.P. to increase power to 5 watts for frequencies: 10775H and 11175H toward Bridgewater, Michigan.

V38-174 SEP 10 73 XUM

450–C1–MP–74—Same. (WOE52). Bridgewater, Michigan. Mod. of C.P. to increase power to 5 watts for frequencies 11265H and 11685H toward Ann Arbor, Michigan.

8943–C1–MP–73—MCI Telecommunications Corporation. 125 East 31st Street, Kansas City (Jackson), Missouri. Lat. 39°04'14" N., Long. 94°34'59" N. Mod. of C.P. to change polarization from H to V on frequency 5974.8. This entry was inadvertently left off the June 11, 1973, Public Notice.

Informative: The following applications have been amended to substitute MCI Telecommunications Corporation as the Applicant. This change results from the merger of MCI Indiana-Ohio, Inc., into MCI Telecommunications Corporation File Number: 8857–8887–C1–P–70, 4124–4130–C1–P–72, 7154–7164–C1–P–72, 3090–3093–C1–P–73, 6631–C1–P–73.

*Major Amendments*

4125–C1–P–72—MCI Telecommunications Corporation (formerly MCI Indiana-Ohio) (New). Relocate station to 2.3 miles SSE of Nova, Ohio. Lat. 40°59'55" N., Long. 82°-17'02" W. Change frequency 5974.8H MHz to 6034.2H MHz toward Medina, Ohio, on azimuth 76 deg./11 min. Change frequency 5945.2V MHz to 6034.2V MHz toward Mansfield, Ohio, on azimuth 211 deg./11 min.

4126–C1–P–72—Same (New) Mansfield, Ohio. Lat. 40°41'02" N., Long. 82°32'02" W. Change frequency 6197.2V MHz to 6286.2H MHz toward Nova, Ohio, on new azimuth 31 deg./01 min.

8878–C1–P–70—Same (New) Hilliard, Ohio. Lat. 40°00'37" N., Long. 83°11'18" W. Change frequency 5945.2V MHz to 6004.5V MHz on azimuth 257 deg./20 min. toward Vienna, Ohio. Delete Columbus, Ohio, as a point of communication.

4129–C1–P–72—Same (New) Vienna, Ohio. Lat. 39°56'13" N., Long. 83°36'26" W. Change frequency 6197.2V MHz to 6226.9V MHz toward Hilliard, Ohio, on azimuth 77 deg./04 min. Change frequency 6226.9V MHz to 6286.2V MHz toward Byron, Ohio, on azimuth 240 deg./12 min.

4130–C1–P–72—Same (New) Byron, Ohio. Lat. 39°47'11" N., Long. 83°56'49" W. Change frequency 5974.8V MHz to 6034.2V MHz toward Vienna, Ohio, on azimuth 59 deg./59 min. Change frequency 5945.2H MHz to 5974.8V MHz toward Waynesville, Ohio, on azimuth 211 deg./03 min.

8876–C1–P–70—Same (New) Waynesville, Ohio. Lat. 39°34'14" N., Long. 84°06'53" W. Change frequency 6197.2H MHz to 6256.5V MHz toward Byron, Ohio, on azimuth 30 deg./56 min. Change frequency 6226.9H MHz to 6286.2H MHz toward Mason, Ohio, on new azimuth 212 deg./29 min.

8871–C1–P–70—Same (New) Relocate station to 2.7 miles South of Mason, Ohio. Lat. 39°-19'18" N., Long. 84°19'07" W. Change frequency 5974.8H MHz to 6034.2H MHz toward Waynesville, Ohio, on azimuth 32 deg./21 min. Change azimuth of frequency 5945.2V MHz toward Cincinnati, Ohio, to 214 deg./23 min.

8874–C1–P–70—Same (New) Cincinnati, Ohio. Lat. 39°06'06" N., Long. 84°30'42" W. Change frequency 6197.2V MHz to 6286.2V MHz toward Mason, Ohio, on new azimuth 34 deg./16 min.

7009–C1–MP–73—Data Transmission Company (WKR42) 6.0 miles W. of Spring, Texas. Change polarization and azimuth of frequency 6404.8 MHz toward Houston to vertical and 160°52'.

7008–C1–MP–73—Same (WKR41) 1.0 mile S. of Montgomery, Texas. Change polarization of frequency 6152.8 MHz toward Mossy Grove to horizontal.

9947–C1–MP–73—Same (WQP23) 1.7 miles SW. of Velma, Oklahoma. Change frequency on azimuth 331°28' toward Rush Springs to 5945.2 MHz (V).

9950–C1–MP–73—Same (WQP26) 4.5 miles NE. of El Reno, Oklahoma. Change polarization of frequency 6404.8 MHz toward Bridge Creek to horizontal.

5099–C1–P–70—Eastern Microwave, Inc. (KEA64). Major amendment filed to change receive site (Gloversville) coordinates to Lat. 43°02'41" N., Long. 74°21'58" W. Change frequencies to 5989.7H MHz and 6049.0H MHz toward Gloversville, New York, on azimuth of 40°40'.

7993–C1–P–70—Same (KEM58) Major amendment filed to change receive site (from Colonie to Schenectady) coordinates to Lat. 42°48 24" N., Long. 73°54'44" W. Delete frequency 5960.0V MHz and change 6019.3V MHz and 6078.6V to 6241.7H MHz and 6301.0H MHz respectfully (via power split) toward Schenectady (via back to back parabolic antenna Passive Repeater) on azimuth of 50°01'.

*Corrections*

263–C1–P–74—Continental Telephone Company of California. (KMW63). Correct to read C.P. to change frequencies 6135H to 6034.2H toward Oregon Mtn., California, via Passive Reflectors on azimuth 33°55'. (All other particulars same as reported in Public Notice #660, dated August 6, 1973.)

373–C1–P–74—Same. (KQF43). Correct to read C.P. to add frequencies: 4010H, 4090H MHz toward Flint, Michigan, on azimuth 183°20'; 4010V, 4090V MHz toward Saginaw, Michigan, on azimuth 323°48'. (All other particulars same as reported in Public Notice #661, dated August 13, 1973.)

## FEDERAL MARITIME COMMISSION

### A. B. BARONE FORWARDING INC. AND C. H. POWELL CO., INC.

#### Notice of Agreement Filed

Notice is hereby given that the following Agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1202; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before October 1, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Alfred E. Powell, Vice President, C. H. Powell Company, Inc., One World Trade Center, Suite 1725, New York, New York 10048.

Agreement No. FF 74–3 is a cooperative working arrangement between A. B. Barone Forwarding, Inc. (Barone, FMC No. 995) of New Orleans, Louisiana, and C. H. Powell Co., Inc. (Powell, FMC No. 176) of New York. Under the terms of the agreement Barone will supervise the movement of export shipments from the Port of New Orleans which Powell has secured and documented. Powell will maintain a telephone on Barone's premises and advertise as having an office on the premises. Barone's compensation for managing the subject shipments will be an agreed upon forwarding fee. Ocean freight brokerage received on shipments subject to the arrangement will be divided by the parties. The agreement is exclusive on the part of Powell, but not on the part of Barone who may engage or be engaged by other forwarders under other agreements.

By Order of the Federal Maritime Commission.

Dated September 5, 1973.

JOSEPH C. POLKING,
*Assistant Secretary.*

### F. J. HERBELIN FORWARDING CO., INC., AND C. H. POWELL CO., INC.

#### Notice of Agreement Filed

Notice is hereby given that the following Agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1202; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before Oct. 1, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Alfred E. Powell, Vice President, C. H. Powell Company, Inc., One World Trade Center, Suite 1725, New York, New York 10048.

Agreement No. FF 74–2 is a cooperative working arrangement between F. J. Herbelin Forwarding Co., Inc. (Herbelin, FMC No. 474), of Houston, Texas, and C. H. Powell Co., Inc. (Powell, FMC No. 176), of New York. Under the terms of the agreement Herbelin will supervise the movement of export shipments from the Ports of Houston and Galveston which Powell has secured and documented. Powell will maintain a telephone on Herbelin's Houston and Galveston premises and advertise as having offices on the premises. Herbelin's compensation for managing the subject shipments will be an agreed upon forwarding fee. Ocean freight brokerage received on shipments subject to the arrangement will be divided by the parties. The agreement is exclusive on the part of Powell, but not on the part of Herbelin who may engage or be engaged by other forwarders under other agreements.

By order of the Federal Maritime Commission.

Dated September 5, 1973.

JOSEPH C. POLKING,
*Assistant Secretary.*

## FEDERAL RESERVE SYSTEM

### UNITED PENN CORPORATION

#### Proposed Acquisition of Valley Consumer Discount Company

United Penn Corporation, Wilkes-Barre, Pennsylvania, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Valley Consumer Discount Company, Exeter, Pennsylvania. Notice of the application was published on July 20, 1973 in the Times-Leader-The Evening News-Wilkes-Barre Record, a newspaper circulated in Wilkes-Barre, Pennsylvania.

Applicant states that the proposed subsidiary would engage in the activities of making, acquiring and servicing loans and other extensions of credit including the sale of credit life and credit accident and health insurance. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Philadelphia.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 26, 1973.

Board of Governors of the Federal Reserve System, August 30, 1973.

[SEAL] THEODORE E. ALLISON,
*Assistant Secretary of the Board.*

[FR Doc.73-19113 Filed 9-7-73;8:45 am]

## FEDERAL TRADE COMMISSION

### Office of the Executive Director

### STATEMENT OF ORGANIZATION

Notice is hereby given that the Statement of Organization published June 30, 1970 (35 FR 10627), as revised July 23, 1970 (35 FR 11827), March 13, 1971 (36 FR 4918), May 18 1971 (36 FR 9044), June 29, 1971 (36 FR 12254), August 18, 1971 (36 FR 15768), October 20, 1972 (37 FR 22658), January 24, 1973 (38 FR 2355), is revised to reflect the reorganization of the Office of the Executive Director by combining into one position the positions and functions of the Assistant Executive Director for Legal Coordination and the Assistant Executive Director for Field Management, to be titled the Assistant Executive Director for Regional Operations; and by transfering to the new Office of Assistant Executive Director for Regional Operations the activities of Federal-State liaison in the Bureau of Consumer Protection.

Section 10 is revised to read as follows:

SEC. 10. *Office of the Executive Director.*—The Executive Director, under the direction of the Chairman, is the chief operating official. He exercises executive and administrative supervision over all the offices, bureaus, and staff of the Commission, and, in coordination with the Office of Policy Planning and Evaluation, resolves problems concerning priorities in case handling. Immediately under his direction are the Assistant Executive Director for Regional Operations, and the Assistant Executive Director for Administration.

(a) The Assistant Executive Director for Regional Operations functions as advisor and principal assistant to the Executive Director on all substantive legal matters pertaining to Commission programs; assists the Executive Director in planning, coordinating and reviewing the full range of antitrust and consumer protection functions performed by the operating bureaus and regional offices; acts for the Executive Director in all matters concerning supervision and line management of the regional offices, guiding and directing their activities in the fields of antitrust law, consumer protection and consumer education, including investigations, trial of cases and industry and consumer counseling; acts for the Executive Director in coordinating the legal case work of the Bureau of Consumer Protection, Bureau of Competition, Bureau of Economics and the regional offices; and provides guidance and counseling to Federal, State and local officials on antitrust as well as consumer protection matters.

(b) The Assistant Executive Director for Administration functions as staff advisor to the Executive Director in all aspects of administrative management; provides administrative policy guidance to agency management and provides general supervision to the programs of management analysis and organization, personnel, budget and finance, data processing, and administrative service activities; initiates and develops long-range plans to assure that the Commission acquires and effectively utilizes the manpower, financial resources, physical facilities and management tools necessary to accomplish its mission.

Section 16 is revised to read as follows:

Sec. 16. *Bureau of Consumer Protection.*—This bureau investigates, provides guidance and counseling to businessmen and consumers, and endeavors to secure voluntary compliance with the law in all matters involving acts or practices alleged to be deceptive, unfair to consumers or involving unsafe products within the scope of the Commission's jurisdiction; and, to the extent necessary, litigates and secures compliance with final orders in all such matters. It is also responsible for developing and administering a nationwide consumer education program designed to alert the public to deceptive trade practices.

Section 18(b)(12) is amended to change the address of the Philadelphia Field Station to read as follows:

Field Station: Federal Trade Commission, Room 9202, Federal Office Building, 600 Arch Street, Philadelphia, Pa. 19106.

By direction of the Commission dated June 19, 1973.

[SEAL] CHARLES A. TOBIN,
*Secretary.*

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (73-68)]

### KENNEDY SPACE CENTER

**Final Environmental Impact Statement; Public Notice Regarding Availability**

Notice is hereby given of the public availability of the final Environmental Impact Statement for the Kennedy Space Center, Amendment #1.

Comments on the draft Environmental Impact Statement were previously solicited from State and local agencies and members of the public through a notice in the FEDERAL REGISTER of November 25, 1972.

Copies of the draft and final statement have been furnished to the Council on Environmental Quality, Office of Management and Budget, Environmental Protection Agency, Atomic Energy Commission, Department of Defense, Department of Transportation, Department of Commerce, and the Department of Interior.

Copies of the final statement may be obtained or examined at any of the following locations:

(a) National Aeronautics and Space Administration, Public Documents Room (Room 126), 600 Independence Avenue, SW., Washington, D.C. 20546.

(b) Ames Research Center, NASA (Building 201, Room 17), Moffett Field, Calif. 94035.

(c) Flight Research Center, NASA (Building 4800, Room 1017), P.O. Box 273, Edwards, Calif. 93523.

(d) Goddard Space Flight Center, NASA (Building 8, Room 150), Greenbelt, Md. 20771.

(e) Johnson Space Center, NASA (Building 1, Room 136), Houston, Tex. 77058.

## NATIONAL ENDOWMENT FOR THE HUMANITIES

### PLANNING OFFICE PANEL

**Notice of Meeting**

SEPTEMBER 4, 1973.

Pursuant to Public Law, 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Planning Office Panel will take place in Washington, D.C., on September 14 and 15, 1973.

The purpose of the meeting is to review youthgrant applications that have been submitted to the Endowment for possible grant funding.

Based on section b (4) and (6) of 5 U.S.C. 522, the meeting will not be open to public participation. It is suggested that those desiring more specific information contact the Advisory Committeee Management Officer Mr. John W. Jordan, 806 15th Street NW., Washington, D.C. 20506, or call Area Code 202–382–2031.

JOHN W. JORDAN,
*Advisory Committee Management Officer.*

## SECURITIES AND EXCHANGE COMMISSION

[File 500–1]

### COMPUSAMP, INC.

**Order Suspending Trading**

SEPTEMBER 4, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, $.01 par value, and all other securities of Compusamp, Inc., being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

*It is ordered*, pursuant to section 15(c)(5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from 10:00 a.m. (edt) September 4, 1973 through midnight (edt) September 13, 1973.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
*Secretary.*

[FR Doc.73-19153 Filed 9-7-73;8:45 am]

[Rel. No. 7974, 812–3500]

### IDS LIFE VARIABLE ANNUITY FUND A AND IDS LIFE INSURANCE CO.

**Application for Order**

SEPTEMBER 4, 1973.

Notice is hereby given that IDS Life Variable Annuity Fund A (Fund) and IDS Life Insurance Company ("IDS Life") IDS Tower, Minneapolis, Minnesota 55402 (herein collectively referred to as Applicants) have filed an application pursuant to Section 6(c) of the Investment Company Act of 1940 (Act) for an order of the Commission exempting Applicants from the provisions of section 22(d) of the Act to the extent described below. Fund A is an open-end diversified management investment company registered under the Act. IDS Life established Fund A on May 10, 1968, under Minnesota law as a separate account through which it will set aside and invest payments accruing from the sale of variable annuity contracts offered by IDS Life. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that they presently offer three types of individual variable annuity contracts: (1) installment purchase payment deferred annuity contracts; (2) single purchase payment deferred annuity contracts; and (3) single purchase payment immediate annuity contracts. All the contracts possess combination features; that is, purchase payments under the contracts may be allocated either to the purchase of a fixed or variable annuity, or both. Additionally, the deferred contracts contain transfer provisions whereby each contract year a contract owner may transfer accumulation values either to Fund A to provide variable benefits, or from Fund A to provide fixed dollar benefits. Applicants propose to offer an individual flexible purchase payment retirement annuity contract, based upon Fund A, which is designed for use in connection with retirement or deferred compensation plans adopted by an employer. The new individual retirement annuity contract will possess combination features and transfer privileges identical to those contained in the three individual annuity contracts presently being offered.

In connection with the sale of variable annuity contracts, charges are deducted from purchase payments to pay sales and administrative expenses. Applicants request exemptions from section 22(d) of the Act to the extent necessary to permit the following:

1. Applicants request an exemption to permit an investor to transfer accumulated values under the retirement annuity contract from the fixed dollar account to the variable account without the imposition of an additional sales and administrative charge. Applicants state that since sales and administrative charges assessed upon purchase payments under the contract are identical, irrespective of whether such payments are allocated to the fixed dollar account or the variable account, to deduct an additional sales and administrative charge from funds previously paid into the fixed dollar account incident to their transfer to the variable account would be inconsistent with the protection of investors. Applicants further state that to assess an additional sales and administrative charge upon such transfers is unjust since the effectuation of the transfer, unlike a sale, involves no sales effort and only minimal administrative expense. Applicants state that the transfer of accumulation values from the fixed to the variable accounts will be limited to one transfer each year per contract owner.

2. Applicants request an exemption to permit the usual decreasing sales and administrative charges on purchase of variable annuities to be assessed upon the basis of aggregate purchase payments received from an investor, irrespective of whether such payments are allocated to the fixed account, the variable account, or both. Applicants state that since sales and administrative charges are assessed on the basis of total purchase payments previously made, rather than at a single flat rate, the exemption is necessary if contract owners with purchase payments allocated to both the fixed dollar account and variable account are to be treated on an equal basis with contract owners who allocate payments to only one account.

3. Applicants request an exemption to permit the beneficiary of an annuitant to elect to have the proceeds payable upon the death of the annuitant, including those not derived from the viariable account, applied to a variable annuity without the imposition of a sales and administrative charge. Applicants state that under the retirement annuity contract the dollar amount of their liability to a beneficiary is fixed at the date of death of the annuitant. Applicants propose to place and hold the amount of such liability allocable to an annuitant's variable account in the general account during the interim between the date of death of the annuitant and the exercise of an option by the beneficiary. Applicants state that if the beneficiary elects to receive a variable annuity, the sums necessary to effectuate the annuity will then be transferred from the general account to the variable account. Applicants propose to allow this transfer of funds to occur without the imposition of sales and administrative charges. Applicants state that since a sales and administrative charge has already been received from the annuitant prior to his death, there is no justification for imposing a duplicate sales and administrative charge when the beneficiary of an annuitant elects to transfer the funds to the variable account.

On January 25, 1971, the Commission issued an order (Act Rel. No. 6329) exempting Applicants' present individual annuity contracts from the requirements of Section 22(d) to allow Applicants to permit transfers and compute sales and administrative charges in the manner described herein. Applicants state they believe fairness demands that these benefits be afforded under the retirement annuity contracts also.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company shall sell any redeemable security issued by it to any person except at a current public offering price described in the prospectus. The exemption is requested because these securities may be sold at an offering price which varies as described above.

Section 6(c) of the Act provides that the Commission may, by order upon application, conditionally or unconditionally exempt any person from any provision of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 28, 1973, submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the address set forth above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule O–5 of the Rules and Regulations under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in the application, unless an order for hearing upon the application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
*Secretary.*

## TARIFF COMMISSION

### CRITERION FOOTWEAR, INC.

[TEA–W–207]

**Notice of Investigation**

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the former workers of Criterion Footwear, Inc., Brooklyn, New York, the United States Tariff Commission, on September 4, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agree-

V 38-174 SEP 10 73 XUM

ments, articles like or directly competitive with footwear for women and misses (of the types provided for in items 700.43, 700.45, 700.55 and 700.60 of the Tariff Schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed within 10 days after the notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the Office of the Secretary, United States Tariff Commission, 8th and E Streets, NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued September 4, 1973.

By order of the Commission.

[SEAL] KENNETH R. MASON, *Secretary.*

[FR Doc.73-19136 Filed 9-7-73;8:45 am]

## DON GUSTIN SHOE CO., INC.

[TEA-W-208]

### Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the former workers of the Don Gustin Shoe Co., Inc., Paterson, N.J., the United States Tariff Commission, on September 4, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with footwear for women (of the types provided for in items 700.43, 700.45 and 700.55 of the Tariff Schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed within 10 days after the notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the Office of the Secretary, United States Tariff Commission, 8th and E Streets, NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued September 4, 1973.

By order of the Commission.

[SEAL] KENNETH R. MASON, *Secretary.*

## COST OF LIVING COUNCIL

### FOOD INDUSTRY WAGE AND SALARY COMMITTEE

### Notice of Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770) notice is hereby given that the Food Industry Wage and Salary Committee, established under the authority of section 212(f) of the Economic Stabilization Act, as amended, section 4(a)(iv) of Executive Order 11695, and Cost of Living Council Order No. 14, will meet at 10:00 a.m., Wednesday, September 12, 1973, at 2025 M Street NW., Washington, D.C.

The agenda will consist of discussions leading to recommendations on specific Phase II and Phase III wage cases in the food area, and future wage policy.

Since the above stated meeting will consist of discussions of future food wage policy and Phase II and III cases for decision, pursuant to authority granted me by Cost of Living Council Order 25, I have determined that the meeting would fall within exemption (5) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C., on September 7, 1973.

HENRY H. PERRITT, JR.,
*Executive Secretary,*
*Cost of Living Council.*

[FR Doc.73-19363 Filed 9-7-73;1:45 pm]

## DEPARTMENT OF LABOR

### Bureau of Labor Statistics

### BUSINESS RESEARCH ADVISORY COUNCIL'S COMMITTEE ON MANPOWER AND EMPLOYMENT

### Notice of Meeting

The BRAC Committee on Manpower and Employment will meet at 9:30 a.m., September 25, 1973, at 1515 Broadway, Room 3560, New York, New York. The agenda for the meeting is as follows:

1. Occupational Statistics: Survey of Training in Industry, Program of Projections of Employment for Localities, Survey of Employment by Occupation.
2. Improving area unemployment estimating procedures.
3. New data from the Current Population Survey—Information on "work schedules" being collected for first time in May 1973.
4. Economic and Manpower Projections for the Nation to 1985.

It is suggested that persons planning to attend this meeting as observers contact Kenneth G. Van Auken, Executive Secretary, Business Research Advisory Council on (Area Code 202) 961-2559.

Signed at Washington, D.C. this 4th day of September 1973.

JULIUS SHISKIN,
*Commissioner of Labor Statistics.*

[FR Doc.73-19128 Filed 9-7-73;8:45 am]

### Office of the Secretary

[Secretary of Labor's Order No. 13-73]

### ORGANIZATION AND FUNCTIONS

### Changes in Organizational Terminology

1. *Purpose.*—This order prescribes a new generic term referring to the major organizational components of the Department. This order also prescribes new official titles for the regional heads of major organizational components.

2. *Background.*—For the past ten years the major organizational components of the Department have been referred to generically as "Administrations and Offices." This has led to confusion partly because one major component is officially a "Bureau" (the Bureau of Labor Statistics) and partly because of the widespread use of the designation "Office" at lower organizational levels.

A separate confusion of reference has existed in the field regions, where the titles for heads of major organizational components have varied from one component to another. The titles in use have included Regional Administrator, Regional Administrative Office, Regional Director, Regional Manager and Regional Solicitor.

3. *Organizational Designation.*—a. The major organizational components listed below shall hereafter be referred generically by the term "agencies" in all official documents and issuances. The term "Administrations and Offices" as a generic term is now obsolete.

b. The Agencies of the Department of Labor are as follows:

(1) Manpower Administration
(2) Labor-Management Services Administration
(3) Employment Standards Administration
(4) Occupational Safety and Health Administration
(5) Office of the Solicitor
(6) Bureau of Labor Statistics
(7) Office of the Assistant Secretary for Policy, Evaluation and Research
(8) Office of the Assistant Secretary for Administration
(9) Bureau of International Labor Affairs
(10) Office of Information, Publications and Reports

c. The above changes in generic terminology do not change existing official organizational names, structures or functions.

4. *Regional titles.*—a. Effective immediately, the regional heads of the following agencies of the Department: Manpower, Labor-Management Services, Employment Standards, Occupational Safety and Health, Labor Statistics, Office of the Assistant Secretary for Administration, Office of Information, Publications and Reports, shall have the official title of "Assistant Regional Director for Manpower", "Assistant Regional Director for Labor-Management Services", "Assistant Regional Director for Employment Standards", "Assistant Regional Director for Occupational Safety and Health", "Assistant Regional Director for Labor Statistics", "Assistant Regional Director for Administration and Management", "Assistant Regional Director for Program Review and Audit", "Assistant Regional Director for Information, Publications and Reports".

b. The regional heads of the Women's Bureau shall henceforth have the official title, "Associate Assistant Regional Director, Women's Bureau/ESA".

c. The regional heads of the Office of Federal Contract Compliance shall henceforth have the official title, "Associate Assistant Regional Director, Office of Federal Contract Compliance/ESA".

d. The regional heads of the Bureau of Apprenticeship and Training shall henceforth have the official title of "Associate Assistant Regional Director, Bureau of Apprenticeship and Training/MA".

e. The various official titles currently in use for the above regional heads are now obsolete.

f. The above changes in terminology do not change existing responsibilities, authorities, or administrative relationships.

5. *Directive affected.*—All directives of the Department which conflict with the foregoing designations of official terminology are modified to the extent of the conflict.

6. *Implementation.*—Use is to be made of the new terminology in all Department documents and issuances originating after distribution of this Order. Preexisting documents and issuances shall be amended to reflect the new terminology in the course of normal updating and maintenance.

7. *Effective date.*—This order is effective June 11, 1973.

Signed at Washington, D.C., this 11th day of June 1973.

PETER J. BRENNAN,
*Secretary of Labor.*

[FR Doc.73-19127 Filed 9-7-73;8:45 am]

## INTERSTATE COMMERCE COMMISSION

[Notice 337]

### ASSIGNMENT OF HEARINGS

SEPTEMBER 5, 1973.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC-C-7777, Allied Van Lines, Inc.—Investigation and Revocation of Certificates—now assigned October 9, 1973, MC 105045 Sub 40, R. L. Jeffries Trucking Co., Inc., now assigned October 15, 1973, MC 22278 Sub 43, Takin Bros. Freight Line, Inc., now assigned October 16, 1973, MC 107012 Sub 179, North American Van Lines, Inc., now assigned October 17, 1973, at Chicago, Ill., will be held in Room 1086A, Everett McKinley Dirksen Building, 219 S. Dearborn Street.

MC 124692 Sub 113, Sammons Trucking, now being assigned hearing October 2, 1973 (1 day), will be held in the U.S. Customs Court Room 1057, 909 First Avenue, Seattle, Washington.

MC 99284 Sub 6, Sullivan's Motor Delivery, Inc., now being assigned continued hearings October 15, 1973 (3 days), at Chicago, Illinois, October 18, 1973 (2 days), at Milwaukee, Wisconsin, in hearing rooms to be later designated.

MC-C-8048, Forlow Travel Bureau, Inc. v. Mrs. Leland (Romine) Hostetler And Mrs. Hugh (Orpha) Easterday, D.B.A. Wana-Go Club, Et Al., now assigned September 25, 1973, at Chicago, Ill., is postponed indefinitely.

MC-56679 Sub 66, Brown Transport Corp., now being assigned hearing December 3, 1973 (2 weeks), at Jacksonville, Fla., in a hearing room to be later designated.

MC-136230, Interstate Warehousing Corporation, now being assigned hearing December 3, 1973 (2 weeks), at Jacksonville, Fla., in a hearing room to be later designated.

MC-136155 Sub 2, Gay Trucking Co., Inc., now being assigned hearing December 3, 1973 (2 weeks), at Jacksonville, Fla., in a hearing room to be later designated.

MC-136285 Sub 3, Southern Intermodal Logistics, Inc., now being assigned hearing December 3, 1973 (2 weeks), at Jacksonville, Fla., in a hearing room to be later designated.

MC 107496 Sub 827, Ruan Transport Corp., MC 108449 Sub 334, Indianhead Truck Line, Inc., MC 124078 Sub 510, Schwerman Trucking Co., and MC 124813 Sub 96, Umthun Trucking Co., now being assigned continued hearing October 23, 1973 (3 days), at Chicago, Ill., in a hearing room to be later designated.

MC 71459 Sub 31, O.N.C. Freight Systems, now being assigned continued hearing October 9, 1973, at Salt Lake City, Utah, in a hearing room to be later designated.

MC 66121 Sub 28, IndianBow Truck Lines, Ltd., now being assigned hearing October 29, 1973 (1 wk.), at New York, N.Y., in a hearing room to be later designated.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.73-19174 Filed 9-7-73;8:45 am]

### FOURTH SECTION APPLICATIONS FOR RELIEF

SEPTEMBER 5, 1973.

An application as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 42740—*Boards or Sheets to Paducah, Kentucky.* Filed by Southwestern Freight Bureau, Agent (No. B-433), for interested rail carriers. Rates on boards or sheets, in carloads, as described in the application, from points in southwestern territory, to Paducah, Kentucky.

Grounds for relief—Rate relationship.

Tariff—Supplement 37 to Southwestern Freight Bureau, Agent, tariff SW/W-2006-J, I.C.C. No. 5056. Rates are published to become effective on October 2, 1973.

FSA No. 42741—*Ethylene to Philadelphia, Pa.* Filed by Southwestern Freight Bureau, Agent (No. B-436), for interested rail carriers. Rates on ethylene, in tank-car loads, as described in the application, from specified points in Texas, to Philadelphia, Pa.

Grounds for relief—Market competition.

Tariff—Supplement 24 to Southwestern Freight Bureau, Agent, tariff 12-H, I.C.C. No. 5043. Rates are published to become effective on October 2, 1973.

FSA No. 42742—*Grain to Chicago, Illinois.* Filed by Louisville and Nashville Railroad Company (No. 2), for interested rail carriers. Rates on grain, viz: barley, corn, oats, rye, and wheat, in box cars, as described in the application, from L&N RR stations Monon through Dyer, Indiana, to Chicago, Illinois.

Grounds for relief—Motor-truck competition.

Tariff—Louisville and Nashville Railroad Company tariff 520, I.C.C. No. 48 (Monon Series). Rates are published to become effective on October 3, 1973.

FSA No. 42743—*Compressed Gases (Sulphur Dioxide) from Tacoma, Washington.* Filed by Trans-Continental Freight Bureau, Agent (No. 485), for interested rail carriers. Rates on gases, compressed, viz: Sulphur Dioxide, in tank-car loads, as described in the application, from Tacoma, Washington, to Leeds, S.C., and Le Moyne, Alabama.

Grounds for relief—Water competition.

Tariff—Supplement 59 to Trans-Continental Freight Bureau, Agent, tariff 2-K, I.C.C. No. 1852. Rates are published to become effective on October 5, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.73-19172 Filed 9-7-73;8:45 am]

[Notice 120]

### MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 31, 1973.

The following are notices of filing of application, except as otherwise specifi-

V38-174
SEP 10 73
XUM

cally noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application. for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2900 (Sub-No. 244 TA), filed August 22, 1973. Applicant: RYDER TRUCK LINES, INC., Mlg.: P.O. Box 2408, Off.: 2050 Kings Road, Jacksonville, Fla. 32203. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except commodities in bulk, household goods as defined by the Commission, and commodities requiring special equipment), (1)(a) between Memphis, Tenn., and Fort Worth, Tex.; from Memphis over U.S. Highway 70 to Little Rock, Ark., thence over U.S. Highway 67 to Dallas, Tex., and thence over U.S. Highway 80 to Fort Worth, Tex., serving Dallas, Tex., as an intermediate point; and (b) between Memphis, Tenn., and Fort Worth, Tex.; from Memphis over Interstate Highway 40 to its junction with Interstate Highway 30, thence over Interstate Highway 30 to its junction with Interstate Highway 20, and thence over Interstate Highway 20 (and the Dallas-Fort Worth Turnpike) to Fort Worth, Tex., serving Dallas, Tex., as an intermediate point; (2)(a) between Shreveport, La., and Fort Worth, Tex.; from Shreveport over U.S. Highway 80 to Fort Worth, Tex., serving Dallas, Tex., as an intermediate point; and (b) between Shreveport, La., and Fort Worth, Tex.; from Shreveport over Interstate Highway 20 (and the Dallas-Fort Worth Turnpike) to Fort Worth, Tex., serving Dallas, Tex., as an intermediate point; (3)(a) between Houston, Tex. and Fort Worth, Tex.; from Houston over U.S. Highway 75 to Dallas, Tex., thence over U.S. Highway 80 to Fort Worth, Tex., serving Dallas, Tex., as an intermediate point; and (b) between Houston, Tex., and Fort Worth, Tex.; from Houston over Interstate Highway 45 to Dallas, Tex., thence over Interstate Highway 20 (and the Dallas-Fort Worth Turnpike) to Fort Worth, Tex., serving Dallas, Tex., as an intermediate zones) Addison, Aledo, Alvarado, Allen, Arlington, Azle, Balch Springs, Bedford, Benbrook, Blue Mound, Boyd, Briar Oaks, Bristol, Britton, Burleson, Carrollton, Carswell A.F.B., Cedar Hill, Chisholm, Cleburne, Cockrell Hill, Colleyville, Copeville, Coppell, Crandall, Cresson, Crowley, Dalworthington Gardens, DeSoto, Duncanville, Egan, Edgecliff Village, Euless, Everman, Fate, Falt, Farmers Branch, Ferris, Flower Mound, Forest Hills, Forney, Frisco, Garland, Godley, Grand Prairie, Grapevine, Halton City, Haslet, Heath, Hebron, Hickory Creek, Highland Park, Highland Village, Hurst, Hutchins, Irving, Joshua, Justin, Keene, Keller, Kennedale, Kleburg, Lake Dallas, Lake Worth Village, Lancaster, Lavon, Lawrence, Lewisville, Lillian, Lisbon, Mansfield, McKinney, Mesquite, Midlothian, Murphy, Nevada, Newark, North Richmond Hills, Ovilla, Palmer, Pantego, Parker, Plano, Princeton, Prosper, Red Oak, Renner, Rhome, Richardson, Richland Hills, River Oaks, Roanoke, Rockwall, Rowlett, Royse City, Sachse, Saginaw, Sansom Park, Seagoville, Smithfield, South Lake, Springtown, Terrell, Trumbull, Venus, Watauga, Waxahachie, Weatherford, Westlake, Westover Hills, Westworth Village, White Settlement, Wilmer, and Wylie, for 180 days.

RESTRICTIONS: Restricted against the transportation of traffic moving between Fort Worth and Dallas, Tex., and all points listed in (4) above, on the one hand, and, on the other, all points in Texas which the applicant is presently authorized to serve when: (a) such traffic is moving locally; or (b) such traffic has been interlined to applicant at a point in Texas it is presently authorized to serve and is destined to Fort Worth, Tex., or a point listed in (4) above, or (c) such traffic has been interlined to applicant at Fort Worth, Dallas, or a point listed in (4) above, and is destined to a point in Texas, applicant is presently authorized to serve. SUPPORTING SHIPPERS: There are approximately 587 statements of support attached to the application, which may be examined here at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. ## Fiscal Service

■

## REGULATIONS GOVERNING UNITED STATES SAVINGS BONDS

V 38-174 SEP 10 73 XUM

Title 31—Money and Finance: Treasury

CHAPTER II—FISCAL SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER B—BUREAU OF THE PUBLIC DEBT

# PART 315—REGULATIONS GOVERNING UNITED STATES SAVINGS BONDS

The regulations in 31 CFR, Part 315 have been revised and amended for the purpose of incorporating in a single, updated document all prior amendments thereof, as well as all relevant changes heretofore made in the offering circulars for Series E and Series H savings bonds (31 CFR, Parts 316 and 332, respectively).

Notice and public procedures are unnecessary and are dispensed with as the fiscal policy of the United States is involved and as the revision is largely declaratory of revisions and amendments of the offering circulars heretofore published in the FEDERAL REGISTER. The changes were effected under authority of section 22 of the Second Liberty Bond Act, as amended, 49 Stat. 21, as amended (31 U.S.C. 757c); section 8 of the Act of July 8, 1937, as amended, 50 Stat. 481, as amended (31 U.S.C. 738a); and 5 U.S.C. 301.

Dated September 5, 1973.

[SEAL] DAVID MOSSO,
*Deputy Fiscal Assistant Secretary.*

Department of the Treasury Circular No. 530, Ninth Revision, dated December 23, 1964, as amended (31 CFR, Part 315), is hereby further amended and issued as the Tenth Revision, effective September 5, 1973.

**Subpart A—General Information**

Sec.
315.0 Applicability of regulations.
315.1 Official agencies.
315.2 Definition of words and terms as used in these regulations.

**Subpart B—Registration**

315.5 General.
315.6 Restrictions on registration.
315.7 Authorized forms of registration.
315.8 Unauthorized registration.

**Subpart C—Limitation on Holdings**

315.10 Amounts which may be held.
315.11 Computation of amount.
315.12 Disposition of excess.

**Subpart D—Limitations on Transfer or Pledge**

315.15 Limitation on transfer or pledge.
315.16 Pledge under Department Circulars No. 154 and Public Debt Series No. 4–67.

315.20 General.
315.21 Payment to judgment creditors.
315.22 Payment or reissue pursuant to judgment.
315.23 Evidence necessary.

**Subpart F—Relief for Loss, Theft, Destruction, Mutilation, Defacement, or Nonreceipt of Bonds**

315.25 After receipt by owner or his representative.
315.26 Procedure to be followed.
315.27 Nonreceipt of bond.
315.28 Recovery or receipt of bond reported lost, stolen, destroyed or not received.

**Subpart G—Interest**

Sec.
315.30 General.
315.31 Series E bonds.
315.32 Series H bonds.

**Subpart H—General Provisions for Payment and Redemption**

315.35 Payment or redemption.
315.36 Withdrawal of request for redemption.
315.37 Requests for payment.
315.38 Presentation and surrender.
315.39 Partial redemption.
315.40 Nonreceipt or loss of check issued in payment.

**Subpart I—Certifying Officers**

315.42 Persons who may certify.
315.43 General instructions to certifying officers.
315.44 Interested person not to certify.

**Subpart J—Reissue and Denominational Exchange**

315.45 General.
315.46 Requests for reissue.
315.47 Effective date.
315.48 Correction of errors.
315.49 Change of name.

**Subpart K—Minors, Incompetents, Aged Persons, Absentees, Etc.**

315.50 Payment to representative of estate.
315.51 Payment to minors.
315.52 Payment to a parent or other person on behalf of a minor.
315.53 Payment or reinvestment upon request of voluntary guardian or incompetent.
315.54 Reissue.

**Subpart L—Natural Person as Sole Owner**

315.55 Payment.
315.56 Reissue for certain purposes.

**Subpart M—Two Natural Persons as Coowners**

315.60 Payment during the lives of both coowners.
315.61 Reissue during the lives of both coowners.
315.62 After the death of one or both coowners.
315.63 Upon death of both coowners in a common disaster, etc.

**Subpart N—Two Natural Persons as Owner and Beneficiary**

315.65 Payment during the lifetime of the registered owner.
315.66 Reissue during the lifetime of the registered owner.
315.67 After the death of the registered owner.

**Subpart O—Deceased Owners**

315.70 General.
315.71 Special provisions applicable to small amounts of savings bonds, interest checks, or redemption checks.
315.72 Estates administered.
315.73 Estates not administered.

**Subpart P—Fiduciaries**

315.75 Payment.
315.76 Reissue.
315.77 Requests for reissue or payment prior to maturity or extended maturity.
315.78 Requests for payment at or after maturity.

**Subpart Q—Private Organizations (Corporations, Associations, Partnerships, Etc.) and Governmental Agencies, Units and Officers**

315.80 Payment to corporations or unincorporated associations.
315.81 Payment to partnerships.
315.82 Reissue or payment to successors of corporations, unincorporated associations, or partnerships.
315.83 Reissue or payment on dissolution of corporation or partnership.
315.84 Payment to institutions (churches, hospitals, homes, schools, etc.).
315.85 Reissue in name of trustee or agent for reinvestment purposes.
315.86 Reissue upon termination of investment agency.
315.87 Payment to governmental agencies and units.
315.88 Payment to government officers.

**Subpart R—Miscellaneous Provisions**

315.90 Waiver of regulations.
315.91 Additional requirements; bond of indemnity; social security numbers.
315.92 Preservations of rights.
315.93 Supplementa, amendments, or revisions.

AUTHORITY.—Sec. 22 of the Second Liberty Bond Act, as amended, 49 Stat. 21, as amended (31 U.S.C. 757c); sec. 8 of the Act of July 8, 1937, as amended, 50 Stat. 481, as amended (31 U.S.C. 738a); and (5 U.S.C. 301).

## Subpart A—General Information

### § 315.0 Applicability of regulations.

These regulations apply to all United States Savings Bonds of whatever series designation, bearing any issue dates whatever, to the extent specified herein and in the offering circulars governing such bonds. The provisions of these regulations with respect to bonds registered in the names of certain classes of individuals, fiduciaries, and organizations are equally applicable to bonds to which such individuals, fiduciaries, and organizations are otherwise shown to be entitled under these regulations. United States Savings Notes, issued under authority of sections 18 and 20 of the Second Liberty Bond Act, as amended (31 U.S.C. 753 and 754b), and offered in Department Circular, Public Debt Series No. 3–67 (31 CFR, Part 342), are also governed by these regulations, subject to the provisions of the offering circular. The term "savings bonds" or "bonds," as used in these regulations, refers to United States Savings Bonds and, as applicable, to United States Savings Notes. The provisions of Department Circular No. 300, current revision (31 CFR, Part 306), have no application to the securities governed by these regulations.

### § 315.1 Official agencies.

The Bureau of the Public Debt of the Department of the Treasury is charged with matters relating to savings bonds. Correspondence concerning transactions after original issue and requests for appropriate forms should be addressed to (a) the Federal Reserve Bank or Branch of the District in which the correspondent is located, or (b) the Bureau of the Public Debt, 536 South Clark Street, Chicago, Illinois 60605, or (c) the Office of the Treasurer of the United States, Securities Division, Washington, D.C. 20222, except where specific instructions are otherwise given in these regulations. Notices or documents not filed in accordance with instructions in these regulations will not be recognized. The addresses of the Federal Reserve Banks and Branches are:

Federal Reserve Bank of Boston, Boston, Massachusetts 02106.
Federal Reserve Bank of New York, New York, New York 10045. Buffalo Branch, Buffalo, New York 14240.
Federal Reserve Bank of Philadelphia, Philadelphia, Pennsylvania 19101.
Federal Reserve Bank of Cleveland, Cleveland, Ohio 44101. Cincinnati Branch, Cincinnati, Ohio 45201. Pittsburgh Branch, Pittsburgh, Pennsylvania 15230.
Federal Reserve Bank of Richmond, Richmond, Virginia 23261. Baltimore Branch, Baltimore, Maryland 21203.
Charlotte Branch, Charlotte, North Carolina 28201.
Federal Reserve Bank of Atlanta, Atlanta, Georgia 30303.
Birmingham Branch, Birmingham, Alabama 35202.
Jacksonville Branch, Jacksonville, Florida 32203.
Nashville Branch, Nashville, Tennessee 37203.
New Orleans Branch, New Orleans, Louisiana 70160.

### § 315.2 Definition of words and terms as used in these regulations.

(a) "Authorized issuing agent" means an incorporated bank, trust company, savings bank, savings and loan association, other organization, or agency of the United States, qualified as an issuing agent under the provisions of Department Circular, Public Debt Series No. 4–67 (31 CFR, Part 317).

(b) "Authorized paying agent" means an incorporated bank, trust company, savings bank, savings and loan association, or other financial institution qualified as a paying agent under the provisions of Department Circular No. 750, current revision (31 CFR, Part 321).

(c) "Court" means a court having jurisdiction over the parties and subject matter.

(d) "Extended maturity date" is the date on which a bond will mature and cease to bear interest under applicable extended maturity provisions.

(e) "Extended maturity period"[1] means any period after original during which the owner may retain the bonds and continue to earn interest on the maturity value or extended maturity value under applicable extended maturity provisions of the circular offering such bonds for sale.

(f) "Extended maturity value" is the value of a bond at the end of the applicable extended maturity period.

(g) "Face amount" of a bond refers to the value of the bond as shown on the face thereof.

(h) "Incompetent" refers to a person under any legal disability except minority.

(i) "Maturity date" means the date on which the bond will mature by the terms of the circular offering it for sale without regard to any extended maturity period.

(j) "Payment" and "redemption" are used interchangeably, unless otherwise indicated. They refer to payment of a bond in accordance with these regulations.

(k) "Personal trust estate" means a trust estate established by natural persons in their own right for the benefit of themselves or other natural persons in whole or in part, and common trust funds comprised in whole or in part of such trust estates.

(l) "Presented and surrendered" and "presentation and surrender" mean the actual receipt of a bond, with an appropriate request for the particular transaction, by the Chicago, Parkersburg, or Washington Office of the Bureau of the Public Debt, the Office of the Treasurer of the United States, Securities Division, or a Federal Reserve Bank or Branch, or, if the transaction is one which an authorized paying agent may handle, receipt by such authorized paying agent.

(m) "Representative of the estate of a minor, incompetent, aged person, absentee, etc.," means a guardian, conservator, or similar representative appointed by a court or otherwise legally qualified, regardless of the title by which designated. These terms do not refer to a voluntary guardian recognized under § 315.53, to a natural guardian, such as a parent, including a parent to whom custody of a child has been awarded through divorce proceedings or a parent by adoption, or to the executor or administrator of the estate of a decedent.

(n) "Reissue" means the cancellation and retirement of a bond and issue of a new bond or bonds of the same series, amount (face amount) (or the remainder thereof in case of partial redemption), and issue date.

(o) "Social security number" means an individual's social security account number or an employer identification number. An individual's number is composed of nine digits separated by two hyphens, for example, 123–45–6789; the employer identification number is composed of nine digits separated by one hyphen, for example, 12–3456789. The hyphens are an essential part of the numbers and must be included.

[1] See Appendices to current revisions of Department Circulars No. 653 and No. 905 (31 CFR, Parts 316 and 332) concerning extensions and investment yields for Series E and Series H bonds, respectively. See Department Circular, Public Debt Series No. 3–67, Revised, as amended (31 CFR, Part 342), concerning the extension and investment yields for savings notes (Freedom Shares).

## Subpart B—Registration

### § 315.5 General.

Savings bonds are issued only in registered form. The registration used on issue or reissue must express the actual ownership of an interest in the bond and, except as otherwise specifically provided in Subpart E and § 315.48 will be considered as conclusive of such ownership and interest. No designation of an attorney, agent, or other representative to request or receive payment on behalf of the owner or a coowner, or any restriction on the right of the owner or a coowner to receive payment of the bond or interest, except as provided in these regulations, may be made in the registration or otherwise. Registrations requested in applications for purchase or requests for reissue should be clear, accurate, and complete, conform with one of the forms set forth in this subpart, and include the social security number of the owner or first-named coowner.[2] However, if bonds are purchased as gifts, awards, prizes, or the like, and the social security number of the intended owner is not known, the purchaser's number must be furnished. In this event, the issuing agent will inscribe the word "GIFT" and the purchaser's number on the bond. Bonds so inscribed will not be associated with the purchaser's own holdings. The registration of all bonds owned by the same person, organization, or fiduciary should be uniform with respect to the name of the owner and, in the case of a fiduciary, the description of the fiduciary capacity. A natural person should be designated by the name by which he is ordinarily known or the one under which he does business, including preferably at least one full given name. The name of a natural person may be preceded by any applicable title, such as "Dr." or "Rev.," or followed by "M.D.," "D.D.," or other similar designation. "Sr." or "Jr.," or a similar suffix, should be included when ordinarily used or when necessary to distinguish the owner from a member of his family. If a woman is named as either second coowner or beneficiary, either the courtesy title "Miss" or "Mrs.," or her social security number must be furnished. A married woman's own given name, not that of her husband, must be used, for example, "Mrs. Mary A. Jones,"

[2] Effective October 1, 1973. Issuing agents desiring to issue bonds in the names of entities described in § 315.7 (c) (9) and (e), should obtain instructions from the Bureau of the Public Debt, Washington, D.C. 20226.

V 38-174
SEP 10 73
XUM

NOT "Mrs. Frank B. Jones." The address should include, where appropriate, the number and street, route, or any other local feature, and the Zip Code.

**§ 315.6 Restrictions on registration.**

(a) *Residence.*—Registration of bonds is restricted on original issue, but not on authorized reissue, to persons (whether natural persons or others) who are:

(1) Residents of the United States, its territories and possessions, the Commonwealth of Puerto Rico, and the Canal Zone;

(2) Citizens of the United States temporarily residing abroad; and

(3) Civilian employees of the United States or members of its Armed Forces, regardless of their residence or citizenship.

Except to the extent otherwise provided in these regulations, only a natural person may be designated as coowner or beneficiary with a natural person of any of the above classes, whether on original issue or reissue. Also, registration is not permitted in any form which includes the name of any alien who is resident of any area with respect to which the Treasury Department restricts or regulates the delivery of checks drawn against funds of the United States or any agency or instrumentality thereof.[3]

(b) *Minority.*[4]—(1) Bonds purchased by another person with funds belonging to a minor must be registered in the name of the minor without a coowner or beneficiary. Bonds purchased by a representative of a minor's estate must be registered in the name of the minor and include in the registration an appropriate reference to the guardianship estate. Bonds purchased by a representative of the estates of two or more minors, even though appointed in a single proceeding, must be registered in the name of each minor separately, with appropriate reference to his guardianship estate.

(2) Bonds purchased with funds not belonging to a minor may be registered to name the minor as owner, coowner or beneficiary. In this case, if the minor's estate is under legal guardianship, the registration should include an appropriate reference to the guardianship estate.

(3) Bonds purchased as a gift to a minor under a gifts-to-minors statute in effect in the State in which either the donor or the minor resides may be registered as provided in the applicable statute, with a parenthetical reference to the statute if it is not clearly identified by the registration. A coowner or beneficiary may not be named.

(4) Registration of bonds in the name of a natural guardian for a minor is not authorized.

(5) A minor may name a coowner or beneficiary on bonds he purchases with his wages, earnings, or other funds belonging to him and under his control.

(c) *Incompetency.*[4]—Bonds may be purchased to name as owner, coowner or beneficiary an incompetent for whose estate a guardian or similar representative has been appointed,[5] except that a coowner or beneficiary may not be named on bonds purchased with funds belonging to the incompetent. The registration must include appropriate reference to the guardianship or similar fiduciary estate.

**§ 315.7 Authorized forms of registration.**

Subject to any limitations or restrictions contained in these regulations on the right of any person to be named as owner, coowner, or beneficiary, bonds may be registered in the following forms:

(a) *Natural persons.*—In the names of natural persons in their own right, but only in one of the forms authorized by this paragraph:

(1) *Single ownership form.*—Example:

John A. Jones 123-45-6789.

(2) *Coownership form—two natural persons (only).*—In the alternative as coowners. Examples:

John A. Jones 123-45-6789 or Mrs. Ella S. Jones. Ella S. Jones 987-65-4321 or John A. Jones. No other form of registration establishing coownership is authorized.

(3) *Beneficiary form—two natural persons (only).*—Examples:

John A. Jones 123-45-6789 payable on death to Miss Iola S. Jones. John A. Jones 123-45-6789 P.O.D. Ella S. Jones 987-65-4321.

"Payable on death to" may be abbreviated to "P.O.D.", as indicated in the last example, or "POD". The first-named natural person is hereinafter referred to as the owner and the second-named natural person as the beneficiary.

(b) *Fiduciaries (including legal guardians or similar representatives, certain custodians, executors, administrators and trustees).*—(1) *General.*—A bond may be registered in the name of any person or persons or any organization, public or private, acting as fiduciary of a single duly constituted fiduciary estate, but not where the fiduciary would hold the bond merely or principally as security for the performance of a duty, obligation or service. A coowner or beneficiary may not be named in the registration except under the applicable provisions of § 315.6 (b) and (c). A common trust fund established and maintained according to law by a financial institution duly authorized to act as a fiduciary will be considered as a single duly constituted fiduciary estate within the meaning of these regulations. Registration must conform to a form authorized by this paragraph.

(2) *Guardians, conservators, similar representatives, certain custodians.*—A bond may be registered in the name and title or capacity of the legally appointed, designated or authorized representative of the estate of a minor, incompetent, aged person, absentee, etc., or in the name of such individual, followed by an appropriate reference to the estate and showing the nature of the disability or referring to the applicable statute. A coowner or beneficiary may be named only in accordance with the applicable provisions of § 315.6(b) and (c). Examples:

Tenth National Bank, guardian (or conservator, trustee, etc.) of the estate of George M. Brown 123-45-6789, a minor (or an incompetent, aged person, infirm person, or absentee).

George M. Brown 123-45-6789, a minor (or an incompetent, aged person, infirm person, or absentee) under legal guardianship (or conservatorship or trusteeship, etc.) of James F. Jones.

John R. White 123-45-6789, an adult under conservatorship of Henry C. Smith pursuant to Sec. 572, 1963 Iowa Probate Code.

James F. Green 123-45-6789, a minor (or an incompetent) under custodianship by designation of the Veterans Administration.

Frank M. Redd 123-45-6789, an incompetent for whom Eric A. Redd has been designated trustee by the Department of the Army pursuant to 37 U.S.C. 351-354.

Arnold A. Ames, as custodian for Barry B. Bryan 123-45-6789, under the California Uniform Gifts of Securities to Minors Act.

Thomas J. Reed, as custodian for Lawrence W. Reed 123-45-6789, a minor, under the laws of Georgia (Ch. 48-3, Code of Ga. Ann.).

Richard A. Roe 123-45-6789, for whom Reva L. Roe is representative payee for social security benefits (or black lung benefits, as the case may be). (If the beneficiary is a minor, the words "a minor," should appear immediately after the social security number.)

Henry L. Green 123-45-6789 or Tenth National Bank, guardian of the estate of George M. Brown, a minor.

Henry L. Green 123-45-6789 P.O.D. George M. Brown, a minor under legal guardianship of Tenth National Bank.

(3) *Executors and administrators.*—A bond may be registered in the name of the representative or representatives appointed by a court or otherwise legally qualified to act for the estate of a decedent, or in the name of an executor authorized to administer a trust under the terms of a will although he is not named as trustee. The names and capacities of all the representatives, as shown in their letters of appointment, must be included in the registration and be followed by an adequate identifying reference to the estate. Examples:

John H. Smith and Calvin N. Jones, executors of the will (or administrators of the estate) of Robert J. Smith, deceased 12-3456789.

John H. Smith, executor of the will of Robert J. Smith, deceased, in trust for Mrs. Jane L. Smith, with remainder over 12-3456789.

(4) *Trustees or life tenants under wills, deeds of trust, agreements or similar instrument.*—A bond may be registered in the name and title of the trustee (or trustees) of a duly constituted trust estate, or in the name of a life tenant, followed by an adequate identifying reference to the authority governing the trust or life tenancy. Examples:

Thomas J. White and Tenth National Bank, trustees under the will of Robert J. Smith, deceased 12-3456789.

[3] See Department Circular No. 655, current revision (31 CFR, Part 211).

[4] See examples of forms of registration under § 315.7(b)(2).

[5] Bonds should not be registered in the name of an incompetent unless there is a representative for his estate, except as provided in § 315.53.

Mrs. Jane M. Black, life tenant under the will of Robert J. Black, deceased 12-3456789.

Tenth National Bank, trusteee under agreement with Paul E. White, dated 2/1/55 12-3456789.

Carl A. Black and Henry B. Green, trustees under agreement with Paul E. White, dated 2/1/55 12-3456789.

If the trust instrument designates by title only an officer of a board or an organization as trustee, only the title of the officer should be used. Example:

Chairman, Board of Trustees, First Church of Christ, Scientist, of Chicago, Ill., in trust under the will of Robert J. Smith, deceased 12-3456789.

The names of all trustees, in the form used in the trust instrument, must be included in the registration, except as follows:

(i) If there are several trustees designated as a board or authorized to act as a unit, their names may be omitted and the words "Board of Trustees" substituted for the word "trustees." Example:

Board of Trustees of Immediate Relief Trust of Federal Aid Association, under trust indenture dated 2/1/55 12-3456789.

(ii) If the trustees do not constitute a board and are not authorized to act as a unit, and are too numerous to be designated in the registration by names and title, some or all of the names may be omitted. Examples:

John A. Smith, Henry B. Jones, et al., trustees under the will of Edwin O. Mann, deceased 12-3456789.

Trustees under the will of Edwin A. Mann, deceased 12-3456789.

(5) *Pension, retirement or similar funds, or eligible employees' savings or savings and vacation plans.*—A bond may be registered in the name and title, or title alone, of the trustee or trustees of a pension, retirement or similar fund, or an eligible employees' savings or savings and vacation plan. If the instrument creating the trust provides that the trustees shall serve for a limited term, their names may be omitted. Examples:

Tenth National Bank, trustee of pension fund of Safety Manufacturing Co., U/A with said company dated March 31, 1949 12-3456789.

Trustees of Retirement Fund of Safety Manufacturing Co., under directors' resolution adopted 3/31/49 12-3456789.

County Trust Company, trustee of the Employees' Savings Plan of Jones Co., Inc., U/A dated 1/17/59, 12-3456789.

Trustee of the Employees' Savings Plan of Brown Bros., Inc., U/A dated January 20, 1964, 12-3456789.

(6) *Funds of lodges, churches, societies, or similar organizations.*—A bond may be registered in the titles of the trustees, or a board of trustees, holding funds in trust for a lodge, church, society, or similar organization, whether or not incorporated. Examples:

Trustees of the First Baptist Church, Akron, Ohio, acting as a Board under Sec. 15 of its by-laws 12-3456789.

Trustees of Jamestown Lodge No. 1,000, Benevolent and Protective Order of Elks, under Sec. 10 of its by-laws 12-3456789.

Board of Trustees of the Lotus Club, Washington, Ind., under Art. 10 of its constitution 12-3456789.

(7) *Investment agents for religious, educational, charitable or nonprofit organizations.*—A bond may be registered in the name of a bank, trust company, or other financial institution, or an individual, as agent under an agreement with a religious, educational, charitable, or nonprofit organization, whether or not incorporated, if the agent holds funds for the sole purpose of investing and reinvesting them and paying the income to the organization. The name and designation of the agent must be followed by an adequate identifying reference to the agreement. Examples:

Tenth National Bank, fiscal agent under agreement with The Evangelical Lutheran Church of the Holy Trinity, dated 12/28/49, 12-3456789.

Sixth Trust Co., investment agent U/A dated September 16, 1962, with Central City Post, Department of Illinois, American Legion 12-3456789.

John Jones, investment agent U/A dated 9/16/62, with Central City Post, Dept. of Ill., American Legion 12-3456789.

(8) *Funds of school groups or activities.*—A bond may be registered in the title of the principal or other officer of a public, private, or parochial school holding funds in trust for a student body fund or for a class, group, or activity. If the amount purchased for any one fund does not exceed $500 (face amount), no reference need be made to a trust instrument. Examples:

Principal, Western High School, in trust for Class of 1955 Library Fund 12-3456789.

Director of Athletics, Western High School, in trust for Student Activities Association, under resolution adopted 5/12/55 12-3456789.

(9) *Public corporations, bodies, or officers as trustees.*—A bond may be registered in the name of a public corporation or a public body, or in the title of a public officer, acting as trustee under express authority of law, followed by an appropriate reference to the statute creating the trust. Examples:

Rhode Island Investment Commission, trustee of the General Sinking Fund under Ch. 35, Gen. Laws of R.I.

Superintendent of the Austin State Hospital Annex, in trust for the Benefit Fund under Sec. 3183(c), Vernon's Civil Stats. of Texas Anno.

(c) *Private organizations (corporations, associations, partnerships).*—(1) *General.*—A bond may be registered in the name of any private organization in its own right, except that of a commercial bank, which is defined for this purpose as one accepting demand deposits. The full legal name of the organization, as set forth in its charter, articles of incorporation, constitution, partnership agreement, or other authority from which its powers are derived, must be included in the registration and may be followed, if desired, by a parenthetical reference to a particular account other than a trust account, in accordance with the rules and examples authorized by this paragraph.

(2) *Corporations.*—A bond may be registered in the name of a business, fraternal, religious, or other private corporation. The words "a corporation" must be included in the registration unless the fact of incorporation is shown in the name. Examples:

Smith Manufacturing Co., a corporation 12-3456789.

Green & Redd, Inc. 12-3456789 (Depreciation Acct.).

(3) *Unincorporated associations.*—A bond may be registered in the name of a club, lodge, society, or similar self-governing association which is not incorporated. The words "an unincorporated association" must be included in the registration. This form of registration must not be used for a trust fund, a board of trustees, a partnership, a business conducted under a trade name or a sole proprietorship. If the association is chartered by or affiliated with a parent organization, the name or designation of the subordinate or local organization must be given first, followed by the name of the parent organization. The name of the parent organization may be placed in parentheses and, if well known, may be abbreviated. Examples:

The Lotus Club, an unincorporated association 12-3456789.

Local 447, Brotherhood of Railroad Trainmen, an unincorporated association 12-3456789.

Eureka Lodge No. 317 (A.F. & A.M.), an unincorporated association 12-3456789.

(4) *Partnerships.*—A bond may be registered in the name of a partnership, which will be considered as an entity. The words "a partnership" must be included in the registration. Examples:

Smith & Jones, a partnership 12-3456789.

Acme Novelty Co., a partnership 12-3456789.

(d) *Institutions (churches, hospitals, homes, schools, etc.).*—A bond may be registered in the name of a church, hospital, home, school, or similar institution conducted by a private organization or by private trustees, regardless of the manner in which it is organized or governed or title to its property is held. Descriptive words such as "a corporation" or "an unincorporated association" must not be included in the registration. Examples:

Shriners' Hospital for Crippled Children, St. Louis, Mo., 12-3456789.

St. Mary's Roman Catholic Church, Albany, N.Y., 12-3456789.

Rodeph Shalom Sunday School, Philadelphia, Pa., 12-3456789.

(e) *States, public bodies and corporations and public officers.*[3]—A bond may be registered in the name of a State, county, city, town, village, school district or other political entity, public body or corporation established by law (including a board, commission, administration, authority or agency) which is the owner or official custodian of public funds, other than trust funds, or in the full legal title of the public officer having custody of the funds. Examples:

V 38 I 174 SEP 10 73 XUM

State of Maine.
Town of Rye, N.Y. (Street Improvement Fund).
Maryland State Highway Administration.
Treasurer, City of Chicago.

(f) *Treasurer of the United States as coowner or beneficiary.*—A person who desires to have a bond become the property of the United States upon his death may designate the Treasurer of the United States as coowner or beneficiary. Examples:

George T. Jones 123-45-6789 or the Treasurer of the United States of America.
George T. Jones 123-45-6789 P.O.D. the Treasurer of the United States of America.

**§ 315.8 Unauthorized registration.**

A savings bond inscribed in a form not substantially in agreement with one of those authorized by this subpart will not be considered as validly issued. However, if the form of registration was not authorized under the regulations in effect at the time of issuance but is authorized under regulations in effect at the time the bond is presented for payment or reissue, it will be considered as having been validly issued from the date of original issue.

## Subpart C—Limitation on Holdings

**§ 315.10 Amounts which may be held.**

The amounts of savings bonds of Series E and H, issued in any one calendar year, which may be held by any one person at any one time, computed in accordance with the provisions of § 315.11, are limited as follows:

(a) *Series E*—(1) *General annual limitations.*

| Bonds issued: | Limit |
|---|---|
| May 1941 through December 1947 | $5,000 (face amount) |
| January 1948 through December 1951 | 10,000 (face amount) |
| January 1952 through April 1957 | 20,000 (face amount) |
| May 1957 through December 1965 | 10,000 (face amount) |
| (A person holding $10,000 (face amount) or more purchased between January 1, 1957, and April 30, 1957, was not entitled to additional holdings during the remainder of 1957.) | |
| January 1966 through November 1969 | 20,000 (face amount) |
| December 1, 1969, and thereafter | 5,000 (issue price) |
| (A person holding $5,000 (issue price) or more purchased between January 1, 1969, and November 30, 1969, was not entitled to additional holdings during the remainder of 1969. $5,000 (issue price) will purchase $6,650 (face amount).) | |

(2) *Special limitation.*—Trustees of an employees' savings plan (as defined in Department Circular No. 653, current revision, 31 CFR, Part 316) and trustees of an eligible savings and vacation plan may purchase $2,000 (face amount) multiplied by the highest number of employees participating in the plan at any time during the calendar year in which the bonds are issued.

(b) *Series H*—(1) *General annual limitations.*

| Bonds issued: | Limit |
|---|---|
| June 1952 through April 1957 | $20,000 (face amount) |
| May 1957 through December 1961 | 10,000 (face amount) |
| (A person holding $10,000 (face amount) or more purchased between January 1, 1957, and April 30, 1957, was not entitled to additional holdings during the remainder of 1957.) | |
| January 1962 through December 1965 | 20,000 (face amount) |
| January 1966 through November 1969 | 30,000 (face amount) |
| December 1, 1969, and thereafter | 5,000 (face amount) |
| (A person holding $5,000 (face amount) or more purchased between January 1, 1969, and November 30, 1969, was not entitled to additional holdings during the remainder of 1969). | |

(2) *Special limitation.* $200,000 (face amount) for the calendar year 1966 and each calendar year thereafter for bonds received as gifts by an organization which at the time of purchase was an exempt organization under the terms of 26 CFR 1.501(c)(3)-1.

**§ 315.11 Computation of amount.**

(a) *Definition of "person".*—The term "person" for purposes of this section shall mean any legal entity and shall include but not be limited to natural persons, corporations (public or private), partnerships, unincorporated associations, and trust estates. The holdings of each person individually and his holdings in any fiduciary capacity authorized by these regulations, such as, for example, his holdings as a guardian of the estate of a minor, as a life tenant, or as trustee under a will or deed of trust, shall be computed separately. A pension or retirement fund or an investment, insurance, annuity or similar fund or trust will be regarded as an entity regardless of the number of beneficiaries or the manner in which their respective interests are established or determined. Segregation of individual shares as a matter of bookkeeping or as a result of individual agreements with beneficiaries or the express designation of individual shares as separate trusts will not serve to constitute them separate "persons" for purposes of this section.

(b) *Bonds that must be included in computation.*—Except as provided in paragraph (c) of this section, there must be taken into account in computing the holdings of each person:

(1) All bonds registered in the name of that person alone;

(2) All bonds registered in the name of the representative of the estate of that person;

(3) All bonds originally registered in the name of that person as coowner or reissued at the request of the original owner to add the name of that person as coowner or to designate him as coowner instead of as beneficiary. However, the amount of bonds of Series E and H held in coownership form may be applied to the holdings of either of the coowners or apportioned between them.

(c) *Bonds that may be excluded from computation.*—There need not be taken into account:

(1) Bonds on which that person is named beneficiary;

(2) Bonds in which his interest is only that of a beneficiary under a trust;

(3) Bonds to which he has become entitled under Sec. 315.67 as surviving beneficiary upon the death of the registered owner, as an heir or legatee of the deceased owner, or by virtue of the termination of a trust or the happening of any other event;

(4) Bonds of Series E purchased with the proceeds of matured bonds of Series A, C-1938, and D, where such matured bonds were presented for that purpose;

(5) Bonds of Series E bearing issue dates from May 1, 1941, to December 1, 1945, inclusive, held by individuals in their own right which are not more than $5,000 (face amount) in excess of the prescribed limit;

(6) Bonds of Series E or H reissued under Sec. 315.61(a);

(7) Bonds of Series E or H reissued in the name of a trustee of a personal trust estate which did not represent excess holdings prior to such reissue;

(8) Bonds of Series E or H purchased with the proceeds of bonds of Series F, G, J, or K, at or after maturity, where such matured bonds had been presented for that purpose;

(9) Bonds of Series H issued in exchange for bonds of Series E, F, or J, and savings notes under the provisions of Department Circular No. 1036 (31 CFR, Part 339) as in effect at the time of the exchange.

**§ 315.12 Disposition of excess.**

If any person at any time acquires savings bonds issued during any one calendar year in excess of the prescribed amount, instructions should be obtained from the Bureau of the Public Debt for appropriate adjustment of the excess.

For good cause found the Secretary of the Treasury may permit excess holdings to stand in any particular case or class of cases.

## Subpart D—Limitations on Transfer or Pledge

**§ 315.15 Limitation on transfer or pledge.**

Savings bonds are not transferable and are payable only to the owners named thereon, except as specifically provided in these regulations, and then only in the manner and to the extent so provided. A savings bond may not be hypothecated, pledged as collateral, or used as security for the performance of an obligation, except as provided in Sec. 315.16.

**§ 315.16 Pledge under Department Circulars No. 154 and Public Debt Series No. 4-67.**

A bond may be pledged by the registered owner in lieu of surety under the provisions of Department Circular No. 154, current revision (31 CFR, Part 225), if the bond approving officer is the Secretary of the Treasury. In this case an irrevocable power of attorney shall be executed authorizing the Secretary of the Treasury to request payment. A bond may also be deposited as security with a Federal Reserve Bank under the provisions of Department Circular, Public Debt Series No. 4-67, current revision (31 CFR, Part 317).

## Subpart E—Limitation on Judicial Proceedings—No Stoppage or Caveats Permitted

**§ 315.20 General.**

(a) No judicial determination will be recognized which would give effect to an attempted voluntary transfer inter vivos of a bond, whether between persons designated thereon, or otherwise, or which would defeat or impair the rights of survivorship conferred by these regulations upon a surviving coowner or beneficiary, and all other provisions of this subpart are subject to this restriction. Otherwise, a claim against an owner or coowner of a savings bond and conflicting claims as to ownership of, or interest in, such bond as between coowners or between the registered owner and beneficiary will be recognized when established by valid judical proceedings, upon presentation and surrender of the bond, but only as specifically provided in this subpart.[6]

(b) Neither the Treasury Department nor any agency for the issue, reissue, or redemption of savings bonds will accept notices of adverse claims or of pending judicial proceedings or undertake to protect the interests of litigants who do not have possession of the bonds.

**§ 315.21 Payment to judgment creditors.**

(a) *Creditors.*—Payment (but not reissue) of a savings bond registered in single ownership, coownership, or beneficiary form will be made to the purchaser at a sale under a levy or to the officer authorized to levy upon the property of the registered owner or coowner under appropriate process to satisfy a money judgment. Payment will be made to such purchaser or officer only to the extent necessary to satisfy the judgment and will be limited to the redemption value current sixty days after the termination of judicial proceedings. Payment of a bond registered in coownership form pursuant to a judgment or levy against only one of the coowners will be limited to the extent of that coowner's interest in the bond. This interest may be established by an agreement between the coowner or by a judgment, decree, or order of court entered in a proceeding to which both coowners are parties.

(b) *Trustees in bankruptcy and receivers.*—Payment of a savings bond will be made to a trustee in bankruptcy, a receiver of an insolvent's estate, a receiver in equity, or a similar officer of the court, under the applicable provisions of paragraph (a) of this section, except that payment will be made at the redemption value current on the date of payment.

**§ 315.22 Payment or reissue pursuant to judgment.**

(a) *Divorce.*—A decree of divorce ratifying or confirming a property settlement agreement or otherwise settling the respective interests of the parties in a bond will not be regarded as a proceeding giving effect to an attempted voluntary transfer under the provisions of § 315.20. Accordingly, reissue of a savings bond may be made to eliminate the name of one spouse as owner, coowner, or beneficiary, or to substitute the name of one spouse for that of the other as owner, coowner, or beneficiary pursuant to such a decree. However, if the bond is registered in the name of one of the spouses with another person as coowner, there must be submitted either a request for reissue by such person or a certified copy of a judgment, decree, or order entered in a proceeding to which such other person and the spouse whose name is to be eliminated are parties determining the extent of the interest of that spouse in the bond and reissue will be permitted only to the extent of the spouse's interest. The evidence required under § 315.23 must be submitted in any case. Where the decree of divorce does not set out the terms of the property settlement agreement, a certified copy of the agreement must also be submitted. Payment rather than reissue will be made if requested.

(b) *Gifts causa mortis.*—A bond belonging solely to one person will be paid or reissued on the request of the person found by a court to be entitled thereto by reason of a gift causa mortis by the sole owner.

(c) *Date for determining rights.*—For the purpose of determining whether or not reissue shall be made under this section pursuant to judicial proceedings, the rights of all parties involved shall be those existing under these regulations at the time of the entry of the final judgment, decree, or order.

**§ 315.23 Evidence necessary.**

To establish the validity of judicial proceedings, there must be submitted certified copies of a final judgment, decree, or order of court and of any necessary supplementary proceedings. If the judgment, decree, or order of court was rendered more than six months prior to the presentation of the bond, there must also be submitted a certificate from the clerk of the court, under its seal, dated within six months of the presentation of the bond showing that the judgment, decree, or order of court is in full force. A request for payment by a trustee in bankruptcy must be supported by duly certified evidence of his appointment and qualification. A request for payment by a receiver of an insolvent's estate must be supported by a copy of the order appointing him, certified by the clerk of the court, under its seal, as being in full force on a date not more than six months prior to the date of the presentation of the bond. A request for payment by a receiver in equity or a similar officer of the court, other than a receiver of an insolvent's estate, must be supported by a copy of an order authorizing him to present the bond for redemption, certified by the clerk of the court, under its seal, as being in full force on a date not more than six months prior to the presentation of the bond.

## Subpart F—Relief for Loss, Theft, Destruction, Mutilation, Defacement, or Nonreceipt of Bonds

**§ 315.25 After receipt by owner or his representative.**

Relief, either by the issue of a substitute bond or by payment, is authorized for the loss, theft, destruction, mutilation, or defacement of a bond after receipt by the owner or his representative. As a condition for granting relief, the Secretary of the Treasury may require a bond of indemnity, in such form and with such surety as may be deemed necessary to protect the interests of the United States of America. In all cases the bond must be identified and the applicant must submit satisfactory evidence of loss, theft, or destruction, or a satisfactory explanation of the mutilation, or defacement.

**§ 315.26 Procedure to be followed.**

(a) Immediate notice of the facts concerning the loss, theft, destruction, mutilation, or defacement of a bond, together with its complete description (series, year, and month of issue, serial number, name and address of the registered owner or coowners), and the appropriate social security number, should be furnished to the Bureau of the Public Debt, P.O. Box 509, Parkersburg, West Virginia 26101. Defaced bonds and all available fragments of mutilated bonds in any form whatsoever should be submitted. That office will furnish the proper application form and instructions. The application must be made by the person or persons (including both coowners, if living), authorized under these regulations to request payment of the bond, except as follows:

(1) If the bond is in beneficiary form and the owner and beneficiary are both

[6] Title to a savings bond claimed by a finder or a purchaser will not be recognized.

V 38-174 SEP 10 73 XUM

living, both ordinarily will be required to join in the application.

(2) If a minor named on a bond as owner, coowner, or beneficiary is not of sufficient competency and understanding to request payment, both parents ordinarily will be required to join in the application.

### § 315.27 Nonreceipt of bond.

If a bond, on original issue or on reissue, is not received from the issuing agent by the registered owner or other person to whom delivery of the bond was directed, the issuing agent should be notified as promptly as possible and given all information available about the transaction. The agent will then obtain appropriate instructions and a form for applying for relief. Following approval of the application, relief will be granted by the issuance of a bond bearing the same issue date as the bond which was not received.

### § 315.28 Recovery or receipt of bond reported lost, stolen, destroyed or not received.

If a bond reported lost, stolen, destroyed, or not received, is recovered or received before relief is granted, the Bureau of the Public Debt should be notified promptly. A bond which is recovered after relief therefor has been granted belongs to the United States and shall be promptly surrendered for cancellation.

## Subpart G—Interest

### § 315.30 General.

The only savings bonds currently on sale are (a) Series E bonds, which are appreciation bonds issued at a discount and redeemable before final maturity at increasing redemption values; and (b) Series H bonds, which are current-income bonds issued at par (face amount), paying interest semiannually to maturity, or extended maturity, where authorized. Series H bonds are redeemable at par at any time after six months from issue date. Series E bonds, and Series H bonds having extended maturity periods, continue to earn interest when held to their final maturity dates.[1] Savings notes, the sale of which terminated at the close of business on June 30, 1970, have been extended for ten years.

### § 315.31 Series E bonds.

For the first six months from issue date, a Series E bond is redeemable only at purchase price. Thereafter, its redemption value increases at the beginning of each successive half-year period and at maturity, and at the beginning of each successive half-year period, and at final maturity.[1] The increment in value (interest) on a Series E bond is payable only on its redemption.

### § 315.32 Series H bonds.

(a) *Interest.*—Interest on a Series H bond is paid semiannually by check, beginning six months from issue date. Interest will cease at maturity or extended maturity for bonds having extended maturity periods, or if redeemed before maturity or extended maturity,[1] at the end of the interest period next preceding the date of redemption. However, if the date of redemption falls on an interest payment date, interest will cease on that date. For example, if a bond on which interest is payable on January 1 and July 1 is redeemed on September 1, interest will cease on the preceding July 1, and no adjustment of interest will be made for the period from July 1 to September 1. The same rules apply in case of partial redemption with respect to the amount redeemed.

(b) *Method of interest payments.*—Interest due on a Series H bond will be paid on each interest payment date by check drawn to the order of the person or persons in whose names the bond is inscribed, in the same form as their names appear in the inscription on the bond, and mailed to the address of record (that given for the delivery of interest checks in the application for purchase or the request for reissue or, if no instruction is given as to the delivery of interest checks, the address given for the owner or the first-named coowner), except that:

(1) In the case of a bond registered in the form "A payable on death to B" the check will be drawn to the order of "A" alone until the Bureau of the Public Debt receives notice of A's death. At that time the payment of interest will be suspended until the bond is presented for payment or reissue. Interest so withheld will be paid to the person entitled to the bond.

(2) Upon receipt of notice of the death of the coowner to whom interest is being mailed, payment of interest will be suspended until a request for change of address is received from the other coowner, if living, or, if not, until satisfactory evidence is submitted as to who is authorized to endorse and collect such checks on behalf of the estate of the last deceased coowner in accordance with the provisions of Subpart O.

(3) Upon receipt of notice of the death of the owner of a bond, payment of interest on the bond will be suspended until satisfactory evidence is submitted as to who is authorized to endorse and collect such checks on behalf of the estate of the decedent, in accordance with the provisions of Subpart O.

(4) Whenever practicable the accounts for all Series H bonds with the same inscription, on which interest is payable on the same dates, will be consolidated and a single check will be issued on each interest payment date for interest on all such bonds. The check inscription may vary from the inscriptions on the bonds in cases of very long inscriptions or where there is lack of uniformity in the inscriptions on the bonds.

(c) *Notices affecting delivery of interest checks.*—Notices affecting the delivery of interest checks on Series H bonds, including changes in addresses, should be sent to the Bureau of the Public Debt, 536 South Clark Street, Chicago, Illinois 60605. Each bond should be described in the notice by issue date (including year of issue), serial number, series, inscription appearing on the face of the bond, and the social security number furnished. Bonds should not be submitted. The notice must be signed by the owner or a coowner, or in the case of a minor or incompetent, as provided in (d) or (e) of this section. If the notice is not received at least one month before an interest payment date, no assurance can be given that action can be taken in time to make the change, or suspend the mailing of the interest due on that date.

(d) *Representative appointed for the estate of a minor, incompetent, absentee, etc.*—Interest on Series H bonds will be paid, in accordance with the provisions of § 315.50, to the representative appointed for the estate of an owner who is a minor, incompetent, absentee, etc. If the registration of the bonds does not include reference to the owner's status, the bonds should be submitted for reissue to the Bureau of the Public Debt, at the address shown in paragraph (c) of this section, or to a Federal Reserve Bank so that interest checks may be properly drawn and delivered. They must be accompanied by the proof of appointment required by § 315.50.

(e) *Adult incompetent's estate having no representative.*—If an adult owner of a Series H bond is incompetent to endorse and collect the interest checks and no legal guardian or similar representative has been appointed to act for him, the relative responsible for his care and support, or some other appropriate person, may apply to the Bureau of the Public Debt for recognition as voluntary guardian for the purpose of receiving, endorsing, and collecting the checks. Form PD 2513 should be used in making application for this purpose.

(f) *Reissue during interest period.*—Physical reissue of a Series H bond will be made as soon as practicable without regard to interest payment dates. If a bond is reissued between interest payment dates, interest for the entire period will ordinarily be paid on the next interest payment date by check drawn to the order of the person in whose name the bond is reissued. However, if reissue is made during a month preceding an interest payment date, the interest due on the first day of the next month may in some cases be paid to the former owner or the representative of his estate.

(g) *Endorsement of checks.*—Interest checks may be collected upon the endorsement of the payee or his authorized representative in accordance with the regulations governing the endorsement and payment of Government warrants and checks, which are contained in Department Circular No. 21, current revision (31 CFR, Part 360). A form for the appointment of an attorney in fact for this purpose may be obtained from the Office of the Treasurer of the United States or from any Federal Reserve Bank. If the owner is incompetent or deceased and no legal representative of his estate has been or will be appointed, the Bureau of the Public Debt (see (c) of this section for address), or a Federal Reserve Bank will furnish instructions upon request.

(h) *Nonreceipt or loss of check.*—If an interest check is not received or is lost after receipt, the Bureau of the Public Debt should be notified of the facts and given information concerning the amount, number, inscription of the bonds, and social security number, as well as a description of the check, if possible.

## Subpart H—General Provision for Payment and Redemption

### § 315.35 Payment or redemption.

(a) *General.*—Payment of a savings bond will be made to the person or persons entitled thereto under the provisions of these regulations, except that checks in payment will not be delivered to addresses in areas with respect to which the Department of the Treasury restricts or regulates the delivery of checks drawn against funds of the United States or any agency or instrumentality thereof.[2] Payment will be made without regard to any notice of adverse claims to a bond and no stoppage or caveat against payment of the bond will be entered. Pursuant to its terms, a savings bond may not be called for redemption by the Secretary of the Treasury prior to maturity, or the end of any authorized extension period. However, a bond may be redeemed in whole or in part at the option of the owner prior thereto, under the terms and conditions set forth in the offering circular for each series and in acordance with the provisions of these regulations. On or after the maturity date, or the final extended maturity date, the bond will be paid at the maturity value or the extended maturity value fixed by the terms of the circular and in no greater amount.

(b) *Series E.*—A Series E bond will be redeemed at any time after two months from issue date at the appropriate redemption value shown in the revision of Department Circular No. 653 current at the time of redemption.

(c) *Series H.*—A Series H bond will be redeemed at par after six months from issue date. However, a bond received for redemption during the calendar month preceding an interest payment date will not be redeemed until that date. On or after the maturity date, or the final extended maturity date, a bond presented for redemption will be paid at par.

### § 315.36 Withdrawal of request for redemption.

An owner or a coowner who has presented and surrendered a bond to the Department of the Treasury or a Federal Reserve Bank or Branch or to an authorized paying agent with an appropriate request for payment may withdraw such request if notice of intent to withdraw is given to and received by the same agency to which the bond was presented for payment prior to the issuance of a check in payment or prior to payment by the authorized paying agent. Such request may be withdrawn under the same conditions by the executor or administrator of the estate of a deceased owner or by the person or persons who would have been entitled to the bond under Subpart O, or by the legal representative of the estate of a person under legal disability, unless presentation and surrender of the bond have cut off rights of survivorship under the provisions of Subpart M or Subpart N.

### § 315.37 Requests for payment.

(a) *Form and execution of requests.*—A request for payment of a bond must be executed on the form appearing on the back of the bond unless (1) the bond is accepted by an authorized paying agent for payment or for presentation to a Federal Reserve Bank for payment without the owner's signature to the request for payment under the provisions of Department Circular No. 888, current revision (31 CFR, Part 330), or (2) authority is given for the execution of a separate or detached request.

(b) *Date of request.*—Ordinarily, requests executed more than six months before the date of receipt of a bond for payment will not be accepted; nor will a bond ordinarily be accepted for redemption more than three calendar months prior to the date redemption is requested under these regulations.

(c) *Identification and signature.*—Unless the bond is presented under provisions of paragraph (a) of this section or paragraph (b) of § 315.38, the owner or a coowner whose name is inscribed on the bond, or other persons entitled to payment under the provisions of these regulations, must appear before and establish his identity to an officer authorized to certify requests for payment (see Subpart I), and in the presence of such officer sign the request for payment in ink, adding in the space provided the address to which the check issued in payment is to be mailed. A signature by mark (X) must be witnessed by at least one disinterested person in addition to the certifying officer and must be attested by endorsement in the blank space, substantially as follows: "Witness to signature by mark" followed by the signature and address of the witness. If the name of the owner, coowner or other person entitled to payment, as it appears in the registration or in evidence on file in the Bureau of the Public Debt, has been changed by marriage or in any other legal manner, the signature to the request for payment must show both names and the manner in which the change was made, for example, "Mrs. Mary T. Jones Smith (Mrs. Mary T. J. Smith or Mrs. Mary T. Smith) changed by marriage from Miss Mary T. Jones," or "John R. Young, changed by order of court from Hans R. Jung." (See Sec. 315.49.) No request signed in behalf of the owner, a coowner or person entitled to payment by an agent or a person acting under a power of attorney will be recognized by the Department of the Treasury, except when the bond has been pledged in lieu of surety under Department Circular No. 154, current revision (31 CFR, Part 225), as provided in § 315.16.

(d) *Certification of request.*—After the request for payment has been signed by the owner, the certifying officer should complete and sign the certificate thereunder and the bond should then be presented and surrendered as provided in Sec. 315.38(a).

### § 315.38 Presentation and surrender.

(a) *All series.*—Except for cases coming within the provisions of paragraph (b) of this section, after the request for payment has been duly signed by the owner and certified as provided in Subpart I, the bond should be presented and surrendered to (1) a Federal Reserve Bank or Branch, (2) the Bureau of the Public Debt, or (3) the Office of the Treasurer of the United States, Securities Division. Usually, payment will be expedited by surrender to a Federal Reserve Bank or Branch. In all cases presentation will be at the expense and risk of the owner. Payment will be made by check drawn to the order of the registered owner or other person entitled and mailed to the address given in the request for payment or, if no address is given, to the address shown in instructions accompanying the bond.

(b) *Optional procedure for bonds of Series A to E, inclusive, in the names of individual owners or coowners only.* A natural person whose name is inscribed on the face of a bond of Series A, B, C, D, or E, either as owner or coowner in his own right, may present such bond for redemption to an authorized paying agent. If such a person is not known to the paying agent, he must establish his identity to the agent. (See § 315.43.) Such owner or coowner must sign the request for payment, and add his home or business address. Even though the request for payment may have been signed, or signed and certified, before presentation of the bond, the representative of the paying agent must be satisfied that the person presenting the bond for payment is the owner or coowner and may require him to sign the request for payment again. If the bond is in order for payment, the paying agent will make immediate payment at the appropriate redemption value without charge to the owner or co-

[1] See Appendices to current revisions of Department Circulars No. 653 and No. 905 (31 CFR Parts 316 and 332) concerning extensions and investment yields for Series E and Series H bonds, respectively. See Department Circular, Public Debt Series No. 3–67, Revised, as amended (31 CFR Part 342), concerning the extension and investment yields for savings notes (Freedom Shares).

V 38-174 SEP 10 73 XUM

owner. This procedure is not applicable to partial redemption cases, or deceased owner cases, or other cases in which documentary evidence is required.

**§ 315.39 Partial redemption.**

A bond of any series may be redeemed in part at current redemption value, but only in amounts corresponding to authorized denominations, upon presentation and surrender of the bond in accordance with § 315.38(a). In any case in which partial redemption is authorized, before the request for payment is signed, the phrase "to the extent of $_____ (face amount) and reissue of the remainder" should be added to the first sentence of the request. Upon partial redemption of the bond, the remainder will be reissued as of the original issue date, as provided in Subpart J. For payment of interest on Series H bonds in case of partial redemption, see Subpart G of this part.

**§ 315.40 Nonreceipt or loss of check issued in payment.**

In case a check in payment of a bond surrendered for redemption is not received within a reasonable time, or the check is lost after receipt, notice should be given to the same agency to which the bond was surrendered for payment, accompanied by a description of the bond by series, denomination, serial number, registration, and social security number. The notice should state whether or not the check was received and should give the date upon which the bond was surrendered for payment.

## Subpart I—Certifying Officers

**§ 315.42 Persons who may certify.**

The following persons are authorized to act as certifying officers for the purpose of certifying requests for payment and forms with respect to bonds:

(a) *At United States post offices.*—Any postmaster, officer-in-charge or other post office official or clerk designated for that purpose. One or more of these officials will be found at every United States post office, classified branch, or station. A post office official or clerk, other than a postmaster or officer-in-charge, should certify in the name of the postmaster or officer-in-charge, followed by his own signature and official title, for example, "John Doe, postmaster, by Richard Roe, his designee." Signatures of these officers should be authenticated by a legible imprint of the post office dating stamp.

(b) *At banks, trust companies and member organizations of the Federal Home Loan Bank System.*—Any officer of any bank or trust company incorporated in the United States, its territories or possessions, or the Commonwealth of Puerto Rico, any Federal Savings and Loan Association or other organization which is a member of the Federal Home Loan Bank System, or a domestic or foreign branch of any such institution; any officer of a Federal Reserve Bank, Federal Land Bank, or Federal Home Loan Bank; any employee of any such institution expressly authorized by it for that purpose, who must sign over the title "Designated Employee"; and Federal Reserve Agents and Assistant Agents located at the several Federal Reserve Banks. Certifications by any of these officers or designated employees must be authenticated by either a legible impression of the corporate seal of the institution or, in the case of organizations which are authorized issuing agents for bonds of Series E, by a legible imprint of the issuing agent's dating stamp.

(c) *Issuing agents not banks or trust companies.*—Any officer of a corporation not a bank or trust company and of any other organization which is an authorized issuing agent for bonds of Series E. All certifications by such officers must be authenticated by a legible imprint of the issuing agent's dating stamp.

(d) *Commissioned and warrant officers of Armed Forces.*—Commissioned and warrant officers of any of the Armed Forces of the United States, but only for members and the families of members of their respective services and civilian employees at Posts or Bases or Stations. Such certifying officer should indicate his rank and state that the person signing the request is one of the class whose request he is authorized to certify.

(e) *United States officials.*—Judges, clerks, and deputy clerks of United States courts, including United States courts for the territories, possessions, the Commonwealth of Puerto Rico, and the Canal Zone; United States Commissioners; United States Attorneys; United States Collectors of Customs and their deputies; Regional Commissioners, District Directors, Service Center Directors, and Internal Revenue agents, Internal Revenue Service; the officer in charge of any home, hospital, or other facility of the Veterans Administration, but only for patients and employees of such facilities; certain officers of Federal penal institutions designated for that purpose by the Secretary of the Treasury; certain officers of the United States Public Health Service Hospitals at Lexington, Kentucky, and Carville, Louisiana, designated for that purpose by the Secretary of the Treasury (in each case, however, only for patients or employees of the institution involved).

(f) *Officers authorized in particular localities.*—Certain designated officers in the Department of the Treasury; the Governor and Treasurer of Puerto Rico; the Governor and Commissioner of Finance of the Virgin Islands; the Governor and Director of Finance of Guam; the Governor and Director of Administrative Services of American Samoa; the Governor, paymaster, or acting paymaster and collector or acting collector of the Panama Canal; and postmasters and acting postmasters of the Bureau of Posts of the Canal Zone.

(g) *In foreign countries.*—In a foreign country requests for payment may be signed in the presence of and be certified by any United States diplomatic or consular representative, or the manager or other officer of a foreign branch of a bank or trust company incorporated in the United States whose signature is attested by an impression of the corporate seal or is certified to the Department of the Treasury. If such an officer is not available, requests for payment may be signed in the presence of and be certified by a notary or other officer authorized to administer oaths, but his official character and jurisdiction should be certified by a United States diplomatic or consular officer under seal of his office.

(h) *Special provisions.*—In the event no officer authorized to certify requests for payment of bonds is readily accessible, the Commissioner of the Public Debt, a designated official of the Bureau of the Public Debt, the Treasurer of the United States, or any Federal Reserve Bank or Branch is authorized to make special provision for any particular case.

**§ 315.43 General instructions to certifying officers.**

A certifying officer should require that a person presenting bonds, or forms with respect thereto, establish his identity by positive and reliable evidence before the bonds or forms are signed, unless the presenter is personally well known to the officer. Such officer and, if he is an officer or employee of an organization, the organization, will be held fully responsible for the adequacy of the identification. The certifying officer should place an adequate notation on the back of the bond or form, or on a separate record, showing exactly how identification was established. The certifying officer must affix to the certification his official signature, title, seal or dating stamp, address (if not shown in the seal or stamp), and the date of execution. Officers of the Public Health Service Hospitals, Veterans Administration Facilities and Federal penal institutions should use the seal of the particular institution or service, where such seal is available. A certifying officer, other than a post office official, officer of a bank or trust company, or officer of an issuing agent, who does not possess an official seal, should add a statement to that effect to his certification.

**§ 315.44 Interested person not to certify.**

A certifying officer may not certify a request for payment of a bond, or a form with respect to a bond, in which he has or is acquiring an interest, either in his own right or in a representative capacity.

## Subpart J—Reissue and Denominational Exchange

**§ 315.45 General.**

Reissue of a bond may be made only under the conditions specified in these regulations. Reissue is not authorized solely for the purpose of effecting an exchange as between authorized denominations, but in the case of authorized re-issue the new bond or bonds may be issued in any authorized denomination or denominations.

Reissue will not be made if the request therefor is received less than one full calendar month before the final maturity date of a bond. Such request, however, will be effective to establish

ownership as though the requested reissue had been made.

(a) A request for reissue of a bond received on or after its final maturity date will not be effective to name a coowner or beneficiary or to promote a beneficiary to a coowner, but requests for reissue in the names of persons who have become entitled by operation of law will be recognized as establishing the right of those persons to receive payment. Reissues under the provisions of this subpart may be made only at (1) a Federal Reserve Bank or Branch, (2) the Bureau of the Public Debt, or (3) the Office of the Treasurer of the United States, Securities Division.

**§ 315.46 Requests for reissue.**

A request for reissue should be made on the prescribed form by the person authorized under these regulations to make such request. Appropriate forms may be obtained from any Federal Reserve Bank, the Office of the Treasurer of the United States, Securities Division, or the Bureau of the Public Debt.

**§ 315.47 Effective date.**

In any case of authorized reissue, the Department of the Treasury will treat the receipt by (a) a Federal Reserve Bank or Branch, or (b) the Bureau of the Public Debt, or (c) the Office of the Treasurer of the United States, Securities Division, of a bond and an appropriate request for reissue thereof as determining the date upon which the reissue is effective. If the owner or either coowner of a bond dies after he has presented and surrendered the bond for authorized reissue, the bond will be regarded as though reissued in the decedent's lifetime.

**§ 315.48 Correction of errors.**

Reissue of a bond may be made to correct an error in the original issue, upon appropriate request supported by satisfactory proof of the error.

**§ 315.49 Change of name.**

An owner, coowner, or beneficiary whose name is changed by marriage, divorce, annulment, order of court, or in any other legal manner after the issue of a bond should submit the bond with a request on Form PD 4000 for reissue to substitute the new name for the name inscribed on the bond. The signature to the request for reissue should show the new name, the manner in which the change was made and the former name. Documentary evidence, properly certified, may be required in any appropriate case.

## Subpart K—Minors, Incompetents, Aged Persons, Absentees, Etc.

**§ 315.50 Payment to representative of estate.**

(a) If the registration of a bond shows the name of the representative of the estate of the owner or a coowner who is a minor, an incompetent, aged person, absentee, etc., the representative may obtain payment of the bond without submitting evidence of his representative capacity. In the event the representative's name is not shown, a certificate, or a certified copy of the letters of appointment, from the court making the appointment, under court seal, or other proof of qualification if not appointed by a court, must be submitted. Except in the case of corporate fiduciaries, such evidence must show that the appointment is in full force and be dated not more than one year prior to presentation of the bond for payment. After the death of the ward, and at any time prior to his discharge, the representative of the estate will be entitled to obtain payment of a bond to which the ward was solely entitled. The request for payment appearing on the back of a bond must be signed by the representative as such, for example, "John S. Jones, guardian (committee) of the estate of Henry W. Smith, a minor (an incompetent)."

(b) If the form of registration does not indicate there is a representative of the estate of a minor owner or coowner, a notice that there is such a representative will not be accepted for the purpose of preventing payment to the minor or to a parent or other person on behalf of the minor, as provided in §§ 315.51 and 315.52.

**§ 315.51 Payment to minors.**

If the owner of a savings bond is a minor and the form of registration does not indicate that there is a representative of his estate, payment will be made to him upon his request, provided he is of sufficient competency to sign his name to the request for payment and to understand the nature of the transaction. In general, the fact that the request for payment has been signed by a minor and duly certified will be accepted as sufficient proof of competency and understanding.

**§ 315.52 Payment to a parent or other person on behalf of a minor.**

If the owner of a savings bond is a minor and the form of registration does not indicate that there is a representative of his estate, and if such minor owner is not of sufficient competency to sign his name to the request for payment and to understand the nature of the transaction, payment will be made to either parent with whom he resides or, if the minor does not reside with either parent, then to the person who furnishes his chief support. His parent or the person furnishing his chief support should execute the request for payment and furnish a certificate, which may be typed or written on the back of the bond, as to his right to act for the minor. If a parent signs the request, the certificate and signature thereto should be in substantially the following form:

> I certify that I am the mother of John C. Jones and the person with whom he resides. He is ____ years of age and is not of sufficient competency and understanding to make this request.
>
> Mrs. Mary Jones on behalf of
> John C. Jones.

If a person other than a parent signs the request, the certificate and signature thereto, including a reference to the person's relationship, if any, to the minor, should be in substantially the following form:

> I certify that John C. Jones does not reside with either parent and that I furnish his chief support. He is ____ years of age and is not of sufficient competency and understanding to make this request.
>
> Mrs. Alice Brown, grandmother,
> on behalf of John C. Jones.

**§ 315.53 Payment or reinvestment upon request of voluntary guardian of incompetent.**

If the adult owner of bonds is incompetent to request and receive payment thereof and no other person is legally qualified to do so, the relative responsible for his care and support or some other person may submit an application seeking recognition as voluntary guardian for the purpose of redeeming the bonds in the following situations:

(a) If the proceeds of the bonds are needed to pay expenses already incurred, or to be incurred during any 90-day period, for the support of the incompetent or his legal dependents;

(b) If the bonds have matured and it is desired to redeem them and reinvest the proceeds in savings bonds. The proceeds of any matured appreciation type bonds ordinarily will be required to be reinvested in Series E bonds. The proceeds of matured current income bonds may be invested in Series H or Series E bonds. The new bonds must be registered in the name of the incompetent followed by words showing he is under voluntary guardianship, for example, "John Jones 123-45-6789 under voluntary guardianship." A living coowner or beneficiary named on the matured bonds must be designated on the new bonds unless he is a competent adult and furnishes a certified statement consenting to omission of his name. If an amount insufficient to purchase an additional bond of any authorized denomination of any series remains after the reinvestment, the voluntary guardian may, if he so desires, furnish additional funds sufficient to purchase another bond of either series in the lowest available denomination. If additional funds are not furnished, the remaining amount will be paid to the voluntary guardian for the use and benefit of the incompetent.

**§ 315.54 Reissue.**

A bond of which a minor or other person under legal disability is the owner or in which he has an interest may be reissued upon an authorized reissue transaction under the following conditions:

(a) A minor of sufficient competency to sign his name to the request and to understand the nature of the transaction may request reissue to add a coowner or beneficiary to a bond registered in his name alone or to which he is entitled in his own right.

(b) A bond on which a minor is named as beneficiary or coowner may be reissued in the name of a custodian for the minor under a statute authorizing gifts to minors upon the request of the adult whose name appears on the bond as owner or coowner.

V 38-174 SEP 10 73 XUM

(c) Except to the extent provided in paragraphs (a) and (b), above, and in paragraph (c) of § 315.61, reissue will be restricted to a form of registration which does not adversely affect the existing ownership or interest of the minor or such other person. Requests for reissue should be executed by the person authorized to request payment under §§ 315.50 and 315.52, or who may request recognition as voluntary guardian under § 315.53, and in the same manner.

### Subpart L—Natural Person as Sole Owner

#### § 314.55 Payment.

A savings bond registered in the name of a natural person in his own right, without a coowner or beneficiary, will be paid to him during his lifetime under Subpart H. Upon the death of the owner such bond will be considered as belonging to his estate and will be paid under Subpart O, except as otherwise provided in these regulations.

#### § 315.56 Reissue for certain purposes.

A savings bond registered in the name of a natural person in his own right may be reissued upon appropriate request by him (subject to the provisions of § 315.54), upon presentation and surrender during his lifetime, for the following purposes:

(a) *Addition of a coowner or beneficiary.*—To name another natural person as coowner or as beneficiary. Form PD 4000 should be used.

(b) *Divorce or annulment.*—To name as registered owner the other party to a divorce or annulment occurring after issue of the bond. Form PD 3360 should be used.

(c) *Certain degrees of relationship.*—To name as registered owner a person related to the owner as set forth in § 315.61(a)(2), with a beneficiary or coowner, if so desired. (Form PD 3360 may be used.)

(d) *Trustees.*—To name the trustee of (1) a personal trust estate created by the owner, or (2) a personal trust estate created by other than the owner provided (i) the owner is a beneficiary of the trust, or (ii) a beneficiary of the trust and the owner are related as set forth in § 315.61 (a)(2). (Form PD 1851 may be used.)

### Subpart M—Two Natural Persons as Coowners

#### § 315.60 Payment during the lives of both coowners.

A savings bond registered in coownership form, for example, "John A. Jones or Mrs. Mary C. Jones," will be paid to either upon his separate request, and upon payment to him the other shall cease to have any interest in the bond. If both request payment jointly, payment will be made by check drawn to their order jointly, for example, "John A. Jones AND Mrs. Mary C. Jones."

#### § 315.61 Reissue during the lives of both coowners.

(a) *General.*—A bond registered in coownership form may be reissued upon its presentation and surrender during the lifetime and competency of both coowners, upon the request of both, under the following conditions:

(1) *Marriage, divorce, or annulment of marriage.*—If one of the coowners marries, or if they are divorced or legally separated from each other, or their marriage to each other is annuled after issue of the bond, the bond may be reissued in the name of either coowner alone, or with another natural person as the new coowner or beneficiary.

(2) *Related coowners.*—If the coowners are related as: husband, wife; parent, child (including child by legal adoption or stepchild); brother, sister (including the half blood, stepbrother, stepsister, or brother or sister through adoption); grandparent, grandchild, great grandparent, great grandchild; uncle, aunt, nephew, niece (including a child of a brother or sister of the present spouse); granduncle, grandaunt, grandnephew, grandniece; father-in-law, mother-in-law, son-in-law, daughter-in-law; brother-in-law, sister-in-law—the bond may be issued in the name of:

(i) Either coowner alone, or with another natural person as the new coowner or beneficiary;

(ii) A third person related to either coowner in any of the foregoing degrees of relationship, with another natural person as coowner or beneficiary, if so desired (Form PD 1938 may be used for any of the above classes.); or

(iii) The trustee of (*a*) a personal trust estate created by either of them, or (*b*) a personal trust estate created by some other person provided (*1*) either coowner is a beneficiary of the trust, or (*2*) a beneficiary of the trust is related to either coowner in any of the foregoing degrees of relationship. (Form PD 1851 may be used.)

(3) A request for reissue to eliminate the name of one coowner may be signed by that coowner only.

(4) The provisions of this section do not apply to bonds on which the Treasurer of the United States is named as coowner.

(b) *Minor coowners.*—A minor coowner for whose estate no representative has been appointed may be promoted to sole owner upon the request of the competent coowner. A competent coowner may, upon his own request have the bond reissued to remove his name and name a custodian for the minor under a statute authorizing gifts to minors. A request for reissue signed by a minor coowner of sufficient competency to sign his name to the request and understand the nature of the transaction, and for whose estate no representative has been appointed, will be recognized if the bond is to be reissued in his name with a new coowner or beneficiary. A request for reissue to eliminate the name of a minor coowner will be recognized only if supported by evidence that a court has ordered the representative of his estate to request such reissue (see § 315.23).

(c) *Incompetent coowners.*—Reissue will not be made if one coowner is incompetent and a representative of the incompetent's estate has not been appointed by a court, except to add "under voluntary guardianship" after his name or to eliminate the other coowner from the registration. If there is a representative, the provisions of paragraph (b) of this section apply as to his execution of a request for reissue.

#### § 315.62 After the death of one or both coowners.

If either coowner dies without the bond having been presented and surrendered for payment or authorized reissue, the survivor will be recognized as the sole and absolute owner. Thereafter, payment or reissue will be made as though the bond were registered in the name of the survivor alone (see Subpart L of this part). However, a request for reissue by him must be supported by proof of death of the other coowner, and if the bond is still outstanding at the death of the survivor, proof of death of both coowners will be required. The presentation and surrender of a bond by one coowner for payment establishes his right to receive the proceeds of the bond, and if he should die before the transaction is completed, payment will be made to the legal representative of, or persons entitled to, his estate in accordance with the provisions of Subpart O. If either coowner dies after the bond has been presented and surrendered for authorized reissue (see § 315.47), the bond will be regarded as though reissued during his lifetime.

#### § 315.63 Upon death of both coowners in a common disaster, etc.

If both coowners die under such conditions that it cannot be established either by presumption of law or otherwise which died first, the bond will be considered as belonging to the estates of both equally, and payment or reissue will be made accordingly. (See Subpart O of this part.)

### Subpart N—Two Natural Persons as Owner and Beneficiary

#### § 315.65 Payment during the lifetime of the registered owner.

A savings bond registered in beneficiary form, for example, "John A. Jones payable on death to Mrs. Mary C. Jones," will be paid to the registered owner during his lifetime upon his properly executed request as though no beneficiary had been named in the registration. The presentation and surrender of the bond by the registered owner for payment establishes his exclusive right to the proceeds of the bond, and if he should die before the transaction is completed, payment will be made to the legal representative of, or the persons entitled to, his estate upon receipt of proof of appointment and qualification of the representative or the identity of the persons entitled, in accordance with the provisions of Subpart O of this part.

#### § 315.66 Reissue during the lifetime of the registered owner.

A savings bond registered in beneficiary form may be reissued upon its presentation and surrender during the lifetime of the registered owner, upon his request, as follows:

(a) To name the beneficiary designated on the bond as coowner. (Form PD 4000 may be used.)

(b) To eliminate his name as owner and to name as owner a custodian for the beneficiary, if a minor, under a statute authorizing gifts to minors. (Form PD 3360 may be used.)

(c) To eliminate the beneficiary, to substitute another natural person as beneficiary, or to name another natural person as coowner. The request of the owner must be supported by the duly certified consent of the beneficiary to elimination of his name, or by proof of his death. (Form PD 4000 may be used.)

(d) To eliminate his name as owner and to name as owner the trustee of (1) a personal trust estate created by the owner, or (2) a personal trust estate created by other than the owner if (i) the owner is a beneficiary of the trust, or (ii) a beneficiary of the trust and the owner are related as set forth in § 315.61 (a)(2). The request of the owner must be supported by the duly certified consent of the beneficiary, or by proof of his death. (Form PD 1851 may be used.)

(e) The provisions of this section do not apply to bonds on which the Treasurer of the United States is named as beneficiary.

#### § 315.67 After the death of the registered owner.

If the registered owner dies without the bond having been presented and surrendered for payment or authorized reissue and is survived by the beneficiary, upon proof of death of the owner the beneficiary will be recognized as the sole and absolute owner, and payment or reissue will be made as though the bond were registered in his name alone. (See Subpart L of this part.)

### Subpart O—Deceased Owners

#### § 315.70 General.

Upon the death of the owner of a savings bond who is not survived by a coowner or designated beneficiary and who had not during his lifetime presented and surrendered the bond for payment or an authorized reissue, the bond will be considered as belonging to his estate and will be paid or reissued accordingly as hereinafter provided, except that reissue under this subpart will not be permitted if otherwise in conflict with these regulations. If the person entitled is an alien who is a resident of an area with respect to which the Department of the Treasury restricts or regulates the delivery of checks drawn against funds of the United States of American or any agency or instrumentality thereof, payment of, and interest on, a bond will not be made so long as the restriction applies.[3] A creditor is entitled only to payment of a bond to the extent of not more than his claim.

[3] See Department Circular No. 655, current revision (31 CFR, Part 211).

#### § 315.71 Special provisions applicable to small amounts of savings bonds, interest checks or redemption checks.

Entitlement to, or the authority to dispose of, a small amount of bonds and checks issued in payment thereof or in payment of interest thereon, belonging to the estate of a decedent, may be established through the use of certain short forms, according to the aggregate face amount of bonds and checks involved (excluding checks representing interest on the bonds), as indicated by the following table:

| Amount | Circumstances | Form | To be executed by— |
|---|---|---|---|
| $100 | No administration | PD 2216 | Person who paid burial expenses. |
| 500 | Estate being administered | PD 2488-1 | Executor or administrator. |
| 500 | Estate settled | PD 2458 | Former executor or administrator, attorney or other qualified person. |

#### § 315.72 Estates administered.

(a) *In course of administration.*—If the estate of a decedent is being administered in court, the bond will be paid to the duly qualified representative of the estate or will be reissued in the names of the persons entitled to share in the estate, upon the request of the representative and compliance with the following requirements:

(1) Where there are two or more legal representatives, all must join in the request for payment or reissue, except as provided in §§ 315.77 and 315.78.

(2) The request for payment or reissue should be signed in the form, for example, "John A. Jones, administrator of the estate (or executor of the will) of Henry W. Jones, deceased," and must be supported by proof of the representative's authority in the form of a court certificate or a certified copy of the representative's letters of appointment. The certificate or the certification to the letters must be under seal of the court and, except in the case of a corporate representative, must contain a statement that the appointment is in full force and should be dated within six months of the date of presentation of the bond, unless the certificate or letters show that the appointment was made within one year immediately prior to such presentation.

(3) In case of reissue the legal representative of the estate should certify that each person in whose name reissue is requested is entitled to the extent specified for each and has consented to such reissue. A request for reissue by the legal representative should be made on Form PD 1455. If a person in whose name reissue is requested desires to name a coowner or beneficiary, such person should execute an additional request for that purpose, using Form PD 4000.

(b) *After settlement through court proceedings.*—If the estate of the decedent has been settled in court, the bond will be paid to, or reissued in the name of, the person entitled thereto as determined by the court. The request for payment or reissue should be made by the person shown to be entitled, supported by a duly certified copy of the representative's final account as approved by the court, decree of distribution, or other pertinent court records, supplemented, if there are two or more persons having an apparent interest in the bond, by an agreement executed by them concerning the disposition of the bond. Form PD 4000 should be used by the person entitled if he wishes to name a coowner or beneficiary.

#### § 315.73 Estates not administered.

(a) *Special provisions under State laws.*—If, under State law, a person has been recognized or appointed to receive or distribute the assets of a decedent's estate without regular administration, his request for payment or reissue of a bond to the person or persons entitled will be accepted provided he submits appropriate evidence of his authority.

(b) *Agreement of persons entitled.*—When it appears that no legal representative of a decedent's estate has been or will be appointed, the bond will be paid to, or reissued in the name of, the person or persons entitled, including those entitled as donees of a gift causa mortis, pursuant to an agreement and request by all persons entitled to share in the decedent's personal estate. A form of agreement for settlement without administration, Form PD 1946–1, should be used for cases in which the total face amount of bonds and redemption and interest checks belonging to the decedent's estate is in excess of $500. If the total face amount does not exceed $500, Form PD 1946 may be used. Should the persons entitled to share in the personal estate include minors or incompetents, payment or reissue of the bonds will not be permitted without administration except to them or in their names, unless their interests are otherwise protected.

### Subpart P—Fiduciaries

#### § 215.75 Payment.

A savings bond registered in the name of a fiduciary or otherwise belonging to a fiduciary estate will be paid to the fiduciary or fiduciaries in accordance with the provisions of Secs. 315.77 and 315.78.

#### § 315.76 Reissue.

(a) *In the name of person entitled—*(1) *Distribution of trust estate in kind.*—A bond to which a beneficiary of a trust estate has become lawfully entitled in his own right or in a fiduciary capacity, in whole or in part, under the terms of a trust instrument, will be reissued in his name to the extent of his interest, upon

V 38 I 174 SEP 10 73 XUM

the trustee's request and its certification that such person is entitled and has agreed to reissue in his name.

(2) *After termination of trust estate.*—If the person who would be lawfully entitled to a bond upon the termination of a trust does not desire to have distribution made to him in kind, as provided in paragraph (a) (1) of this section, the trustee should present the bond for payment before the estate is terminated. If, however, the estate is terminated without payment or reissue having been made, the bond will thereafter be paid to or reissued in the name of the person lawfully entitled upon his request and satisfactory proof of ownership, supplemented, if there are two or more persons having any apparent interest in the bond, by an agreement executed by all such persons concerning the disposition of the bond.

(3) *Upon termination of guardianship estate.*—If the estate of a minor or incompetent or of an absentee is terminated during the ward's lifetime, a bond registered to show that there is a representative of the estate will be reissued in the name of the former ward upon the representative's request and certification that the former ward is entitled and has agreed to reissue in his name (Form PD 1455 should be used), or will be paid to or reissued in the name of the former ward upon his own request, supported in either case by satisfactory evidence that his disability has been removed or that an absentee has returned to claim his property. Certification by the representative that a former minor has attained his majority, that a former incompetent has been legally restored to competency, that a legal disability of a female ward has been removed by marriage, if the state law so provides, or that an absentee has appeared to claim his property, will ordinarily be accepted as sufficient (see § 315.77 if the representative's name is not shown in the registration). Upon the termination of the estate as the result of the death of the ward, a bond registered to show that there is a representative of his estate will be reissued in accordance with the provisions of Subpart O of this part.

(4) *Upon termination of life estate.*—Upon the death of a life tenant, a bond registered in his name as life tenant may be reissued in the name of the person or persons entitled pursuant to an agreement and request of all of the persons having an interest in the remainder.

(b) *In the name of a succeeding fiduciary.*—If a fiduciary in whose name a bond is registered has been succeeded by another, the bond will be reissued in the name of the succeeding fiduciary upon appropriate request and satisfactory evidence of successorship. Form PD 1455 should be used.

(c) *In the name of financial institution as trustee of common trust fund.*—A bond held by a bank, trust company, or other financial institution as a trustee, guardian or similar representative, executor or administrator may be reissued in its name as trustee of its common trust fund to the extent that participation therein by the institution in such capacity is authorized by law or applicable regulations. A request for reissue to the institution as trustee of its common trust fund should be executed on its behalf in the capacity in which the bond is held and by the cofiduciary, if any. Form PD 1455 should be used.

### § 315.77 Requests for reissue or payment prior to maturity or extended maturity.

The following rules apply to both requests for reissue and payment by fiduciaries: A request for reissue or payment prior to maturity, or final extended maturity, as appropriate, must be signed by all acting fiduciaries unless by express statute, decree of court, or the terms of the instrument under which the fiduciaries are acting, one or more of them may properly execute the request. If the fiduciaries named in the registration are still acting, no further evidence of authority will be required. Otherwise, a request must be supported by evidence as specified below:

(a) *Fiduciaries by title only.*—If the bond is registered in the titles, without the names, of fiduciaries not acting as a board, satisfactory evidence of their incumbency must be furnished, except in the case of bonds registered in the title of public officers as trustees.

(b) *Succeeding fiduciaries.*—If the fiduciaries in whose names the bond is registered have been succeeded by other fiduciaries, satisfactory evidence of successorship must be furnished.

(c) *Boards, committees, etc.*—A savings bond registered in the name of a board, committee, commission, or other body, empowered to act as a unit and to hold title to the property of a religious, educational, charitable, or nonprofit organization or public corporation will be paid upon a request for payment signed in the name of the board or other body by an authorized officer or employee thereof. A request so signed and duly certified will ordinarily be accepted without further evidence of the signer's authority. The check in payment of the bond will be drawn in the name of the board or other body as fiduciary for the organization named in the registration or shown by satisfactory evidence to be entitled as successor thereto.

(d) *Corporate fiduciaries.*—If a public or private corporation or a political body, such as a state or county, is acting as a fiduciary, a request must be signed in the name of the corporation or other body, in the fiduciary capacity in which it is acting, by an authorized officer thereof. A request so signed and duly certified will ordinarily be accepted without further evidence of the officer's authority.

(e) *Registration not disclosing trust or other fiduciary estate.*—If the registration of the bond does not show that it belongs to a trust or other fiduciary estate or does not identify the estate to which it belongs, satisfactory evidence of ownership must be furnished in addition to any other evidence required by this section.

### § 315.78 Requests for payment at or after maturity.

A request, signed by any one or more acting fiduciaries, for payment at or after the maturity date, or an extended maturity date for bonds having extended maturity periods, will be accepted. Payment ordinarily will be made by check drawn as the bond is inscribed.

## Subpart Q—Private Organizations (Corporations, Associations, Partnerships, Etc.) and Governmental Agencies, Units and Officers

### § 315.80 Payment to corporations or unincorporated associations.

A savings bond registered in the name of a private corporation or an unincorporated association will be paid to the corporation or unincorporated association upon a request for payment on its behalf by a duly authorized officer thereof. The signature to the request should be in the form, for example, "The Jones Coal Company, a corporation, by John Jones, President," or "The Lotus Club, an unincorporated association, by William A. Smith, Treasurer." A request for payment so signed and duly certified will ordinarily be accepted without further evidence of the officer's authority.

### § 315.81 Payment to partnerships.

A savings bond registered in the name of an existing partnership will be paid upon a request for payment signed by a general partner. The signature to the request should be in the form, for example, "Smith and Jones, a partnership, by John Jones, a general partner." A request for payment so signed and duly certified will ordinarily be accepted as sufficient evidence that the partnership is still in existence and that the person signing the request is duly authorized.

### § 315.82 Reissue or payment to successors of corporations, unincorporated associations, or partnerships.

A savings bond registered in the name of a private corporation, an unincorporated association, or a partnership which has been succeeded by another corporation, unincorporated association, or partnership by operation of law or otherwise, as the result of merger, consolidation, incorporation, reincorporation, conversion, or reorganization, or which has been lawfully succeeded in any manner whereby the business or activities of the original organization are continued without substantial change, will be paid to or reissued in the name of the succeeding organization upon appropriate request on its behalf, supported by satisfactory evidence of successorship. Form PD 1540 should be used.

### § 315.83 Reissue or payment on dissolution of corporation or partnership.

(a) *Corporations.*—A savings bond registered in the name of a private corporation which is in the process of dissolution will be paid to the authorized representative of the corporation upon a duly executed request for payment, supported by satisfactory evidence of the representative's authority. Upon the termination of dissolution proceedings, the bond may be reissued in the names of those persons, other than creditors, entitled to the assets of the corporation, to the extent of their respective interests. Reissue under this subsection will be made upon the duly executed request of the authorized representative of the corporation and upon proof that all statutory provisions governing the dissolution of the corporation have been complied with and that the persons in whose names reissue is requested are entitled and have agreed to the reissue. If the dissolution proceedings are under the direction of a court, a certified copy of an order of the court, showing the authority of the representative to make the distribution requested must be furnished.

(b) *Partnerships.*—A savings bond registered in the name of a partnership which has been dissolved by death or withdrawal of a partner, or in any other manner, will be paid upon a request for payment by any partner or partners authorized by law to act on behalf of the dissolved partnership, or will be paid to or reissued in the names of the persons entitled as the result of such dissolution to the extent of their respective interests, except that reissue will not be made in the names of creditors. The request must be supported by satisfactory evidence of entitlement, including proof that the debts of the partnership have been paid or properly provided for. Form PD 2514 should be used.

### § 315.84 Payment to institutions (churches, hospitals, homes, schools, etc.).

A savings bond registered in the name of a church, hospital, home, school, or similar institution without reference in the registration to the manner in which it is organized or governed or to the manner in which title to its property is held will be paid upon a request for payment signed on behalf of such institution by an authorized representative. For the purpose of this section, a request for payment signed by a pastor of a church, superintendent of a hospital, president of a college, or by any official generally recognized as having authority to conduct the financial affairs of the particular institution will ordinarily be accepted without further proof of his authority. The signature to the request should be in the form, for example, "Shriners' Hospital for Crippled Children, St. Louis, Missouri, by William A. Smith, superintendent," or "St. Mary's Roman Catholic Church, Albany, New York, by Rev. John Jones, pastor."

### § 315.85 Reissue in name of trustee or agent for reinvestment purposes.

A savings bond registered in the name of a religious, educational, charitable or nonprofit organization, whether or not incorporated, may be reissued in the name of a bank, trust company or other financial institution, or an individual, as trustee or agent under an agreement with the organization under which the trustee or agent holds funds of the organization, in whole or in part, for the purpose of investing and reinvesting the principal and paying the income to the organization. Form PD 2177 should be used and should be signed on behalf of the organization by an authorized officer.

### § 315.86 Reissue upon termination of investment agency.

A savings bond registered in the name of a bank, trust company, or other financial institution, or individual, as agent for investment purposes only, under an agreement with religious, educational, charitable, or nonprofit organization, may be reissued in the name of the organization upon termination of the agency. The former agent should request such reissue and should certify that the organization is entitled by reason of the termination of the agency, using Form PD 1455. If such request and certification are not obtainable, the bond will be reissued in the name of the organization upon its own request, supported by satisfactory evidence of the termination of the agency.

### § 315.87 Payment to governmental agencies and units.

A savings bond registered in the name of a state, county, city, town, or village, or in the name of a Federal, State, or local governmental agency, such as a board, commission, or corporation, will be paid upon a request signed in the name of the governmental agency or unit by a duly authorized officer thereof. A request for payment so signed and duly certified will ordinarily be accepted without further proof of the officer's authority.

### § 315.88 Payment to government officers.

A savings bond registered in the official title of an officer of a governmental agency or unit will be paid upon a request for payment signed by the designated officer. The fact that the request for payment is so signed and duly certified will ordinarily be accepted as proof that the person signing is the incumbent of the designated office.

## Subpart R—Miscellaneous Provisions

### § 315.90 Waiver of regulations.

The Secretary of the Treasury reserves the right, in his discretion, to waive or modify any provision or provisions of these regulations in any particular case or class of cases for the convenience of the United States of America or in order to relieve any person or persons of unnecessary hardship, if such action would not be inconsistent with law and would not impair any existing rights, and if he is satisfied that such action would not subject the United States of America to any substantial expense or liability.

### § 315.91 Additional requirements; bond of indemnity; social security numbers.

The Secretary of the Treasury may require (a) such additional evidence as he may consider necessary or advisable, (b) a bond of indemnity, with or without surety, in any case in which he may consider such a bond necessary for the protection of the interests of the United States of America, and (c) that appropriate social security numbers be furnished for reissue or payment of any savings bond.

### § 315.92 Preservation of rights.

Nothing contained in these regulations shall be construed to limit or restrict existing rights which holders of savings bonds heretofore issued may have acquired under the circulars offering the bonds for sale or under the regulations in force at the time of purchase.

### § 315.93 Supplements, amendments, or revisions.

The Secretary of the Treasury may at any time, or from time to time, prescribe additional, supplemental, amendatory, or revised rules and regulations governing United States Savings Bonds.

■

## WATER AND RELATED LAND RESOURCES

Establishment of Principles and Standards for Planning

No. 174—Pt. III——1

V 38-174 SEP 10 73 XUM

## WATER RESOURCES COUNCIL

### PRINCIPLES AND STANDARDS FOR PLANNING WATER AND RELATED LAND RESOURCES

#### Notice of Establishment

1. Notice is hereby given by the Water Resources Council that Principles and Standards for Planning Water and Related Land Resources have been established pursuant to sec. 103 of the Water Resources Planning Act (P.L. 89–80).

2. The full texts of the Principles and Standards are published as a part of this notice.

3. These Principles and Standards are based on several years of effort by the Water Resources Council. After extensive study, review, field testing and public hearings, the Council published on December 21, 1971, "Proposed Principles and Standards for Planning Water and Related Land Resources" (36 FR 24144) along with a draft environmental statement, and invited public comment on the proposal. Extensive views and comments were received through oral statements at the public hearings held on the proposal and through written submission to the Council during the period allowed for comment.

4. After careful consideration of the public response to its proposal, consultation with all concerned Federal agencies, including the Office of Management and Budget, the Council on Environmental Quality, and the Environmental Protection Agency, the Council made its decisions on the proposal and forwarded its recommendations to the President.

5. Indicated below are the areas, listed by subject, where the Council has made revisions in the Principles and Standards.

(1) Planning objectives.
(2) Discount rate.
(3) Retroactive application, "Grandfather Clause".
(4) Cost allocation.
(5) Public participation.
(6) Water quality evaluation.
(7) Use of economic (OBERS) projections.
(8) Unemployed and underemployed resources.
(9) Application of benefit/cost ratio.
(10) Feasible project alternatives.
(11) Impact of benefits on income distribution.

6. Revisions in the Principles and Standards are reflected as appropriate in the final environmental statement which is printed as a part of this notice. The final statement also indicates the availability of a summary of the comments received on the draft environmental statement and the availability of the original transcripts of the testimony composing the public record. The draft and final environmental statements illustrate how the Principles and Standards, by providing for explicit consideration of the environmental quality objective in plan formulation, augment the National Environmental Policy Act in fostering a full disclosure of environmental consequences.

7. Pursuant to sec. 103 of the Water Resources Planning Act (P.L. 89–80) the President approved the Principles and Standards as they appear herein.

8. The Principles and Standards are effective October 25, 1973.

ROGERS C. B. MORTON,
*Chairman.*

The United States Water Resources Council, an independent Executive Agency of the U. S. Government, is composed of the Secretaries of Interior; Agriculture; Army; Health, Education, and Welfare; Transportation; Chairman, Federal Power Commission; with participation by the Secretaries of Commerce; Housing and Urban Development; Administrator, Environmental Protection Agency; Attorney General, Department of Justice; Director, Office of Management and Budget; Chairman, Council on Environmental Quality; and the Chairmen, River Basin Commissions. Council activities encourage the conservation, development and utilization of water and related land resources on a comprehensive and coordinated basis by Federal, State, local government and private enterprise.

WATER RESOURCES COUNCIL

| MEMBERS | ALTERNATES |
|---|---|
| Rogers C. B. Morton, Chairman, Secretary of the Interior. | Jack O. Horton, Assistant Secretary. |
| Earl L. Butz, Secretary of Agriculture. | Robert W. Long, Assistant Secretary. |
| Howard H. Callaway, Secretary of the Army. | Charles R. Ford, Acting Special Assistant. |
| Caspar W. Weinberger, Secretary of Health, Education, and Welfare. | Merlin K. DuVal, Assistant Secretary. |
| Claude S. Brinegar, Secretary of Transportation. | Chester R. Bender, Commandant, U. S. Coast Guard. |
| John N. Nassikas, Chairman, Federal Power Commission. | George G. Adkins, Chief, Division of River Basins. |

| ASSOCIATE MEMBERS | ALTERNATES |
|---|---|
| Frederick B. Dent, Secretary of Commerce. | Robert M. White, Administrator, National Oceanic and Atmospheric Administration. |
| James T. Lynn, Secretary of Housing and Urban Development. | Clifford W. Graves, Deputy Assistant Secretary. |
| John R. Quarles, Jr., Deputy Administrator, Environmental Protection Agency. | |

| OBSERVERS | ALTERNATES |
|---|---|
| Roy L. Ash, Director, Office of Management and Budget. | John C. Sawhill, Associate Director. |
| Elliot L. Richardson, Attorney General, Department of Justice. | Wallace H. Johnson, Assistant Attorney General. |
| Russell E. Train, Chairman, Council on Environmental Quality. | Stephen F. Sloan, Staff Member. |
| Donel J. Lane, Chairman, Pacific Northwest River Basins Commission. | |
| R. Frank Gregg, Chairman, New England River Basins Commission. | |
| Frederick O. Rouse, Chairman, Great Lakes Basin Commission. | |
| Fred E. Morr, Chairman, Ohio River Basin Commission. | |

Council on Environmental Quality. . . . . Stephen F. Sloan.

PRINCIPLES, STANDARDS, AND PROCEDURES
FOR WATER AND RELATED LAND RESOURCES PLANNING

The Principles provide the broad policy framework for planning activities and include the conceptual basis for planning.

The Standards provide for uniformity and consistency in comparing, measuring, and judging beneficial and adverse effects of alternative plans.

The Procedures provide more detailed methods for carrying out the various levels of planning activities, including the selection of objectives, the measurement of beneficial and adverse effects, and the comparison of alternative plans for action. Procedures are developed within the framework of Principles and the uniformity of Standards but will vary with the level of planning, the type of program, and the state-of-the-art of planning.

As indicated by these definitions, the concepts of Principles, Standards, and Procedures will evolve and change. Principles, reflecting major public policy and basic public investment theory, will change and evolve slowly. Standards, representing the best available techniques for the application of Principles, will change more frequently than Principles, as progress in the development of planning and evaluation techniques takes place. Procedures, detailed methods for the application of the Principles and Standards, will be subject to even more frequent revisions as experience, research, and planning conditions require such revision.

PRINCIPLES FOR PLANNING WATER
AND RELATED LAND RESOURCES

I. Purpose and scope.
II. Objectives.
III. Other beneficial and adverse effects.
IV. General evaluation principles.
V. Plan formulation.
VI. System of accounts.
VII. Cost allocation, reimbursement, and cost sharing.
VIII. National program for Federal and federally assisted activities.
IX. Implementation of principles.
X. Application and effect.

I. PURPOSE AND SCOPE

These Principles are established for planning the use of the water and related land (hereinafter referred to as water and land) resources of the United States to achieve objectives, determined cooperatively, through the coordinated actions of the Federal, State, and local governments; private enterprise and organizations; and individuals.

These Principles provide the basis for Federal participation with river basin commissions, States, and others in the preparation, formulation, evaluation, review, revision, and transmittal to the Congress of plans for States, regions, and river basins; and for planning of Federal and federally assisted water and land resources programs and projects and Federal licensing activities as listed in the Standards.

Plans for the use of the Nation's water and land resources will be directed to improvement in the quality of life through contributions to the objectives of national economic development and environmental quality. The beneficial and adverse effects on each of these objectives will be displayed in separate accounts with other accounts for the beneficial and adverse effects on regional development and social well-being. Planning for the use of water and land resources in terms of these objectives will aid in identifying alternative courses of action and will provide the type of information needed to improve the public decisionmaking process.

II. OBJECTIVES

Existing or projected needs and problems expressed by the people through their local, State, regional, or national institutions have created a need for water and land resource management and use. These needs and problems are of such a multigovernmental nature that their resolution requires cooperation and coordination by many levels of government and private interests.

The overall purpose of water and land resource planning is to promote the quality of life, by reflecting society's preferences for attainment of the objectives defined below:

A. to enhance national economic development by increasing the value of the Nation's output of goods and sevices and improving national economic efficiency.

B. To enhance the quality of the environment by the management, conservation, preservation, creation, restoration, or improvement of the quality of certain natural and cultural resources and ecological systems.

For each alternative plan there will be a complete display or accounting of relevant beneficial and adverse effects on these two objectives.

Beneficial and adverse effects are measured in monetary or nonmonetary terms. Estimating these beneficial and adverse effects is undertaken in order to measure and display in appropriate accounts the net changes, with respect to the two objectives, that are generated by alternative plans.

The priorities and preferences of the various individuals affected will vary and, accordingly, there will likely not be full agreement among all affected on whether certain effects are beneficial or adverse or on the relative trade offs between objectives. However, when any plan is recommended from among alternative plans, there is an implicit expression of what is considered to be the affected group's priorities and preferences.

XUM

Effects on some components of the two objectives are generally regarded as favorable. These include, for example, gains in national output. For other components, however, preferences will differ. This will certainly be true of some of the components making up the environmental quality objective. For such instances, planning provides information which should facilitate planning decisions and reduce conflict over such decisions.

Thus, there are beneficial and adverse effects for national economic development and environmental quality. These are measured in quantitative units or qualitative terms appropriate to a particular effect. The accounts are not mutually exclusive with respect to beneficial or adverse effects, and final decisions as to the selection of the recommended plan will be made by considering the differences among alternative plans as to all their effects.

### A. Beneficial Effects on National Economic Development

Beneficial effects to be displayed in the national economic development account are increases in the value of the output of goods and services and improvements in national economic efficiency resulting from a plan. These include:

a. The value to users of increased outputs of goods and services; and

b. The value of output resulting from external economies.

### B. Adverse Effects on National Economic Development

Adverse effects of a plan to be displayed in the national economic development account include:

a. The value of resources required for or displaced by a plan; and

b. Losses in output resulting from external diseconomies.

### C. Beneficial and Adverse Effects on Environmental Quality

The beneficial and adverse effects of alternative plans on the environmental characteristics of the area under study or elsewhere in the Nation will be evaluated. Environmental effects will be displayed in terms of relevant physical and ecological criteria or dimensions, including the appropriate qualitative aspects. Such an evaluation would be displayed in the environmental quality account and include the effects of the proposed plan on:

a. Open and green space, wild and scenic rivers, lakes, beaches, shores, mountains and wilderness areas, estuaries, and other areas of natural beauty;

b. Archeological, historical, biological, and geological resources and selected ecological systems;

c. The quality of water, land, and air resources; and

d. Irreversible commitments of resources to future uses.

## III. OTHER BENEFICIAL AND ADVERSE EFFECTS

For each alternative plan, the beneficial and adverse effects on regional development and social well-being will be displayed where appropriate.

### A. Beneficial and Adverse Effects on Regional Development

The following beneficial or adverse effects of the proposed plan on a system of relevant planning regions (States, river basins, or communities) will be displayed where appropriate.

a. Income effects

(1) Beneficial.

(a) The value of increased outputs of goods and services resulting from a plan accruing within relevant regions; and

(b) The value of output resulting from external economies accruing within relevant regions.

(2) Adverse.

(a) The value of resources within relevant regions required for or displaced by a plan.

(b) Losses in output resulting from external diseconomies within the relevant regions.

b. Beneficial and adverse effects on other components of regional development.

(1) The number and types of jobs resulting from a plan in the region under consideration;

(2) Effects of the plan on population distribution within the region under consideration and among regions in the Nation;

(3) The effect of the plan on the economic base and economic stability of the region under consideration;

(4) The effect of the plan on the environment in the region under consideration; and

(5) The effect of the plan on other specified components of regional development.

### B. Beneficial and Adverse Effects on Social Well-Being

The beneficial and adverse effects of a plan to be displayed where appropriate in the social well-being account include:

a. Real income distribution. The effects of a plan on the real income of classes or groups that are relevant to the evaluation of a plan will be displayed. All effects, both monetary and income in kind, will be included in this display.

b. Life, health, and safety. Plan effects on life, health, and safety other than those evaluated monetarily for the national economic development objective will be included here. Measurement techniques will vary but would largely be in terms of physical units.

c. Educational, cultural, and recreational. The effect of the plan on educational, cultural, and recreational opportunities.

d. Emergency preparedness. The effects of the plan on reserve capacities and flexibilities in water resource systems and protection against interruption of the flow of essential goods and services at times of national disaster or critical need will be displayed.

e. Other. Other effects on social well-being may be identified and displayed as relevant to alternative plans.

## IV. GENERAL EVALUATION PRINCIPLES

### A. General Setting

Full employment will be assumed except where local areas of chronic unemployment, underemployment, or other conditions indicate otherwise. Plan formulation and evaluation will be based on national and regional projections of employment output, and population and the amounts of goods and services that are likely to be demanded. Actual or projected needs for water and land resources will be related to these projections. Alternative plans will take into account established standards and goals for the quality of the environment and other factors.

### B. Measurement of Beneficial and Adverse Effects

Beneficial and adverse effects of each alternative plan will be determined by comparing the conditions expected with the plan to the conditions expected without the plan. Since substantial changes may be expected even in the absence of the plan, care should be taken that this fact is properly reflected in plan formulation and evaluation.

### C. Price Relationships

When prices are used in evaluation they should reflect the real exchange values expected to prevail over the period of analysis. For this purpose, relative price relationships and the general level of

XUM

prices prevailing during the planning study will be assumed to hold generally for the future, except where specific studies and considerations indicate otherwise.

D. The Discount or Interest Rate

The discount rate will be established in accordance with the concept that the Government's investment decisions are related to the cost of Federal borrowing.

E. Consideration and Comparison of Alternatives

A range of possible alternatives capable of application by various levels of government and by nongovernmental interests, should be studied. These alternatives should be evaluated or judged as to their contributions to the objectives.

Plans, or increments thereto, will not be recommended for Federal development that, although they have beneficial effects on the objectives, would physically or economically preclude alternative non-Federal plans which would likely be undertaken in the absence of the Federal plan and which would more effectively contribute to the objectives when comparably evaluated according to these principles.

F. Period of Analysis

The period of analysis will be the lesser of (1) the period of time over which the plan can reasonably be expected to serve a useful purpose considering probable technological trends affecting various alternatives, or (2) the period of time when further discounting of beneficial and adverse effects will have no appreciable effects on design. Appropriate consideration will be given to long-term environmental and social well-being effects which may extend beyond periods significant for analysis of national economic development or regional development beneficial and adverse effects.

G. Scheduling

Plans should be scheduled for implementation in relation to needs so that desired beneficial effects are achieved efficiently. Beneficial and adverse effects occurring according to different patterns in time are affected differently by the discount process when plans are scheduled for implementation at alternative future times. Therefore,

plan formulation should analyze the alternative schedules of implementation to identify the schedule that would result in the most desirable mix of contributions to the objectives when the beneficial and adverse effects of a plan are appropriately discounted.

H. Risk and Uncertainty

Risk is characterized by a distribution of events occurring according to reasonably well-known probabilities, even though their sequence and time of occurrence cannot be determined. Frequency analysis in hydrology, where long records are available or can be mathematically simulated, is an example of predictable risk. In such situations, it may be necessary to choose between planning for average or probable conditions and planning for extreme events. When this is done, the nature of the choice and its relationship to the objectives will be clearly stated. Predictable risk; based upon past experience, should not be divorced from predictable or foreseeable trends which would alter probabilities based solely upon previous experience.

Uncertainty is characterized by the absence of any known probability distribution of events. This is often the situation in water resources planning. The nature of uncertainty associated with the planning study, strategies proposed to deal with uncertainty, and their impact on the objectives should be reported. In addition, sensitivity analysis may be employed to analyze uncertain situations.

I. Sensitivity Analysis

Plans should be examined to determine their sensitivity to data availability and to alternative assumptions as to future economic, demographic, environmental, and technologic trends. Selected projections and assumptions of alternative futures that are reasonably probable and that, if realized, would appreciably affect plan design or scheduling should be analyzed.

J. Updating Plans

Because, of rapid change in social economic, environmental, technologic, physical, and other factors, a plan that is not implemented within a reasonable time after completion should be reviewed as provided in the standards to ascertain whether it continues to be the best alternative to achieve the objectives.

V. PLAN FORMULATION

Plans will be directed to the improvement in the quality of life by meeting current and projected needs and problems as identified by the desires of people in such a manner that improved contributions are made to society's preferences for national economic development and environmental quality. These plans should be formulated to reflect national, regional, State, and local needs or problems consistent with the above two objectives.

Planning of water and land resources is a part of broader public and private planning to meet regional and local needs and to alleviate problems. Therefore, planning for water and land resources should be carefully related to other regional or local planning activities and should include active participation of all interests.

Plans for water and land resources will focus upon the specified components of the objectives desired for the designated region, river basin, State, or local planning setting. These are expressed in terms of projected needs and problems identified in each planning setting.

The planning process includes the following major steps:

(1) Specify components of the objectives relevant to the planning setting;

(2) Evaluate resource capabilities and expected conditions without any plan;

(3) Formulate alternative plans to achieve varying levels of contributions to the specified components of the objectives;

(4) Analyze the differences among alternative plans which reflect different emphasis among the specified components of the objectives;

(5) Review and reconsider, if necessary, the specified components for the planning setting and formulate additional alternative plans as appropriate; and

(6) Select a recommended plan from among the alternative plans based upon an evaluation of the trade offs between the objectives of national economic development and environmental quality and considering, where appropriate, the effects of the plans on regional development and social well-being.

A. Specification of Components of the Objectives

At the outset and throughout the planning process, the responsible planning organization will consult appropriate Federal, regional, State, and local groups to ascertain the components of the objectives that are significantly related to the use and management of the resources in the planning setting. These will be expressed in terms of needs and problems.

The components selected for use in formulating alternative plans should be of concern to the Nation, and the components should be those that can reasonably be expected to be substantially influenced through the management and development alternatives available to the planner. The components of objectives for which plans are formulated can be expected to change over time and between areas of the Nation as preferences and possibilities change and differ. These changes will be reflected in the Water Resources Council's Standards.

The objectives for which plans are formulated can also be expected to change over time as preferences and possibilities change. Changes in objectives will be accommodated only through revision of these principles.

The specified components will be defined so that meaningful alternative levels of achievement are identified. This will facilitate the formulation of alternative plans in cases where there may be technical, legislative, or administrative constraints to full achievement of objectives.

B. Evaluation of Conditions Without a Plan

The identification of the specified components of objectives will necessarily involve an appraisal of future economic and environmental conditions expected without the plan as compared with those desired by people for the planning area. In addition, a sufficient inventory and appraisal of the water and land resource base of the planning area will be necessary.

C. Formulation of Alternative Plans

The planning process involves an evaluation of alternative means, including both structural and nonstructural measures, to achieve desired effects.

Based upon identified needs and problems, alternative plans will be prepared and evaluated in the context of their contributions to the objectives. This involves comparisons between objectives, and it will be necessary to formulate alternative plans that reflect different relative emphasis between the objectives for the planning setting.

The number of alternative plans to be developed for each planning effort will depend upon complementarities or conflicts among specified components of the objectives, resource capabilities, technical possibilities, and the extent to which the design of additional alternative plans can be expected to contribute significantly to the choice of a recommended plan. Because planning staffs are limited, emphasis should be placed on examination of those alternative waters and land-use plans which may have appreciable effects on objectives.

With respect to the number of alternative plans there will be a continuing dialog among the Water Resources Council, river basin commissions, and other planning groups, emphasizing on the one hand the need for national guidelines and overview of objectives for which alternative plans are formulated, and on the other the special insights into local planning situations that field level teams may develop.

Appropriate methods and techniques for estimating beneficial and adverse effects will be used to provide reliable estimates of the consequences and feasibility of each alternative plan.

One alternative plan will be formulated in which optimum contributions are made to the national economic development objective. Additionally, during the planning process at least one alternative plan will be formulated which emphasizes the contributions to the environmental quality objective. Other alternative plans reflecting significant physical, technological, legal or public policy constraints or reflecting significant trade-offs between the national economic development and environmental quality objectives may be formulated so as not to overlook a best overall plan.

Major increments proposed for addition to a plan intended to serve a single component of an objective will be included only if the beneficial effects on that component of the addition outweigh the adverse effects. For example, an increment to an alternative plan proposed for the national economic development objective would be added only if the additional beneficial effects exceeded the additional adverse effects, and similarly for the environmental quality objective. For plans emphasizing some combination of objectives, the incremental rule applies to the combination of objectives that is relevant.

D. Analysis of Alternative Plans

The display of beneficial and adverse effects for each alternative plan will be prepared so that the differences among alternatives can be clearly shown and accurately analyzed. The analysis will provide the rationale for the selection of a recommended plan and the underlying evaluation of the various alternative plans. This analysis will provide the information on which the planning organization and others can base judgments as to the most desirable mix of beneficial effects as compared with the adverse effects.

The trade offs among alternative plans should be displayed as fully as possible for the components of all objectives and where appropriate for effects on regional development and social well-being to facilitate administrative and legislative review and decision.

E. Reconsideration of Specified Components of the Objectives

As planning proceeds, the specified components will be reviewed and reconsidered as appropriate. This reconsideration may result from new information, revised projections, changes in policy, or technological innovations. Reconsideration of components may result in modifying alternatives or developing additional alternative plans.

F. Plan Selection

From its analysis of alternative plans, the planning organization will select a recommended plan. The plan selected will reflect the relative importance attached to different objectives and the extent to which the two objectives can be achieved by carrying out the plan.

The recommended plan should be formulated so that beneficial and adverse effects toward objectives reflect, to the best of current understanding and knowledge, the priorities and preferences expressed by the public at all levels to be affected by the plan. A recommended plan must have net national economic development benefits unless the deficiency in net benefits for the national economic development objective is the result of benefits foregone or additional costs incurred to serve the environmental quality objective. In such cases, a plan with a less than unity benefit-cost balance may be recommended as long as the net deficit does not exceed the benefits foregone and the additional costs incurred for the environmental quality objective. A Departmental Secretary or head of an independent agency may make an exception to the net benefits rule if he determines that circumstances unique to the plan formulation process warrant such exception.

In addition to the recommended plan with supporting analysis, other significant alternative plans embodying different priorities between the objectives will be presented in the planning report. Included with the presentation of alternative plans will be an analysis of the trade offs among them. The trade offs will be set forth in explicit terms, including the basis for choosing the recommended plan from among the alternative plans.

VI. SYSTEM OF ACCOUNTS

A system of public information accounts will be established that displays beneficial and adverse effects of each plan to the objectives and beneficial and adverse effects on regional development and social well-being and provides a basis for comparing alternative plans. The display of beneficial and adverse effects will be prepared in such manner that the different levels of achievement in each account can be readily discerned and compared, indicating the trade offs among alternative plans.

For purposes of accounting, the distribution of beneficial and adverse effects will be shown to whomsoever they accrue. This will include display of the distribution of effects to regions, income classes, and interest groups relevant to the particular plan and will reflect the cost information specified in Section VII below. The system of accounts will display the beneficial and adverse effects in relevant regions in relation to the rest of the Nation. The Water Resources Council will establish a procedure for relating regional accounts to the rest of the Nation. The use of such reporting regions will not, however, rule out the use of other regions whose delineations are important in measuring beneficial or adverse effects on regional development.

VII. COST ALLOCATION, REIMBURSEMENT, AND COST SHARING

A. Cost Allocation

On the basis of the identification provided for in the system of accounts for beneficial and adverse effects, an allocation of appropriate costs shall be made when an allocation of costs is required for purposes of establishing reimbursement levels, pricing policies, or cost sharing between the Federal Government and non-Federal public and private interests. Each objective and each component of the objectives shall be treated comparably in cost allocation and each is generally entitled to its fair share of the mutual advantages resulting from a plan.

B. Reimbursement and Cost Sharing

Reimbursement and cost-sharing policies shall be directed generally to the end that identifiable beneficiaries bear an equitable share of cost commensurate with beneficial effects received in full cognizance of the planning objectives. Since existing cost-sharing policies are not entirely consistent with this approach to planning water and land resources, these policies are being thoroughly reviewed after which changes will be recommended.

VIII. NATIONAL PROGRAM FOR FEDERAL AND FEDERALLY ASSISTED ACTIVITIES

The principles set forth in this document are concerned with alternative plans for individual projects, States, regions, or river basins. The evaluation, systematic display, and comparison of alternative plans for a project, State, region, or river basin provide the basis for selecting a recommended plan.

XUM

The formulation of national programs for Federal and federally assisted water and land resource activities requires that priorities be established among recommended plans for projects, States, regions, and river basins. The system of accounts, together with other criteria, such as available budget resources, national policy toward the environment and public and private investment alternatives, will provide a basis for formulating national programs.

## IX. IMPLEMENTATION OF PRINCIPLES

The Water Resources Council will implement these Principles by establishing Standards for planning water and land resources in accordance with the Water Resources Planning Act.

The Water Resources Council will establish Procedures as necessary to carry out the established Principles and Standards.

Included in the Water Resources Council's Standards and Procedures will be provision for coordination, among Federal and State agencies and among public and private interests affected by water and land resource plans.

The Council will also specify appropriate Procedures for the review and transmission of planning reports to States, Federal agencies, the Office of Management and Budget, the Council on Environmental Quality, and the Congress. The Council may also provide for review of individual project studies to determine their relationships to regional and river basin plans and their conformance with the Council's evaluation Standards. The Council will consider any unresolved coordination problem.

The Water Resources Council will foster needed training and development of manpower, improvements in mathematical and other planning tools, and research to increase the efficiency of planning efforts. The Principles, Standards, and Procedures should be based at any given time on the best available interpretation of conceptual and impirical bases for planning water and land resources. The Council will encourage and support needed improvements in the application of the conceptual and theoretical planning and decisionmaking framework upon which these Principles are based. The Council will also encourage and support improvement in the conceptual and theoretical framework.

The Council in its Standards and Procedures will make adjustments for deviations from the Principles that may be required by law or Executive order.

The Water Resources Council will review these Principles from time to time and after consultation with others will recommend improvements for consideration of the President.

## X. APPLICATION AND EFFECT

These Principles for Planning Water and Land Resources shall be implemented by the Water Resources Council and shall be applied by river basin commissions, other Federal-State organizations, and each of the Federal departments and agencies. The Office of Management and Budget, the Council on Environmental Quality, and other organizations in the Executive Office of the President will use these Principles in their review of proposed project, basin, or regional plans.

The Policies, Standards, and Procedures in the Formulation, Evaluation, and Review of Plans for Use and Development of Water and Related Land Resources, approved by the President, May 15, 1962, printed as Senate Document No. 97, 87th Congress, 2d Session, together with Supplement No. 1 thereto, June 4, 1964, "Evaluation Standards for Primary Outdoor Recreation Benefits," and the amendment of December 24, 1968, 18 CFR § 704.39, "Discount Rate," are revoked.

These Principles, the Standards promulgated in connection therewith, and the above revocation shall take effect 45 days following the date of their publication by the Chairman of the Water Resources Council in the Federal Register.

Approved: September 5, 1973

Richard Nixon

## STANDARDS FOR PLANNING WATER AND RELATED LAND RESOURCES

### Table of Contents

I. Purpose and scope.
II. Objectives.
III. Other beneficial and adverse effects.
IV. General evaluation standards.
V. Plan formulation.
VI. System of accounts.
VII. Cost allocation, reimbursement, and cost sharing.
VIII. National program for Federal and Federally assisted activities.
IX. Coordination and review of planning studies.

Appendix A. Water Resources Planning Act of 1965, as amended.

## I. PURPOSE AND SCOPE

### A. Authority

These planning standards implement the Principles for Planning Water and Related Land Resources.

These standards shall apply, as appropriate, to the activities referred to in subsection B of this section except for adjustments required by law or Executive order. Adjustments required for special situations where the application of these standards is not practical may be made and will be developed by the concerned agency or entity in consultation with the Water Resources Council.

Although these standards are not binding upon State and local bodies participating in water and land resources planning, it is intended that the standards be broad and flexible enough to accommodate the goals and objectives of such entities. The standards apply to Federal participation in Federal-State cooperative planning and should also provide a useful guide to State and local planning.

The Water Resources Planning Act of 1965, as amended, is found in Appendix A.

### B. Activities Covered

1. Comprehensive planning. These standards apply to Federal participation in comprehensive framework studies and assessments and regional or river basin planning of water and land resources whether carried out--

(a) By river basin commissions established under the Water Resources Planning Act;

(b) By entities performing the functions of a river basin commission, including, but not limited to, such entities as:

(1) Federal-interstate compact commissions;

(2) Federal-State interagency committees;

(3) Federal-State coordinating committees;

XUM

(4) Federal-State development commissions;

(5) Lead Federal agency with special authorization for comprehensive planning;

(6) Other entities designated by the Council engaged in comprehensive water and land resource planning with coordinated Federal technical or financial assistance.

In formulating plans to meet the objectives all alternative means shall be considered, including, but not limited to, water and land programs to be carried out directly by the Federal Government, Federal financial and technical participation in water and land programs to be carried out by State or other non-Federal entities, and Federal licensing activities that affect the development, conservation, and utilization of water and land resources.

2. Federal and federally assisted programs and projects. These standards apply to the planning and evaluation of the effects of the following water and land programs, projects, and activities carried out directly by the Federal Government and by State or other entities with Federal financial or technical assistance;

(a) Corps of Engineers civil functions;

(b) Bureau of Reclamation projects;

(c) Federally constructed watershed and water and land programs;

(d) National parks and recreation areas;

(e) Wild, scenic, recreational rivers and wilderness areas;

(f) Wetland and estuary projects and coastal zones;

(g) Federal waterfowl refuges;

(h) Tennessee Valley Authority;

(i) Federal assistance to State and local government sponsored watershed and water and land resource programs (Watershed Protection and Flood Prevention Projects and Resource Conservation and Development Projects).

C. Levels of Planning

These standards apply to all levels of planning as defined by the Water Resources Council.

Framework studies and assessments are the evaluation or appraisal on a broad basis of the needs and desires of people for the conservation, development, and utilization of water and land resources and will identify regions or basins with complex problems which require more detailed investigations and analysis, and may recommend specific implementation plans and programs in areas not requiring further study. They will consider Federal, State, and local means and will consider both national economic development and environmental quality objectives.

Regional or river basin plans are reconnaissance-level evaluation of water and land resources for a selected area. They are prepared to resolve complex long-range problems identified by framework studies and assessments and will vary widely in scope and detail; will involve Federal, State, and local interests in plan formulation; and will identify and recommend action plans and programs to be pursued by individual Federal, State, and local entities. They will consider both national economic development and environmental quality objectives.

Implementation studies are program or project feasibility studies generally undertaken by a single Federal, State, or local entity for the purpose of authorization or development of plan implementation. These studies are conducted to implement findings, conclusions, and recommendations of framework studies and assessments and regional or river basin studies which are found to be needed in the next 10 to 15 years. As with framework studies and regional or river basin plans, they will consider both national economic development and environmental quality objectives.

D. Responsibility for Applying Standards

The Federal chairman and the representatives of the Federal agencies participating in a river basin commission established under the Water Resources Planning Act are responsible for applying these standards.

The study director provided or designated by the Water Resources Council or by river basin commissions (in their areas) and Federal members of coordinating bodies established or designated by the Council to carry out framework studies and assessments and regional or river basin planning studies are responsible for applying these standards.

The administrator of each Federal program or federally assisted program covered under this section is responsible for applying these standards to his program. Each Federal administrator shall follow these standards in establishing agency procedures for evaluation of programs and projects for conservation, development, and utilization of water and land resources.

The Board of Directors of the Tennessee Valley Authority, responsible for framework studies and assessments, regional and river basin planning studies and implementation studies for the Tennessee River Basin, and the Federal representatives of other entities performing the functions of a river basin commission shall apply these standards except for any adjustments required by law or Executive order or for special situations where the application of these standards is not practical.

Proposed Federal agency procedures, and revisions thereto, to implement these standards will be referred to the Water Resources Council for review for consistency with these standards.

E. Schedule for Applying Standards

The principles and standards will apply to all levels of planning studies. For authorized but unfunded projects the principles and standards will be applied on a selective basis to be determined by the head of the agency, with opportunity for suggestions from the Water Resources Council, and other governmental entities. Authorized plans or projects that are substantially reformulated as a result of application of these principles and standards will be submitted to Congress for reauthorization. Separable and independent elements of a project or a system also would be subject to review prior to funding for construction.

II. OBJECTIVES

A. Introduction

The Principles for Planning Water and Land Resources define the objectives of national economic development and environmental quality. These objectives provide the basis for the formulation of State, region, and river basin plans for the use of water and land resources to meet foreseeable short- and long-term needs and have been explicitly stated or implied in numerous congressional enactments and Executive actions. The most notable of these actions in water and related areas are summarized below.

In the Flood Control Act of 1936, the Congress declared that benefits to whomsoever they may accrue of Federal projects should exceed costs. Interpretation of this statute has resulted in development of various analytical procedures to evaluate the benefits and costs of proposed projects. These procedures have centered around a national economic efficiency analysis and were first published as "Proposed Practices for Economic Analysis of River Basin Projects" in May 1950 and revised in May 1958. Budget Bureau Circular No. A-47 was issued on December 31, 1952, informing the agencies of considerations which would guide the Bureau of the Budget in its evaluations of projects and requiring uniform data that would permit comparisons among projects.

On October 6, 1961, the President requested the Secretaries of Interior, Agriculture, Army, and Health, Education, and Welfare to review existing evaluation standards and to recommend improvements. Their report, "Policies, Standards, and Procedures in the Formulation, Evaluation, and Review of Plans for Use and Development of Water and Related Land Resources," was approved by the President on May 15, 1962, and published as Senate Document No. 97, 87th Congress, 2d Session. This document replaced Budget Bureau Circular No. A-47 and in turn has been superseded by the "Principles for Planning Water and Land Resources," upon their approval by the President, and by these "Standards for Planning Water and Land Resources."

By enacting laws and taking actions enumerated below and others, the Congress and the President have broadened the objectives to be considered in water and land resources planning.

The two objectives as defined in the principles and set forth in more detail in these standards provide a flexible planning framework that is responsive to and can accommodate changing national needs and priorities.

XUM

The statement of the objectives and specification of their components in these standards is without implication concerning priorities to be given to them in the process of plan formulation and evaluation. These standards, nonetheless, do recognize and make provision for a systematic approach by which the general public and decisionmakers can assess the relative merits of achieving alternative levels of satisfaction to the two objectives where there may be conflict, competition, or complementarity between them. This will provide the type of information needed to improve the public decisionmaking process.

B. Major Congressional Directives

Many laws that give new or more definitive directions to Federal participation in planning for water and land resources have been passed in recent years. Some major enactments are:

The Federal Water Project Recreation Act of 1965 (Public Law 89-72), provides for full consideration of opportunities for recreation and fish and wildlife enhancement in Federal projects under specified cost allocation and cost-sharing provisions.

The Water Resources Planning Act of 1965 (Public Law 89-80), establishes a comprehensive planning approach to the conservation, development and use of water and related land resources. The Act emphasizes joint Federal-State cooperation in planning and consideration of the views of all public and private interests. Section 103 of the Act provides that "The Council shall establish, after such consultation with other interested entities, both Federal and non-Federal, as the Council may find appropriate, and with the approval of the President, principles, standards, and procedures for Federal participants in the preparation of comprehensive regional or river basin plans and for the formulation and evaluation of Federal water and related land resources projects."

The Act further provides in section 102(b) that "The Council shall . . . maintain a continuing study of the relation of regional or river basin plans and programs to the requirements of larger regions of the Nation and of the adequacy of administrative and statutory means for the coordination of the water and related land resources policies and programs of the several Federal agencies; it shall appraise the adequacy of existing and proposed policies and programs to meet such requirements; and it shall make recommendations to the President with respect to Federal policies and programs."

The Act also provides in section 301(b) that "The Council, with the approval of the President, shall prescribe such rules, establish such procedures, and make such arrangements and provisions relating to the performance of its functions under this title, and the use of funds available therefor, as may be necessary in order to assure (1) coordination of the program authorized by this title with related Federal planning assistance programs, including the program authorized under section 701 of the Housing Act of 1954 and (2) appropriate utilization of other Federal agencies administering programs which may contribute to achieving the purpose of this Act."

The Water Resources Planning Act, as amended, in attached as Appendix A.

The Public Works and Economic Development Act of 1965 (Public Law 89-136) establishes national policy to use Federal assistance in planning and constructing public works to create new employment opportunities in areas suffering substantial and persistent unemployment and underemployment. The Act provides for establishing Federal-State regional commissions for regions that have lagged behind the Nation in economic development.

The Water Quality Act of 1965 (Public Law 89-234) and subsequent amendments provides for establishing water quality standards for interstate waters. These water quality standards provide requirements and goals that must be incorporated into planning procedures.

In authorizing the Northeastern Water Supply Study in 1965 (Public Law 89-298), Congress recognized that assuring adequate supplies of water for the great metropolitan centers of the United States has become a problem of such magnitude that the welfare and prosperity of this country require the Federal Government to assist in solution of water supply problems.

The Clean Water Restoration Act of 1966 (Public Law 89-753) provides assistance for developing comprehensive water quality control and abatement plans for river basins.

The Department of Transportation Act of 1966 (Public Law 89-670) provides standards for evaluating navigation projects and provides for the Secretary of Transportation to be a member of the Water Resources Council.

The Wild and Scenic Rivers Act of 1968 (Public Law 90-542) provides that in planning for the use and development of water and related land resources consideration shall be given to potential wild, scenic, and recreational river areas in river basin and project plan reports, and comparisons are to be made with development alternatives which would be precluded by preserving these areas.

The National Flood Insurance Act of 1968 (title XIII, Public Law 90-448) provides that States, to remain eligible for flood insurance, must adopt acceptable arrangements for land use regulation in flood-prone areas. This provision, together with Executive Order 11296, August 10, 1966, places increased emphasis on land use regulations and administrative policies as means of reducing flood damages. Planning policies must include adequate provision for these new enactments and directives in an integrated program of flood-plain management.

The Estuary Protection Act of 1968 (Public Law 90-454) outlines a policy of reasonable balance between the conservation of the natural resources and natural beauty of the Nation's estuarine areas and the need to develop such areas to further the growth and development of the Nation.

The National Environmental Policy Act of 1969 (Public Law 91-190) authorizes and directs Federal agencies in the decision-making process to give appropriate consideration to environmental amenities and values, along with technical considerations. The results of this analysis are to be included in proposals for Federal action.

The Environmental Quality Improvement Act of 1970 (title II of Public Law 91-224) further emphasizes congressional interest in improving the environment and the major responsibility that State and local governments have for implementing this policy.

The Flood Control Act of 1970 (Public Law 91-611) requires in Section 122 promulgation of guidelines designed to assure that possible adverse economic, social and environmental effects relating to any proposed project have been fully considered in developing such project, and that the final decisions on the project are made in the best overall public interest, taking into consideration the need for flood control, navigation and associated purposes, and the cost of eliminating or minimizing such adverse effects and the following:

(1) air, noise, and water pollution;

(2) destruction or disruption of man-made and natural resources esthetic values, community cohesion and the availability of public facilities and services;

(3) adverse employment effects and tax and property value losses;

(4) injurious displacement of people, businesses, and farms; and

(5) disruption of desirable community and regional growth.

The same Act also includes in Section 209 the following statement: "It is the intent of Congress that the objectives of enhancing regional economic development, the quality of the total environment, including its protection and improvement, the well-being of the people of the United States and the national economic development are the objectives to be included in federally financed water resource projects, and in the evaluation of benefits and costs attributable thereto, giving due consideration to the most feasible alternative means of accomplishing these objectives."

The Rural Development Act of 1972, Public Law 92-419, provides for improving the economic and living conditions of rural America by broadening and strengthening ongoing programs of financial and technical assistance to farmers and rural communities. It provides for the management of agricultural wastes, storage of water for rural needs, recharge of groundwater, fire protection, long term contract program for land treatment, acquisition of land rights with other Federal funds, farm research, and a land inventory and monitoring program.

The Federal Water Pollution Control Act Amendments of 1972, Public Law 92-500, establishes the goals that:

(1) the discharge of pollutants into navigable waters be eliminated by 1985;

(2) an interim goal of water quality be provided for the protection of fish, shellfish and wildlife, and for recreation by July 1, 1983;

(3) the discharge of toxic pollutants in toxic amounts be prohibited;

(4) Federal financial assistance be provided to construct publicly, owned waste treatment plants;

(5) water quality and areawide waste treatment management planning include multiobjective water resources and land use planning;

(6) Regional or river basin (Level B) plans be completed by the Water Resources Council for all river basins in the United States by 1980 (Section 209); and that

(7) a major research and demonstration effort be made to develop technology to eliminate the discharge of pollutants.

The Coastal Zone Management Act of 1972, Public Law 92-583, provides for a comprehensive, long range, and coordinated national program in marine science, to establish a National Council on Marine Resources and Engineering Development, and a Commission on Marine Science, Engineering and Resources; and for annual grants to any coastal State for the purpose of assisting in the development of a management program for the land and water resources of its coastal zone, and for annual grants to any coastal State for not more than 66 2/3 per centum of the costs of administering the State's management program.

C. Relationships of Program Measures to Objectives

Formulating courses of action that effectively contribute to the attainment of the national economic development and environmental quality objectives is the paramount task of water and land resources planning. These actions are only the means by which objectives can be attained. For instance, providing flood control or preserving a scenic river is meaningful only to the extent that such actions contribute to specific needs that can be related to the objectives. Thus, plans are to be formulated in terms of their beneficial or adverse effects on the objectives.

These standards relate primarily to the planning of water and land resource programs that contribute to specified components of the objectives. It is recognized that other programs may also contribute to these objectives. In some instances, water and land programs are the only means or are the most effective means to achieve the objectives. In the usual case, however, it is likely that a combination of water and land programs and other programs will be the most effective means to achieve the desired objectives. In the formulation of plans, therefore, these standards provide for the consideration of the full range of alternatives relevant to the needs for water and land resources.

A given plan formulated for one or several components of the objectives may affect the components of other objectives in a beneficial or adverse manner. This joint effect relationship is a common occurrence

in plan formulation. Its presence necessitates that the full range of effects of plans be shown in terms of specified components of objectives regardless of the size of the effect or the component for which an alternative plan has been formulated.

D. Objectives

1. National economic development. The national economic development objective is enhanced by increasing the value of the nation's output of goods and services and improving national economic efficiency.

National economic development reflects increases in the Nation's productive output, an output which is partly reflected in a national product and income accounting framework designed to measure the continuing flows of goods and services into direct consumption or investment.

In addition, national economic development is affected by beneficial and adverse externalities stemming from normal economic production and consumption, imperfect market conditions, and changes in productivity of resource inputs due to investment. National economic development is also affected by the availability of public goods which are not accounted for in the national product and income accounting framework. Thus, the concept of national economic development is broader than that of national income and is used to measure the impact of governmental investment on the total national output. The gross national product and national income accounts do not give a complete accounting of the value of the output of final goods and services resulting from governmental investments because only government expenditures are included. This is especially true in those situations where governmental investment is required to overcome imperfections in the private market. Therefore, national economic development as defined in these standards is only partially reflected in the gross national product and national income accounting framework.

A similar situation prevails where a private investment results in the production of final public goods or externalities that are not exchanged in the market.

Components of the national economic development objective include:

a. The value of increased outputs of goods and services resulting from a plan. Developments of water and land resources result in increased production of goods and services which can be measured in

terms of their value to the user. Increases in crop yields, expanding recreational use, and peaking capacity for power systems are examples of direct increases in the Nation's output which result from water and related land resources developments. Moreover, such developments often result in a change in the productivity of natural resources and the productivity of labor and capital used with these resources. Increased earnings from changes in land use, reduced disruption of economic activity due to droughts, floods and fluctuating water supplies, and removal of constraints on production through increased water supplies are examples of direct increases in productivity from water and land development that contribute to national output. Development of water and land resources may result in increased production from the employment of otherwise unemployed or underemployed resources, as well as contributions to increased output due to cost savings resulting in the release of resources for employment elsewhere.

b. The value of output resulting from external economies. In addition to the value of goods and services derived by users of outputs of a plan, there may be external gains to other individuals or groups.

2. Environmental quality. The environmental objective is enhanced by the management, conservation, preservation, creation, restoration, or improvement of the quality of certain natural and cultural resources and ecological systems in the area under study and elsewhere in the Nation. This objective reflects society's concern and emphasis for the natural environment and its maintenance and enhancement as a source of present enjoyment and a heritage for future generations.

Explicit recognition should be given to the desirability of diverting a portion of the Nation's resources from production of more conventional market-oriented goods and services in order to accomplish environmental objectives. As incomes and living levels increase, society appears less willing to accept environmental deterioration in exchange for additional goods and services in the market place.

Responsive to the varied spiritual, psychological, recreational, and material needs, the environmental objective reflects man's abiding concern with the quality of the natural physical-biological system in which all life is sustained.

Components of the environmental objective include the following:

a. Management, protection, enhancement, or creation of areas of natural beauty and human enjoyment such as open and green space, wild and scenic rivers, lakes, beaches, shores, mountain and

wilderness areas, and estuaries;

b. Management, preservation, or enhancement of especially valuable or outstanding archeological, historical, biological (including fish and wildlife habitat), and geological resources and ecological systems;

c. Enhancement of quality aspects of water, land, and air by control of pollution or prevention of erosion and restoration of eroded areas embracing the need to harmonize land use objectives in terms of productivity for economic use and development with conservation of the resource;

d. Avoiding irreversible commitments of resources to future uses: While all forms of development and use affect and sometimes change the tenuous balance of fragile aquatic and terrestrial ecosystems, the implication of all possible effects and changes on such systems is imperfectly understood at the present time. In the absence of absolute measures or standards for reliably predicting ecological change, these planning standards emphasize the need for a cautionary approach in meeting development and use objectives in order to minimize or preclude the possibility of undesirable and possible irreversible changes in the natural environment;

e. Others. Given its broad and pervasive nature, it is not practical to specifically identify in these standards all possible components of the environmental quality objective. If other components are recognized, they should be explicitly identified and accommodated in the planning process.

E. Effects on Objectives

For each alternative plan there will be a complete display or accounting of relevant beneficial and adverse effects on the national economic development and environmental quality objectives. Alternative plans will be formulated to optimize their contributions to the two objectives.

Beneficial and adverse effects are measured in both monetary and nonmonetary terms. Estimating these beneficial and adverse effects is undertaken in order to measure and display in appropriate accounts the net changes with respect to particular objectives that are generated by alternative plans.

The priorities and preferences of the various individuals affected will vary and, accordingly, there will likely not be full agreement among all affected on whether certain effects are beneficial or adverse or on the relative trade offs between objectives. However, when any plan is recommended from among alternative plans, there is an implicit expression of what is considered to be the affected group's priorities and preferences.

Effects on some components of the objectives are generally regarded as favorable. These include, for example, gains in national output. For other objectives and components, however, preferences will differ. This will certainly be true of some of the components making up the environmental quality objective. For such instances, planning provides information which should facilitate planning decisions and reduce conflict over such decisions.

1. Relationship of beneficial and adverse effects to objectives. Beneficial and adverse effects will be identified for national economic development and environmental quality objectives and will be displayed. Also, since beneficial and adverse effects may be of a monetary or nonmonetary nature, they may be measured in dollars or in physical, biological, or other quantitative units or qualitative terms as appropriate.

The objectives are not mutually exclusive with respect to beneficial and adverse effects. Comparisons and evaluations of plans require measurement or quantification of similar effects in terms of common standards. The selected standards may be in terms of dollars, acres of land, acre-feet or cubit-feet-per-second of water, miles of trails or

streams, number of people, and so on. The nonmonetary measures must include appropriate qualitative dimensions.

2. Incidence of beneficial and adverse effects. The distribution among groups and time of beneficial and adverse effects is an important consideration in the evaluation of plans. Those groups who are affected by a plan should be identified. Those who are benefited or adversely affected by a plan may be located within the planning area or region, or they may be in an area or region immediately adjacent, or they may be in distant regions which are noncontiguous with the planning area. The beneficial and adverse effects may also occur immediately or in the future in any of the areas or regions. These are discussed in detail in section III.

3. With and without analysis. In planning water and land resources, beneficial and adverse effects of a proposed plan should be measured by comparing the estimated conditions with the plan with the conditions expected without the plan. Thus, in addition to projecting the beneficial and adverse effects expected with the plan in operation, it is necessary to project the conditions likely to occur in the absence of a plan. Economic, social, and environmental conditions are not static, and changes will occur even without a plan. Only the new or additional changes that can be anticipated as a result of a proposed plan should be attributed as beneficial and adverse effects of the plan.

4. Monetary beneficial effects. For many goods and services the conventional market mechanism or simulation thereof provides a valid measure of exchange values, expressed in monetary terms. The values determined by the market may need adjustment to account for imperfect market conditions. Contributions to national economic development and the income component of regional development are of the monetary type of beneficial effects. In addition, certain components of the environmental quality objective can be analyzed in terms of monetary values.

5. Monetary adverse effects. Adverse effects result, just as beneficial effects do, from the implementation of a particular plan. Values for some adverse effects can be based on or derived from actual or simulated market prices. For example, the costs of goods and services used in constructing and operating a project or payment for damages even though no goods or services are being acquired can be derived from actual market prices. The prices determined by the market may need adjustment to account for imperfect market conditions. Some adverse effects are not represented by actual cash expenditures; but

market prices can be used to estimate or derive the appropriate monetary values by use of a simulated market price or by observing market prices for similar goods and services.

6. Nonmonetary beneficial effects. There are many effects which cannot or should not be expressed in monetary values. This is true of many contributions to environmental quality objective.

When effects cannot or should not be expressed in monetary terms, they will be set forth, insofar as is reasonably possible, in approriate quantitative and qualitative physical, biological, or other measures reflecting the enhancement or improvement of the characteristics relevant to the type of effects under consideration.

When specified minimum technical or institutional standards related to the environmental quality objective will be met or otherwise exceeded, they will be explicitly identified.

If particular nonmonetary beneficial effects or services are not amenable to quantitative measurement they should be described as fully as possible in appropriate qualitative terms.

7. Nonmonetary adverse effects. There are adverse effects that cannot be valued by market prices and direct compensation for these adverse effects may not be possible. Nevertheless, they should be accounted for by use of appropriate nonmonetary values or described as carefully as possible. The nonmonetary values may be expressed in terms of a physical, biological, or other quantitative units or qualtitative terms.

The adverse effects of a nonmonetary nature will generally be related to environmental quality.

F. BENEFICIAL EFFECTS ON NATIONAL ECONOMIC DEVELOPMENT

Beneficial effects in the national economic development account are the increases of the value of the output of goods and services and improvements in national economic efficiency.

1. General measurement concepts. There are two basic sources of increased output of goods and services that contribute toward enhancing national economic development. First, additional resources may be employed using normal production techniques, as, for example, in the application of irrigation water and other associated resources to land for the production of agricultural commodities or in the use of electric power and other associated resources for the production of aluminum. Second, resource productivity changes may be induced by the plan, resulting in more efficient production techniques to be used to achieve a higher level of output from the same resources or the same level of a specific output with fewer resources or the employment of otherwise unemployed or underemployed resources than would be achieved without the plan. In the latter case, the release of productive resources which can be employed elsewhere in the economy for the production of other goods and services ultimately results in an increase in national output as a consequence of a plan. These two sources of increased output may apply to situations in which the plan results in the production of final consumer goods or intermediate producer goods utilized by direct users; and they may also apply in situations in which firms are indirectly affected through economic interdependence with firms which utilize the intermediate producer goods from the plan.

For convenience of measurement and analysis, beneficial effects on national economic development are classified as follows:

a. The value of increased outputs of goods and services from a plan;

b. The value of output resulting from external economies caused by a plan.

In each case, with and without analysis must be applied to ascertain that with a plan there is a net increase in the production of goods and services, regardless of source, over those that would be obtained in the absence of the plan.

The general measurement standard for increases in the national output of goods and services will be the total value of the increase, where total value is defined as the willingness of users to pay for each increment of output from a plan. Such a value would be obtained

XUM

if the "seller" of the output was able to apply a flexible unit price and charge each user (consumer) an individual price to capture the full value of the output to the user. This concept is illustrated in figure 1.

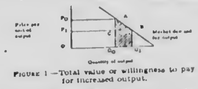

FIGURE 1.—Total value or willingness to pay for increased output.

Assuming the normal demand-output relationship, additional plan output will be taken by users as the unit price of output falls. If, as a result of the plan, output is increased by an amount $Q_1$-$Q_0$, the total value of this additional output to the users is measured by the entire shaded area on the chart. This is a larger amount than would be reflected by the market value. It is the sum of market price times increased quantity (represented by the rectangle $CEQ_1Q_0$) plus the consumer surplus for that increase (represented by the triangle ABC).

Since, in most instances, it is not possible for the planner to measure the actual demand situation, three alternative techniques can be used to obtain an estimate of the total value of the output of the plan--willingness to pay, change in net income, and the most likely alternative.

If the additional output from a plan is not expected to have a significant effect on price, actual or simulated market prices will closely approximate the total value of the output. This is true because there would be no consumer's surplus. If the additional output is expected to significantly influence market price (as in figure 1), a price midway between that expected with and without the plan may be used to estimate the total value. This would approximate the willingness to pay, including consumer surpluses, in most cases.

When outputs of a plan are intermediate goods or services, the net income of the (producer) user may be increased. Where changes in net income of each individual user can be estimated, a close approximation of the total value of the output of the plan (including consumer surpluses) will be obtained.

The cost of the most likely alternative means of obtaining the desired output can be used to approximate total value when the willingness to pay or change in net income methods cannot be used.

The cost of the most likely alternative means will generally misstate the total value of the output of a plan. This is because it merely indicates what society must pay by the next most likely alternative to secure the output, rather than estimating the real value of the output of a plan to the users. This assumes, of course, that society would in fact undertake the alternative means. Because the planner may not be able to determine whether alternative means would be undertaken in the absence of the project, this procedure for benefit estimation must be used cautiously.

Application of these general measurement standards will necessarily vary, depending upon the source by which output is increased (that is, via direct increases in production or through subsequent employment of released resources), upon the type of good or service produced (whether the output is an intermediate or final good), and upon the type and nature of available alternatives. General measurement methods for each type of situation as well as an indication of the water and land resource plan outputs to which these standards are applicable are presented below.

a. Direct output increases. Direct outputs of water and land resource plans may be in the form of either final consumer goods or intermediate goods. An effective direct or derived demand must exist for the final and intermedite goods, respectively, to include the increased output as a contribution to national economic development.

Certain consumer goods and services may result directly from water projects and be used with no additonal production resulting therefrom. Recreation, municipal water, and electric power for residential use are examples of this type of good or service. Most goods and services produced by water projects are not directly consumed, however, but are intermediate products that serve as inputs for producers of final goods or producers of other intermediate goods. The development of irrigation water for use in producing food and fiber or supplying electric power and water for industry are examples.

The values of increased output resulting directly from plans that produce final consumer goods or services is properly measured as the willingness to pay by final users for such output. When a competitive market price is not directly available, and the increased output will not be large enough to affect prices, total value of output may be estimated by simulated market prices or the use of the cost of the most likely alternative means of producing such final output. Examples

of types of outputs to which this method may be applied include:

a. Community and residential water supply:

b. Electric power provided for community and residential use; and

c. Recreation enhancement.

The value of increased output of intermediate goods and services is measured by their total value as inputs to producers of final consumer products. The intermediate product from the plan may enable the producers to increase production of final consumer goods, or reduce costs of production which in effect releases resources for use elsewhere in the economy. In either case, the total value of the intermediate goods or services to the producer is properly measured as the increase in net income received by the producers with a plan as compared with the net income received in the absence of a plan. Net income is defined as the market value of producers' outputs less the market value of producers' inputs exclusive of the cost of the intermediate goods or services resulting from a plan. Examples of types of plan outputs to which this method may be applied include:

a. Agricultural water supply; and

b. Agricultural flood damage alleviation, land stabilization, drainage, and related activities.

Where net income changes cannot be directly determined, however, the value of the intermediate goods and services to producers will be measured either in terms of competitive market values, when competitive conditions exist, or approximated by the cost of the likely alternative that the producers would utilize in the absence of a plan to achieve the same level of output. Examples of types of plan outputs to which this method may be applied include:

a. Industrial and commercial water supply;

b. Urban flood damage alleviation;

c. Electric power provided for industrial, commercial, and agricultural uses;

d. Transportation; and

e. Commercial fishery enhancement.

b. Increases in output resulting from external economies. Increased output of individual firms or industries directly affected by the plan may create situations in which related firms or industries are able to take advantage of more efficient production techniques; or consumers may be indirectly affected by a project (such as through favorable environmental changes). Such productivity changes or technological external economies can be attributed as a benefit to a plan. For example higher levels of output by directly affected firms may enable subsequent processing firms to use more efficient processing techniques and thereby release resources for use in producing other goods and services or permit the higher level of output to be processed with no additional resources.

Present techniques are not well developed for measuring the beneficial effects accruing from external economies. However, in situations where it is thought that the increased output of final consumer goods or intermediate goods used by direct users can be expected to increase the productivity or output of related firms, an attempt should be made to measure the net income change resulting from such externalities. When this is done the methodology should be carefully documented in the report.

2. Measurement of the value to users of increased outputs.

a. Water supply. Plans for the provision of water supply are generally designed to satisfy requirements for water as a final good to domestic and municipal users and as an intermediate good to agricultural and industrial users. Provision of water supply to satify requirements in these uses generally requires, either separately or in combination, an increase in water quantity, an improvement in water quality, and an improvement in the reliability of both quantity and quality.

Where it is necessary to use alternative costs for approximation of total value for water supply, as provided herein, the alternative selected must be a likely and realistic alternative directly responsive to achievement of this particular category, namely the additional output of water as an input to industrial, agricultural, and municipal uses or as a final good for community and individual uses. Moreover, the

XUM

alternative must be a viable one in terms of engineering and financing and must be institutionally acceptable. It must be more than a hypothetical project. It must be a real alternative that could and would likely be undertaken in the absence of the proposed program, for instance, the reuse or recycling of existing water supplies or the use of available groundwater, including the improvement of its quality, if necessary.

Although water supply can often be considered as a final good, there usually does not exist a market value in terms of price that directly expresses users' valuation of water supply for community and individual use. When this is the case, the total value of the water may be derived using the cost of the alternative that would provide essentially a comparable water supply service, in both quantity and quality, that would in fact be utilized in the absence of the water supply provided by the plan. Where such an alternative source is not available or would not be economically feasible, a market value for the water may be derived on the basis of the price paid by other like users or the average cost of a comparable water service from municipal water supply projects planned or recently constructed in the general region.

The total value of water to the producers using increased supplies is reflected in the change in their net income with a plan for the provision of water supply compared with their net incomes without the plan. It is recognized that for many planning studies it is not possible to either specifically identify net income changes accruing to firms using water supply for productive purposes or always possible to determine what part of a municipal supply is used for productive pursuits or for general community or individual uses as set forth below. In these cases, total value to the users can be approximated by use of the cost of the alternative that would be employed to achieve the same production that would be utilized in the absence of the water supply provided by a plan.

Water supply for irrigation is an input to the production of food and fiber. This may result in a net increase in production of specified products, the reduction in production cost, or a combination of both. Beneficial effects from the application of irrigation water supplies will be based upon total value to agricultural producers and will be measured as the increase in net farm income with and without a plan for providing irrigation water. This may be measured directly as the sum of net incomes of farm enterprises benefiting from a plan for irrigation.

Gross farm income comprises total annual receipts from the sale of crops, livestock, livestock products, and the value of perquisites, such as the rental value of the farm dwelling and the value of farm products consumed by the farm family.

Farm expenses are the costs necessary to produce and market farm products and maintain and replace all depreciable items.

Increased net income is measured as the difference between the increase in gross farm income minus the increase in farm expenses analyzed with and without a plan. Changes in net farm income may be estimated by analyzing changes in gross farm income and expenses for each separate enterprise or by the use of representative farm budgets.

b. Flood control, land stabilization, drainage, and related activities. A number of activities, such as flood control and prevention, flood-plain management, drainage, prevention of sedimentation, land stabilization, and erosion control, contribute to the objectives through improving the productivity, use, and attractiveness of the Nation's land resources. From the viewpoint of their contribution to national economic development, the effect of these activities on the output of goods and services is manifested by increasing the productivity of land or by reducing the costs of using the land resources, thereby releasing resources for production of goods and services elsewhere. These activities affect land resources in the following manner:

(1) Prevention or reduction of inundation arising from stream overflow, overland waterflow, high lake stages, and high tides, and prevention of damage from inadequate drainage;

(2) Prevention or reduction of soil erosion, including sheet erosion, gullying, flood-plain scouring, streambank cutting, shore or beach erosion, and prevention of sedimentation; and

(3) Prevention or limitation of the uses to which specified land resources will be put.

There are essentially three types of effects on use that may occur as a benefit from including these activities in a plan. The first is an increase in the productivity of land without a change in land use. The second is a shift of land resources to a more intensive use than would occur in the absence of a plan. The third is a shift of land resources

to less intensive use than would occur in the absence of a plan. In each case, the general method of calculating benefits is applicable. The distinction is made only to facilitate the application of the general method in different settings and as a means of providing criteria for the use of alternative techniques for estimating net income changes for the three classes of land utilization under the with and without analysis.

The general method to be applied in measuring effects for these and any other activities that result in a change in net productivity or a reduction in the cost of using land resources involves the measurement of the difference in net income accruing to users of land resources benefiting from such activities compared with what these users would earn in the absence of such a plan. This generally defines and establishes the limit of the willingness of users to pay for a plan that results in a change in productivity or reduction in the cost of using land resources.

Willingness to pay of the users, which is the basis for approximating the value of output from these activities, whether it be in the form of increased production of intermediate or final goods or release of resources, may be obtained by the following approaches.

(a) Productivity increase. In this situation, analysis with and without the plan indicates that the current and future enterprises employing given land resources are essentially the same with the plan as they would be without the plan. Further, it is more profitable for the given enterprise to continue to use the given land resource even without the beneficial effect of the plan than to locate at the next most efficient location. Net income change can then be measured as the difference in net income accruing to the enterprise on the specified land resource without the plan compared with what that enterprise would receive as net income with the plan on the same land resource.

(b) Changes in land use. Two situations are covered by changes in land use. These are:

(i) The situation in which the land owner benefiting from the change in land use would only utilize the land resource affected by such activity once the plan has become operative. In other words, it would not be as profitable for the benefiting landowner to utilize the affected land resource unless improved through one of the activities in this category as compared with the next most efficient location. Without such a plan the improved enterprise would occur at an alternative location. Net income change to the landowner will be measured as the difference in net income from the enterprise at an alternative location that would be utilized without the plan compared with the net income received from the

enterprise at a new location which is improved or enhanced as a result of the plan.

(ii) The situation in which enterprises that would otherwise employ a given land resource would be precluded from using the given land resources with implemention of the plan. Other enterprises less prone to incur flood damages or other adverse consequences would be allowed to use the given land resources.

Beneficial effects to the enterprises from activities in this category would be evaluated by measuring the net income change for the enterprise precluded from using the given land resources with the plan as compared with the without situation, plus the net income change for the enterprise that would be allowed to use the given land resource with the plan as compared with the without situation.

(c) Estimates of damage prevention and other measures. In the above cases, where it is not possible to directly employ net income changes to derive benefits, the estimate of actual or prospective damages to the physical properties of the enterprises involved can be employed as an approximation of net income change.

In the case of productivity change, where development will be the same with and without the plan, benefits attributable will equal total damages reduced. For the intensive land use cases, where development or use of land will be different with and without the plan, benefits can be approximated as equal to the damages these enterprises could sustain in the absence of protection if located on the affected land.

As a check on benefits derived in the form of net income change or damages prevented, observations of changes in land values for all lands may be employed.

c. Power. With respect to the computation of beneficial and adverse effects of increases in output of electric power it is emphasized that where appropriate, these should be viewed and evaluated as increments to planned or existing systems. Power supplied for general community and residential use can be considered as a final consumer good. Its value as a final good is generally reflected by the satisfaction

XUM 37 10 7 SUB 4 7 1 8 3 V

of individual residents or in terms of improved community services and facilities. Electric power provided to industrial, commercial, and agricultural uses is viewed as an energy input to the production of goods and services from these activities resulting in an increase in the output, reduction in the cost of production, or a combination thereof. The total value of electric power to the producers using such power is reflected in their willingness to pay. Where the identification and measurement of willingness to pay and satisfactions accruing to activities using electric power for industrial, municipal, and residential purposes are not possible, total value to the users will be approximated by taking account of the cost of power from the most likely alternative source and using this as the measure of the value of the power creditable to the plan. The alternative selected must be a viable one in terms of engineering, and the financing should be that most likely to the constructing entity. The costs should include any required provisions for protection of the environment. However, since the addition of a hydroelectric project to an electric system in lieu of an alternative power source usually will either increase or decrease the unit cost of producing power by existing generating facilities of the system, this cost differential must be taken into account in determining the power value of the hydroelectric project.

Normally, electric power is evaluated in terms of two components--capacity and energy. The capacity value is derived from a determination of the fixed costs of the selected alternative source of supply. The energy value is determined from those costs of the alternative which relate to and vary with the energy output of the alternative plan. These capacity and energy components of power value are usually expressed in terms of dollars per kilowatt per year of dependable capacity and mills per kilowatt-hour of average annual energy.

d. Transportation (navigation). Plans for the provision of transportation through inland waterways and harbors are established to complement or extend the overall national transportation system within and among regions to achieve an improved movement of goods from the producer to the consumer.

(1) Movement of intermediate or final goods. Transportation as applied to industrial, commercial, and agricultural activities is viewed as an essential service input resulting in savings and creation of utilities in the distribution of intermediate and final goods and services.

The beneficial effects from the movement of traffic are related to the improvements in the transportation services provided

enabling the widespread distribution of goods and services, and are measured as:

(a) The savings in the movement of commodities on the waterway when compared with movement via existing alternative modes; and

(b) The expressed willingness to pay by the shippers (producers) of commodity or traffic flow newly induced by a navigation improvement as reflected in the change in their net income.

(2) Where traffic will move in the absence of the waterway improvement. In this situation, navigation studies would include an estimate of the savings to shippers via the considered navigation improvement, measured as the product of the estimated traffic and the estimated unit savings to shippers from the movement of that traffic via the proposed navigation improvement. The unit savings would be measured as the difference between the charges shippers actually incur for transportation at the time of the study and the charges they would likely incur for transportation via the improvement.

The traffic that is estimated to move via the proposed waterway will be based on a thorough analysis of the existing traffic movements in the tributary area. The potential traffic will be carefully screened to eliminate those movements that are not, for a variety of reasons, susceptible to movement on the waterway. The traffic available for water movement after the screening process is completed will be subject to an analysis of savings as discussed immediately below, and, based on the magnitude of the indicated savings, a decision will be made as to whether or not the movement would be directed to the waterway. Only traffic for which the differences in savings is judged sufficiently large to divert the traffic to the waterway will be included in the estimated waterway traffic. Moreover, as a practical matter, it will be deemed realistic to assume a sharing of the total traffic movement among alternative modes rather than to assume complete diversion to the lower cost mode.

The estimate of savings will ordinarily be developed by comparing the full charges for movement from origin to destination via the prevailing mode of transportation with the charges via the waterway being studied where these charges encompass all applicable handling, switching assessorial charges, and net differences in inventory, storage, or other charges due to the change in transportation mode. The alternative modes of transportation to be used in estimating savings to shippers

are those actually in use at the time of the study for moving the traffic in question, or, where there are no existing movements, those modes that would most likely be used for such movements. In the latter case, the alternative mode will be chosen on the basis that the shipper would take advantage of the mode affording him the lowest total charges. The competitive, or complementary, effects of existing and authorized waterways not yet constructed, including joint land-waterway routes, should also be taken into account.

(3) Where additional flow of traffic is induced by the plan. By making new sources of supply, or by increasing the net demand for a commodity, the navigation improvement may induce more traffic movement than would be the case in the absence of such improvement. Beneficial effects creditable to the plan for such new traffic are the differences between the cost of transportation by the waterway and the value to shippers, that is, the maximum cost they would be willing to pay for moving the various units of traffic involved.

Where data are available for estimating the value at which various increments of the new traffic could be moved economically, the difference between such values and the charges for transportation by the waterway provides a measure of the estimated beneficial effects attributible to the plan.

In the absence of such data, the probable average charge that could be borne by the induced traffic may be assumed to be half way between the highest and the lowest charges at which any part of it would move. On this basis, the difference between this average and the cost by the waterway applied to the volume of new traffic is the beneficial effect of the plan.

(4) Basis for evaluation. Congress has provided the standard for computing the beneficial effects of navigation in section 7(a) of the Department of Transportation Act of 1966, as follows:

> * * * the primary direct navigation benefits of a water resource project are defined as the product of the savings to shippers using the waterway and the estimated traffic that would use the waterway; where the savings to shippers shall be construed to mean the difference between (a) the freight rate or charges prevailing at the time of the study for the movement by the alternative means

and (b) those which would be charged on the proposed waterway; and where the estimate of traffic that would use the waterway will be based on such freight rates, taking into account projections of the economic growth of the area.

Consistent with the approach above outlined, these criteria are the basis on which beneficial effects for waterway plans will be evaluated.

(c) Recreation. As national living standards continue to rise, the average person, with basic needs provided for, uses an increasing percentage of rising real income to satisfy a demand for leisure time and outdoor recreational activities such as swimming, picnicking, boating, hunting, and fishing. With general ownership of automobiles and improvement in highways, travel to distant public recreational areas has become commonplace. Consequently, a large and increasing portion of recreational demand, especially that portion which is water-oriented, is accommodated by development of Federal lands and multi-purpose reservoirs which include specific provision for enhancing recreation activities. This is consistent with the requirements of the Federal Water Projects Recreation Act of 1965 (Public Law 89-72), providing for recreation and fish and wildlife as full and equal partners with all other purposes in Federal water projects.

For the most part, outdoor recreation is produced publicly and distributed in the absence of a viable market mechanism. While the private provision of recreation opportunities has been increasing in recent years, analysis of recreation needs is conducted in the absence of any substantial amount of feedback from effectively functioning markets to guide the evaluation of publicly produced recreation goods and services. Under these conditions--and based on a with and without analysis--the increase in recreation provided by a plan, since it represents a direct consumption good, may be measured or valued on the basis of simulated willingness to pay. In computing the projected recreation demand, however, the analysis should take explicit account of competition from recreation opportunities within the area of influence of the proposed plan.

There are in existance a number of methods, or approaches, to approximating demand and what people are willing

XUM
37 OF 38 SHEETS
ANHIBEV

to pay for outdoor recreation. A generalized methodology encompassing the travel-distance approach is set forth below.

(1) An analytical approach relating travel cost to distance. Using marginal travel costs (i.e., variable costs of automobile operation directly related to the number of miles driven) taken as a measure of what people are willing to pay for water-oriented recreation and how price affects use, the relationship between price and per capita attendance can be established for recreation sites and market areas. This relationship, the conventional demand curve having a negative slope, sums up the response of users' demand to alternative prices of the recreational product (or experience). Separate demand curves are constructed to reflect each kind of recreation use, whether day-use travel, camping-use travel, or other. If there is no entrance charge at the project, per capita rates for each distance or travel cost would be consistent with the constructed demand curves.

If a fee is charged, however, the cost to the recreationist would then be equal to the fee plus his travel cost, thus diminishing the per capita use rate. Applying a range of reasonable entrance fee charges to the constructed demand schedules, additional separate day-use and camping-use demand curves for sites are constructed to determine respective attendance which may be expected under such conditions. Following this, initial project year day-use and camping-use values are computed by measuring the area under their respective demand curves. These values can be compared with market projections and existing capacities to determine if actual site demand will materialize. The initial year values are then projected throughout the life of the project consistent with the calculated recreational use predictions. The resultant figures, total values for day-use and camping-use over the life of the project, are separately discounted at the prevailing discount rate established by these standards to obtain average annual equivalent values.

(2) Other approaches. A variety of other approaches may be taken toward the evaluation of recreation goods and services. In general, however, no one method is completely satisfactory to the exclusion of all others. The applicable rule to follow, taking cognizance of the unique circumstances of a particular setting, including the availability of actual market data and experience, is to use that procedure which appears to provide the best measure or expression of willingness to pay by the actual consumer of the recreation good or service provided by the plan.

In the interim, while recreation evaluation methodology is being further developed, the following schedule of monetary unit values may be used in the preparation of plans.

(3) Simulated prices per recreation day. A single unit value will be assigned per recreation day regardless of whether the user engages in one activity or several. The unit value, however, may reflect both the quality of activity and the degree to which opportunities to engage in a number of activities are provided.

| Type of Outdoor Recreation Day | Range of Unit Day Values |
|---|---|
| General.....(A recreation day involving primarily those activities attractive to the majority of outdoor recreationists and which generally require the development and maintenance of convenient access and adequate facilities.) | $0.75-$2.25 |
| Specialized.....(A recreation day involving primarily those activities for which opportunities, in general, are limited, intensity of use is low, and often may involve a large personal expense by the user.) | 3.00- 9.00 |

Two classes of outdoor recreation days, general and specialized, are differentiated for evaluation purposes. Estimates of total recreation days of use for both categories, when applicable, will be developed.

The general class, constituting the great majority of all recreation activities associated with water projects, embraces the more usual activities, such as swimming, picnicking, boating, and most warm water fishing.

In view of the fewer alternatives available and the likelihood that higher total costs are generally incurred by those engaged in hunting and fishing activities compared with those engaged in other types of outdoor recreation, it may be anticipated that the monetary unit values applicable to fish and wildlife recreation will ordinarily be larger than those applied to other types of recreation.

The special class includes activities less often associated with water projects, such as big game hunting and salmon fishing.

A separate range of values is provided for each class in order that informed judgment may be employed in determining the applicable unit values for each individual project under consideration. Where considered appropriate, departure from the range of values provided is permissible if a full explanation is given.

(f) Commercial fishing and trapping. Water and land resource plans may include specific measures designed for the purpose of enhancing the fish and wildlife resources and associated opportunities for the direct harvesting of fish and game as a commercial product. Beneficial effects to commercial fishing, hunting, and trapping consist of the value of an increase in the volume or quality of the products expected to be marketed. This increase is determined by comparing values of future production with and without the plan.

The beneficial effects from the increase in output of fish and wildlife products resulting from a plan is measured as the total value to the final users of the output reflected by the applicable market price, minus the expenditures incurred to obtain the fish or game.

(g) Other program outputs. In addition to the more common outputs which have been dealt with in the preceding sections, plans may produce other goods and services which contribute to national economic development. Proper application of the measurement standards to these additional outputs should be guided by analogy to the outputs which have been discussed. Care must be exercised in defining types of outputs to assure that overlapping categories are not used which lead to duplication in the estimates of beneficial effects.

(3) Measurement of increases in output resulting from external economies. Technological external economies are the beneficial effects on individuals, groups, or industries that may or may not benefit from the direct output of the project. They result from a plan if an increase in the output of final consumer goods or intermediate goods takes place beyond that which would be obtained in the absence of the plan and over and above direct outputs of the plan. This increased output may result from firms which are economically related to the plan taking advantage of more efficient production techniques and thereby releasing resources for use in producing other goods and services.

The change in net income of the economically related firms will be used as an indicator of the value of this type of national economic development effect. Changes in the total value of consumer goods due to externalities because of a plan can be accounted for by using measurement techniques like those described above.

If society would obtain the project output of final consumer goods or the output of firms that utilize the intermediate goods of the project from some other source in the absence of the project, then the net income position of the related firms would be unaffected by the plan.

Some examples of potential situations for the occurence of external economies associated with final consumer goods and intermediate produced goods are presented below.

(a) Final consumer goods. Provision of additional recreation opportunities and fish and wildlife enhancement for the direct enjoyment of individuals may enable merchants of sporting goods and other suppliers of recreation equipment and services to increase their sales and net income. However, to the extent that the increased expenditures for outdoor sporting equipment and other outdoor recreation services substitute for some other consumer expenditures, there is no real gain in the Nation's output.

The provision of either water supply or electric power for community and residential use will not generally stimulate external economies to enhance national economic development. It is usually assumed that the necessary quantities of these outputs will be provided by some alternative means in the absence of the plan. As a consequence, firms that are economically related to consumers through the consumption of these products will experience the same economic conditions and have the same net income without the plan as compared with the plan.

(b) Intermediate producer goods. The utilization of intermediate goods and services from the plan by direct users may enable them to expand their output. Increased levels of output by direct users of the output of a plan may, in turn, enable economically related firms to improve the efficiency of their operation and/or expand their output and, as a result, increase their net income. Measurement of the change in the net income position of related firms should be made, if it can definately be established that a change in output by the direct users will generate a corresponding income change for the related firms.

An evaluation should be made of the output levels that will be achieved by the direct users with the plan and without the plan. If the direct users would obtain the same good or service from some other source in the absence of the plan, no external economies occur and the net income position of the related firms would be unaffected by the plan. Some examples of types of plan outputs to which this standard may be applied are presented below.

In situations where water supply is an intermediate good, its utilization by direct users may stimulate more inputs to be acquired from supplying firms, and if there is an increased output from the enterprise of the direct user additional output will be processed by related processing firms. Except for irrigation water supplies and a few industries with high water requirements, water represents a relatively small consideration in the management decision of firms. If firms or industries with relatively small water requirements would obtain their necessary water from some other source in the absence of the plan, no external economies should be included in the calculation of water supply benefits.

The provision of flood control, land stabilization, drainage, and related programs may affect the productivity of and resources resulting in increased levels of output by firms directly affected by the plan. Net income changes may also occur in economically related firms. Measurement of the net income change of the related firms should be made if it can be definitely established that a change in output by the direct users will generate a corresponding income change for the related firms. However, if the plan merely enables economic activities to shift to new locations resulting in more efficient production but no change in total output, then no external economies occur and no attempt should be made to measure net income changes of related input supply or output processing firms.

Electric power provided for industrial, commercial, and agricultural uses will frequently result in higher levels of output from these economic sectors. However, if alternative electric power or alternative energy sources would be utilized in the absence of the plan, the level of output would be unaffected and no external economies would accrue as a benefit to the plan.

To the extent that navigational facilities provide alternative transportation services that would otherwise be provided in the absence of the project, no external economies occur. In situations where the navigational facility provides a unique service, such as providing movement of bulky raw materials that would not otherwise be made available, external economies may occur to the firms economically related to the shippers.

4. Special beneficial effects from use of unemployed or underemployed labor resources. The effects of the use of unemployed or underemployed resources conceptually should be treated as an adjustment to the adverse effects of a plan on national economic development. Since this approach leads to difficulties in cost allocation and cost sharing calculations, the effects from the use of such resources should be treated as an addition to the benefits resulting from a plan.

Beneficial effects from the utilization of unemployed or underemployed labor resources may occur as a result of the plan through employment in the construction or installation of the plan.

The Council, considering data from its economic projections and the economic and rural development programs, will designate planning regions in which unemployed or underemployed labor resources exist.

Where the planning region has been designated as having unemployed or underemployed labor resources and it can be shown that these labor resources will in fact be employed or more effectively employed in construction or installation of the plan, the net additional payments to the unemployed or underemployed labor resources should be measured as a benefit.

G. Adverse Effects on National Economic Development

Achievement of beneficial effects on national economic development, and or environmental quality, requires resources to be diverted from alternative uses. The adverse effects on national economic development are the economic value that these resources would have in their alternative uses. Generally, market prices provide a valid measure of the values of goods and services foregone in alternative uses. Both public and private costs associated with the plan will be measured to indicate the total adverse effect on national economic development incurred to realize the desired objectives.

1. Sources of adverse effects. Water and land resource plans result in adverse effects to national economic development in two ways.

a. Resources required or displaced to produce final or intermediate goods and services. In situations where a physical structure is necessary to obtain the desired objective, the adverse effects on national economic development include all explicit cash expenditures for goods and services necessary to construct and operate a project throughout a given period of analysis. They consist of actual expenditures for construction; transfers from other projects, such as costs for reservoir storage; development costs; and interest during construction. If the output of the plan is an intermediate good or service, the associated costs incurred by the intermediate product user in converting it into a marketable form will be measured. These associated costs are borne by the user of the plan output but nevertheless, represent resource requirements necessary to convert the project output into a product demanded by society. Examples are production costs incurred by users of plan outputs, and costs to other producers or to processors that arise in conjunction with the physical flow of the output of the plan. Associated costs should be deducted from the value of gross outputs to obtain net beneficial effects to be compared with the national economic development adverse effects of a plan. These adverse effects occur as a result of certain resources being released and subsequently unemployed as a result of the implementation of the plan.

In situations where nonstructural measures are used to obtain the desired objective, the adverse effects on national economic development will include payments to purchase easements or rights-of-way and costs incurred for management arrangements or to implement and enforce necessary zoning. In some cases, actual cash expenditures will not be involved as when local communities are required to furnish lands, easements, and rights-of-way.

b. Decreases in output resulting from external diseconomies. External diseconomies are adverse economic effects of a plan that are not reflected in

market prices of project inputs. They result when provision of goods and services for one group necessarily results in an undesirable effect or disservice for another group. For example, the return flow from an irrigation project may create a salinity condition for downstream water users, forcing them to adopt higher cost water treatment practices. These adverse effects (external diseconomies) are not compensated, yet they should be taken into account when deciding on the desirability of a plan.

Another type of external diseconomy may occur if the plan has the direct effect of reducing the output of some firms in the project area, and this reduction causes firms that are linked to the directly affected firms to become less efficient in their operation. For example, the reduction in output by a group of firms which have their output processed by another firm may result in an inefficient operation by the processing firm.

A third type of external diseconomy may occur if the plan has an adverse direct effect on the consumption by individual consumers. For example, if a plan is instrumental in increasing congestion or pollution which results in increased costs to the consumers, this effect should be taken into account in plan evaluation.

c. Cost adjustments. A special case of benefits from cost adjustments arise when a plan creates an opportunity to use resources that would be unemployed or underemployed in the absence of the plan. These resources can include labor, fixed capital, or natural resources. Utilization of such unemployed or underemployed resources may come about (a) as a result of implementing a plan, including construction, operation, maintenance, or replacement; (b) as a result of the use of intermediate goods and services resulting from the plan; or (c) as a result of expansion of output by firms who are indirectly affected by the installation of the project or indirectly affected by consumers and firms who use final and intermediate goods, respectively. The latter two effects--(b) and (c) above--occur when use of the output of a plan results in the employment of unemployed or more effective employment of underemployed resources. Increased national output results in this situation, since with a plan otherwise unemployed or underemployed resources are in effect substituted for resources that would have been drawn from productive activities elsewhere. The market value of the increase of such production will be measured as the difference in the earnings accruing to otherwise unemployed or underemployed resources with a plan as compared with their earnings without a plan. Because of measurement problems, only benefits arising from the use of otherwise unemployed or underemployed labor resources in construction or installation of the plan, will be estimated for the national economic development account.

2. Measurement of adverse effects.

XUM

a. Resources required for or displaced by the plan. Resource requirements of the plan are the sum of the market values of the goods and services used for installations; interest during construction; operation, maintenance, and replacement; and induced costs as defined below.

Installation costs are the market values of goods and services necessary to implement a plan and place it in operation, including management and organizational arrangements, technical services, land, easements, rights-of-way, and water rights; initial and deferred construction; capital outlays to relocate facilities or to prevent or mitigate damages; transfers of installation costs from other projects; and all other expenditures for investigating, surveying, planning, designing, and installing a plan after its authorization.

Operation, maintenance, and replacement costs are the market values of goods and services needed to operate an installed plan and to make repairs and replacements necessary to maintain the physical features in sound operating condition during their economic life.

b. Decreases in output resulting from external diseconomies. While external diseconomies are difficult to measure and the effects are incidental to the project, they are nevertheless recognized adverse effects.

Induced costs are all significant adverse effects caused by the construction and operation of a plan expressed in terms of market prices and whether or not compensation is involved. Compensation for some induced costs is neither required nor possible. Induced costs include estimated net increases in the cost of government services directly resulting from the project and net adverse effects on the economy, such as increased transportation costs.

H. Beneficial and Adverse Effects on Environmental Quality

A water and land use plan may have a variety of effects--beneficial and adverse--on environmental quality. While effects on environmental quality are characterized by their nonmarket, nonmonetary nature, they provide important evidence for judging the value of proposed plans.

Beneficial effects on the environmental quality account are contributions resulting from the management, preservation, or restoration of one or more of the environmental characteristics of an area under study or elsewhere in the Nation. Such contributions generally enhance the quality of life.

Adverse environmental effects--generally the obverse of beneficial environmental effects--are consequences of the proposed plan that result in the deterioration of relevant environmental characteristics of an area under study or elsewhere in the Nation, for example, acres of open and green space, wilderness areas, estuaries, or wildlife habitat inundated or altered, or of

lands experiencing increased erosion. Such adverse effects generally detract from or diminish the quality of life.

Often, however, an environmental impact of a plan cannot be easily labeled as being beneficial or adverse, since that decision will vary with the perceptions of the individual concerned. In any case, the effect itself should be quantified and displayed for purposes of decisionmaking.

1. Measurement methods. Whether subjectively perceived or objectively measured, the criteria used to describe or evaluate the beneficial or adverse effects of a plan will vary--consistent with the relevant components of environmental quality under consideration. To the extent possible, however, beneficial or adverse effects will be displayed in terms of relevant physical and ecological criteria or dimensions, including the appropriate qualitative dimensions. For example, where the effects of a plan will be visibly evident, quantitative, and qualitative descriptions may be made in terms of established or accepted water and land classification or ecological criteria and related measures.

Where significant physical effects are less easily perceived, it may be necessary to determine their extent through instrumentation or symptomatically by the presence or absence of commonly expected characteristics. As an example, eutrophication of fresh water lakes exemplifies a less easily perceived process that is reflected symptomatically, and which is subject to measurement by instrumentation with statistical analysis of data collected over time. Therefore, its rate of change is measured by reference to previous dates or periods, with projected rates of future change based on probability analysis. As explicit an account as possible of these effects and supporting analysis should be provided.

Notwithstanding the physical or ecological criteria terms available, certain environmental effects can be presented most effectively by reference to their qualitative dimensions. For instance, it may be necessary to use this approach to show the importance of a reduction in use or availability for use of areas of natural beauty, archeological, or historical significance. Consequently, the analysis should be supported by an appropriate descriptive-qualitative interpretation and evaluation of the effects of the plan on the relevant components of environmental quality.

2. With and without analysis Existing environmental conditions will be described and presented in terms that best characterize the planning perceptions and ecology of the affected area as conditions would exist without any plan. Similar descriptions will be prepared for the time sequence of the conditions to be expected with and without the plan throughout the period of analysis. The conditions before planning is initiated will provide the data from which

to evaluate environmental effects--or prediction of change--under alternative proposals, including the consequence of failure to adopt a plan for development and use of resources in the area under study. It should be clear that environmental conditions will not remain static but will, in fact, tend to change over time regardless of whether a plan is adopted.

3. Limitations. It is not presently possible to anticipate or identify, much less measure, all environmental effects or change. Nor are there in existence evaluation standards that permit full and direct quantitative comparisons and ranking of the conditions of identifiable environmental effects that might be expected to result from a plan. Consequently, reasoned judgments by multidisciplinary teams will be required in many situations. When this is necessary, a frank expression of the state of knowledge and the limitations thereof, as well as the limitations of the analysis in each instance, is essential.

4. Classes of environmental effects. Environmental effects of plans toward the complex of conditions encompassed by the environmental quality objective are best understood and their significance interpreted by evaluating them as separable components. While these are stated in terms of beneficial effects, adverse effects should be read as the converse of each statement. Beneficial effects (and adverse effects) of plans as related to components of the environmental objective are classified and evaluated relevant to:

A. Beneficial effects resulting from the protection, enhancement, or creation of open and green space, wild and scenic rivers, lakes, beaches, shores, mountain and wilderness areas, estuaries, or other areas of natural beauty.

With regard to these kinds of resources, beneficial effects on this component of the environmental quality objective are evaluated on the basis of data such as follows, though these are not all inclusive:

1. Open and green space. These are essentially undeveloped, visually attractive natural areas strategically located where most needed to ameliorate intensifying urbanization patterns.

a. Size and measure:

(1) Total acreage (woods, fields, meadows, etc.);

(2) Pattern and distribution;

(3) Juxtaposition to community and urban areas (effect on urban sprawl).

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected open and green space.

c. Improvements:

(1) Accessibility (mileage of public roads or trails provided; easements);

(2) Public amenities (provision for limited facilities, if any);

(3) Other (specify or describe).

d. Protection and preservation:

(1) Physical (fire, bioenvironmental, etc.);

(2) Legal (dedication, easements, institutional, etc.);

(3) Special.

2. Wild and scenic rivers. These are free-flowing streams, with shorelines or watershed essentially or largely undeveloped, which possess outstandingly remarkable scenic, recreational, geological, fish and wildlife, historic, cultural, and other features.

a. Size and measure, including characterization of adjacent primitive or near natural setting:

(1) Total mileage;

(2) White water mileage;

(3) Water quality;

(4) Character and extent or acreage of streamside land;

(5) Juxtaposition to community.

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected wild or scenic river.

c. Improvements:

(1) Accessibility (trails, infrequent roads, or other minimum public access provided; easements);

(2) Public amenities (provision for limited facilities, as boat launching, picnic areas, if any);

(3) Other (specify or describe).

d. Protection and preservation:

(1) Physical (bioenvironmental);

(2) Legal (dedication or withdrawal, institutional, water quality standards, etc.);

(3) Special.

3. Lakes. Where their clarity, color, scenic setting, or other characteristics are of special interest, aesthetically pleasing lakes contribute to the quality of human experience.

a. Size and measure:

(1) Surface acreage;

(2) Shoreline mileage;

(3) Depths;

(4) Water quality.

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected lake or lakes.

c. Improvements:

(1) Accessibility (public roads and trails; easements);

(2) Drainage;

(3) Cleaning;

(4) Shoreline management, including public amenities;

(5) Other (specify or describe).

d. Protection and preservation:

(1) Physical (bioenvironmental);

(2) Legal (institutional, pollution standards, etc.);

(3) Special.

4. Beaches and shores. The juxtaposition of attractive beaches, distinctive scenic shorelines, and adjacent areas of clean offshore water provides positive public aesthetic values and recreational enjoyment.

a. Size and measure:

(1) Mileage;

(2) Acreage;

(3) Marshland acreage;

(4) Embayments.

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on designated or affected beaches and shores.

c. Improvements:

(1) Accessibility (public roads and trails; easements);

(2) Public amenities;

(3) Nourishment;

(4) Other (specify or describe).

d. Protection and preservation:

(1) Physical (jettys, bulkheads, etc.);

(2) Legal (dedication, institutional, etc.);

(3) Special.

5. Mountains and wilderness areas. Generally occurring at higher altitudes, these pristine areas of natural splendor and scientific interest embrace

a very special category of land use. Such areas are designated for the purpose of preserving primeval conditions, as nearly as possible, for aesthetic enjoyment and for limited forms of recreation and other scientific uses.

a. Size and measure:

(1) Acreage;

(2) Biological diversity;

(3) Pattern and distribution;

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected mountain and wilderness area.

c. Improvements:

(1) Accessibility (limited public roads and trails);

(2) Public amenities (limited facilities provided, if any);

(3) Other (specify or describe).

d. Protection and preservation:

(1) Physical (fire, bioenvironmental, etc.);

(2) Legal (dedication, institutional, etc.);

(3) Special.

6. Estuaries. Beyond their critical importance in man's harvest of economically useful living marine resources, many estuaries, coves, and bays merit special consideration as visually attractive settings that support diverse life forms of aesthetic value and as marine ecosystems of special interest.

a. Size or measure:

(1) Surface acreage;

(2) Shoreline mileage;

(3) Marshland acreage and shoreline mileage;

(4) Water quality.

b. Biological significance as a nursery, breeding, and feeding ground (name species involved).

c. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected estuary.

d. Improvements:

(1) Accessibility;

(2) Public amenities (facilities provided, if any);

(3) Other (specify or describe).

e. Protection and preservation:

(1) Physical;

(2) Legal;

(3) Special.

7. Other areas of natural beauty. These include any other examples of nature's visual magnificence and scenic grandeur, not accommodated in the above-specified classes, which have special appeal to the aesthetic faculties of man.

a. Size or measure:

(1) Acreage;

(2) Mileage.

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on designated or affected areas of natural beauty.

c. Improvements:

(1) Accessibility (public roads and trails; easements);

(2) Screening;

(3) Plantings (seedlings, grassed cover, etc.);

(4) Public amenities (scenic overlooks, if any);

(5) Other (specify or describe).

d. Protection and preservation:

(1) Physical (fire, bioenvironmental, etc.);

(2) Legal;

(3) Special.

Conversely, and in a generally parallel manner, adverse effects of a plan result from the inundation, adverse alteration, or decreases in the availability, use, and aesthetic quality of these resources.

B. Beneficial effects resulting from the preservation or enhancement of especially valuable archeological, historical, biological, and geological resources and selected ecological systems.

Excluding ecological systems which are separately evaluated below, beneficial effects on this component of the environmental objective are evaluated on the basis of data such as follows, though these are not all inclusive:

1. Archeological resources. Preservation of these resources provides a continuing opportunity for studying the development of human settlements and understanding man's cultural heritage.

a. Size or measure:

(1) Acreage;

(2) Square footage;

(3) Height or depth from ground level.

b. A descriptive-qualitative interpretation including an evaluation of the effects of a plan on the designated or affected archeological resource areas.

c. Educational:

(1) General education;

(2) Special and scientific.

d. Improvements:

(1) Accessibility (public roads and trails; easements);

(2) Interpretation and monumentation;

(3) Other (specify or describe).

e. Protection and preservation:

(1) Physical;

(2) Legal (dedication, other);

(3) Special.

2. Historical resources. Preservation of these resources provides for the study, understanding, and appreciation of the Nation's origins and the evolution of its institutions as well as its scientific and technical progress.

a. Size and measure:

(1) Acreage;

(2) Number of units (of whatever kind).

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected historical resource area.

c. Educational values:

(1) General education;

(2) Specialist.

d. Improvements:

(1) Accessibility (public roads and trails; easements);

(2) Availability (as appropriate to particular site or materials preserved);

(3) Interpretation and monumentation;

(4) Other (specify or describe).

e. Protection and preservation:

(1) Physical;

(2) Legal (dedication, other);

(3) Special.

3. Biological resources. The opportunity to observe and study biological resources--terrestrial and aquatic--leads to an enlarged understanding and appreciation of the natural world as the habitat of man.

a. Size and measure (wide variation depending on characteristics of particular animal or plant):

(1) Total land and surface acreage and shoreline mileage;

(a) Land acreage (forest, woodland, grassland, etc.);

(b) Water surface acreage and shoreline mileage;

(c) Marshland acreage and shoreline mileage.

(2) Population estimates and characteristics of fish and wildlife to include as nearly as possible:

(a) Age and size classes;

(b) Sex ratios;

(c) Distribution (density).

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected biological resource or resources.

c. Educational:

(1) General;

(2) Special and scientific.

d. Improvements:

(1) Accessibility (public roads and trails; easements;

(2) Habitat enhancement or site improvement:

(a) Sanitation;

(b) Stabilization;

(c) Increasing edges;

(d) Harvesting (to maintain balance with environmental food supply);

(e) Cover planting (species, including number or acreage);

(f) Stocking:

(i) Wildlife (species and number);

(ii) Fish (species and number);

(3) Other (specify or describe):

e. Protection and preservation:

(1) Physical;

(2) Legal (dedication, other);

(3) Special.

4. Geological resources. When of outstanding geologic or geomorphologic significance, preservation of these resources contributes to man's knowledge and appreciation of his physical environment.

a. Size and measure:

(1) Surface acreage;

(2) Subsurface acreage (estimated);

(3) Quantity (estimated in appropriate units).

b. A descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the designated or affected geological resources.

c. Educational:

(1) General education;

(2) Special and scientific.

d. Improvements:

(1) Accessibility (public roads and trails; easements);

(2) Interpretation and monumentation;

(3) Other (specify and describe);

e. Protection and preservation:

(1) Physical;

(2) Legal (dedication, other);

(3) Special.

Conversely, and in a generally parallel manner, adverse effects result from the inundation, deterioration, or disruption of like kinds of resources.

5. Ecological systems. Apart from the contributions which use of the natural resource base makes to man's basic needs for food, shelter, clothing, and employment opportunities, covered elsewhere, the environmental objective embraces the concept and appreciation of the values inherent in preservation of ecological systems per se.

Each natural area, such as a watershed, a vegetation and soil type, a tidal salt marsh, a swamp, a lake, or a stream complex, represents an ecosystem, an interdependent physical and biotic environment that functions as a continuing dynamic unit, possessing not only intrinsic values but also contributing to the enrichment of the general quality of life in a variety of subtle ways. Conversely, when such natural areas are lost or otherwise diminished in size or quality, there are corresponding adverse environmental effects borne by society.

Beneficial effects resulting from preservation of ecological systems include:

a. The maintenance of a natural environment in a state of equilibrium as an intrinsic value to society;

b. The provision of the purest form of aesthetic contact with nature;

c. Contributions to the development, appreciation, and integration of a "land ethic" or environmental conscience as a part of man's culture; and

d. Scientific understanding derived from the preservation and study of natural ecological systems which contributes to the conservation of natural resources in general, the most important practical application of ecology.

Conversely, adverse effects are the reduction or loss of opportunity to society as a result of a plan.

C. Beneficial effects resulting from the enhancement of selected quality aspects of water, land, and air by control of pollution.

1. Water quality. The beneficial effects of water quality improvements will be reflected in increased value to water users and will be recorded under the national economic development or regional development objective. For example, increases in the value of the Nation's output of goods and services from improvements in water quality will be accommodated under the national economic development objective. A great deal of improvement is needed in the methods of measuring these values.

There will be other water quality beneficial effects, however, that cannot be measured in monetary terms but are nonetheless of value to the Nation. Examples of such benefits are usually in the aesthetic and ecological areas so important to mankind. Beneficial effects from these kinds of improvements are contributions to the environmental quality account and are identified, measured, and described in nonmonetary terms.

Beneficial effects to the environmental quality account from water quality control may be defined in relation to the State standards or goals established under the Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500). Reservoir storage and flow regulation for water quality may be utilized where it is the least-cost way of meeting these standards or goals.

Consistent with water quality standards or goals established for the affected planning area, water quality control beneficial effects are identified, measured, and described by methods and terms such as:

a. Physical and chemical tests including but not limited to:

(1) Dissolved oxygen;

(2) Dissolved solids;

(3) Temperature;

(4) Acidity/alkalinity;

(5) Nutrients.

b. Biological indicators including but not limited to:

(1) Coliform;

(2) Macro and micro organisms;

(3) Algae.

c. Description: By a descriptive-qualitative interpretation, including an evaluation of the effects of a plan on the aquatic community as a whole.

Conversely, adverse effects will be reflected as departures from the established water quality standards, including related damages, as a result of a plan.

2. Air quality. Air pollution is primarily a regional problem stemming principally from urban centers containing concentrations of people, industry, and transportation. In addition to its diverse social impacts, air pollution causes direct injury to natural environments, including ground cover, trees, and wildlife. In its purely physical dimensions, air pollution is accommodated within the environmental objective.
